

Ethics & Academic Citizenship Supplemental Workshops for students who completed GET

Current students who started their academic programs before September 2022 and finished the Graduate Ethics Training (GET) online course can complete the remaining three hours of their ethics and academic citizenship requirement through a combination of workshops and online courses.

Ethics Online Training Suite

The Ethics Online Training Suite is for students who started their academic programs before September 2022 and require complementary sessions to the Graduate Ethics Training (GET) course to meet the Ethics and Academic Integrity requirement.

These sessions are not required for students who have completed INT D 710 and INT D 720 (doctoral students).

The course will appear on your official transcript record.

You will receive a certificate after completing a course.

[Understanding and Avoiding Plagiarism](#)

Academic Integrity and Research Ethics Training Credit: two hours with departmental approval

This course will help you better understand the issue of academic integrity with specific attention given to plagiarism, including:

- Why it happens
- Different types of plagiarism
- Strategies to avoid plagiarism

Examples are provided in each module to explain and test your understanding of plagiarism.

The knowledge you develop in this course will strengthen your research and writing habits, help you avoid plagiarism in your work and build your confidence as an academic writer.

[Academic and Research Integrity](#)

Academic Integrity and Research Ethics Training Credit: one hour with departmental approval

This course explores academic integrity issues in the graduate student setting, including:

- Academic integrity
- Research integrity
- Academic dishonesty
- Research misconduct
- Ethics approval
- Record keeping
- Negotiating authorship

Examples and animated case studies will test your knowledge.

[Intellectual Property: An Entrepreneur's Guide](#)

Academic Integrity and Research Ethics Training Credit: one hour with departmental approval

This course offers an introduction to intellectual property. You will learn basic definitions and will explore types of intellectual property, including:

- Trademarks
- Patents
- Trade secrets
- Copyrights

This course will help graduate students, entrepreneurs and/or inventors to make strategic decisions about intellectual property protection.

Topics in this course include:

- How to file for various types of intellectual property
- How to determine if you have intellectual property
- What rights do intellectual properties give a society, company and inventor?
