## 2020 Course Registration Tip Sheet- Earth & Atmospheric Science

### 1. Accept your admission offer and pay your tuition deposit

Once you have accepted your admission offer and paid the tuition deposit, you will be eligible to register in courses. Login to your [UAlberta Launchpad](#) portal to accept and pay.

### 2. What courses should you register in?

- **BSc General, Earth & Atmospheric Sciences Major**

Your program outline is available at: [uab.ca/SciGeneralDegree](http://uab.ca/SciGeneralDegree) (Select the course planning sheet). We recommend you register for the junior core requirements in your first year of study. These 100-level courses are normally the pre-requisites for higher level science subjects and can be used towards professional programs.

- **BSc Specialization in \*Environmental Earth Sciences, \*Geology, \*Paleontology and Planning**

Locate your program curriculum in our registration guide at [uab.ca/ScienceSpecialization](http://uab.ca/ScienceSpecialization). For the Specialization degrees you are required to have a course load of at least \*18-24 through the Fall/Winter terms. You must also achieve a minimum 2.3 GPA each year in order to stay in your program and remain in good standing (this is equivalent to a C+ average). **Always review the calendar section (accessible through the link above) in case there are changes.**

- **BSc Honors in \*Environmental Earth Sciences, \*Geology and \*Paleontology**

Locate your program curriculum in our registration guide at [uab.ca/ScienceHonors](http://uab.ca/ScienceHonors). For the Honors degrees, you are required to have a course load of at least \*24 through the Fall/Winter terms. You must also achieve a minimum 3.0 GPA each year in order to stay in your program and remain in good standing (this is equivalent to a B average). **Always review the calendar section (accessible through the link above) in case there are changes.**

**Note:** A minimum of \*120 normally taken in no more than five consecutive academic years is required to complete the Honors program for the degree of BSc with Honors. Some departments require that an Honors program be completed in four years, others permit five. See individual departments for details.

\*For admission requirements to \*non-direct entry programs, see [Admission Chart 7](#) in the Calendar.

### 3. What courses count as options to fulfill your option requirements for your EAS degree?

**Arts options:** Courses offered by the Faculty of Arts, these are a diverse range of courses from the Humanities, Social Sciences, Fine Arts and Languages.

**Science options:** Courses offered by the Faculty of Science.

**Outside options:** Courses not offered by the Faculty of Science or Faculty of Arts. These are available to General Science students.

**Approved (Pool) options:** Only apply to Specialization & Honors students. These are normally science courses chosen by your department. See the calendar for your list of choices.

## 4. Tips for creating your ideal timetable.

- **Create a balanced timetable.** Do not register for more than three lab based courses per term as you will have lab assignments and exams in addition to regular course work.
- **Do not register for a course if you do not have the pre-requisite.** Students without the appropriate pre-requisites will be removed from the course. Make sure to read the course description before you register in a course on Bear Tracks.
- **The class you want is full:** If a class is full simply place the class on your watch list (found on Bear Tracks). You will be notified via email or text message when a spot becomes available in the class.
- **Succeed from the start.** If you have questions about how to tackle a paper, report, or exam, how to study or take notes, how to plan your term, or manage a course project, visit the [Academic Success Centre](#).

## 5. Preparing for your degree in EAS

- **Be familiar with Specialization and Honors requirements.** Environmental Earth Sciences, Geology, Planning, and Paleontology streams require a year of pre-requisite courses. Refer to [Admission Chart 7](#) in the Calendar for details. Admission is competitive; meeting the minimum GPA requirements does not guarantee admission.
- **Field school is a huge part of the hands-on training in an EAS degree.** The Department of Earth & Atmospheric Sciences offers 7 field school [courses](#). You can start taking them as early as second year, take enough and you can become certified with APEGA. Students in the Specialization and Honors streams of Environmental Earth Science and Geology are given priority.
- **Pay attention to course restrictions during registration.** Many EAS courses have restrictions, pay attention to pre-requisites and go to the department if you experience issues.

## 6. Additional assistance

- Advising is available to all Science students, please visit [www.ualberta.ca/science/student-services/your-academics/advising](http://www.ualberta.ca/science/student-services/your-academics/advising) for details.
- See the Science online step-by-step registration guide: [uab.ca/afteryouapply](http://uab.ca/afteryouapply)
- For all questions relating to courses or registration issues, please email the Department at [easuga@ualberta.ca](mailto:easuga@ualberta.ca).

*For additional questions contact a Faculty Recruiter at [science.recruiting@ualberta.ca](mailto:science.recruiting@ualberta.ca) (while we will not register you in courses, we would be happy to provide assistance and answer your questions).*
