

The following Motions and Documents were considered by the Board of Governors at its Friday, March 14, 2014 meeting:

Agenda Title: **Proposed University Records Management Policy**

APPROVED MOTION: THAT the Board of Governors, on the recommendation of the Board Audit Committee, approve the proposed University Records Management Policy, as set forth in attachment 2.

Final Item: 12a.

Agenda Title: **University of Alberta's Comprehensive Institutional Plan (CIP) (2014)**

APPROVED MOTION: THAT the Board of Governors, on the recommendation of the General Faculties Council Academic Planning Committee, the Board Learning and Discovery Committee, and the Board Finance and Property Committee, approve the 2014 *University of Alberta Comprehensive Institutional Plan (CIP)*, as set forth in Attachment 1, and empower administration to make any editorial changes to the CIP, as needed, as long as the changes do not have the force of policy.

Final Item: 13a.

Agenda Title: **Proposed Changes to Existing Mandatory Student Instructional Support Fees, Proposed New Mandatory Student Instructional Support Fees, and Proposed New Non-Instructional Fees**

APPROVED MOTION: THAT the Board of Governors, on the recommendation of the Board Finance and Property Committee, approve the proposed changes to existing Mandatory Student Instructional Support Fees (set forth in Attachment 1), proposed new Mandatory Student Instructional Support Fees (set forth in Attachment 2), and a proposed change to the existing Undergraduate Application Fee for New Students (set forth in Attachment 3) as submitted on behalf of the relevant Faculties/Departments by the Registrar's Advisory Committee on Fees (RACF), to take effect as noted in each respective attachment.

Final Item: 14a.

Agenda Title: **North Campus Sectors Plan - Long Range Development Plan Amendment**

APPROVED MOTION: THAT the Board of Governors, on the recommendation of the Board Finance Property Committee, approve the proposed *Appendix XX: North Campus Long Range Development Plan Amendment 2014*, as set forth in Attachment 2, as the basis for further planning; and recommend that the Board of Governors approve the concurrent rescission of 'Section 6.1' of the Long Range Development Plan 2002.

Final Item: 14b.

Agenda Title: **Proposed Changes to the Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility (UAPPOL)**

APPROVED MOTION: THAT the Board of Governors, on the recommendation of the Board Human Resources and Compensation Committee, approve the proposed change to the Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility in UAPPOL, as amended, to take effect upon final approval by the Board of Governors.

Final Item: 15a.

Agenda Title: **Advisory Search Committee for President: Guidelines and Procedures**

APPROVED MOTION: THAT the Board of Governors, on the recommendation of the Board Human Resources and Compensation Committee, approve the Guidelines and Procedures for the Advisory Search Committee for President as set forth in Attachment 1 of the agenda documentation.

Final Item: 15b.

OUTLINE OF ISSUE

Agenda Title: **Proposed University Records Management Policy**

Motion: That the Board of Governors, on the recommendation of the Board Audit Committee, approve the proposed University Records Management Policy, as set forth in attachment 2.

Item

Action Requested	<input checked="" type="checkbox"/> Approval <input type="checkbox"/> Recommendation <input type="checkbox"/> Discussion/Advice <input type="checkbox"/> Information
Proposed by	Office of the Provost and Vice-President (Academic) & Office of the Vice-President (Finance and Administration)
Presenters	Phyllis Clark, Vice-President (Finance and Administration); Andrea Hare, University Records Officer
Subject	University Records Management Policy

Details

Responsibility	Vice-President (Finance and Administration)
The Purpose of the Proposal is (please be specific)	To recommend, to the Board of Governors, approval of a University Records Management (RM) policy.
The Impact of the Proposal is	<p>To formalize the management of University Records, regardless of media, and provide a framework for strong stewardship and management of records. The RM policy will be a cornerstone component of the university's records management framework.</p> <p>The purpose of the RM policy is to provide guidance and direction on the creation and management of information and records, as well as to clarify staff responsibilities. Going forward, once all necessary records standards are in place (see attachment one), procedures providing specific guidance on the implementation of the RM policy will be developed and put into effect upon approval.</p> <p>It is important to move forward with the policy first to provide an official framework for records management at the University, especially since work is proceeding on a centrally approved and managed Electronic Document and Records Management System (EDRMS). Work will then proceed on the various procedures, which will be approved by the Provost and the Vice-President (Finance & Administration).</p>
Replaces/Revises (eg, policies, resolutions)	N/A
Timeline/Implementation Date	To be formally approved and in effect on 21 March 2014.
Estimated Cost	N/A
Sources of Funding	N/A
Notes

Prepared by: Sandra Kereliuk, Senior Administrative Officer, Office of the Vice-President (Finance & Administration)

Overview – Records Management Office

9 January 2013

Since its inception in March of 2013, the University of Alberta's Records Management Office (RMO) has been working to develop an overarching records management framework to strategically guide the creation, use, management and disposition of the university's valuable information assets. The framework will enable: 1) informed, timely, robust decision-making, 2) risk management, and 3) compliance with external requirements. In addition, the framework will support institutional governance, serve as an integral part of the university's business processes and promote improved efficiencies and economies.

The records management (RM) policy is a cornerstone component of the university's records management framework. The purpose of the RM policy is to provide guidance and direction on the creation and management of information and records, as well as to clarify staff responsibilities. The RM policy confirms the university's commitment to establishing and maintaining information and records management procedures.

In order to meet global best practices, and fulfill legislative and business requirements, a number of standards must be developed before the RM procedures can be created. These standards include:

- a functional taxonomy constructed using the University's mandated business and mission;
- university-wide record classification plans based on University's business activities;
- approved records retention and disposition schedules;
- a security and access classification scheme;
- thesauri of preferred terms;
- scanning and digitization guidelines;
- a recordkeeping metadata standard for the University's electronic records; and
- digital preservation standards.

Using global standards as a foundation, the RMO has drafted the following university-specific standards to facilitate the implementation of the university's electronic document and records management system:

- standard naming conventions;
- a recordkeeping metadata standard and guideline;
- common file classification plans for Human Resources and Undergraduate Student records;
- a security and access classification scheme; and
- scanning and digitization guidelines.

Before going forward for consultation and approval, these standards will be tested during the implementation of EDRMS.

To further support the development of the RM procedures, the RMO is currently in the process of completing:

- common record classification plans for Advancement, Student Support Services, Campus Services and Academic Operations;
- a glossary of record management terms;
- a transitory record retention and disposition schedule; and
- a source record retention and disposition schedule.

Going forward, once all of the necessary standards are in place, procedures providing specific guidance on the implementation of the RM policy will be developed and put into effect upon approval.

Ms. Brygeda Renke
Barrister and Solicitor
Executive Director
Association of Academic Staff University of Alberta
1600 College Plaza
8215 – 112 Street
Edmonton, AB T6G 2C8

Dear Ms. Renke:

Thank you for your e-mail of November 14, 2013 in which you provided the AASUA response to the draft Records Management policy.

We have reviewed your comments and appreciate your thoughtful feedback. Please find attached a copy of the revised draft policy. In addition to the changes made in response to your feedback, the policy also contains amendments made to address commentary from other stakeholders.

Noted below are our responses (in italics) to each of the points raised in your aforementioned e-mail:

- 1) The Policy does not apply to ...research records (subject to the University of Alberta Research Policy) and personal communications of an individual faculty, staff and students (unless specifically commissioned or prepared under contract for the University or prepared in the context of administrative work);

What the University's definition of "personal communication"?

For the purpose of the records management policy only, the University definition of personal communication is: Personal communication is information in all media and formats that is created, received or accumulated as a result of personal activities that are not related to the mission, administration or operation of the University of Alberta.

It is the AASUA's position that the University does not have any rights to any communications of AASUA staff, unless it is in the context of administrative work. Further, the University is not entitled to personal communications of those individuals doing administrative work. The paragraph implies that the University would be entitled to an APO's personal communication so long as they were prepared in the context of administrative work – is this the University's intention?

Accordingly, the paragraph as drafted implies that the University has access to records arising from administrative work and everything else that is not personal communications.

It was the intention of the policy to state that it would not apply to personal communication. We hope this intention is now clear with the inclusion of the definition.

- 2) What does the University mean by “prepared under contract” and why the need for this further clarification? I would think that “specifically commissioned for the University” covers specific works under contract.

Agree. The phrase has been deleted.

- 3) Bullet #3 under principles, it states that records should be managed as electronic records. Pursuant to FOIPPA, records definition includes items that are not electronic, such as handwritten notes. Does the University have processes in place to convert any paper documents, memos, notes to file, etc. to electronic documents? Is this the intent of this principle?

While it is the University's goal to manage its records electronically subject to relevant legislation, it was determined that this principle is best addressed in the policy's associated procedures that are currently under development. The procedures, which will be record series specific, will outline the processes for managing both electronic and hard-copy records. The principle has been deleted from the policy.

- 4) Last bullet under principles, should include “grievances” after “litigation”.

Agree. “Grievances” has been added to the principle.

- 5) 3. STATEMENT OF RESPONSIBILITY

“All employees are responsible for creating...” This statement creates an onerous and unreasonable expectation on the part of the employee. The Policy previously stated “adequately document all decisions”. What exactly are the standards that employees must follow and what are the consequences if they fail to act to this standard?

Agree. The statement created confusion as to expectations on the part of the employee. Therefore, the policy has been amended to state – “To support accountability, legal compliance and operational efficiencies and economies, the effective management of university records is a responsibility shared by all University units.” We believe the new statement delineates why records management is important and more fairly assigns responsibility for records management within the University.

- 6) 3. b Why was the phrase “must designate an appropriate person from among staff” changed to “must clarify who is responsible...”?

The phrase was changed to reflect the current staffing constraints faced by some university units. It was also amended to accommodate the possibility that the job duties of the Records Management Coordinator may be shared by several individuals within a unit.

7) Definitions:

a. "Records" should include audio recordings (voice messages are records, for example).

Agree. "Audio recording" was added to the definition of records.

b. "Personal Information Record" should state that it is a record containing the personal information of an identifiable individual, subject to FOIPPA.

Disagree. A personal information record is subject to many pieces of legislation, not just to FOIPPA. We believe your suggested change of "subject to FOIPPA" would cause confusion, especially as in the principles section of the policy, it states that a personal information record is subject to all relevant privacy legislation, regulations and policies, including FOIPPA. As we do not wish to create the impression that university records are only subject to FOIPPA, we decided not to make your suggested change. However, it was determined that the definition of personal information record in the policy should align with the definition contained in FOIPPA. Therefore, after consulting with the University Information and Privacy Officer, the phrase "as defined in the FOIP Act" was added to the definition.

c. "University Records Officer" this definition removed "business" and replaced with "university". It should be made clear that we are dealing with "university business records or any records related to the operation and management/mandate of the University.

It is explicitly stated throughout the policy that it pertains only to the university records. We believe "business" can have a very narrow connotation and could lead to a misunderstanding as to the full scope of University records. For example, student records are university records, but many individuals would not consider them "business" records. Therefore, to prevent any misunderstanding, the definition of the University Records Officer will not include the word "business".

d. "Records Management Coordinator" ...shall ensure the unit is compliant with this policy, associated procedures, and legislation.

Disagree. The inclusion of the word "shall" places an unfair burden of responsibility on the Records Management Coordinators. It is unlikely that the Coordinators will have the authority to ensure compliance by their respective units. After reviewing the role of the Coordinators, the definition was re-worded to more accurately reflect the authority and role of the Coordinators.

e. In conclusion, the Policy does not address the use of and the disclosure of records – can members locate the procedure regarding this elsewhere?

The use and disclosure of records will be addressed in the policy's associated procedures, which will be drafted once all of the necessary university-specific records management standards have been developed, tested and approved. The record series-specific procedures will provide detailed guidance on the management of university records, including their use and disclosure.

I trust the explanations above provide you with complete feedback on your comments. Thank you again for taking the time to share your assessment.

Sincerely,

Andrea Hare
University Records Officer
University Records Office

Records Management Policy

Office of Accountability:	Office of the Vice-President (Finance and Administration)
Office of Administrative Responsibility:	Records Management Office
Approver:	Board of Governors
Scope:	Compliance with this University policy extends to all employees, including contracted staff, of the University of Alberta who create, receive or maintain records in the course of conducting the business of the University.

Overview

The University of Alberta (the University) is responsible for the management of its **records** regardless of media. By practicing strong stewardship and managing its records from the time of capture to final disposition, the University promotes institutional transparency, openness, accountability and excellence in scholarship and knowledge dissemination.

The Policy and its associated Procedures apply to all **university records** created, received or collected, maintained and disposed in the course of the University discharging its mandate, regardless of where they are located. This includes, without limitation, university records that are stored on an employee's home computer or personal computing device.

The Policy does not apply to:

- **research records** (subject to the *University of Alberta Research Policy* and its associated *Procedures*)
- **personal communications** of individual faculty, staff and students; or
- records placed in the University Archives by or on behalf of a person or organization other than the University.

The Records Management Policy is a component of the University's broader data, information and knowledge governance and management regime. All practices concerning the management of University records are to be in accordance with this policy and its supporting procedures.

Purpose

- To ensure the University's records and recordkeeping systems are managed responsibly as valuable resources and assets.
- To manage all records in all formats in compliance with relevant legislation and regulatory requirements, standards and best practices.
- To establish a University-wide **records management program** that facilitates the effective and efficient creation, collection, access, maintenance, protection, retention and disposition of all University records.
- To ensure the **integrity, authenticity, reliability** and **usability** of University records.

- To preserve the history and the evidence of the University's activities and transactions in all formats (including **vital records** and records of permanent value).
- To support both freedom of information and protection of privacy throughout the University.

The University's records management program is based on the following principles:

- All University records created, received or collected by University **employees**, including volunteers, while conducting the business of the University are the property of the University as vested under the authority of the Board of Governors.
- The University shall identify and create records that satisfy the requirements for evidence of and information about each business function, activity and transaction.
- All University records, including **transitory records**, shall be managed through their **lifecycle** according to the **University Recordkeeping Standard**.
- University vital records shall be identified in the University Recordkeeping Standard and shall be protected and made available in the event of disaster or loss.
- Records shall be disposed of only in accordance with approved **records retention and disposition schedules** as set forth in the University Recordkeeping Standard.
- Records requiring restricted access or dissemination shall be identified in the University Recordkeeping Standard and shall be protected from inappropriate access, alteration, usage and disposal.
- **Personal information records** shall be managed in accordance with all relevant privacy legislation, regulations and policies, including without limitations the *Freedom of Information and Protection of Privacy (FOIP) Act*.
- **Health information records** shall be managed in accordance with all relevant privacy legislation, regulations and policies, including the *Health Information Act (HIA)* and the FOIP Act.
- Disposition of relevant or **responsive** University records will cease in the event of litigation, grievances, audit or a request for information pursuant to the FOIP Act.

POLICY

1. LEGISLATION AND STANDARDS

The University of Alberta is committed to managing its records in accordance with best practices, and adheres to all relevant laws and standards.

2. STATEMENT OF AUTHORITY

The **University Records Management Committee** is responsible for the initiation, control and review of records management standards, procedures, documentation and programs. The Committee shall recommend approval of the above (including the University Recordkeeping Standard) to the Vice- President (Finance and Administration).

3. STATEMENT OF RESPONSIBILITY

To support accountability, legal compliance and operational efficiencies and economies, the effective management of university records is a responsibility shared by all University **units**.

- a. The **University Records Officer** and the **University Records Office** are responsible for the development, implementation, communication, coordination, and on-going review of the university records management policy, procedures and standards.
- b. Within their respective units, Administrative Heads must clarify who is responsible to act as the unit **Records Management Coordinator(s)**. Administrative Heads may delegate the responsibilities of Records Management Coordinator to multiple individuals to accommodate work functions and duties. Record Management Coordinators are responsible for serving as the first point of contact for providing records management assistance and for coordinating records transfer and disposition activities.

- c. University employees and others who create or manage University records as part of their work are responsible to ensure that records management principles are addressed and for consulting with the Records Management Office when developing processes or systems or changing the media of records.

DEFINITIONS

Any definitions listed in the following table apply to this document only with no implied or intended institution-wide use. [\[▲ Top\]](#)

Record(s)	A record of information in any form and includes notes, images, audiovisual recordings, audio recordings, x-rays, books, documents, maps, drawings, photographs, letters, vouchers and papers and any other information that is written, photographed, recorded or stored in any manner, but does not include software or any mechanism that produces records.
University record(s)	A University record means recorded information in any format within the custody or under the control of the University relating to the operation and administration of the University.
Research record	Research information assets supporting both research and operational needs. This includes administrative information and records produced for analytic or evidentiary purposes.
Personal communication	For the purpose of this policy , personal communication is information in all media and formats that is created, received or accumulated as a result of personal activities that are not related to the mission, administration or operation of the University of Alberta.
Records Management Program	A Records Management Program encompasses the governance and management framework, the people, and the systems required within the University to manage the University's records as a valuable asset through their lifecycle.
Integrity	The integrity of a record refers to it being complete and unaltered.
Authenticity	An authentic record is one that can be proven to be what it purports to be; to have been created or sent by the individual purported to have created or sent it; and to have been created or sent at the time purported.
Reliability	A reliable record is one whose contents can be trusted as a full and accurate representation of the transactions, activities or facts to which they attest.
Usability	A useable record is one that can be accessed, processed, and understood over time.
Vital records	Records in any format or form containing information that is (1) essential to the operations of the University, (2) necessary to protect the University's legal and financial position, and (3) necessary to preserve its claims and rights and those of its stakeholders. Vital records are those records whose informational value to the University is so great, and the consequences of loss are so severe, that special protection is required and justified.

Employee(s)	An employee is any person who performs a service for the University as defined in section 1(e) of the Freedom of Information and Protection of Privacy Act. A person employed by the University for wages or salary, or who is under contract to provide a service to the University.
Transitory records	Records of a routine nature having short-term or limited value. Transitory records are (1) not an integral part of the University's administrative or operational records files, (2) not required to sustain the University's administrative or operational functions, (3) not filed under a University records classification system, and (4) recorded only for the time required for completion of actions or ongoing records associated with them. They are subject to legislative and legal proceedings, including the FOIP Act.
Lifecycle (of a record)	The lifecycle of a record is a series of phases starting when it is created or received by the University, through to its use, maintenance and temporary storage before finally being destroyed or archived permanently.
University Recordkeeping Standard	<p>A composite of all records management requirements, business rules and attributes relating to University records. The requirements, standards, business rules and attributes include, but are not limited to:</p> <ul style="list-style-type: none"> ● the functional taxonomy and classification scheme based on the University's business activities; ● the approved records retention and disposition schedules; ● the security and access classification scheme; ● a thesaurus of preferred terms; ● the recordkeeping metadata standard for the University's electronic records; and ● digital preservation technologies
Records retention and disposition schedule	The formal, recorded approval of a decision to retain or to destroy a record or set of records, together with the justification for that decision; and, it is the official legal instrument used by the University for the disposition of records.
Personal information record	As defined in the FOIP Act, a record containing the personal information of an identifiable individual, excluding a health information record.
Health information record	As defined in HIA, a record containing information about an identifiable individual that was collected in the course of providing a health service to the individual.
Responsive	Information that is reasonably related to pending litigation, audit or access to information request.
University Records Management Committee	A standing committee of the Vice-President (Finance and Administration) with campus-wide representation, to advise on matters relating to the management of the University's records.
Unit(s)	Administrative and/or organizational entities including faculties, departments, centres, institutes, administrative units and non-departmental units.
University Records Officer	The individual accountable for the development of an overall University records management framework, strategy and plan to ensure university records, regardless of media, are created, collected,

	classified, filed, preserved and disposed according to industry best practices and institute policy, procedure and standards.
University Records Office	The unit within the University responsible for ensuring the University is in compliance with this policy and associated procedures. The unit also provides guidance with respect to records management practices and procedures.
Records Management Coordinator	An individual designated by an Administrative Head who will represent the records management interests of the unit, serve as the unit contact for the Records Management Office and provide assistance to the unit to facilitate compliance with this policy and associated procedures.

OUTLINE OF ISSUE

 Agenda Title: **University of Alberta's Comprehensive Institutional Plan (CIP) (2014)**

Motion: THAT the Board of Governors, on the recommendation of the General Faculties Council Academic Planning Committee, the Board Learning and Discovery Committee, and the Board Finance and Property Committee, approve the 2014 *University of Alberta Comprehensive Institutional Plan (CIP)*, as set forth in Attachment 1, and empower administration to make any editorial changes to the CIP, as needed, as long as the changes do not have the force of policy.

Item

Action Requested	<input checked="" type="checkbox"/> Approval <input type="checkbox"/> Recommendation <input type="checkbox"/> Discussion/Advice <input type="checkbox"/> Information
Proposed by	Provost and Vice-President (Academic) Carl Amrhein; Vice-President (University Relations) Debra Pozega Osburn; Vice-President (Finance and Administration) Phyllis Clark; Vice-President (Facilities and Operations) Don Hickey; and Vice-President (Research) Lorne Babiuk
Presenters	Provost and Vice-President (Academic) Carl Amrhein; Vice-President (University Relations) Debra Pozega Osburn; Vice-President (Finance and Administration) Phyllis Clark; Vice-President (Facilities and Operations) Don Hickey; and Vice-President (Research) Lorne Babiuk
Subject	2014 University of Alberta's Comprehensive Institutional Plan (CIP)

Details

Responsibility	Provost and Vice-President (Academic); Vice-President (University Relations); Vice-President (Research); Vice-President (Finance and Administration); and Vice-President (Facilities and Operations)
The Purpose of the Proposal is (please be specific)	<p>Under guidelines from Innovation and Advanced Education, the University of Alberta has prepared the Comprehensive Institutional Plan (CIP) that incorporates the university's access plan, research plan, capital plan, and budgets into one comprehensive document. The CIP is for approval by the Board of Governors and is then filed with the Minister of Innovation and Advanced Education.</p> <p>The CIP is written in support of the university's vision and mission as outlined in <i>Dare to Discover</i> and its Academic Plan, <i>Dare to Deliver</i>. The CIP outlines the university's academic and research priorities as articulated in the Academic Chapter, which in turn drives the university's capital and resource allocation priorities.</p>
The Impact of the Proposal is	To enable the university to move toward fulfilling its vision and mission and to authorize the administration to allocate resources as outlined in the institutional budgets.
Replaces/Revises (eg, policies, resolutions)	CIP 2013
Timeline/Implementation Date	Fiscal Year 2014-2015
Estimated Cost	See attached documentation for detail
Sources of Funding	See attached documentation for detail
Notes	<p>This version differs from the version which was presented to other committees in the following ways:</p> <ol style="list-style-type: none"> 1. It has now been designed and has all charts and graphs fully integrated into the text. The earlier version was a Word document and

	<p>charts and graphs were sent separately.</p> <p>2. All requested changes to the document have been made (as per the request of members of APC, BFPC, and BLDC). No changes that have impact upon the planning or policies contained with the document have been made. The changes would all be considered "editorial."</p>

EXECUTIVE SUMMARY

The province of Alberta has a vision: To forge an enterprising and diversified knowledge economy defined by a culture of learning, creative visionaries, and innovators. To foster and inspire public and private sector leaders who can build public institutions, organizations, businesses, and industries that connect the province to the world at large. To achieve this vision, Alberta needs the benefits that the University of Alberta brings.

Alberta seeks an educated and engaged community and workforce—the U of A delivers. Alberta needs a collaborative, innovative research system that asks major questions, generates transformative discoveries, and translates new knowledge into effective solutions to urgent problems—the U of A delivers. Alberta strives to create resilient, diverse communities, full of enriched learning opportunities that will unleash the potential of all Albertans—the U of A delivers.

Nationally and internationally recognized for high-quality teaching, learning, and research, the U of A inspires and delivers excellence, defined by a bold, creative mindset. The U of A equips students, researchers, and scholars with the knowledge and tools to be active and engaged citizens, leaders, and entrepreneurs. U of A educates and prepares change makers, people with the talent and imagination to make something new.

Graduates of the U of A have a proven track record of driving innovation in all sectors of society. A 2013 landmark study estimates that U of A alumni have collectively founded 70,258 organizations globally, creating more than 1.5 million jobs and generating annual revenues of \$348.5 billion. Of those jobs, 390,221 were founded in Alberta. One-third of the organizations started by U of A alumni are non-profit or have a cultural, environmental, or social mission. More than 77 per cent of U of A alumni have volunteered locally, and 17 per cent have

volunteered outside Canada.¹ Collectively, this embrace of the university's promise of "uplifting the whole people" amounts to a force of remarkable power and effect.

The University of Alberta inspires by example. For more than a century, this institution has sought to provide the programs, research, and community action demanded—and more importantly, needed—by the public it serves. Adaptation and leadership have defined the university's history as it has responded to changes in social, economic, and cultural forces shaping both society as a whole and the field of higher education in particular. Today, the U of A aims to continue its upward trajectory providing learning experiences and research opportunities that compete with the best public universities in the world and give students, faculty, staff, and alumni the support, tools, and motivation to lead action and change.

The future strength and development of Alberta's knowledge economy will depend on the strength of the knowledge ecosystem that sustains such talented people. This ecosystem stretches from early childhood literacy and numeracy to the education and training of highly qualified people. It is sustained by a variety of enriched education and research environments that nurture potential, spark ambition, and fuel the pursuit of excellence through the provision of highly specialized core facilities and technical

¹ Briggs, Anthony and Jennifer Jennings. *Uplifting the Whole People: The Impact of University of Alberta Alumni through Innovation and Entrepreneurship*, 2013.

infrastructure. Alberta's post-secondary institutions each have a role in this system.

As a publicly funded, comprehensive academic and research institution, the U of A provides the rich soil that seeds the imaginations of undergraduates and feeds the talents and ideas of graduate students and post-doctoral fellows. Undergraduate students are embedded in an environment where research surrounds them and actively engages them. Graduate students and post-doctoral fellows bring energy and intellectual capacity to the U of A's learning, teaching, and discovery mandate in multiple ways. They often form the core of research teams working on complex research projects. Indeed, they are vital to Alberta's knowledge ecosystem. Leading researchers seek institutions with a reputation for attracting strong graduate students and post-doctoral fellows, who in turn become key generators of future knowledge transfer. With the level of knowledge and skill that teams of graduate students and post-doctoral fellows possess, principal investigators can pursue large-scale, visionary, and sometimes risky research agendas—agendas that often have the greatest potential for producing major discovery and innovation. From the U of A's research-intensive ecosystem emerges the province's next generation of social and technical innovators and entrepreneurs.

Maintaining and enhancing the integrity, vitality, and competitiveness of this research environment is the U of A's top priority. Over the next 18 months, the university's board and senior leadership is implementing a four-point Action Plan focused on inspiring and facilitating academic transformation, ensuring sustainable financial models, seeking administrative efficiency and effectiveness, and fostering culture change.

Changes are occurring on many fronts. Strengthening graduate education is at the fore of academic transformation; a major review of the full graduate experience—from recruitment to graduation—has been conducted to ensure that academic, professional, and administrative graduate student supports match or exceed

those of our peer institutions. The establishment of the Peter Lougheed Leadership Initiative will spark enriched leadership development at the undergraduate level.

Throughout the last year, the university has made several significant changes in order to present a balanced 2014-2015 budget. These include offering a Voluntary Severance Program to continuing members of the academy, reducing faculty budgets, changing policies to ensure the greatest possible recovery of indirect costs of research, and providing new incentives for revenue generation. These changes will continue to strengthen the institution's financial sustainability into the future.

Successful development and implementation of administrative efficiencies, such as streamlining payroll, simplifying financial and procurement processes, and modernizing records management, continues to be an ongoing project of the university. Many of these efforts also benefit the wider Campus Alberta network, with the U of A contributing expertise and leading collaboration and harmonization across Campus Alberta by building alliances, managing shared systems and agreements, sharing resources, and providing centralized services.

Overarching the U of A's Action Plan is the need to promote and facilitate a culture of transparency and accountability, as well as a culture of interdisciplinary and inter-faculty co-ordination and partnership on both academic and administrative endeavours.

As has been the case since the U of A's founding in 1908, Alberta's ability to capitalize on strategic opportunities, find effective solutions to issues of provincial interest, and provide leadership in areas of international importance will continue to be directly linked to the U of A's ability to attract and achieve excellence. Through excellence, the U of A—and by extension this province—can create partnerships with global innovators and compete at the highest levels on the international stage.

Environmental Scan

Great opportunities lie ahead for Alberta; so, too, do risks and challenges. People in the 21st century are highly mobile: they move from one province or country to another to live and work, transferring knowledge between geographical regions and developing new ideas, innovations, and solutions in the process. If Alberta effectively leverages these people connections to create knowledge transfer, it will improve quality of life, increase competitiveness, secure economic prosperity and social resilience, and advance Alberta's position as one of the world's leading jurisdictions.

With every innovation, every discovery, every global partnership formed, every alumnus working in the international market, the University of Alberta is advancing the province's national and global brand. The U of A is a gateway through which Albertans and Alberta organizations, businesses, and industries can access the world and, in turn, a key entry point to the province for outside talent and innovation. In fact, global companies are attracted to Alberta by the research and innovation partnering opportunities presented by the university.

These successes come as many international regions have recognized the imperative for even greater investment in education, research, development, and innovation. That investment is highly strategic. Nations are increasingly crafting frameworks that allow for the concentration of resources that advances overall system efficiency and coordination, and focuses on a core number of institutions that have the potential to compete globally.

They are selectively investing in their major research-intensive universities to enable them to compete for the most talented students and researchers, the most important research projects, and the most valuable international and corporate partnerships. Increasingly, a strategic expansion of the complement of graduate

students and post-doctoral fellows is central to these efforts. From new players such as China, India, and Brazil to advanced economies such as Japan, South Korea, France, and Germany, university funding mechanisms are being reviewed to ensure they recognize and support top performance. The United States and the United Kingdom already have measures in place to provide strong incentives for research excellence—and these efforts are producing results.

Clearly, the international knowledge economy is fiercely competitive. Alberta's long-term success is dependent upon understanding the changes demanded by a shifting international post-secondary landscape and remaining competitive within it. Consistent, adequate, long-term funding for post-secondary education and innovation, specifically with strong support for the province's comprehensive academic research-intensive institutions, is essential to securing Alberta's prosperity long into the future.

As Alberta's 2013-16 Strategic Plan states, "Alberta's path for a successful and dynamic economy that can compete in, and contribute to, the global knowledge economy requires having the right people with the right skills. Future success also requires strong strategic relationships between government, post-secondary institutions, the research and innovation system and the province's entrepreneurial business sector."²

Given its wealth, creativity, and entrepreneurial spirit, Alberta has distinct advantages on the national and international stages. Through sustained, strategic investments in building blocks such as talented and creative people, advanced infrastructure, and research excellence, Alberta has the potential to emerge as one of the most dynamic and energetic jurisdictions in the world.

² Government of Alberta, *2013-16 Government of Alberta Strategic Plan*, p. 6.

The Academy

The University of Alberta is internationally recognized as one of the top 100 public universities in the world, and nationally as one of Canada's top five comprehensive academic and research institutions, with a reputation for providing nationally and internationally competitive undergraduate degrees, professional credentials, medical and doctoral training, and exceptional research capacity and impact in seven critical areas of human inquiry and global challenge: food and bio-resources; energy; environment; health and wellness; humanities and fine arts; science and technologies; and society and culture. This full spectrum of research and scholarship enables the U of A to offer undergraduate, graduate, and professional degree programs within Alberta that are competitive nationally and internationally and to make the comprehensive contributions towards the scientific, social, and cultural innovations needed to support Alberta's vision for its citizens and their province.

Post-secondary education systems, and within them, research-intensive universities such as the U of A, are undergoing academic transformation in response to new opportunities and expectations concerning their role in society. Alberta's and Canada's needs for an educated citizenry and a skilled population are diverse, and each type of post-secondary institution makes its own contributions to meet these needs. As a comprehensive academic and research institution, and one of Canada's

leading medical/doctoral universities, the U of A provides the broad range of foundational BSc and BA degrees required to fill the projected gap of professional leaders and managers across nearly all private and public sectors. Offered within an integrated environment of advanced research, scholarship, and creative activities, these degree programs develop graduates who bring a particular set of skills, competencies, and perspectives to colleagues and employers upon graduation.

The U of A also provides professional degrees that must meet increasingly rigorous accreditation standards, the demand for professional skills development for all undergraduate and graduate students, and the demand for post-graduate and continuing professional education.

Finally, the U of A provides graduate programs for MA and PhD students from all disciplines. Along with post-doctoral fellows, many of these highly qualified professionals eventually undertake public and private sector positions as academics, managers, and leaders of technology, research, and innovation. They often spark the growth of new sectors for economic diversification.

To support and sustain the comprehensive academic and research-intensive mission of the U of A, the university operates highly specialized core research facilities essential in supporting internationally competitive

research. Examples of these facilities include animal lab facilities; bio-containment labs; specialty fabrication labs for machining, plastics, glass blowing and electrical; biochemical analytics labs; biotron and aquatic facilities; and greenhouses. These facilities not only support research at the U of A, but also enable collaborative sponsored research with public and private sector partners.

The impact and competitiveness of both research and education activities continues to depend on global connections. The placement of Canadian undergraduate and graduate students in foreign research internship positions for a portion of their degree programs is emerging as another tactic for ensuring that Canada is globally connected. Undergraduate students and businesses alike are looking for increased experiential, internship, and co-op experiences in both domestic and international settings.

Conversely, bringing international students into Canada for graduate work and post-doctoral training continues to be a key complementary mechanism for addressing Canada's and Alberta's globalization objectives. Here, both Alberta and the U of A are competing with other Canadian provinces and universities, respectively, for

those international students with inclinations to study in Canada, either to remain as part of the professional workforce or to create international linkages upon their return. Our investments in global academic programs and research consortia remain a foundational part of an institutional strategy to create such opportunities for Alberta's students and for Alberta's established and emerging private sectors. These collaborations continue to accelerate the development of our advanced joint degree programs with global partners and to secure new federal and international funding resources.

Within Alberta, the U of A is responding to the increasing need for post-baccalaureate continuing education for professionals coming from or returning to rural and Aboriginal communities. Through partnerships with other Campus Alberta institutions, we have a number of well-established programs and initiatives in place, and we will continue this collaborative work to address new needs and opportunities. Within the academy, transformation is occurring through the development of innovative credentials to meet all these new opportunities and expectations, and through the targeted adoption of e-learning technologies and approaches for program delivery.

Capital Plan

In the competitive world of 21st-century post-secondary education, the vitality and vibrancy of the U of A's education and research ecosystem can only be maintained through well-supported, well-planned, and strategic repurposing and renewal of its facilities. As the university changes and the academy transforms, so must space needs and requirements. Though the U of A has recently completed and opened several new and renewed learning and research spaces, increased enrolment and demand continue to strain existing academic support space such as fitness facilities, formal and informal collaboration/social space, libraries, collections and storage, housing, and daycares. These spaces help attract and retain students, faculty, and staff because together they form and support an environment conducive to a successful academic outcome and experience. Purpose-built student housing is a key driver leading to successful learner outcomes and strong alumni relations.

The university's ability to meet its own and the province's objectives depends on continued investment for new facilities and for renewal and repurposing, addressing deferred maintenance of older facilities. With the recent completion of several large-scale capital projects, the university now has the opportunity to sustainably maintain and, where appropriate, repurpose aging assets

and infrastructure as new funding is made available. As areas and buildings are vacated by programs relocating to newly constructed buildings, smart, forward-thinking planning requires that we look beyond simple renewal and explore repurposing opportunities. By coupling renewal and backfill projects, the U of A provides a best-value model for creating projects that look toward our future operational and academic needs at a reduced capital cost. However, strategic investment in new infrastructure and buildings remains vital in maintaining the delivery of first-in-class academic programs. To that end, wherever possible, the university will seek opportunities to leverage existing funding, utilize the equity in our current physical assets, and explore various partnerships and project delivery models.

As in previous years, the following Capital Plan endeavours to take a balanced approach in identifying planning, engineering, and construction needs. The following five strategic focus areas guide our capital planning efforts:

- Ensure that we continue to maintain the condition and functionality of the university's existing physical assets, which play a critical role in our ability to attract, support, and retain the best students, faculty, and staff.

- Couple backfill requirements with renewal projects to provide a best-value model for capital projects that meets the pedagogical needs of tomorrow’s learners and the requirements of researchers in a more cost-effective manner while positively enhancing utilization of our space and meeting the goals of our sustainability plan.
- Fund pre-design services for strategic institutional capital priorities, creating an inventory of projects that can respond to future funding opportunities and be readily implemented through a variety of project delivery models.
- Provide purpose-built, supportive student housing for up to 25 per cent of full time enrolment to keep pace with U15 peers, enhance completion rates, and ensure accessibility for rural and underrepresented Alberta students as well as international students.
- Strategically plan and construct critical new facilities, respecting the varied needs of the university’s five

distinct campuses as they each serve unique and separate constituencies within Alberta.

The capital priorities outlined within the Comprehensive Institutional Plan are in direct response to the measures and goals outlined in the university’s academic and research plans. They also address space pressures directly related to differential growth of our graduate programs, differing space requirements for graduate versus undergraduate space, approved and planned program growth, changing pedagogy and program delivery methods, and the need for additional academic support space. While all U of A campuses work together as a whole, each serves distinct and separate constituencies across Alberta and each has critical capital priorities, putting the university in a unique position within the Campus Alberta model. The U of A remains committed to seeking partnership opportunities that leverage provincial funding and maintain the momentum of the university’s initiatives in support of its vision and government’s priorities for post-secondary education.

Budget

Although the University of Alberta continues to face significant budget challenges in 2014-2015, it is looking forward to a period of greater budget stability, with government's decision to begin reinvesting in post-secondary education late in 2013-2014. As the university moves into 2014-2015 and onward, it will advance on the vision and academic priorities as laid out in *Dare to Discover* and the Comprehensive Institutional Plan. With a positive consolidated budget in place, and a structurally balanced operating fund in sight, the university will leverage government's reinvestment strategically in 2014-2015. A major thrust of the reinvestment will be stimulation of new revenue (net) to help mitigate the impact of budget cuts planned for 2014-2015. All of this will be accomplished within the context of the university's four-point action plan, which is focused on academic transformation, establishment of sustainable financial models, ongoing administrative effectiveness, and internal culture change.

Consolidated Budget

Prepared under Canadian Generally Accepted Accounting Principles (GAAP), the U of A's 2014-2015 consolidated budget reflects the entire enterprise, including unrestricted and restricted funds. This includes funding for general operations, ancillary operations, research activities, and capital projects. Funding for general operations is fully unrestricted within the consolidated budget. Funding for ancillary operations remains within general operations, while research revenues, philanthropic sources of revenue, and capital project funding are fully restricted. The

difference between unrestricted and restricted funds is in the degree of university control over the use of the funds. All unrestricted funds fall fully within the authority of the board to use to advance the institution's enterprise, whereas restricted funds can only be used for the purposes for which they were received.

Over the last year, the university has focused on implementing plans that will enable it to realign its budget within a new funding context. For 2014-2015, the university has developed detailed plans and strategies that will achieve a consolidated balanced position for 2014-2015 while also allowing for limited strategic investments that will advance the institution. Although mitigated by the mid-year 2013-2014 2.6 per cent base funding increase to the Campus Alberta grant, and notwithstanding the university's efforts to generate new sources of revenue, cuts across the institution will still need to be implemented to realign the university's expenditures with its budgeted and forecast revenues.

For 2014-2015, the consolidated budget reflects an excess of revenue over expense of \$9.5 million on a total revenue of \$1,749 million. This represents less than one per cent of the university's budgeted consolidated revenue. The \$42-million change between the 2013-2014 preliminary actuals and the 2014-2015 proposed budget is driven by a number of factors. First, there was the specific decision by the Board to approve a consolidated budget deficiency in 2013-2014 and phase in budget cuts over two years in an effort to plan effectively and limit the impact of the cuts on the institution. Second, in 2013-2014 the university booked the full impact of the Voluntary Severance Program

along with other one-time severance payments associated with 2013-2014 budget cuts. Finally, and based on current assumptions of no increase to the Campus Alberta grant, the 2014-2015 consolidated budget has factored in seven per cent budget cuts to the academic units and eight per cent budget cuts to the administrative units in order to bring the university's consolidated budget into a balanced position.

The university prepares its budgets using a comprehensive integrated planning and budget process, involving key stakeholders from across the institution. Key budget assumptions and sensitivities are cornerstones of the university's multi-year budgeting process. The goal is to achieve improved accuracy in forecasting elements of the budget and provide common assumptions for budget planners across the university.

Key highlights of the university's revenue assumptions include:

- a zero per cent adjustment to the Campus Alberta grant. Any increase in the grant will be used to offset budget cuts;
- an estimated \$4-million base increase to the Campus Alberta grant to replace tuition revenue following government's decision to freeze tuition at 2012-13 levels;

- a one per cent increase in general tuition fees and graduate student international differential fees and an effective five per cent increase to undergraduate international student tuition fees;
- continued phased approach to full implementation of market modifier tuition;
- a one per cent increase to all mandatory non-instructional fees with a proposed \$16.38 per term increase to the Athletics and Recreation Fee; and
- marginal growth in investment income.

Key highlights of the university's expenditure assumptions include:

- salary increases driven by negotiated salary settlements (1.65 per cent across-the-board increase and an average two per cent increase for merit);
- employer-paid non-statutory benefit cost increases averaging 7.2 per cent;
- a seven per cent overall average cut to faculties and eight per cent to administrative units;
- one-time severance costs associated with budget cuts;
- marginal decline in utility expenditures; and
- stable scholarship funding.

Resource and Risk Implications

In November of 2013, the provincial government announced \$50 million in reinvestment in Alberta's publicly funded post-secondary institutions, of which \$14.4 million was reinvested at the University of Alberta. As outlined in the budget chapter, the university will invest this money strategically in 2014-2015. Notwithstanding this reinvestment, the university remains concerned about its capacity to realize its bold vision and at the same time contribute to the province's vision of an Alberta powered by innovation, ingenuity, and an entrepreneurial spirit. What is needed is a commitment to a long-term funding model that recognizes the unique aspects of a comprehensive academic research institution, including the funding of graduate students and post-doctoral fellows as well as the research enterprise and facilities that support not only the university's mandate, but also much of Campus Alberta.

The 2013-2014 budget had a negative impact on all aspects of the university including its students, staff, faculty, alumni, donors, and strategic partners. In addition to dealing with the unanticipated cut to the Campus Alberta grant, there has been uncertainty in government policy and funding support going forward. This has made all aspects of planning extremely difficult and any type of long-term strategic planning almost impossible. This lack of certainty affects the university's capacity to recruit and retain the brightest students and world-leading faculty. This uncertainty also hinders the ability of the university to attract new resources through donors, international consortia, and governments. The university is committed to expanding its resource base and generating new sources of revenue; however, stability in its base funding and an understanding of matching fund opportunities is critical in achieving this goal.

The following is a list of the university's key resource requests:

- three-year rolling commitments of increases to the Campus Alberta grant, enabling all of Campus Alberta to more effectively plan and fulfil their post-secondary education mandates
- a funding envelope that supports and appropriately funds growth in the number of graduate students, post-doctoral fellows, and the required professorial positions
- the provision of new targeted resources to fund the direct costs of the research and innovation enterprise
- matching dollars in support of digital technologies that will enhance the learning and research environments and achieve efficiencies within the university while bringing benefits to Campus Alberta
- funding for critical deferred maintenance, planning and pre-design, and capital projects as indicated
- payout of approximately \$400 million in yet unmatched donations within the Access to the Future Fund. Completing the match of donations in the program will increase the institution's success in securing philanthropic funding that supports broad-based excellence.

Risk Implications

Like all internationally competitive research-intensive universities, the U of A must deal with a variety of risks that have the potential to hinder its growth and the realization of its vision, mission, and strategic objectives. Many of these risks have been identified throughout this document.

1. The dramatic cut in provincial funding gives rise to numerous institutional risks including the impact on quality; ability to grow research and establish international partnerships; maintenance of program accreditation; ability to attract and retain the highest-quality faculty, staff, and students; maintenance of infrastructure; and overall institutional reputation.
2. Enrolment growth (graduate and undergraduate) must be managed from the perspective of meeting the labour demands of the province and supporting the research mandate of the university.
3. Without the appropriate number of leaders, teachers, researchers, and support staff contributing to their full potential, the university will not be able to provide the quality of the learning experience or participate in the world-leading research expected of an internationally competitive research university.
4. For the university to remain relevant to its students and meet the needs and expectations of its faculty to engage in the highest-calibre research, it requires continuous investment in leading-edge IT infrastructure, highly skilled personnel, and support.
5. The continuation of appropriate levels of Infrastructure Maintenance Program funding is vital to avoid a return to increasing levels of deferred maintenance.
6. An institution that aspires to be among the top research-intensive universities in the world requires access to and flexibility in funding that would enable it to leverage tens of millions of research dollars from provincial, national, and international sources and permanent base funding to support core research infrastructure.
7. The university must address the current economic and financial challenges it faces in such a way that it does not negatively affect its increasing national and international reputation as an exceptional place to learn and work.
8. The university must also promote appropriate risk management plans and strategies that develop responsive attitudes and behaviour at all levels of the organization in order to maintain a healthy and safe environment for all.
9. Previous and planned budget reductions may negatively affect the capacity of the university to provide the programs and services required for students to meet their potential.

Through its integrated enterprise risk management framework, the university will monitor, manage, and mitigate these and other emerging risks in an effort to avoid substantial impact on the university's ability to fulfil its strategic objectives.

Conclusion

Although the University of Alberta's financial circumstances changed with the March 2013 provincial budget, the university remains committed to excellence and its chief strategic goal to be a leader among the world's best public comprehensive, research-intensive post-secondary institutions. The university also remains committed to its short- and long-term plans and goals as outlined in the following Comprehensive Institutional Plan. The U of A is a resilient institution that has emerged from difficult periods in the past and maintained a steady upward trajectory of increasing national and international reputation for academic leadership.

Indeed, the U of A is an outstanding university for the public good. Our faculty, staff, and students, together with the support of partners in government, business, and the broader community, are committed to meeting our own high expectations for excellence and to earn our reputation as one of the world's top public research universities through our achievements and service to the province, the nation, and the world.

Accountability Statement

This Comprehensive Institutional Plan was prepared under the Board's direction in accordance with legislation and associated ministerial guidelines, and in consideration of all policy decisions and material, economic, or fiscal implications of which the Board is aware.

A handwritten signature in black ink, appearing to read 'Douglas O. Goss', written over a horizontal dashed line.

Douglas O. Goss, Q.C., AOC
Chair, University of Alberta Board of Governors

Institutional Context

University of Alberta Mandate

As approved by the Minister of Advanced Education and Technology, July 2009

Created by the University Act, 1906, of the Legislative Assembly of the Province of Alberta, the University of Alberta is a board-governed, publicly funded university that operates as a Comprehensive Academic and Research Institution under the authority of Alberta's Post-Secondary Learning Act. Its fundamental mandate is to offer a broad range of outstanding learning and research programs to prepare citizens and leaders who will make a difference. The university plays a leading role in Campus Alberta through collaboration with other Alberta institutions, responding to vital community relationships at every level and giving a national and international voice to Alberta innovation. Its activities enhance student opportunities and build Alberta's capacity for long-term, knowledge-driven sustainable development at the global forefront.

The university provides instructional excellence through both on-campus and distance delivery in a vibrant and supportive learning and research environment. Its residential, multi-campus setting includes many research and field facilities. The university community discovers, disseminates, and applies new knowledge through the following interrelated core activities.

In a dynamic and integrated learning and research environment, the University of Alberta offers graduate and undergraduate students the opportunity to earn

internationally respected credentials, including bachelor's, master's and doctoral degrees, and university certificates and diplomas. It also offers French-language programs leading to university degrees, certificates, and diplomas, as well as college certificates and diplomas. A number of its programs are unique within Alberta. Post-doctoral fellows come to the university to refine their teaching, mentoring, and research skills.

The University of Alberta is a balanced academy, with strong arts and sciences programs featuring the faculties of Agricultural, Life and Environmental Sciences, Arts, Augustana, Extension, Native Studies, Physical Education and Recreation, Science, and Campus Saint-Jean. These faculties are foundational to and interlinked with the university's network of strong professional faculties, including Business, Education, Engineering, Graduate Studies and Research, Law, Medicine and Dentistry, Nursing, Pharmacy and Pharmaceutical Sciences, Public Health, and Rehabilitation Medicine. In addition, all of our faculties are involved in professional development and continuing education.

The university establishes and maintains an environment of inquiry-based learning anchored in strong academic programming and an array of co-curricular student life opportunities. Academic support, social/community

enrichment, health and wellness, and career and life development are cornerstones of the University of Alberta student experience. The intellectual and creative diversity of the campus, including its international and multicultural population and exchange programs, makes for an engaging student experience. Fine arts displays, stage performances, museum collections, athletics, and recreational opportunities combine with residence life to present multi-dimensional possibilities. Experiential learning opportunities based in the community augment on-campus activities with real-life applications.

Transfer and collaborative degree completion agreements with partner institutions broaden student opportunities and provide rural, northern, and Aboriginal communities with access to University of Alberta credentials. Similar innovative arrangements centred at the university deliver information and knowledge resources to post-secondary and government communities through both inter-library and online access.

The university's research and creative activities produce a dual impact through the preparation of highly qualified graduates and a continuous flow of innovation. The university attracts scholars of international reputation: undergraduate and graduate students, post-doctoral fellows, staff, and faculty. Collectively, they foster, conduct,

and disseminate research and creative activity, both pure and applied, within and across all the major program areas at an internationally recognized level of excellence.

University faculties, centres, and institutes combine resources and talents for collaborative advantage through research partnerships with other academic institutions, business, governments and public agencies. The university actively transfers new knowledge and creative works to Alberta, Canada, and the world for community benefit, including commercial development of intellectual property when appropriate and feasible.

In every aspect of its mandate, the University of Alberta is a partner in social, cultural, and economic development, fostering and establishing the provincial, national, and international connections and understandings that support leading global enterprise and citizenship for Albertans. University administrators, faculty, staff, and students contribute regularly to public debate and to government and corporate examination of issues. Startup companies and new technologies licensed to existing companies lead Alberta in new directions and employ graduates. The university continually moves out into its communities through its graduates, its creative and research advances, and its ongoing opportunities for experiential and lifelong learning.

University of Alberta Vision, Mission, Cornerstones, and Values

The University of Alberta vision is to inspire the human spirit through outstanding achievements in learning, discovery, and citizenship in a creative community, building one of the world's great universities for the public good.

Our mission is to create and sustain a vibrant and supportive learning environment that discovers, disseminates, and applies new knowledge through teaching and learning, research and creative activity, community involvement, and partnerships. The University of Alberta gives a national and international voice to innovation in our province, taking a lead role in placing Canada at the global forefront.

The U of A aspires to become one of the top public universities in the world by 2020 by focusing academic planning and strategic decision-making on four cornerstones:

1. Talented People
2. Learning, Discovery, and Citizenship
3. Connecting Communities
4. Transformative Organization and Support

Our values: The U of A community of students, faculty, staff, and alumni rely on shared, deeply held values that guide behaviour and actions. These values are drawn from the principles on which the University of Alberta was founded in 1908 and reflect a dynamic, modern institution of higher learning, leading change nationally and internationally.

Excellence: Excellence in teaching that promotes learning; outstanding research and creative activity that fuel discovery and advance knowledge; and enlightened service that builds citizenship.

Student Experience: The centrality of our students and our responsibility to provide an intellectually superior educational environment.

Integrity and Academic Freedom: Integrity, fairness, and principles of ethical conduct built on the foundation of academic freedom, open inquiry, and the pursuit of truth.

Diversity and Creativity: A diverse, yet inclusive, dynamic collegial community that welcomes change and seizes opportunity with passion and creativity.

Pride: Pride in our history and traditions, including contributions from Aboriginal people and other groups, which enrich and distinguish the university.

Comprehensive Institutional Plan Development

The University of Alberta operates within a four-year integrated planning and budgeting framework. The framework is based on the principles of long-term planning, openness and transparency, comprehensive consultation, accountability through performance tracking, and academic priorities (teaching and research) as the drivers of resource allocation decisions.

The university's Board of Governors approves the university's vision document, *Dare to Discover*; the academic community, through General Faculties Council, approves the current academic plan, *Dare to Deliver 2011–2015*. The preparation of the Comprehensive Institutional Plan (CIP) is based on these two guiding documents as well as the guidelines provided by the Ministry of Innovation and Advanced Education.

The development of the CIP involved both internal and external consultation for key messages, priorities, and needs. Information from the faculties on the evolution of teaching and research priorities and initiatives, including pan-Albertan and Campus Alberta activities, was solicited in Fall 2013. This information was integrated with other consultations regarding the operating pressures associated with shared research resources and services, and ongoing dialogue on emerging initiatives with local, provincial, national, and international external stakeholders.

The U of A's Office of the Vice-President (University Relations) assumes overall responsibility for the process

of preparing the CIP and leading it through the review and governance approval process. Once the final CIP is prepared, the entire document is taken through several rounds of briefings and consultations. The U of A's governance processes include the participation of all constituencies (students, alumni, faculty, staff, and general public). The 2014 review process for the CIP involved the President's Executive Committee (January 23, 2014), briefings to the General Faculties Council Academic Planning Committee and the Board of Governors Finance and Property Committee (for information on February 7, 2014), the General Faculties Council Academic Planning Committee (for recommendation on February 12, 2014), the Board Learning and Discovery Committee (for information and for recommendation on February 24, 2014), the Board Finance and Property Committee (for information and for recommendation February 25, 2014), and the full Board of Governors (for information and for approval on March 14, 2014). Detailed briefings of the CIP are presented to these committees, along with motions from the General Faculties Council Academic Planning Committee, the Board Finance and Property Committee, and the Board Learning and Discovery Committee to the Board of Governors recommending approval. The Board of Governors is the university's final approving body of the CIP.

Upon approval by the Board of Governors, the document is submitted under the signature of the chair to the Minister of Innovation and Advanced Education.

MEASURING IMPACT

WALK DOWN AN ALBERTA STREET AND COUNT EVERY FIVE PEOPLE YOU PASS. THE SIXTH ONE IS PROBABLY WORKING FOR AN ORGANIZATION STARTED BY A UNIVERSITY OF ALBERTA GRADUATE.

In fact, U of A alumni have started more than 70,000 organizations that have created more than 1.5 million jobs around the world. With almost 400,000 of those jobs in Alberta (of a total 2.1 million jobs in Alberta in 2012), the impact of U of A alumni is very real for working Albertans.

Around the world, alumni-founded companies have generated annual revenues of \$348.5 billion. By comparison, the annual gross domestic product of the province of Alberta is \$306.7 billion, putting the impact of U of A alumni relative to Alberta in the same category as the impact of Stanford alumni relative to the state of California. It's a staggering perspective not previously well known or understood.

This information comes from a study done by U of A professors Tony Briggs and Jennifer Jennings. A first for Canadian institutions, the study was based on study methodology previously used at MIT, Stanford, and Tsinghua University in China.

The U of A study also expanded on previous methodology to examine the mission of alumni-founded organizations, finding that U of A alumni promote cultural change and create societal value that extends beyond dollars and cents. More than 30 per cent of alumni have published peer-reviewed work; 15 per cent are professional artists; 24 per cent have created new products, services, or business models; and 4.6 per cent have patented new products or methods.

One-third of the organizations started by U of A alumni are non-profit or have a cultural, environmental, or social mission. In addition, more than 77 per cent of U of A alumni have volunteered locally, and 17 per cent have volunteered outside Canada.

A previous study by Briggs and Jennings released October 2012 showed that the U of A contributes \$12.3 billion annually to the Alberta economy—the equivalent of 135 NHL teams. That study focused on the direct impact of institutional and visitor spending combined with induced economic impact from university education and research.

SUCCESSES AND OPPORTUNITIES:

- The U of A has launched a Venture Mentoring Service, matching student entrepreneurs with successful alumni who will guide, support, and inspire them in their learning.
- U of A alumni listed faculty as the number one factor in their success.
- U of A alumnus Ray Muzyka ('90 BMedSc, '92 MD), who co-founded BioWare with two fellow med school alumni in 1995, has now founded Threshold Impact, which mentors and invests in information technology, new media, medical innovations, and social entrepreneurs, focusing on sustainable, profitable impact investments.
- On average, each organization founder has started 1.84 organizations, with annual revenue per employee of \$220,301.
- One class of 1,555 U of A Education graduates touches the lives of more than 195,000 students.

ENVIRONMENTAL SCAN

Great opportunities lie ahead for Alberta; so, too, do risks and challenges. Human capital in the 21st century is highly mobile: people move from one province or country to another to live and work, transferring knowledge between geographical regions and developing new ideas, innovations, and solutions in the process. If Alberta effectively leverages these people connections and enables knowledge transfer, it will improve quality of life, increase competitiveness, secure economic prosperity and social resilience, and advance Alberta's position as one of the world's leading jurisdictions.

Future success will depend on Alberta's ability to advance the province as a global leader, to foster an innovative and entrepreneurial society, and to encourage a thriving creative culture. The University of Alberta, as the province's flagship research-intensive post-secondary institution, will be a critical partner in educating and developing top talent, attracting and retaining world-class students, leaders, and visionaries across disciplines. The outcomes and benefits will be many: a highly skilled workforce, engaged citizens, economic diversification, evidence-based policy development, social and technological solutions to serious challenges, and sustained, long-term prosperity.

In addition to educating, credentialing, and employing generations of Albertans, the U of A is a gateway through which Albertans and Alberta organizations, businesses, and industries can access the world. In turn, it is a key entry point to the province for outside talent and innovation. In fact, global companies are attracted to Alberta by the research and innovation partnering opportunities presented by the university. With every

innovation, every discovery, every global partnership formed, every alumnus working in the international market, the University of Alberta is advancing the province's global brand.

These successes come as many jurisdictions have recognized the imperative for even greater investment in education, research, development, and innovation. Regions and countries around the world are aligning their resources and reviewing their educational and research sectors to better compete within the global marketplace. As a result, the knowledge economy is fiercely competitive. Alberta's long-term success is dependent upon remaining competitive within this reality.

Consistent, adequate, long-term funding for post-secondary education and innovation, specifically with strong support for the province's comprehensive academic research-intensive institutions, is essential to securing Alberta's prosperity long into the future. As Alberta's 2013-16 Strategic Plan states, "the economic and intellectual

centre of gravity is shifting away from traditional economic powers in the West, and the pace at which knowledge and technology are advancing is altering how the world does business. Albertans have always been innovators and leaders, resilient and resourceful. These are the qualities that build the province and remain critical to Alberta's continued future success. Alberta's path for a successful and dynamic economy that can compete in, and contribute to, the global knowledge economy requires having the right people with the right skills. Future success also requires strong strategic relationships between government, post-secondary institutions, the research and innovation system and the province's entrepreneurial business sector."³

Given its wealth, creativity, and entrepreneurial spirit, Alberta has distinct advantages on the national and international stages. Through sustained, strategic investments in building blocks such as talented, creative people, advanced infrastructure, and research excellence, Alberta has the potential to emerge as one of the most dynamic and energetic jurisdictions in the world.

The Alberta Environment

In December 2013, Premier Alison Redford reaffirmed her commitment to post-secondary education and innovation, saying, "The strengthened ministerial team will lead the next phase of the Building Alberta Plan, with a focus on expanding our economy, driving innovation and working every day to create an even better quality of life for Albertans" by "ensuring [that] Alberta has the skilled workforce and training opportunities we need" for "an innovative and diversified economy."⁴ Newly appointed Minister of Innovation and Advanced Education Dave Hancock echoed these sentiments when he noted that, "70 to 80 per cent of the new jobs are going to require some

form of post-secondary credentialing"⁵ and, as a result, the post-secondary system will be critical to Alberta's long-term success.

The University of Alberta is at the core of delivering the credentialing and performing the research that the province of Alberta requires to remain economically competitive and to address the social, cultural, and political challenges of the modern global knowledge economy. Indeed, in addition to being one of the largest drivers of the provincial economy, the university fulfils its promise through the achievements of its alumni.

A recent study estimates that U of A alumni have collectively founded 70,258 organizations globally, creating more than 1.5 million jobs and generating annual revenues of \$348.5 billion. By comparison, the annual gross domestic product of the province of Alberta is \$306.7 billion. Of those jobs, 390,221 were created in Alberta. With 2.1 million people being employed in Alberta in 2012, roughly one in every five Albertans is employed by a company founded by a U of A graduate. One-third of the organizations started by U of A alumni are non-profit or have a cultural, environmental, or social mission. More than 77 per cent of U of A alumni have volunteered locally, and 17 per cent have volunteered outside Canada. The report also concludes that a U of A education is a major catalyst for innovation and entrepreneurship and that faculty interactions, more than any other experience, have the highest impact on alumni after graduation. The success of the U of A is inextricably linked to the position of Alberta on the global stage.

ALBERTA'S DEMOGRAPHIC CONTEXT

Within Canada, Alberta faces significant and distinct challenges now and in the future in relation to its human capital. As a province, it has low levels of participation

³ Government of Alberta, *2013-16 Government of Alberta Strategic Plan*, p. 6.

⁴ Government of Alberta, *Premier Redford focuses ministerial team on innovation and economic growth*, December 6, 2013 as accessed on January 3, 2014 at: <http://gov.ab.ca/release.cfm?xID=35519E6244A99-0EE5-26CA-5AD766486566278D>

⁵ Metro News, *Alberta Premier Alison Redford says universities need to help with economy*, January 29, 2013, as accessed on January 3, 2014 at: <http://metronews.ca/news/edmonton/529476/alberta-premier-alison-redford-says-universities-need-to-help-with-economy/>

in post-secondary education among 18- to 24-year-olds, low completion rates of bachelor's degrees, and an aging population, which is leading to a decline of skilled labour in the workforce. Additional population pressures make Alberta's demographic risks more significant—including projections that the province's population will grow by one million people over the next decade.⁶ At the same time, traditionally underrepresented groups in higher education, such as immigrants and Alberta's Aboriginal population, have been growing rapidly, necessitating a strategy to ensure their inclusion in higher education and in Alberta's job market. As a result of overall population growth and demographic pressures, demand for skilled labour will undoubtedly increase. The province estimates that, over the coming decade, it will face a labour shortage of approximately 96,000 workers and that, of these, more than 62,000 will require a post-secondary education.⁷

Graduate Students and Post-Doctoral Fellows

Even more concerning are the low numbers of master's and PhD students currently enrolled in Alberta—students who are traditionally a measure of an economy's innovation success. According to data from the Association of Universities and Colleges in Canada and Statistics Canada, in 2011, graduate student enrolment per thousand of population in Alberta was at 4.1, compared with 5.3 in British Columbia and 8.5 in Quebec.⁸ As the national and international sections of this chapter will demonstrate, other jurisdictions are aggressively investing in funding and recruiting graduate students, as well as post-doctoral fellows, as a critical dimension to gaining a competitive advantage in the global knowledge economy. Given the size and scope of its research enterprise, the University

of Alberta is well positioned to play a central role in expanding the complement of graduate students and post-doctoral fellows who choose to build their careers in Alberta.

International Students

The attraction of international students will help address the province's need for human capital for research, innovation, and highly skilled labour in a dynamic economy.

Currently, international students and faculty members study and teach in universities and colleges throughout Alberta, but as mentioned above, recruiting and retaining more of these highly skilled individuals is critical if the province is to realizing immediate and long-term aspirations. In 2012-13, international students accounted for 11 per cent of undergraduate students, 26 per cent of master's students, and 44 per cent of doctoral students at the U of A. Having come here for education, many students decide to stay: 60 per cent of Alberta's international students have stated that they will look for work in the province after completing their studies.

According to UNESCO, Canada currently attracts only 2.7 per cent of the 3.6 million students studying abroad, with the United States attracting the lion's share at 19 per cent. Unsurprisingly, China and India are the top two source countries. The Campus Alberta Planning Resource 2012 shows that, among Alberta institutions, the U of A consistently attracted the largest number of international students in 2010-11, with that number significantly increasing over a three-year period. However, Citizenship and Immigration Canada puts that in context, noting that Alberta attracted only five per cent of all international students entering Canada in 2011. This is the fourth-highest number in Canada, below Ontario (42 per cent), British Columbia (30 per cent) and Quebec (15 per cent).

ALBERTA'S POST-SECONDARY EDUCATION LANDSCAPE

In 2013, the Government of Alberta began a broad and multi-faceted evaluation of the post-secondary and innovation landscape. The scope and depth of these evaluations have the potential to effect considerable structural change and to significantly alter the education and innovation environment of the province. Letters of Expectation also were first introduced in Budget 2013. The letters, individual to each institution, provide a new means by which goals, objectives, and outcomes are described and can be evaluated.

Results-Based budgeting

The Cabinet Mandate Letter asserted the government's commitment to fiscal responsibility and discipline via a new "results-based budgeting" process—described as a means by which the government will be able to "re-establish government budgets from the ground up and ensure money is allocated to areas of highest need," marking "a clean break from the incremental spending increases of the past decade."⁹

Alberta Treasury Board and Finance is currently undertaking a comprehensive three-year review of all government expenditures to find efficiencies, identify areas for improvement, and ensure government work is effective and delivers intended results. The results-based budgeting review process has the potential to transform how both the province and the University of Alberta in particular are funded and evaluated for success. Out of these discussions come the opportunity for the U of A to re-evaluate several critical aspects of current program delivery and impact.

Alberta Institute for Applied Research and Commercialization

The creation of an Alberta Institute for Applied Research and Commercialization, first discussed in *Shaping Alberta's Future*, a report from the Premier's Council for Economic Strategy, is an initiative that has the potential to positively and significantly affect the innovation and commercialization landscape of the province of Alberta.

The March 7, 2013 budget speech first introduced the notion of a research umbrella institute focused on collaboration. The speech indicated that the government will use the institute to "focus its research agenda and financial resources in areas where they will have the greatest impact and benefit for Albertans" in areas that will include "energy and the environment, health, agriculture and food, and water."¹⁰

Envisioned as a means by which the province can support the diversification and growth of Alberta's economy, the institute and its role within the broader research environment can help Alberta leverage its considerable research capacity into economic growth.

An expert panel, struck in September 2013 to work on the initiative, is set to deliver its final report early in 2014. This report is of great interest to Alberta's academic, research, and industry sectors, and to the University of Alberta as well.

A broad range of questions are being asked related to the creation of the institute, including the role of the institute with respect to existing commercialization entities, the structure of the institute; its funding mechanism, the focus of its activities, its relationship to other partners in the research ecosystem—including research-intensive universities and the Alberta Innovates corporations—and the scope and timing for implementing its mandate.

⁹ Government of Alberta, *Cabinet Mandate Letter*, June 4, 2012.

¹⁰ Government of Alberta, *Speech - Budget 2013: Responsible Change*, March 7, 2013, p. 13.

An Alberta Institute for Applied Research and Commercialization presents the opportunity to strengthen the province's incubation function by integrating and supporting research sector partners. This integration could bridge existing innovation system gaps to greater leverage assets into the products, processes, services, and companies that will broaden Alberta's economic base—but the realization of this goal will need to be managed carefully.

As this initiative is in the beginning stages of consideration, uncertainties, as noted above, remain as to how this vision might be realized to the advantage of all stakeholders involved. Until greater detail is available from the work conducted by the expert panel, it will be difficult for the higher education sector and the U of A to determine and plan for the changes a realigned research and funding schema might bring.

Alberta Innovates Corporations

The Government of Alberta has also committed to a system-wide review of Alberta's innovation landscape and infrastructure. It is expected that the final report from the Alberta Institute for Applied Research and Collaboration expert panel will also inform the delineation and future role of the four Alberta Innovates corporations, including the broad questions pertaining to the scope of the institute. More particularly, the report may also indicate how the existing Alberta Innovates corporations will be affected by the initiative as well as whether or to what degree the Alberta Innovates entities might be integrated into the institute.

With respect to the role of universities in this transformative change, during a town-hall event, Premier Redford affirmed that the interconnectivity of Alberta innovation actors is the end goal, saying, "connecting the research and the commercialization and the investment that is available in this province is a really important part of what we do for future generations."¹¹

It is exactly the current degree of interconnectivity which brings into question the implications of such potentially far-reaching changes to the research system on the higher education system and on the U of A in particular.

Campus Alberta Reviews

In addition to these broad changes being discussed for Alberta's research landscape, a number of post-secondary specific reviews were commenced in 2013. These four reviews include the Post-secondary Learning Act (PSLA), Tuition Policy, the Funding Model Review, and Outcomes and Indicators.

¹¹ Metro News, *Alberta Premier Alison Redford says universities need to help with economy*, January 29, 2013, as accessed on January 3, 2014 at: <http://metronews.ca/news/edmonton/529476/alberta-premier-alison-redford-says-universities-need-to-help-with-economy/>

The Canadian Environment

Much like the provincial landscape, the Canadian environment is characterized by considerable change and uncertainty, with the respective roles of government, academia, industry, and other stakeholders shifting in response to emerging opportunities and risks. As the analysis below reveals, many of the critical issues shaping the Alberta context—bringing advanced research to market, supplying the economy with the skills sought after by industry, and intensifying the focus on tangible outcomes resulting from investments in advanced education and research—are also salient to the national scene.

CANADA'S ECONOMIC CONTEXT

Following the severe financial crises that gripped world markets in 2008-2009, restoring the health and vibrancy of the national economy remains the overriding priority of the Government of Canada. The federal government's economic policy consists of a wide variety of new initiatives, such as international trade, natural resource development, public infrastructure, and labour relations, as well as the crucial areas of advanced learning, science, technology, and research and development.

After an overall tepid performance in 2013, future economic growth prospects are optimistic for 2014 and onward. The Bank of Canada expects the national economy to return to its full productive capacity by 2015. In the 2013 fall economic update, the federal government forecasts growth of a tepid 1.7 per cent for 2013, but this is expected to rise to 2.4 per cent in 2014 and 2.6 per cent in 2015. As a result of both accelerating growth and austerity measures,

the federal government appears to be on target to reach its stated goal of a balanced budget by the 2015-16 fiscal year.

Improved economic conditions, as well as an improved federal balance sheet, could result in greater receptivity from the federal government to proposals for new investments in support of growing Canada's knowledge economy. As the final section of this chapter explores in greater detail, a broad international shift towards sizable investment in world-class research excellence is an area deserving of federal attention.

CANADA'S POST-SECONDARY EDUCATION LANDSCAPE

As the previous section on the Alberta environment explored, the province's advanced learning and research systems and structures are undergoing considerable structural changes. It is important to note, however, that other provinces are also reinvigorating their approaches to post-secondary education and research, which could alter the national landscape for advanced learning in Canada.

Significant examples include the following.

- **Ontario:** Following its \$6.2-billion investment in higher education under the 2005 Reaching Higher plan, the Ontario provincial government released a differentiation policy framework in November 2013 and is in the process of negotiating strategic mandate agreements with each of its post-secondary institutions. The province is also continuing to work towards the goal of creating 6,000 new graduate student spaces by 2015-16.

- **Quebec:** In October 2013, Quebec’s provincial government released its Economic Policy, which committed more than \$3.7 billion over five years to a number of initiatives targeted at boosting provincial spending on R&D to three per cent of GDP.
- **British Columbia:** The Government of British Columbia, drawing on more than 100 submissions received from across its post-secondary sector, released a Green Paper in March 2013 encapsulating a new quality assurance framework initiative.

The issue of emerging labour and skills shortages has the potential to profoundly affect the trajectory of provincial post-secondary education systems as well. Both the Canadian Chamber of Commerce and the Canadian Council of Chief Executives have launched initiatives in recent years highlighting the seriousness of this issue. In 2013, the Conference Board of Canada established a new Centre for Skills and Post-Secondary Education and held a summit on talent development. Michael Bloom, vice-president of organizational learning and effectiveness for the Conference Board, published an op-ed piece in the *Globe and Mail* arguing that Canada’s labour market challenges necessitate a genuine national education strategy. In an appearance before a Canada-U.S. business forum, Prime Minister Stephen Harper deemed skill shortages “the biggest challenge our country faces.” In response, Budget 2013 unveiled a new program entitled the Canada Job Grant, which would allow Canadians to access up to \$5,000 in federal funds for job training, provided the money is matched by provinces and employers.

The outcomes of this ongoing debate could have important implications for research-intensive post-secondary institutions such as the University of Alberta, particularly if governmental policies, programs, and funding priorities shift towards a strict understanding of the present and future needs of the labour market in particular occupations. Comprehensive research and teaching institutions will continue to be challenged to articulate the importance of a broad-based education that promotes values such as critical thinking, citizenship, and entrepreneurialism in addition to occupation-specific skills training.

FEDERAL SCIENCE AND TECHNOLOGY POLICY

The Government of Canada has integrated science, technology, and innovation into its overall approach to fostering economic growth and social prosperity for Canadians. However, the federal funding environment has been constrained by budgetary austerity measures as well as an accelerating shift towards support for industry-focused research and commercialization activities.

Science, Technology and Innovation Strategy

In the fall 2013 Speech from the Throne, the federal government committed to releasing an updated version of the Science and Technology Strategy, entitled *Mobilizing Science and Technology to Canada’s Advantage*, released in 2007. The updated strategy is likely intended to incorporate recommendations from some of the recent studies commissioned by the federal government, such as

the Expert Panel to Review Federal Support to Research and Development, the report of the Advisory Panel on Canada's International Education Strategy, and the review of aerospace and space policies and programs. In particular, the renewed federal S&T strategy can be expected to further codify the government's focus on enhancing Canadian business innovation, particularly industrial research and development.

An update of the previous S&T strategy offers an opportunity for the research and post-secondary education community to provide strategic advice on the overall policy framework that underpins the federal government's investments in innovation. Comprehensive research institutions such as the University of Alberta must continue to articulate the importance of balancing industry-oriented funding with continued and robust support for discovery research. A recent report from the C.D. Howe Institute argued that the best strategy for attracting the world's top minds to Canada is through concentrated investments in the most challenging problems from a scientific point of view, rather than in projects that may have a commercial application.

Granting Councils

Budget 2013 maintained funding for the Granting Councils, with \$15 million allocated to the Natural Sciences and Engineering Research Council (NSERC) and to the Canadian Institutes of Health Research (CIHR), respectively, and \$7 million to the Social Sciences and Humanities Research Council (SSHRC). However, this funding does not represent new dollars but instead reinvestments of the spending efficiencies identified by the Councils in the Strategic and Operating Review conducted in 2011-12. In the latest instalment of an ongoing trend, funding for the Granting Councils announced in Budget 2013 is conditional support dedicated to increasing

industry-academic partnerships. Students at colleges and polytechnics are also now eligible for NSERC's undergraduate scholarships.

Canada Foundation for Innovation

Budget 2012 contained a signal that \$500 million would be allocated to the Canada Foundation for Innovation (CFI) over five years, beginning in 2014-2015. Budget 2013, however, also indicated that the CFI would gain access to an additional \$225 million in unallocated interest income from its endowments to support the next Leading Edge/ New Initiatives Fund competitions, as well as to sustain the foundation's long-term operations. In addition to these new resources, post-secondary institutions will also have a new opportunity to apply for infrastructure funding under the provincial-territorial infrastructure component of the new Building Canada program unveiled in Budget 2013. Although a submission process for the Building Canada Fund has yet to be released by Infrastructure Canada, it is critical that institutions identify potential high-priority projects and that provincial governments are prepared to provide matching funds if required.

Indirect Costs of Research

Budget 2013 also indicated that a review would be conducted of the Indirect Costs of Research Program "to ensure that the program is meeting its objective of reinforcing excellence in post-secondary research." With a total allocation of more than \$330 million to the post-secondary sector in 2013-2014, with \$16.7 million to the U of A alone, the Indirect Costs of Research Program is a significant component of institutional budgets. However, large institutions that conduct the vast majority of advanced scientific research in Canada are routinely undercompensated by the granting formulas used to allocate ICP funding. As a result, federally funded

research must be subsidized by other revenue sources. The Association of Universities and Colleges of Canada (AUCC) has recommended that the program be increased by \$300 million to attain an across-the-board reimbursement rate of 40 per cent for all universities. Regardless of the approach taken, the U of A will continue to make the case for a more robust approach to reimbursing institutions for the indirect costs of advanced research.

National Research Council

The government continues to drive the National Research Council's shift to a more industry-focused mandate, with an investment of \$121 million over two years to continue the transformation unveiled in Budget 2013. The impact of the NRC's transition on the federal S&T system and on research-intensive universities remains unclear; however, the U of A, alongside the Government of Alberta, will undoubtedly be closely monitoring the NRC as its role evolves, particularly to ensure that our important partnership with the NRC on the National Institute for Nanotechnology is maintained and strengthened.

International Engagement

The federal government continues to move forward its agenda for Canada in the world. Following the release of the report of the Advisory Panel on Canada's International Education Strategy, entitled *International Education: A Key Driver of Canada's Future Prosperity*, Budget 2013 allocated \$23 million over two years to international education initiatives, with \$10 million for expanded marketing activities abroad and \$13 million for the Mitacs Globalink Program. Significantly, the 2013 budget also noted that international education would likely be an area of future investment, stating that "the government will continue to review and respond to the Panel's other recommendations as its fiscal position improves."

The panel also determined that Canada should accept double the number of international students, at both the undergraduate and graduate levels. The panel also recommended that Canada strengthen its educational brand and expand its global marketing campaign. As it continues to reach out to international students and international research partners, the U of A is strategically improving its global brand and, by extension, Alberta's and Canada's global brands.

As additional chapters of this document illustrate, the U of A remains a leader in Canada in attracting the best and brightest students and researchers. Given intensifying global competition, however, further collaboration is needed from both the federal and provincial levels of government, as well as the higher education sector, to continue to position Canada strongly on the international stage. The Government of Alberta's newly released International Strategy, which foresees an important role for post-secondary institutions, is a welcome development in this regard.

Expanding free trade, such as with the agreement-in-principle with the European Union and continuing focus on agreements with India and the Trans Pacific Partnership, has been a central pillar of the federal government's broader economic strategies. These and other trade priorities are guided by the Global Markets Action Plan, released in November 2013, which is the government's refreshed Global Commerce Strategy. The proliferation of free trade negotiations and international engagement provides additional opportunities for the U of A to build on its previous successes in the area of international research partnerships—including the Li Ka Shing Institute of Virology, the Helmholtz-Alberta Initiative, and China's Tsinghua University.

The International Environment

As this chapter has demonstrated, the most salient characteristic of the Alberta and Canadian environment for advanced education and research is change. Structural changes are underway in the policies, programs, and funding climates for post-secondary institutions. And there are shifting expectations from government, industry, students, and the public in terms of the role and competencies of advanced learning systems. These trends, however, are also situated within an international context that, if anything, is adapting even more rapidly. According to the World Bank, the share of global GDP contributed by non-OECD nations climbed from 19 per cent to an astonishing 34 per cent between 2001 and 2011. Changes in the geographic concentration of economic and political power are having a profound effect on industries and sectors around the world, including in higher education and research. As the Conference Board's Michael Bloom argues in the above-mentioned article, "Countries everywhere are themselves reforming and enhancing their PSE systems and institutions. It's all part of their national competitiveness strategies."

DECLINING CANADIAN COMPETITIVENESS

Meanwhile, numerous independent studies confirm a gradual erosion of Canada's competitive position on the global stage. The latest report of the Science, Technology and Innovation Council found that, when ranked according to total R&D intensity, Canada fell from 16th to 23rd among 41 OECD nations between 2006 and 2011.

The most recent assessment of global competitiveness by the World Economic Forum found Canada stagnant in 14th position, down five spots from 2009. Another recent analysis by the Conference Board of this country's innovation performance ranked Canada 13th of 15 peer countries—an overall D grade—on the number of patenting firms less than five years old, which the OECD has indicated is among the most important indicators of an entrepreneurial economy.

The decline in Canadian competitiveness has real consequences, such as continued lacklustre productivity, stagnation in the growth of innovative firms and, ultimately, weak economic growth that affects our quality of life as well as the fiscal viability of important social programs at a time of population aging. A recent report from the Canadian Council of Academies starkly warns that the structural conditions—such as preferential access to the world's largest market, and a global commodities boom—that have reliably compensated for Canada's past weak innovation performance will be of less and less relevance in the altered global environment that is emerging. "Now," the report's authors argue, "because circumstances are radically different from those that shaped Canadian business culture and strategic behaviour for more than a century, business will have to embrace innovation-focused business strategies to compete and survive." Similarly, nations around the world are also making strategic choices within their post-secondary education systems in order to compete globally.

GLOBAL RESEARCH EXCELLENCE

Undoubtedly, Alberta and Canada face growing international competition as both advanced and emerging economies invest in research and innovation. A new dynamic, however, is that nations are increasingly crafting frameworks that allow for the concentration of resources in order to secure a global competitive advantage. In a context of economic and fiscal uncertainty, these governments are advancing overall system efficiency and co-ordination, but they are also focusing resources on a core number of institutions that have the potential to compete globally.

Countries around the globe are selectively investing in their major research-intensive universities to enable them to compete for the most talented students and researchers, the most important research projects, and the most valuable international and corporate partnerships. From new players such as China, India, and Brazil to advanced economies such as Japan, South Korea, France, and Germany, university funding mechanisms are being reviewed to ensure they recognize and support top performance. The United States and the United Kingdom already have measures in place to provide strong incentives for research excellence—and these efforts are producing results.

Examples of this growing trend include the following:

- The **United States** awards the vast majority of its federal research and development grants through merit-based award competitions, with the top 100 (out of 4,800) academic institutions in the U.S. accounting for approximately 80 per cent of total federal R&D support.
- The **United Kingdom** requires universities to provide submissions to Research Excellence Framework panels, which assess institutional results prior to allocating future research funding decisions. The 24-member Russell Group (out of a total of 115 public universities) receives approximately two-thirds of all university research grant and contract income. U.K. Research Councils also support Doctoral Training Centres housed within universities or a consortium of institutions. The Scottish Funding Council has also recently opted to allocate research grants to institutions that score highly in international rankings.
- **Australia** awards research and research training funding to institutions through several performance-based programs, with 70 per cent of available funding directed to the Group of Eight leading research institutions. Australia's post-secondary system includes 39 universities. The government also oversees the Sustainable Research Excellence Program, which targets a 50 per cent top-up for the indirect costs of research and released a Strategic Roadmap for Australian Research Infrastructure in 2011.

- **Germany's** Excellence Initiative, which continues through 2017, concentrates resources in areas of superior performance. The initiative operates in two tiers of competitive funding. To promote top-level research at 39 universities, the German government approved a budget of €2.4 billion in 2012 to fund 45 graduate schools, 43 clusters of excellence, and 11 institutional strategies.
- **France's** Excellence Initiative "Idex" also directs funding to areas of superior performance, with the aim of building research capacity and international reputation. Idex held two competitive calls in 2011 and 2012, which led to the selection of eight clusters of higher education institutions. Idex launched a third call in April 2013. The initiative provides financial support of €7.7 billion. In total, Idex will allocate €19 billion to projects in higher education and research from a €35-billion national fund then-President Nicolas Sarkozy announced in 2009 to support "Investments for the Future."
- **China** launched projects 211 and 985 over the past decade. Project 211 aims to raise the research standards of some 100 high-level universities, cultivating an elite cohort capable of advancing national economic and social development strategies. Project 985 provides additional funding to 39 universities within Project 211.

Funding is allocated to these universities to build new research centres, improve facilities, hold international conferences, attract leading faculty, and send Chinese faculty to conferences abroad. More recently, Project 2011 focuses on accelerating the innovative capacities of Chinese universities through international partnerships and exchanges.

- **India** has designated 40 of its 567 institutions as an "Institute of National Importance," a status that is connected to special recognition and funding arrangements. The government has also created the "University with Potential for Excellence" Program, which currently comprises 15 institutions, and the "Centre with Potential for Excellence in Particular Area" Program, which provides funding for five years (with a potential five-year extension) to 23 universities.

As one of Canada's leading research-intensive institutions, the U of A continues to work in partnership with national stakeholder organizations such as the U15 and the AUCC to advocate for instilling an increased emphasis on global research excellence in the overall suite of federal S&T programs.

Conclusion

Alberta is changing. As this chapter has explored, national and international developments are profoundly affecting Alberta's economic and social future. Within a global knowledge economy characterized by intense competition, advanced education and research remains essential to ensuring Alberta's people are skilled and adaptable, our economy is robust and diversified, and our culture and quality of life is vibrant and prosperous. At this critical juncture, however, it is important that Alberta not simply respond to developments elsewhere, but lead them through carefully considered, bold, strategic action. As this environmental scan has made clear, national and sub-national governments in Canada and around the world are closely examining their post-secondary education and research policies and programs to ensure they are not merely competitive but world-class. Given its wealth, creativity, and entrepreneurial spirit, Alberta has distinct advantages on the national and international stages. Through sustained, strategic investments in building blocks such as talented, creative people, advanced infrastructure, and research excellence, Alberta has the potential to emerge as one of the most dynamic and energetic jurisdictions in the world.

RESEARCH IMPACT BASIC RESEARCH

WHEN THE ELUSIVE HIGGS BOSON PARTICLE WAS DISCOVERED BY AN INTERNATIONAL TEAM OF SCIENTISTS IN 2012, IT HELPED REDEFINE OUR UNDERSTANDING OF THE UNIVERSE AND ITS ORIGINS.

For the first time, scientists were able to show how the building blocks of the universe combine and have mass. Called the discovery of the century, the Higgs boson was a major undertaking involving 3,000 scientists worldwide, including a team from the University of Alberta whose work designing one of two particle accelerators used in the project proved instrumental in detecting the particle.

This past year, U of A researchers were again part of an international scientific collaboration that broke new barriers in the exploration of the universe. Named the scientific breakthrough of 2013 by *Physics World*, the IceCube Laboratory, located deep in the Antarctic ice, detected high-energy neutrinos originating from outside the solar system. These particles could mark the dawn of a new field of study, neutrino astronomy. Instead of pointing a telescope at cosmic phenomena, scientists could now track neutrinos to their point of origin to learn about black holes or exploding stars.

Closer to home, U of A researchers sifted through millions of years of history to

discover “Baby” the *Chasmosaurus belli*—the most complete juvenile dinosaur fossil of its kind—as well as rare skin impressions from an *Edmontosaurus* that show the animal had a rooster-like cockscomb. Both rare finds, made right here in Alberta, have changed our understanding of dinosaur biology and could help uncover even more answers about the evolution of life on Earth.

Despite their size and scale, discoveries like the Higgs boson, IceCube and “Baby” all originate from a researcher’s curiosity about one of humanity’s most basic questions: Where does life come from? This kind of curiosity-driven research is at the core of the U of A’s academic mission to discover, disseminate, and apply new knowledge. Having the support to pursue such basic questions, U of A researchers forge connections to major international partnerships and play instrumental roles in achieving the major discoveries of our times. They are the 21st century’s pioneers, working at the frontiers of knowledge and opening pathways to whole new areas of understanding and study.

OUTCOMES AND BENEFITS

- The U of A has formed international collaborations with leading researchers at institutions such as CERN (European Organization for Nuclear Research), University of Wisconsin-Madison, University of Toronto, University of Oxford, University of California-Irvine, Universität Bonn, University of Bern, Ohio State University, University of Adelaide, and University of Cambridge.
- Research such as Higgs boson, IceCube and fossil discoveries shine international attention on the U of A and the quality and breadth of our research.
- More than 3,000 scientists in 30 countries were involved in the Higgs boson discovery; more than 250 spanning 41 institutions in 12 countries are involved in IceCube.
- U of A students have travelled to the IceCube Laboratory in Antarctica to work on the collaboration with students and scientists from Belgium, Wisconsin, Maryland, and Germany.
- The U of A’s global leadership in paleontology and paleobiology gave rise to Dino 101, the U of A’s first massive open online course (MOOC) led by renowned paleontologist Philip J. Currie. More than 23,000 students enrolled in the first offering of the course.

THE ACADEMY

The University of Alberta is internationally recognized as one of the top 100 public universities in the world, and nationally as one of Canada's top five comprehensive academic and research institutions. This reputation is grounded in nationally and internationally competitive undergraduate degrees; professional credentials; medical, doctoral, and post-doctoral training; and exceptional research capacity and impact in seven critical areas of human inquiry and global challenge: food and bio-resources, energy, environment, health and wellness, humanities and fine arts, science and technologies, and society and culture.

This full spectrum of research and scholarship enables the U of A to offer undergraduate, graduate, and professional degree programs within Alberta that are nationally and internationally competitive and to make the comprehensive contributions towards the scientific, social, and cultural innovations needed to support Alberta's vision for its citizens and their province.

Post-secondary education systems and research-intensive universities, such as the University of Alberta, are undergoing academic transformation in response to new opportunities and expectations. Alberta and Canada need an educated citizenry and a skilled population, and each type of post-secondary institution makes its own contributions to meet these needs. As a comprehensive

academic and research institution, and as one of Canada's leading medical/doctoral universities, the U of A provides the broad range of foundational BSc and BA degrees required to prepare informed citizens and fill the projected gap in highly qualified personnel across nearly all private and public sectors. Offered within an integrated environment of advanced research, scholarship, and creative activity, these degree programs develop graduates who bring a particular set of skills, competencies, and perspectives to colleagues and employers upon graduation.

The U of A also provides professional degrees that must meet increasingly rigorous accreditation standards, the demand for professional skills development for all undergraduate and graduate students, and the demand for post-graduate and continuing professional education.

Finally, the U of A provides graduate programs for MA and PhD students from all disciplines. Along with post-doctoral fellows, many of these highly qualified professionals eventually undertake public and private sector positions as academics, managers, and leaders of technology, research, and innovation. They often instigate the growth in new sectors for economic diversification.

To support and sustain the learning and discovery ecosystem that underpins the comprehensive academic and research-intensive ecosystem of the U of A, the university operates highly specialized core research facilities essential in supporting internationally competitive research. Examples of these facilities include animal lab facilities; bio-containment labs; specialty fabrication labs for machining, plastics, glass blowing and electrical; biochemical analytics labs; biotron and aquatic facilities; and greenhouses. These facilities not only support research at the U of A, but also enable collaborative sponsored research with public and private sector partners.

The impact and competitiveness of both research and education activities continues to depend on global connections. The placement of Canadian undergraduate and graduate students in foreign research internship positions for a portion of their degree programs is emerging as another tactic for ensuring that Canada is globally connected. Undergraduate students and businesses alike are looking for increased experiential, internship, and co-op experiences in both domestic and international settings.

Conversely, bringing international students into Canada for graduate work and post-doctoral training continues to be a key complement for addressing Canada's and Alberta's globalization objectives. Here, both Alberta and the U of A are competing with other Canadian provinces and universities, respectively, for those international students with inclinations to study in Canada, and who may remain in Canada as part of the professional workforce or create international connections upon their return home. Our investments in global academic programs and research consortia remain a foundational part of an institutional strategy to create such opportunities for Alberta's students and for Alberta's established and emerging private sectors. These collaborations continue to accelerate the development of advanced joint degree programs with global partners and to secure new federal and international funding resources.

Within Alberta, the U of A is responding to the increasing need for post-baccalaureate continuing education for professionals coming from or returning to rural and Aboriginal communities. Through partnerships with other Campus Alberta institutions, we have a number of well-established programs and initiatives in place, and we will continue this collaborative work to address new needs and opportunities. Within the academy, transformation is occurring through the development of innovative credentials to meet all these new opportunities and expectations, and through the targeted adoption of e-learning technologies and approaches for program delivery.

Access and Enrolment

PRIORITY: The University of Alberta's academy has the balance of professors, post-doctoral trainees, graduate students, and undergraduate students necessary for exceptional learning, teaching, discovery, and creative activities.

The strength of the University of Alberta is founded on the quality and diversity of its people, programming, research, and resources. The U of A remains committed to attracting outstanding undergraduate and graduate students, post-doctoral fellows, and professors from Alberta, across Canada, and abroad. Along with an exceptional and highly skilled technical and professional staff, these individuals create an integrated environment of teaching, learning, research, and creative activities. They enable the breadth and quality that characterizes the U of A's public and private partnerships in Alberta, its participation in national consortia and initiatives, and its collaborations with top-tier international institutions and agencies.

The U of A aims to provide enriched and transformative student experiences, resulting in graduates who are engaged citizens prepared to contribute to the social and economic well-being of the province, the nation, and the world. The U of A recruits and graduates undergraduate and graduate students from a diverse demographic:

- high school and post-secondary graduates from Alberta, Canada, and abroad;
- transfer students from Alberta's comprehensive academic and research institution (CARI) sector as well as institutions in other Campus Alberta sectors;
- francophone and francophile students seeking a post-secondary degree or diploma in a French-language or bilingual learning environment;
- mature students seeking a university education for the first time and those returning for advanced study;
- First Nations, Métis and Inuit students from urban, rural, and Aboriginal communities;

- students seeking a rural-based education or employment following graduation;
- students who are immigrants or are from immigrant families;
- students from socio-economic groups for whom university access is a financial challenge; and
- students who are the first in their family to attend university.

Among this diverse array of undergraduate and graduate students are some of Canada's most accomplished and promising minds. U of A students have consistently won Canada's most prestigious scholarships, including 68 Rhodes Scholarships since 1913 (the third most among Canadian universities), 57 Vanier Scholarships since 2009, and eight Trudeau Scholarships since 2004, while student athletes have won 63 national championships since the inception of Canadian Interuniversity Sport. In 2013, a U of A student received one of 10 prestigious 3M National Student Fellowships. This program, now in its second year, recognizes leadership in advancing a vision of quality education.

Graduate students and post-doctoral fellows are a distinguishing and essential feature of the U of A's academy and its contributions to discovery, innovation, and creative scholarship. They come to the U of A from across Canada and the world, to work with professors who have outstanding national and international credentials as researchers and teachers. More than half of U of A faculty members have been recruited over the past 10 years from top universities in Canada, North America, and around the world. The professoriate continues to

bring distinction to the U of A for exceptional teaching. In 2013, materials engineering professor John Nychka earned the 2013 Engineers Canada Medal for Distinction in Engineering Education. Also in 2013, two more of our professors, Kim Fordham Misfeldt from the Department of Humanities at Augustana and Heather Zwicker from the Department of English and Film Studies in the Faculty of Arts, were recognized with prestigious 3M National

Teaching Fellowships for excellence in undergraduate teaching. This brings the U of A's total number of 3M laureates to 40 since the founding of the award, by far the highest number in Canada. The continuing recognition of U of A faculty with this national award reflects the commitment of the professoriate to provide an exceptional undergraduate learning experience within a research-intensive environment.

FIGURE 1 APPLICATIONS AND ADMISSIONS

Notes: The numbers reported reflect unique individuals. Registration rate is the proportion of those admitted who registered. This data is based on information in effect on October 1 of the reported year. **Source:** Acorn Data Warehouse

Access and Enrolment Projections and Plans

Since 2010, applicants to University of Alberta programs have increased by 4,289 or 12 per cent. With a steady acceptance rate of 75 per cent and an applicant-to-registration conversion rate of approximately 40 per cent, headcount enrolment has grown from 38,243 in 2010 to 39,267 in 2013.

Access to programs at the U of A is adjusted in response to student demand, workforce needs, and new fiscal resources or constraints. The Bachelor of Education program, for example, was expanded in Fall 2012 to allow direct entry to the program in year one, rather than in year two. Demand was such that the target enrolment was met immediately. In 2014, undergraduate enrolment in the BEd program will be reduced by 246 FLEs in specialized areas where employment opportunities are scarce. These FLEs will be redirected (converted at a three to one ratio to 82 graduate FLEs) to high-demand graduate programs that prepare teachers for administrative positions where employment opportunities are increasing. In the Faculty of Arts, with reduced teaching capacity in specific undergraduate programs resulting from the loss of 25 faculty members through the Voluntary Severance Program, 250 undergraduate FLEs will be

converted to 83 graduate FLEs which will, in turn, offset over-target graduate program enrolment.

Managing enrolment through 2016-17 is expected to remain a challenge for direct entry programs, particularly in STEM faculties, because of student demand. Despite affected faculties setting higher high school completion averages and transfer GPAs, exceptionally strong demand for BSc programs in the faculties of Engineering, Science, Physical Education and Recreation, and Agricultural, Life and Environmental Sciences led to above-target enrolments in Fall 2012 and Fall 2013. The U of A will continue to use admission standards to balance student demand with the ability to deliver a quality teaching and learning environment.

Quality teaching and learning experiences are fundamentally based on students' access to and interaction with professors and graduate students. Top universities in North America and around the world strive to achieve three critical minimum target enrolment ratios:

- 1:16 faculty member to overall student number
- 1:4 faculty member to graduate students
- 1:3 graduate student to undergraduate students

FIGURE 2 FULL-TIME EQUIVALENT (FTE) RATIOS, 2011-12 TO 2013-14

Notes: Student data is based on information in effect on December 1 of the reported year. Post-graduate medical education students are excluded. FTE (full-time equivalent) students represents the number of full-time students plus one-third the number of part-time students based on the number of individual students within each reporting category. Staff data is based on information in effect on October 1 of the reported year. 2013-14 staff data are preliminary. **Sources:** Acorn Data Warehouse for student data. U of A Human Resources data as reported in staff census extracts from PeopleSoft for indicated years as calculated by Strategic Analysis Office, (previously from UCASS extracts, which have been discontinued by Stats Canada).

When achieved, these ratios lead to an educational environment that exposes undergraduates to a discovery, research, and innovation culture that can provide them with opportunities to participate on cross-disciplinary, cross-professional initiatives with teams of graduate students, post-doctoral fellows, faculty, and industrial partners. Thus, the U of A remains committed to achieving these ratios, and will continue to differentially increase the number of graduate students. Strategic reinvestment in professorial positions lost through budget cuts will ensure we retain and enhance our effectiveness in both core and cross-disciplinary research and training.

The University of Alberta's institutional benchmark for access in 2013 was 32,993 FLEs. It is composed of:

- the funding benchmark established with the Government of Alberta in June 2003 when a one-time adjustment to the base grant was made to ensure that all student spaces were funded from that point onward, plus
- funding to support additional enrolment with the merging of Augustana Campus in 2004, plus
- all ACCESS and EPE funded enrolment to 2008-09, plus

- the modified rate of increase in incremental FLEs from 2009-10 to 2013-14 following cessation of the EPE program in 2009, plus
- annual variable adjustments since 2010-11 to specific faculty and program enrolment FLEs to reflect new provincial access funding for targeted programs and conversion of undergraduate spaces to graduate spaces as part of approved access and program changes.

Benchmark enrolment targets for faculties were maintained in the 2013 CIP despite the 7.2 per cent decrease to the Campus Alberta grant which arrived in the middle of the admissions and registration cycle for 2013-2014. As of December 1, 2013, overall institutional undergraduate enrolment remained above target by approximately 1007 FLEs (compared with 919 FLEs in 2012-13). Overall institutional graduate enrolment also remained above target at approximately 1,163 FLEs (compared with 1,224 FLEs over target in 2012-13).

Spreading full implementation of the 7.2 per cent cut over two years—mitigated by the grant increase announced in November 2013—has allowed time for faculties to reduce their teaching staff complements, streamline the number of courses and sections offered, partake in

opportunities offered by IAE for enhanced access funding where qualified student demand has pushed enrolment levels above target, reduce targets where graduate supervisory capacity has diminished through loss of professors, and strategically adjust enrolment targets to levels commensurate with longer-term graduate program goals. Outcomes of these efforts include conversion of undergraduate FLEs to graduate FLEs in the faculties of Education and Arts in response to student demand for master's credentials, and a reduction in the graduate target of 117 FLEs in the Faculty of Science. As a result of these outcomes, and an IAE-initiated re-evaluation of the FLE factor in the Faculty of Pharmacy and Pharmaceutical Sciences, the overall institutional undergraduate enrolment target for 2014-2015 has been reduced to 25,812 FLEs, while the graduate enrolment target has been increased to 6,680 FLEs for a total enrolment target of 32,492 FLEs.

Demand from well-qualified students for BSc programs in Engineering and general BSc programs remains strong. Qualifying admissions averages have been increased slightly for 2014-2015 so as to achieve target levels.

See Appendix 1 for 2014-2015 enrolment targets by faculty.

Health Sciences Enrolment

In CIP 2013, steady state enrolment until 2014 was predicted in the health sciences disciplines specifically, with minor changes each year for additional health graduates who were or may be funded. The graduate targets in the Health Workforce Action Plan for nursing and medicine remained in place through 2013-2014. However, a one-time additional cohort of five MD spaces planned for Fall 2013 was cancelled. In 2014-2015, the need remains for new base funding to support existing soft-funded graduate physical therapy pilot programs at Augustana Campus and the U of A's Calgary Centre; funding is also needed to expand the occupational therapy graduate program into Calgary. Proposals related to these two programs were submitted to the Ministry of Innovation and Advanced Education in November 2012 and again in September 2013. The last intake of students for the current, soft-funded physical therapy satellite programs took place in September 2013 with graduates to emerge in 2015-16. These programs now have 10 students in each cohort, but given current demand, numbers could be expanded.

Aboriginal, Rural and Francophone Enrolment

The U of A stands respectfully on lands once known only by Aboriginal people. Our academic plan, *Dare to Deliver 2011-2015*, continues the U of A's institutional commitment to Alberta's Aboriginal people for meaningful engagement on teaching, learning, and research initiatives. As the first institution founded by the new province of Alberta in 1908, the U of A also takes seriously its responsibility to support and participate in the social and economic lives of rural Albertans, offering outstanding educational opportunities to students in a rural environment and conducting leading-edge research on important rural issues. The U of A also offers francophone Albertans, Western Canadians, and international students a liberal arts undergraduate education in French at Campus Saint-Jean, which is an integral part of Edmonton's francophone community.

Aboriginal students. The U of A hosts the only Faculty of Native Studies in Canada, established in 2006. In 2008, the U of A adopted an institutional objective to be Canada's leading institution for Aboriginal post-secondary engagement, education, and research. To reach this goal, the U of A invests in initiatives that advance both Aboriginal recruitment and the distinct elements that define social well-being within Aboriginal communities and regions. These initiatives are integrated into the full range of institutional activities, from education and training programs to collaborative research centres and institutional-level partnerships and agreements.

Aboriginal student enrolment across all faculties and campuses is approximately three per cent, a number that the U of A is striving to increase significantly. Both Augustana Campus and North Campus have Aboriginal student offices to support current students and to spark new enrolment growth. The Aboriginal Peoples

FIGURE 3 ENROLMENT OF SELECTED STUDENT GROUPS

Notes: All data is based on information in effect on December 1 of the reported year. Excludes Post Graduate Medical Education students. Rural and aboriginal figures are proportions of total Alberta undergraduate enrolment. Aboriginal numbers are restated from previously published figures. Rural enrolment is based on the census division of the student's hometown being outside Edmonton and Calgary census division. Visa student enrolment reflects those students who are not Canadian citizens or permanent residents. **Source:** Acorn Data Warehouse.

Network and a team of special advisers to the provost are also charged with enhancing Aboriginal engagement, opportunities, and research. The Aboriginal Teacher Education Program, now celebrating its 10th anniversary, is a community-based collaborative cohort program offered in partnership with provincial and tribal colleges. It is foundational to improving success for Aboriginal and rural students in K-12, and preparing them for post-secondary education. Medical training initiatives focused on Aboriginal learners are also well established: the U of A has trained 77 Aboriginal doctors to date, more than any other institution in Canada. In 2013, four new Aboriginal students were admitted to the MD program, while five graduated.

CIP 2013 selected updates and outcomes:

- *New Teacher Education Program*: The full implementation of a new teacher education program model with a new compulsory Aboriginal component for all Education programs is a first in teacher education in Alberta.
- *Aboriginal Teacher Education Program*: Two Aboriginal Teacher Education Program cohorts in Portage College and Northern Lakes College were added.
- *Master of Education Blue Quills Partnership*: Twenty-two students graduated from the U of A/Blue Quills Master of Education partnership, started in 2011.
- *Master of Arts in Native Studies*: The Master of Arts in Native Studies is now offered both on campus and as an online program, extending access to this program to students across Alberta, as well to other national and international indigenous and non-indigenous students.
- *Aboriginal pipeline program for MD*: A “pipeline” program of one year of open studies has been developed for Aboriginal students with undergraduate university

degrees who are interested in applying for medicine but who do not have GPAs that meets the minimum standard. It is anticipated that this program will be ready for September 2014.

- *Master of Education in Educational Policy Studies (Indigenous Peoples’ Education specialization)*: This program is now being offered in collaboration with Blue Quills First Nations College.
- Augustana Campus is in discussion with Maskwacis Cultural College to increase access for students to the U of A.

Rural students. Augustana Campus offers a rural residential campus experience for students seeking the best of both worlds: a liberal arts and sciences undergraduate education at a research-intensive university. Along with the faculties of Education and Medicine & Dentistry, it offers practicum placements for students in rural Alberta. In partnership with the faculties of Education, Nursing, and Rehabilitation Medicine, it delivers select programs based on North Campus to rural students. Augustana Campus’s relationship to and partnerships with the city of Camrose also attracts students.

CIP 2013 selected updates and outcomes:

- *2+2 Agreements with GPRC*: Two new “2+2” program agreements were added between the Augustana Campus and Grande Prairie Regional College, with a third under discussion. The objective is to reach a specific rural population in the Grande Prairie region.
- *Augustana Transfer Agreements*: To build enrolment, Augustana Campus is also developing and expanding transfer agreements with Campus Alberta institutions in Red Deer, Medicine Hat, and Grande Prairie.

- *Camrose Performing Arts Centre:* The Camrose Performing Arts Centre on Augustana Campus, slated to be completed in April 2014, with a formal opening in September, will enhance the quality of student experiences in fine and performing arts programming at Augustana.
- *Rural/Regional Family Medicine Program:* The rural/regional Family Medicine Residency Program is now offered in Grande Prairie, Red Deer and Fort McMurray. This investment is aimed at increasing the number of graduates who choose rural and regional communities in which to practise.

Francophone students. The intellectual and cultural heart of Alberta's francophone communities, Campus Saint-Jean (CSJ) offers liberal arts and science undergraduate education in French, a bilingual BSc in environmental and conservation sciences, and, in partnership with the U of A's professional faculties, bilingual undergraduate education in nursing, commerce, and engineering. A majority of teachers in Alberta's immersion and francophone schools have studied at CSJ.

CIP 2013 selected updates and outcomes:

Le Centre Collégial de l'Alberta: Since the 2013 CIP, the delivery of college-level programs at Le Centre Collégial de l'Alberta is being reassessed in consultation with IAE and community groups. Development and implementation of the Techniques d'administration des affaires and proposed Tourisme programs was deferred during this period.

Refer to appendices 2, 3, and 4 for additional information on enrolment and programming initiatives for Aboriginal, rural, and francophone students, respectively, and to Appendix 8, Research Capacity: Investments and Details, for the U of A's capacity in Aboriginal, rural, and francophone scholarship and research.

International Enrolment

The presence of international students broadens the perspective, impact, and relevance of the U of A's teaching, research, creative activities, and community service activities. International students educated at the U of A and who remain in Alberta provide the province with additional highly skilled, innovative, and entrepreneurial professionals. They also bring global connections and insights.

In 2005, the U of A set an institution-wide international undergraduate enrolment target of 15 per cent, and an international graduate student enrolment target of 30 per cent. In 2013-2014, international enrolment is estimated to have grown by two per cent. Undergraduate international enrolment is estimated to have increased by seven per cent and graduate international enrolment by three per cent. Currently, approximately 12 per cent of our undergraduate population and 36 per cent of our graduate population are international students.

The three undergraduate program areas in which we have the greatest international enrolment demand are Engineering (which attracts 18 per cent of the total international undergraduate population), Economics (13

per cent of total international undergraduate population), and Commerce (10 per cent). The graduate program areas in which we have the highest number of international student registrations are Engineering (14 per cent of graduate international students are enrolled in the thesis-based MSc in Engineering and 17 per cent are enrolled in the PhD programs in Engineering) and Science (seven per cent of graduate international students are enrolled in the thesis-based MSc program and 14 per cent are enrolled in the PhD programs in Science). We anticipate continuing strong demand for these programs from international students in the coming years.

Strategies to continue to increase international student enrolment include offering in-country early admission to outstanding applicants; identifying countries where interest in studying in Canada is growing and developing articulation program partnerships there; further developing bridging programs to assist students in a successful transition to university in Alberta; improving processes so as to convert a greater number of applicants to registrants; and maximizing retention and completion of international students through better processes, student services, and scholarship opportunities. Financial aid for international students, like domestic students, is a key factor. U of A has one of Canada's largest cohorts (over 500) of sponsored international students (i.e., international students who have scholarships provided by their home countries). The

university will continue to develop relationships with sponsoring agencies around the world.

CIP 2013 selected updates and outcomes:

- Recruited 61 Brazilian undergraduate students through CALDO's participation in Brazil's Science Without Borders scholarship calls, raising the number of Brazilian students on campus by 142 per cent.

Graduate Student Enrolment

The U of A aims to enrol 10,000 graduate students, with at least 30 per cent being international students. The U of A is continuing to focus on strategies to increase the number of domestic graduate students. Using 2004-05 as the base year, the U of A has been gradually increasing the numbers of graduate students and medical students differentially, while maintaining the undergraduate population. That is, between 2004-05 and 2013-14, graduate student enrolment has increased by 59 per cent (from 4,900 to 7,805 FLEs) and doctor of medicine enrolment by 47 per cent (from 505 to 743 FLEs). At the same time, undergraduate enrolment has risen by 20 per cent.

Graduate program enrolment targets are reported in Appendix 1.

Because financial support is critical to the recruitment and retention of top graduate students, the U of A strives to offer appropriate and effective financial packages that are competitive among Canada's top five research-intensive universities. The U of A's average financial support for graduate students is competitive with Canada's leading graduate schools. However, average financial support for

doctoral students, increasing approximately 11 per cent to \$26,728 in 2011-2012, has remained relatively unchanged compared with other U15 institutions since 2006-2007. Support for research master's students has increased seven per cent during this same time, placing it second relative to the U15 cohort.

FIGURE 4 AVERAGE FINANCIAL SUPPORT PER DOCTORAL STUDENT, UNIVERSITY OF ALBERTA AND U15 UNIVERSITIES

Note: Excludes Health Sciences. **Source:** U15 Data Exchange

FIGURE 5 AVERAGE FINANCIAL SUPPORT PER RESEARCH MASTERS STUDENT, UNIVERSITY OF ALBERTA AND U15 UNIVERSITIES

Note: Excludes Health Sciences. **Source:** U15 Data Exchange

Retention and Completion

Assessing and improving retention rates are a focus for attention in the academic plan, *Dare to Deliver 2011-2015*. To assess the effectiveness of initiatives aimed at improvement, trends are being charted and analyzed. From 2011 to 2013, graduate student retention rates have improved by 1.4 per cent while overall undergraduate student retention rates have increased by 1.1 per cent.

Completion rates for undergraduate programs overall have remained steady from 2009 to 2011 at around 69 per cent. In professional degree faculties, completion rates are steady in the range of 93 per cent. Graduate students' completion rates are approximately 78 per cent across the academy.

Strategies to improve completion rates include enhancing academic engagement inside the classroom, creating mentoring programs, investing in student health and wellness, effectively assessing English-language skills for admission and bridging programs, facilitating language improvement, and aiding career and life development. To complement these, the university's programs and partnerships create academic engagement opportunities outside the classroom, through internship and co-op programs and community service learning.

FIGURE 6 RETENTION

Notes: Data reflects students registered on December 1 of the reported year. The graduated percentage is as of November 1, 2012. Other student activity, as of December 1 of the year following the cohort year. Visiting, special and post-graduate medical education (PGME) students are excluded from the analysis. Categories of student activity (e.g. graduated; returned same faculty, etc.) are mutually exclusive. Historical data is updated annually so may differ slightly from previously published figures.

Source: Acorn Data Warehouse.

CIP 2013 selected updates and outcomes:

- English Language Bridging Program:** In the 2013 CIP, the U of A introduced its English Language Bridging Program, which assists highly qualified prospective and admitted international students to improve their language skills and gain tools needed for success in their degree programs. Having met its planned enrolment target a year early in 2012-2013, the Bridging Program turned its focus to addressing challenges created by

rapid expansion. Plans for an international college are underway that will improve service and efficiency by co-ordinating efforts of units engaged in recruiting, admitting, and supporting international students. The international college is expected to be functional by the fall of 2014, though full implementation is likely to occur over a number of years.

FIGURE 7 COMPLETION RATES, UNIVERSITY OF ALBERTA

Notes: Completion Rate methodology defined and implemented by the U of A Strategic Analysis Office. Completers in the Undergraduate Completion Rate represent students who graduated from the U of A in any program. Completers in the Master's and PhD Completion Rates represent students who graduated with either a Master's or PhD. **Source:** U of A Strategic Analysis Office undergraduate figures as submitted to CSRDE (Consortium for Student Retention Data Exchange); Master's and PhD figures are based on the U15 methodology, but have been modified to include course-based Master's students in the analysis.

- *U of A+ program:* A second cohort of 68 international students entered the U of A+ program, which targets elements beyond language acquisition needed for academic success by students new to Canada.
- *ACE Mathematics for University Success Program:* In collaboration with Centre High in Edmonton, the ACE Mathematics for University Success Program pilot program was launched in 2013, with the aim of assessing and enhancing the mathematics skills of sponsored

students from Saudi Arabia and the Gulf States enrolled in the English Language Program.

English for Academic Purposes - Bridging Program Student Registrations

	2011	2012	2013
Total	817	1170	1178
Percentage of BP students within the EAP student population	67.60%	70.06%	70.54%

The Student Experience

The quality of student experience is a critical and intangible contributor to retention and completion, and a multitude of factors interact to define this experience. At the institutional level, the U of A dedicates resources to both academic and co-curricular experiences that develop the whole student, using its research, private sector, and community partnerships. The U of A also invests in internal resources for more than 400 student groups, and offers academic and personal counselling, health and wellness services, and extensive opportunities for students to participate in the collegial governance of the institution. Alumni strongly endorse these initiatives through philanthropic donations to the Annual Fund, which supports study abroad, leadership and professional development, and undergraduate research opportunities. Each of the U of A's five campuses strives to offer both residential and commuter students multiple ways and means to actively participate in campus life.

CIP 2013 selected updates and outcomes:

- *Student Mental Health and Wellness:* The U of A has begun a comprehensive, student-centred approach to student mental health and wellness. To this end, the university has been extending and improving its

mental health and wellness programs and services. The U of A has applied the three-year, \$3-million grant for student mental health from Alberta Health to extending the capacity of the mental health centre with satellite counsellor offices, increasing hours of service, establishing a community social work team, and enhancing wellness education and programming.

- *Students with Disabilities:* Post-secondary institutions have a duty to accommodate students with disabilities. The number of students requiring specialized support at the U of A increased from 920 in 2008-2009 to 1,535 in 2012-2013. Likewise, the number of students requiring exam accommodation increased from 518 in 2008-2009 to 1,136 in 2012-2013. At the same time, because of a reduction in provincial and federal accessibility funding to support exam accommodation and provide alternate format materials, a structural funding deficit for these services has emerged and remains despite restructuring and outsourcing of assessments to reduce administrative costs. A sustainable funding model to accommodate students with disabilities is a high priority in 2013-2014.

FIGURE 8 PERCENT OF SENIOR STUDENTS RATING THEIR EDUCATIONAL EXPERIENCE AS GOOD OR EXCELLENT

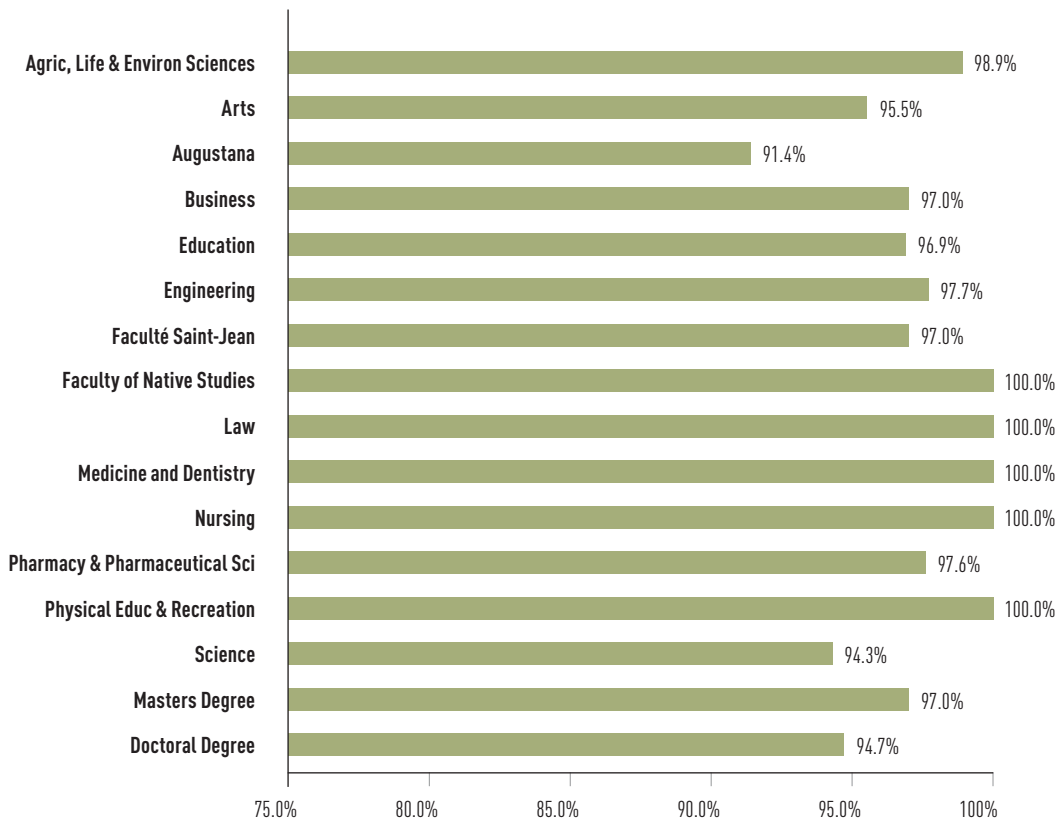

Note: Senior Student designation represents students in their fourth year, or in the year that they are normally expected to graduate. During the time period represented, U15 was referred to as G13 (Group of 13). **Source:** U of A Frequency Distribution Report, NSSE (National Survey of Student Engagement), 2008 and 2011.

- *Student Housing:* Student housing and the associated programming are important features for attracting and retaining students from across the province, nation, and world. The U of A houses only about 13 per cent of its student population in campus residences and has a target of 25 per cent. Residence life is one component that contributes to this outcome. Student residences, coupled with competitive financial aid packages, are key to attracting both rural students and Canadian students from outside of Alberta.
- *Libraries:* U of A Libraries' evolving use of on-campus space and technology is supporting changing styles of learning and academic engagement.

Employment Rates

Statistics Canada reports that labour force demand for university graduates expanded by 700,000 net positions between 2008 and 2012, despite the dramatic economic issues of that period. The high employment rates among graduates from across all disciplines at the U of A, shown in Figure 9, demonstrates the value of degrees. Refer to Appendix 5 for the numbers of 2013 U of A graduates in selected fields.

FIGURE 9 GRADUATE EMPLOYMENT RATE TWO YEARS AFTER GRADUATION, 2010 GRADUATES IN 2012

Source: Alberta Enterprise and Advanced Education: Alberta Graduate Outcomes Survey.

Programming Innovations and Initiatives

PRIORITY: University of Alberta graduates are prepared to think critically, to assume positions of leadership in public and private sectors, to act entrepreneurially, to create cultural and technical innovation, and to be successful in the global marketplace.

The University of Alberta sustains a core foundation of baccalaureate and post-baccalaureate degrees that foster critical thinking, creativity, and flexibility. Our graduates are informed, talented, and empowered individuals ready for a variety of personal, professional, and societal challenges. Our degree programs are also constantly responding and evolving to meet current student and market needs. To this end, the U of A undertakes a formal, structured review of each faculty on a regular basis, engaging external reviewers from top institutions in Canada and the United States. These reviews assess program and teaching quality, research quality, and student satisfaction, and recommend means for improvement, including reallocation of existing resources from current programs to those with greater demand or new relevancy.

Providing Needed Credentials

The shortage of “skilled workers” is an issue around the globe, including in Canada and the United States. Different types of post-secondary institutions produce graduates with different combinations of abilities, skills, and knowledge. The full spectrum ranges from adult learning and apprenticeship programs to graduate degrees and post-graduate training. From a credentials perspective, the University of Alberta delivers nationally and internationally accredited programs for professional designations in medicine, dentistry, engineering, law, business, pharmacy, nursing, education, and library sciences. The U of A also delivers courses, certificates, diplomas, degrees, educational experiences, and professional apprenticeship opportunities (e.g., via internships, international experiences, teamwork on research and innovation initiatives) that are formal or informal requirements for other professional designations or types of professional employment, and self-employment.

CIP 2013 selected updates and outcomes:

- *BSc Radiation Therapy*: The new BSc Radiation Therapy Program, developed at the request of the Ministry of Enterprise and Advanced Education, began its pre-professional year in Fall 2013. The program collaborates with the University of Calgary, Alberta Health Services (CancerControl), the Cross Cancer Institute and the Tom Baker Cancer Centre. Though not specifically designed for Aboriginal or rural student populations, it is expected that the BSc RT program will eventually provide radiation technologists from and for these communities to ensure effective use of their expanded radiation therapy infrastructure.
- *Mining Engineering*: In 2012 and 2013, in response to industry need, enrolment in Mining Engineering was expanded by 140 FLEs. In the absence of new provincial funding, space in other Engineering programs will be reduced in 2014 to offset this change.
- *Fort McMurray MBA Program*: The Fort McMurray MBA Program, offered at regular intervals in collaboration with Keyano College, took in its planned 2013 student cohort. Employees of Syncrude, Suncor, and other Fort McMurray firms are especially interested in this program. One hundred thirteen students have graduated from this program since its inception in 1992.
- *International Alberta Teacher Certification*: A pilot project for internationally educated teachers seeking Alberta teacher certification has begun in collaboration with Alberta Education and IAE and in partnership with Edmonton Public Schools and Edmonton Catholic Schools.

- *Doctor of Pharmacy:* The post-professional Doctor of Pharmacy (PharmD) program accepted its first student cohort in September 2013. In September 2014, a new cohort of students will include practising pharmacists who wish to upgrade their skills. This is the first and only program in Canada that enables practising pharmacists to obtain this credential in only 12-14 months of full-time study.

Other initiatives to develop graduates with abilities, experience, and knowledge required for particular sectors are either in the advanced planning stages or have been submitted for approval. These include:

- integration of undergraduate medical professional programs into community settings in rural or regional clinical training sites, to support provincial and national MD workforce planning activities
- expansion of the industrial internship program for science students, intended for 2014
- new course offering in science citizenship, to foster critical analysis and understanding of science-based policy development, in the context of global challenges
- MA in Public Policy, MSc in Land Reclamation, MSc for Pathology Assistants, and MSc in Mathematical Finance

Providing Diverse and Flexible Credentials

Students elect to study within comprehensive academic and research institutions for the diverse educational environment they offer as preparation for a wide variety of professional opportunities. The University of Alberta's programs allow students to obtain post-secondary university credentials, with flexible entry and exit points. The university has well-established methods and programming that provide current and prospective students with opportunities to ladder from one level of post-secondary study to another, and to

ladder from post-secondary study to additional professional development programs. These varied laddering opportunities include transfer among programs at the U of A, transfer from and into programs in Campus Alberta partner institutions, embedded and free-standing post-baccalaureate certificates, summer institutes, bridging programs, and, potentially, pre-baccalaureate college-level programming.

Collaborative and articulation programming (in which students complete one or two years of study in their home region or country before transferring to complete and receive their degree at the U of A) creates a flexible and diverse array of educational opportunities for undergraduate students. Collaborative programming options for both new and existing programs are part of program renewal. See Appendix 6 for a list of selected programs offered in partnership with Campus Alberta, Canadian, and international institutions.

New initiatives intended to create additional diversity, flexibility, and professional competitiveness for students include:

- two cross-disciplinary credentials (BA/BSc in Interactive Media; Certificate in Computer Game Development) in the areas of advanced digital media and interactive entertainment
- a BA in Asian Studies to create graduates who can bring a broad understanding of this key area of global engagement to a variety of professions
- a Master of Library and Information Studies, with a focus on community libraries and online delivery, serving graduate students locally and in Alberta, Canada, and beyond.
- an embedded certificate in research in the Faculty of Science that will provide professional development in this area for undergraduate Science students. For implementation in Fall 2014.

- a Certificate in International Learning formally launched in September 2013, to recognize the international achievements of undergraduate students. It integrates academic and significant cross-cultural experiences. Learning outcomes include knowledge of international and global issues and systems, the interconnectedness of these systems and of local and global issues, and the ability to apply cultural knowledge for effective interaction in local and international contexts.
- launch of a \$5-million philanthropic Endowment Campaign to support the growth and sustainability of the Institute for Sexual Minority Studies and Services
- an Honours College of Arts and Science, an initiative being explored as an enhanced academic experience for those undergraduates with strong abilities in both the sciences and the arts, and interest in broadly based communication and leadership competencies

Further details on program development in 2012 and 2013 are summarized in Appendix 7. Programs that the university is recommending for suspension or termination are also listed in Appendix 7.

Knowledge Mobilization, Entrepreneurship, and Leadership

The University of Alberta educates graduates with the knowledge and skills foundational to driving and diversifying Alberta's workforce and economy. The U of A is committed to integrating a research-intensive educational experience with specialized training to enable students to pursue entrepreneurial careers, if they choose, and to become leaders in business, industry, non-profit, health, and public service sectors.

Programs and Initiatives with Entrepreneurship Focus

The U of A has a long-standing suite of programs aimed at enhancing Alberta's entrepreneurial capacity

for technological, business, and social innovation. These include a Bachelor of Commerce degree in entrepreneurship and family enterprise; an MBA in technology commercialization; an Executive Management program; a Senior and Executive Managers' Development Program; and a Citation in Social Entrepreneurship. In the coming year, an Innovation and Entrepreneurship certificate program—targeted at graduate students and post-doctoral fellows across the STEM disciplines—will undergo review and approval, with a goal of implementation in Fall 2014 .

The U of A invests in centres and activities that offer both students and external stakeholders ways to develop and enhance entrepreneurship skills, interest, and expertise. These include the Technology Commercialization Centre, which partners with TEC Edmonton, Alberta Innovates, and other external stakeholders; the University of Alberta Venture Catalyst Competition; and Entrepreneurship 101, a collaborative effort with the National Institute for Nanotechnology that is aimed at post-doctoral fellows. The U of A is also an institutional partner of Mitacs, which offers graduate students and post-doctoral fellows a wide variety of professional development programs to prepare them for non-academic careers. A new Venture Mentoring Service has been established with BioWare founder Ray Muzyka as founding chair. The program brings together students with alumni entrepreneur mentors, who will provide objective guidance and support with the goal of helping to launch both for-profit and non-profit ventures in the region.

A two-year pilot program focused on developing entrepreneurship among post-doctoral fellows has been funded by Alberta Innovates - Technology Futures. Up to 10 post-doctoral fellows will be selected early in 2014 for fellowships at the U of A.

A new initiative, directed at connecting international students with entrepreneurship opportunities in Alberta, will connect students with community resources and outline the critical steps needed to develop their own enterprises in the province after graduation.

Initiatives in Leadership

The U of A strives to foster leadership as an essential attribute of local and global citizenship, both in the institution as a whole and within each student. Leadership, as a concept, skill, and activity in itself, is offered as a field of study for credit and non-credit continuing education programming, professional development activities, and scholarship support. Specific credentials include the Municipal Management and Leadership Certificate and the Leadership Development Program (both School of Business), Faculty of Education Educational Administration and Leadership (specialization degree designation, Faculty of Education).

CIP 2013 selected updates and outcomes:

- *Peter Lougheed Leadership Initiative:* In tribute to its namesake, the Peter Lougheed Leadership Initiative is a collaborative venture of the U of A and the Banff Centre founded upon the principles of excellence and access in leadership education and research. The Peter Lougheed Leadership Initiative will build on the two institutions' historical records of leadership and enrich existing strengths to create a pre-eminent leadership development program. The U of A's component of the initiative will be the Peter Lougheed Leadership College, a broad, inclusive, interdisciplinary undergraduate leadership development program that will forge leaders through formal and co-curricular learning, engagement, and mentorship.

Programming Trends

Transformation of the academic enterprise of comprehensive academic and research institutions is gaining momentum around the world as leading universities such as the University of Alberta identify and respond to emerging advanced education needs and expectations. In 2014 at the U of A, these trends include:

- increased use of e-learning in the context of innovative pedagogy, such as MOOCs, blended delivery, e-textbooks, and interactive applets and modules

- intensified competition for highly qualified Albertan and Canadian students among all Canadian universities including the U of A. The U of A recognizes that these students consider a variety of factors when selecting which post-secondary institution to attend, including the international competitiveness of an institution's degree, reputation for quality student experiences (including research, co-op, internship, and international study opportunities), and residential living availability.
- growth of the Community Service-Learning program, which has doubled in size each year since introduced 10 years ago, widening the scope of CSL into a greater variety of disciplines and degree programs on U of A campuses
- development of professional skills for undergraduate and graduate students, need for embedded and free-standing certificate programs for specialized knowledge and skills, and continuing professional education
- establishment of leadership programs in the faculties of Business, Augustana, and Arts, and in partnership with the Banff Centre with the launch of the Peter Lougheed Leadership Initiative
- current demand from students and labour markets for the Bachelor of Science education (engineering, environmental, kinesiology, and general), and rising admissions averages to manage enrolment and sustain quality
- increased need for health sciences distributed-education programs to expand into other urban and rural Alberta communities
- deepened demand for and delivery of undergraduate experiential, internship, work experience, and co-op programming, in both domestic and international settings
- increased calls for independent and group international study opportunities (credit, non-credit)

- intensified need for international partnerships and agreements to develop dual degrees, research opportunities and relationships, and student exchanges in graduate-level studies
- increased student demand for programming with flexible delivery options, such as online master's, PhDs, and continuing professional development programs for students needing or preferring to stay in their own communities or study off campus (e.g., Library and Information Sciences, Native Studies, Nursing)
- ongoing need for programs to work in partnership with industry to develop employees' and executives' skills
- requirement to meet the increasingly demanding professional program accreditation standards
- increased requests for faster tracks to degree completion for professional and graduate research programs
- increased demand for course-based master's programming, especially directed at professional development
- heightened demand for specialized education to facilitate entry into professions in Canada for immigrant professionals who were educated outside of Canada
- opportunities to upgrade degree credentials for experienced professionals
- requirement to prepare Alberta's students to work as globally fluent professionals to lead Alberta's public and private sectors and to connect Alberta to the world
- necessity for flexible and diverse credentials that increase competence and opportunities for business startups, self-employment, and new sector development in Alberta and Canada
- increased need for post-baccalaureate, continuing education for professionals coming from or returning to rural and Aboriginal communities and small- to medium-sized, fast-growing cities (e.g., Fort McMurray, Grande Prairie)

Provincial and National Collaborations

PRIORITY: The University of Alberta is a valued and innovative leader and partner of other post-secondary institutions in Campus Alberta and across Canada in achieving shared academic and organizational aspirations.

Campus Alberta Collaborations

One of the priorities of the Ministry of Innovation and Advanced Education is to ensure a dynamic and innovative post-secondary system that maximizes and leverages expertise and resources across institutions. The University of Alberta continues to lead or participate in cross-institutional initiatives, programs, and resource sharing for both academic and administrative enhancements and efficiencies. For example, U of A Libraries administers the Lois Hole Campus Alberta Digital Library for the province's post-secondary libraries.

In the academic realm, the U of A continually develops and enhances programming partnerships with Campus Alberta institutions within the CARI sector as well as the other five post-secondary sectors. Programs and initiatives, already described, that engage or occur in rural or Aboriginal communities are developed and delivered in partnership with regional colleges. Appendix 6 presents the full suite of U of A academic programming collaborations.

CIP 2013 selected updates and outcomes:

- *Audit Committee Training Program:* The audit committee training program (School of Business) was offered twice in 2013. Participants included Bow Valley College, Concordia University College of Alberta, Grande Prairie Regional College, MacEwan University, Lakeland College, Lethbridge College, Medicine Hat College, Mount Royal University, NAIT, NorQuest College,

Northern Lakes College, Olds College, Portage College, SAIT Polytechnic, University of Calgary, University of Lethbridge, and Alberta College of Art and Design.

- *Northern Systems Major:* Approval was granted by Innovation and Advanced Education (IAE) for a new Northern Systems major within the U of A's Environmental and Conservation Sciences degree to be offered in collaboration with Native Studies and Yukon College. This major is expected to be launched September 2014 subject to budget constraints.
- *Student Mental Health Initiative Update:* At the request of the provost, an internal study on student mental health issues was conducted and completed. The report led to significant new provincial investment in student mental health initiatives at the University of Calgary and University of Lethbridge in addition to the U of A.
- *Information Technology:* The learning management system was fully replaced with a single LMS rather than multiple systems on multiple platforms. A collaboration with Athabasca University and NAIT was struck to consolidate LMS infrastructure among the institutions and provide for service efficiency. Production support for the LMS was then transferred to Cybera and the infrastructure is now located in their data centres in Kelowna and Calgary.

- *Harmonizing Provincial Health Research Ethics*: On November 29, 2013, the vice-president (research) at the U of A signed a Provincial Health Research Ethics Harmonization Agreement. This followed long-term negotiations with government officials and legal advisers from Alberta Health, and representatives from Alberta Innovates – Health Solutions, Alberta Health Services, and the University of Calgary to harmonize health research ethics across Alberta, as requested by the Minister of Health. An Information System (PHREIS) Charter intended to enable the aggregation and analysis of data from the University of Alberta REMO system and the University of Calgary IRISS system was signed earlier in the fall. Two remaining agreements on data sharing and governance are in the final stages of approval.

National Collaborations

The University of Alberta places a high priority on leading, supporting, and participating in national research and innovation initiatives, and where possible, working in partnership with the Government of Alberta to leverage resources. Accordingly, the university invests internal resources (e.g., base positions, space, and funding contributions) in the following national initiatives: The National Institute for Nanotechnology; the Pacific Institute for the Mathematical Sciences (PIMS); SNOLAB (neutrino physics, with expansion into studies within seismology and geophysics); TRIUMF (subatomic physics); WestGrid (supercomputing resources); Canadian Light Source (synchrotron research); and more recently, the IBM-Alberta

Centre for Advanced Studies (health informatics). These investments bring federal and international research dollars into the province, and expand the province’s research capacity through access to highly specialized resources and expertise. Complementary investments by the province in such national initiatives raise the profile of the province, the U of A, and all Alberta CARIs nationally and globally.

In support of French-language programming, under the terms of the Canada/Alberta Agreement on Minority-Language Education and Second Official Language Instruction, the U of A received \$3.2 million in 2012-2013 and has applied for renewal of funding via Alberta Innovation and Advanced Education for 2013-2014. This is an important national collaboration among the university, the provincial government, and the federal government.

The U of A will also continue to partner with other Canadian institutions on common objectives that can leverage complementary expertise and resources. There have been two notable outcomes associated with these investments since the 2012 CIP: the success of the CALDO partnership in recruiting full-funded graduate students from Brazil, and the India–Canada Centre for Excellence (IC-IMPACTS) success. These outcomes advance both the U of A’s and Alberta’s international objectives and are described in the next section.

Internationalization

PRIORITY: The University of Alberta forms international collaborations that create exceptional learning, discovery, citizenship, and innovation opportunities, advancing its vision to be one of the world's top publicly funded institutions.

Internationalization is an institutional objective, an institutional strategy, and an institutional outcome. The University of Alberta reaches beyond Canada's borders to take its place among globally engaged institutions and connects Alberta capacity to international capacity. Internationalization is also a broad institutional strategy that advances nearly all elements of the U of A's academic enterprise and objectives: recruitment of exceptional undergraduate and graduate students from targeted highly ranked foreign institutions; education abroad activities and international internship placements for Canadian students; development and maintenance of international relationships, partnerships, and projects that enhance teaching and global community service; curriculum development in global citizenship; and creation of international research consortia and partnerships that leverage institutional strength and increase research capacity and support.

The U of A's strategies for internationalization are achieving results. International enrolment at both the undergraduate and graduate levels has been increasing steadily over the past three years. Research funding from foreign sources shows a large increase over last year. Shared credentials and degrees with top-tier international partners have been put in place, and international industry internship opportunities for Alberta students have emerged through the university's interaction with these partners. Many of these outcomes emerge from the U of A's existing international research consortia, and continued efforts to establish new ones in strategic areas that advance its learning, teaching, and research objectives.

At the same time, the U of A aims to have at least 20 per cent of the undergraduate graduating class participate in an education abroad experience. In 2012-13, 1,145 students participated in education abroad experiences in

40 countries. Of these, 994 were undergraduate students representing approximately 15 per cent of the graduating undergraduate class.

The need for scholarship funding for both international and Alberta students was identified as a priority in CIP 2012. To ensure that Alberta students can afford education abroad experiences, dedicated fundraising efforts are underway in this area.

CIP 2013 selected updates and outcomes:

- *Alberta Abroad:* The U of A managed the recruitment, selection, placement, and monitoring of participants from across the province for the Alberta Abroad initiative, an externship program launched by the Government of Alberta in 2013 that will annually see up to 40 recent Alberta post-secondary graduates placed in international organizations for work placements of up to one year.
- *International Emerging Market Strategy:* The U of A continued the International Emerging Market Strategy (2012-2018) aimed at growing new student markets with high growth potential in Brazil, Chile, Kuwait, Tanzania, Kenya, UAE, Malaysia, Vietnam, Indonesia, and Singapore.
- *COLCIENCIAS AND CONICYT:* The U of A initiated new partnerships with COLCIENCIAS (the Administrative Department of Science, Technology, and Innovation of the Government of Colombia) and CONICYT (National Commission for Scientific and Technological Research in Chile) through the CALDO consortium. Both agencies annually sponsor hundreds of graduate students to study overseas.

- *University of Alberta Research Experience (UARE) Program:* In 2013-2014, 87 undergraduate students from top international universities are being placed in research internships at the U of A. The goal of the program is to recruit top students—either UARE participants themselves or those they influence on their return home—to the U of A for graduate studies. The goal for 2014-2015 is to place 100 students. The Canadian Embassy in Washington has identified UARE as a model for enhancing education collaboration. Key U of A partners, such as the University of Wisconsin-Madison, seek to further their relationship with the U of A by securing research placements for their students.
- *CALDO:* Responding to demand from other Canadian universities for membership, the U of A again led the expansion of CALDO to include up to 12 of the U15 institutions. This development will enhance the ability of CALDO to negotiate and build programs with key governments around the world that have significant scholarship programs to send students to Canada.

Other strategic initiatives and outcomes related to internationalization objectives are presented on pages 81-82.

Institutional Partnerships

The University of Alberta will continue to build partnerships with top-tier institutions in five priority countries: Germany, China, Brazil, India, and (regions within) the United States. At the same time, the U of A will also sustain and develop other partnerships outside these priority areas when an emerging opportunity also meets strategic goals, especially in the area of global citizenship. The U of A's ongoing relationship with the Aga Khan University is one such example. Here, our activities include curriculum development for fine arts, arts administration, nursing, health sciences, medical training, and teacher

education, as well as assistance in the development of an Aga Khan campus in Tanzania.

China

Since the 1990s, the U of A has endeavoured to build a relationship of respect and trust with China's top-tier education and research institutions, specifically Fudan University, Tsinghua University, and the Ministry of Science and Technology (MOST). The university has 60 active memorandums of understanding with Chinese universities, research institutes, and government agencies.

CIP 2013 selected updates and outcomes:

- *The 7th National PhD Students Conference on Environmental Sciences and Engineering at Tsinghua University:* The University of Alberta facilitated this October 2013 conference, which included presentations from 13 PhD students from five Canadian universities, among them four U of A PhD students.
- *Medical Sciences Graduate Program (MSGP) – Shantou University:* There are currently six PhD students registered in the MSGP-Shantou program, a joint PhD program between the U of A and Shantou University Medical College; six to nine new students are expected to register in the program in September 2014. A dual, four-year MD program with Shantou is now under discussion.
- *U of A Master of Financial Management – delivered in China:* Offered in partnership with Xi'an Jiaotong University in China, this master's degree is designed for individuals who aspire to fill leadership roles, such as VP finance, controller, treasurer, or chief financial officer, in large private and public sector organizations, particularly those with a global orientation. The first cohort of 29 students enrolled in Fall 2013.

- *Collaboration with Chinese Partners:* The U of A signed an MOU with Tsinghua University, Fudan University, Pasteur Institute (Shanghai) and Shanghai Medical College in December 2012. This MOU allowed the Chinese partners to apply for \$50 million from their Ministry of Education to fund collaboration among the four signatories to the MOU.

Germany

The U of A's association with German institutes, universities, and government agencies has matured extensively over the last 10 years. The current foundation of this relationship consists of a major research partnership with the Helmholtz Association of German Research Centres, member institution status in the Technical University of Munich's science and engineering graduate programs, research mobility programs with Bavarian universities in the areas of computing science and earth observation sciences, active exchange programs in the humanities and fine arts with Ludwig-Maximilians-Universität and Leipzig University, and the establishment of the sixth worldwide German Canadian Centre for Innovation and Research at the U of A. LMU and the U of A offer a jointly delivered doctoral degree program. The Faculty of Medicine & Dentistry continues bilateral exchanges with the University of Munich. Early-stage discussions have begun with German officials to explore attracting the Fraunhofer Institute and Leibniz Association to the U of A.

CIP 2013 selected updates and outcomes:

- *Ludwig-Maximilians Universität:* Dual-degree agreements have been reached with LMU in computing science, Earth and atmospheric sciences, and mathematical sciences.
- *e3 in Berlin:* Twenty-two U of A undergraduates enrolled in this program (formerly the "Berlin Summer School"), which started in 2013 and offers three education abroad

experiences: university credits in German language, a six- to eight-week internship placement, and an academic capstone course.

- *Alberta Saxony Intercultural Internship Alliance:* The U of A successfully secured Phase II of the Alberta Saxony Intercultural Internship Alliance (ASiiA) on behalf of Campus Alberta. Funded by the Government of Alberta, Phase II will see 50 students each year (25 from Alberta and 25 from Saxony) participating in research and industry internships in Alberta and Saxony.
- *Helmholtz-Alberta Initiative:* The Helmholtz-Alberta Initiative has added an Infectious Disease Research Program (HAI-IDR) to its array of research activities. The Research Consortium Agreement was signed in Germany at the Helmholtz Centre for Infection Research in Braunschweig. The main goal of HAI-IDR is to help develop preventative vaccines and treatments of liver disease caused by hepatitis B and C viruses. Funding in the amount of €600,000 per year for three years from the Helmholtz Association for the work of the German research partner has been approved. The funding for the Canadian research activities at the U of A is currently covered by the Li Ka Shing Institute but the funding is still under negotiation and final approval is pending. The submitted funding request for the U of A research portion is in the amount of \$950,000 per year for three years. Proposals to further expand HAI collaborations have been submitted in the areas of Terrestrial Ecosystem and Resource Informatics (HAI-TERI), a collaboration between the U of A Faculty of Science and German Aerospace Center DLR, and Neurodegenerative Disease (HAI-NDR) in collaboration between the university's Centre for Prions and Prion Folding Diseases and the German Centre for Neurodegenerative Diseases DZNE. Both German partner institutions are part of the Helmholtz Association of German Research Centres network.

Brazil

In 2010, the U of A identified Brazil as a strategic area for partnership. In 2011, the university joined with Laval University, Dalhousie University, and the University of Ottawa to create the CALDO consortium. CALDO signed agreements with Brazil's two premier funding agencies, the Ministry of Science and Technology's National Council for Scientific and Technological Development (CNPq) and the Ministry of Education's Federal Agency for the Support and Evaluation of Graduate Education (CAPES). These agencies administer scholarships with Brazil's Science Without Borders program, which is sending 75,000 fully funded students to study abroad.

CIP 2013 selected updates and outcomes:

- *Brazil's Science Without Borders*: Through CALDO's participation in Brazil's Science Without Borders scholarship calls, the U of A enrolled 98 fully sponsored graduate students in September 2013, with another 19 expected in January 2014. This adds to the inaugural enrolment of 61 SWB students in September 2012. These students are receiving doctoral training in the faculties of Arts, Augustana, Engineering and Science.
- *e3 in Brazil*: The e3 program launched in Germany in 2013 will be expanded to Brazil in 2014.
- *Tropi-Dry*: Tropi-Dry, a U of A-led collaborative research initiative with Mexico, Costa Rica, and Brazil, received \$900,000 from the Inter-American Institute for Global Change to continue research in Latin America until 2018. This initiative has provided student training, seeded technology innovations, and led to national policy changes during its first funding cycle.

- *Science Agreements*: The U of A is initiating joint degree agreements with the Federal University of Minas Gerais (Brazil), Technische Universität München (Germany), and University of Campinas (Brazil) in science disciplines.

India

In 2009, President Samarasekera launched accelerated strategic outreach in India, pursuing partnerships with India's universities, research institutes, and industries. Active research MOUs and exchanges currently exist in the domains of oil, gas, agriculture, and nanoscience, with the Indian Institute of Technology, Mumbai, and the Indian Institute of Science, Bangalore, as well as with industry leaders Tata Consultancy Services, Petrotech, and Oil and Natural Gas Corporation Limited, among others.

CIP 2013 selected updates and outcomes:

- *IC-IMPACTS*: The federally funded India-Canada Centre for Innovative Multidisciplinary Partnerships to Accelerate Community Transformation and Sustainability hosted its first industry partnership forum in India in 2013, a key milestone. Work has commenced on three joint projects with India collaborators at IIT Roorkee (IIT-R) and other institutions in India: a nanotechnology-enabled device for detection of harmful bacteria in drinking water, the conversion of masonry water infrastructure, and a handheld water pathogen detector.
- *IIT Roorkee and U of A Libraries*: At the invitation of the president of IIT-R, five librarians from the U of A visited IIT-R in November 2013 for a weeklong series of activities with library staff, faculty, and graduate students.

United States

The U of A's U.S. strategy, which has been underway since 2010, focuses on regions that complement the university's research activities, and advance recruitment and alumni objectives. Special emphases include increasing the number of visitors funded under the Fulbright Program, and defining roles for the U of A in influential U.S. university and policy associations.

CIP 2013 selected updates and outcomes:

- *Energy Strategy Program:* The U of A's Executive Education program is finalizing an Energy Strategy program in partnership with the McCombs Business School at the University of Austin, Texas, which is expected to attract international oil and gas middle-level managers.
- *Law Partnership with University of Oklahoma:* Discussions with the College of Law at the University of Oklahoma have begun, to define a graduate student exchange in the cross-border energy law field, which is an area of strength for the U of Oklahoma.

Programs for Global Citizenship and Readiness

To meet employer expectations in Canada and abroad, new graduates need the knowledge, skills, and understanding to function effectively in a global marketplace. As a result, students expect their university education to prepare them

well for international opportunities. To answer this need, the University of Alberta will continue to recruit faculty experts in the history, sociology, business, education, and economics of globalization, who are able to develop outstanding undergraduate and graduate programs in these areas. The U of A also offers credentials to enhance students' knowledge of these issues, including a certificate in globalization and governance, a bachelor of commerce major in international business, an MBA in international business, and various language programs.

CIP 2013 selected updates and outcomes:

- *International Baccalaureate Program:* The Faculty of Education developed a new International Master of Education in the International Baccalaureate Program, in collaboration with International Baccalaureate Global Organization (cost recovery).
- *International Professional Education:* The U of A continued to pursue special training and learning opportunities for international professionals from the public, private, and academic sectors. These activities advance the university's global reputation and relationship-building objectives.
- *Global Academic Leadership Development (GALD):* GALD was delivered to two cohorts of Chinese university administrators in 2013, allowing U of A to share its administrative expertise and best practices while generating revenue for the institution. The program was first delivered in 2011-12 and is expected to expand in 2014.

PROVIDING SOLUTIONS

IN 2007, WHEN CANADA'S CHALK RIVER REACTOR EXPERIENCED AN UNEXPECTED AND LENGTHY SHUTDOWN, ATTENTION WAS DRAWN TO THE FACT THAT CANADA IS ONE OF THE WORLD'S PRIMARY SUPPLIERS OF MEDICAL ISOTOPES—TINY NUCLEAR PARTICLES ESSENTIAL TO THE DIAGNOSES OF CANCERS AND OTHER DISEASES OF THE HEART AND BRAIN.

During Chalk River's shutdown, the global supply of medical isotopes was seriously in jeopardy. The incident heightened calls to seek an alternative supply before the aging Chalk River Reactor is fully decommissioned in 2016. With the construction and launch of the Medical Isotope and Cyclotron Facility in 2013, the University of Alberta has provided an answer.

Located on the university's South Campus, the Medical Isotope and Cyclotron Facility provides an innovative solution to the medical isotope shortage and supply chain issue. Operating with support from the governments of Canada and Alberta, the cyclotron produces non-nuclear, clinical-quality technetium-99m, an isotope used for 80 per cent of nuclear medicine diagnostic procedures. Not

dependent on a nuclear reactor, the cost-effective cyclotron technology is proven to be safe and reliable for patients.

Once fully operational in 2016, the Medical Isotope and Cyclotron Facility will not only advance the health of Albertans by ensuring a steady supply of isotopes, but also revolutionize the manufacture of medical isotopes for routine clinical use. Guided by the leadership of world-renowned oncologist Sandy McEwan, professor and chair of oncology at the U of A, the technology pioneered at the U of A with partner Advanced Cyclotron Systems Inc. is also being used by the Centre Hospitalier Universitaire de Sherbrooke. Additional cyclotrons are planned for Saskatoon and Thunder Bay.

OUTCOMES AND BENEFITS:

- Isotopes are used to complete roughly 60 million diagnostic procedures annually around the world, including almost two million in Canada.
- The U of A's cyclotron facility will help ensure Canada has a reliable supply of medical isotopes once the Chalk River reactor closes in 2016. About 15 to 16 cyclotrons of this kind located across the country could supply 95 per cent of the Canadian population with all the technetium-99m needed for medical diagnostic imaging.
- The non-nuclear technology pioneered here reduces radioactive waste and helps Canada meet nuclear non-proliferation goals.
- The final product is created from start to finish here in Alberta. Nuclear reactors like Chalk River produce a substance that has to be shipped and refined at other facilities in Ottawa and Boston before being distributed to health centres in lead containers.
- The Medical Isotope and Cyclotron Facility houses a new central radiopharmacy operated by Alberta Health Services.
- The production of medical isotopes is a multi-billion-dollar international business. Worldwide growth is expected to be one to four per cent over the next 10 years.

Research Capacity and Impact

PRIORITY: The University of Alberta is among the top public institutions that are internationally recognized for areas of excellence and impact across the breadth of discovery, innovation, and creative activities.

As a comprehensive academic and research institution, and as one of Alberta's two medical/doctoral institutions, the University of Alberta conducts research and offers doctoral programs across seven thematic areas: humanities and fine arts, social structures and systems, science and technology, energy, environment, food and bioresources, and health and wellness. Doctoral programs and post-doctoral training occurs in both the core disciplines and emerging cross-disciplinary fields that drive discoveries, innovation and impact in these domains. This full spectrum of inquiry positions the U of A's academy and its graduates to make the comprehensive contributions towards the scientific, social, and cultural innovations needed to support the objectives Alberta has set for itself: effective resource and environmental management, a broadened economic base, and resilient and healthy individuals and communities.

The U of A's research capacity is measured by the quality of its people and the quality of the physical, financial, and human infrastructure that enables them to have a significant impact in their fields. The U of A develops and sustains research capacity for Alberta by allocating resources for recruiting and retaining faculty members, investigators, and specialized non-academic staff; attracting and supporting graduate students and post-doctoral fellows; providing equipment, resources, and infrastructure for individual faculty as well as multi-user and multi-team activities; supporting centres, institutes, and collaborative initiatives within the institution and in partnership with other provincial, national, and international institutions; operating core research resources, facilities, and platforms for the region; and undertaking capital infrastructure development to meet the evolving needs of research and to pursue new avenues.

Assessing and Enhancing Impact

Sponsored research revenue is one metric of research quality and impact. The U of A's 2011-2012 total sponsored research funding was \$460.1 million, a decrease of 15 per cent from the 2010-2011 level of \$536 million. This is a reversal of a seven-year trend of increasing research income. The U of A currently ranks fifth among U15 Canadian universities in total sponsored research income and fourth in sponsored research income per full-time teaching faculty member. Figure 10 data show the 2010-2011 and 2011-2012 details: a \$64-million decrease in government sponsored research (which includes capital research projects); a \$17-million decrease in donation, investment, and other income for research; a \$3-million decrease in Tri-Council funding; and an increase of \$0.8 million in non-government grants and contracts.

The decrease in government sponsored research revenue is due in part to a \$26-million decline in capital projects research funding, historically included in the U of A's research revenue, and approximately a \$28-million decline in sponsored research funding received from provincial ministries and the Alberta Innovates corporations. The U of A continues to make increased Tri-Council and international funding an institutional priority, and addressing this unprecedented decline is a key focus. To this end, the Grant Assist Program has been established to enhance the quality of institutional research proposals in key national competitions. However, it is also imperative that the province play its role in funding U of A research and providing investments needed to leverage national and international funding programs.

The awards and honours received by our faculty are a second indicator of excellence and impact. Such awards and honours reflect both the quality of the professors recruited and retained, and the quality of the environment and opportunities that the U of A provides. The U of A benchmarks its progress in recruiting and supporting exceptional scholars, using faculty awards and honours as

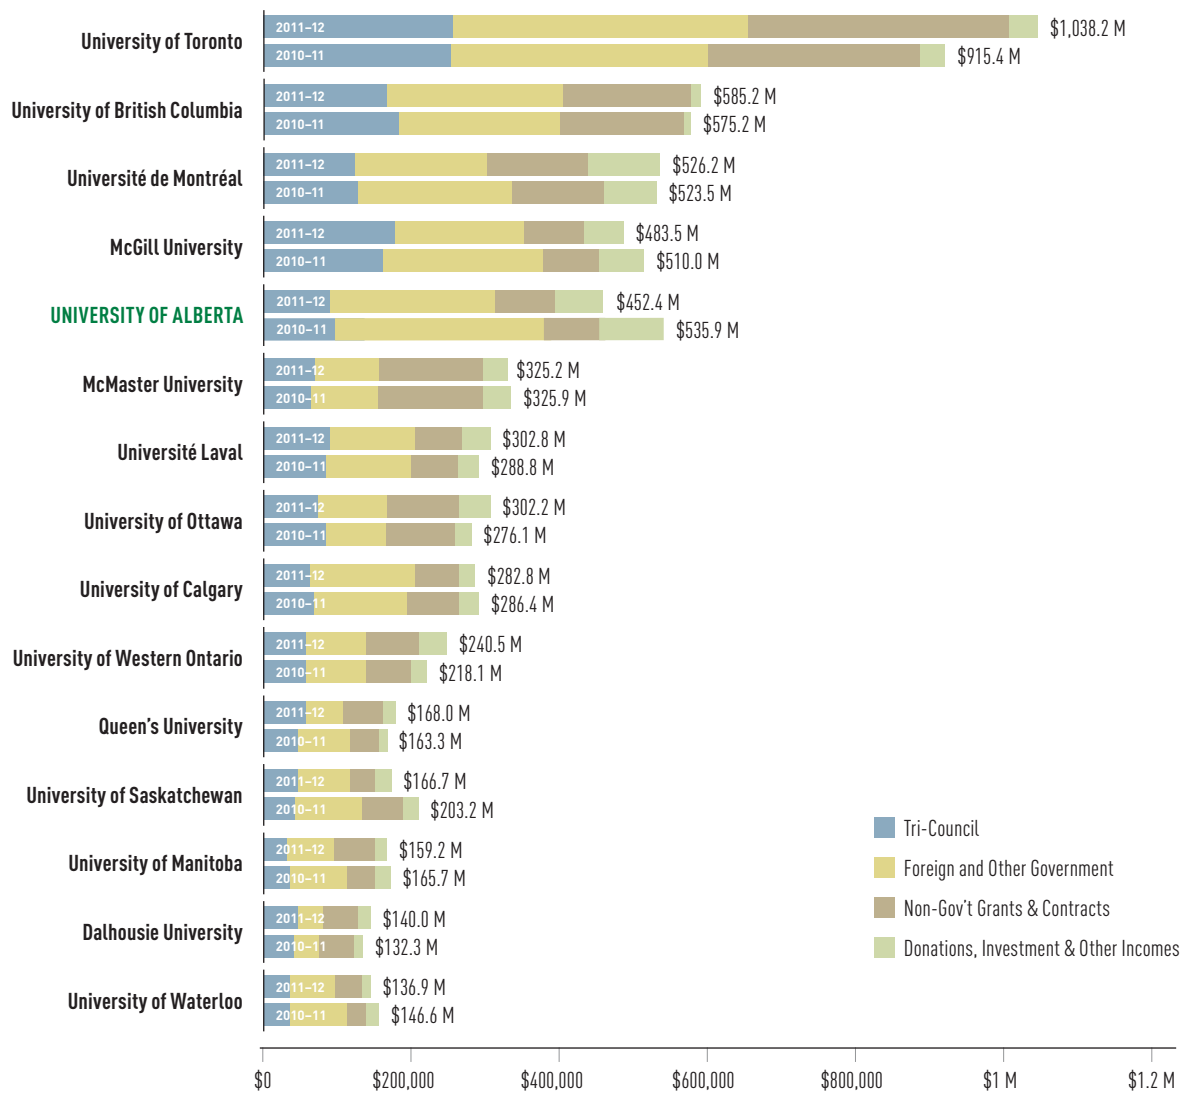

a proxy against a target peer group of Canadian and U.S. institutions. The U of A works to ensure that achievements of its professoriate are recognized by distinguished groups, and celebrates that recognition when it occurs.

U of A faculty received several notable national and international research awards over the past year. Examples include Jeffry Pelletier, recipient of the Alexander von Humboldt Foundation's Anneliese Maier Research Prize, and Robert Nichols, recipient of a Humboldt research fellowship; Michael Houghton, awarded the Canada Gairdner International Award (declined for personal reasons); Cindy Jardine, Canada-U.S. Fulbright Award recipient, and Julianne Gibbs-Davis and John Davis, recipients of Sloan Foundation Research Fellowships. Marcello Tonelli received a CIHR-Canadian Medical Association Journal award for discoveries and innovations with the biggest impact on the health of people in Canada and around the world, and Lorne Babiuk and Witold Pedrycz were awarded Canada Council for the Arts Killam Prizes for career research achievements. Four faculty members were elected as Fellows of the Royal Society of Canada, three to the Canadian Academy of Health Sciences, and one to the Agricultural Institute of Canada. Clare Drake and David Magee were inducted into the Order of Canada.

CIP 2013 selected updates and outcomes:

- *International Development Research Centre (IDRC):* The U of A is the Canadian lead for three major international projects funded by IDRC research grants totalling \$7.1 million.
- *Centre of Excellence in European Union Studies:* The European Union designated the U of A as a Centre of Excellence in European Union Studies, with funding amounting to \$450,000.

FIGURE 10 U15 SPONSORED RESEARCH INCOME BY TYPE

Notes: Income from Tri-Council includes: Social Sciences and Humanities Research Council; Natural Sciences and Research Council; and Canadian Institute of Health Research (CIHR). Other Government income reflects income from all government departments and agencies - grants and contracts, less Tri-Council and includes foreign government income. Donations, non-government grants and contracts, and investment and other incomes, are reported in each respective category on the CAUBO report. Université de Montréal includes École Polytechnique de Montréal and HEC Montréal. **Sources:** Canadian Association of University Business Officers (CAUBO): Financial Information of Universities and Colleges 2010-2011 and 2011-2012, Report 3.1.

- *The Alberta Land Institute (ALI)*: ALI was officially launched in Calgary in September of 2012. Support for ALI was solidified in 2012-2013 and 2013-2014 with the securing of an additional \$1.1 million. Further philanthropic opportunities were also identified.
- *Oxford Medical School*: Oxford Medical School is partnering with the U of A's Faculty of Medicine & Dentistry on a joint research fellowship/PhD training program in diabetes and transplantation sciences.

- *Agricultural Policy Research Networks*: The U of A is home to four nationally funded agricultural policy research networks in Canada.

Citations of research published by faculty and benchmarked against comparator research universities are another indicator of excellence and impact.

FIGURE 11 PERCENTAGE OF FULL-TIME FACULTY RECEIVING SELECTED AWARDS AND HONOURS, UNIVERSITY OF ALBERTA AND SELECTED PEERS, 2001 TO 2011

Note: Data are the most recent available. Awards include: 3M Teaching Awards (2001-2011), American Academy of Arts and Sciences (2001-2011), CIS Coach of the Year Award (2001-2011), Federal Tri-Council Highest Awards (2001-2011), Fulbright Scholars (2001-2011), Guggenheim Fellowship Awards (2001-2011), ISI Highly Cited Researchers (inception-2011), Killam Research Fellows (2001-2011), Molson Prize (2001-2011), National Academy of Engineering (2001-2011), National Academy of Sciences (2001-2011), Nobel Prize (inception-2011), Royal Society of Canada (2001-2011), Royal Society of Canada Awards (2001-2011), Royal Society of London (2001-2011), Sloan Research Fellowships (2001-2011), Steacie Fellows (2001-2011). Sources: Award data from individual awarding organizations. Faculty counts based on Statistics Canada: Salaries and Salary Scales of Full-time Teaching Staff at Canadian Universities, 2001-2002 through 2010-2011: Final Reports.

FIGURE 12 CITATIONS IN ALL FIELDS PER AVERAGE FULL-TIME FACULTY, UNIVERSITY OF ALBERTA AND SELECTED PEERS

Notes: Staff figures represent averages for the reported years. 2012-13 staff figures are not available. Historical citation data has been updated from previous versions. Data is accurate as of August 2, 2013. **Sources:** InCites TM, Thomson Reuters.(2012). Global Comparisons, 5-year trends. Canadian university faculty counts based on Statistics Canada: Salaries and Salary Scale of full-time staff at Canadian Universities Reports and U15 data exchange. US university faculty counts based on their respective Common Data Sets for each respective year.

Graduate Students and Post-doctoral Fellows

Graduate students and post-doctoral fellows often form the core of research teams working on complex research projects, creating strong links with private and public sector partners. Because of the level of knowledge and skill graduate students and post-doctoral fellows possess, professors can pursue large-scale, visionary, and sometimes risky research agendas—agendas that may have the greatest potential for producing major discovery and innovation. Thus, top faculty members seek to join institutions with a reputation for attracting strong graduate students and post-doctoral fellows, who in turn are a key mechanism for knowledge transfer, thereby greatly increasing the U of A's capacity to pursue projects with government, local communities, and Alberta's private sector. The contribution of these research teams' energy and intellectual capacity to the U of A's learning, teaching, and discovery mandate—and to the region as a whole—cannot be overstated.

Training post-doctoral fellows is a core mandate of a medical/doctoral research university, and PDFs are essential team members in the university's discovery and innovation activities. The percentage of post-doctoral fellows to full-time continuing faculty continues on an upward trajectory, increasing from 23.8 per cent in 2010-11 to 28.1 per cent in 2012-2013. Direct and indirect costs associated with PDFs are not included in the university's Campus Alberta Grant, because these individuals are not counted as either staff FLEs or student FLEs. The majority of post-doctoral fellow support comes from external sources. The U of A continues to build partnerships and opportunities that will deliver direct support to increase the post-doctoral fellow cohort from 700 to 1,000. However, the indirect costs of PDF training are not reflected in the U of A's operating budget, creating a challenge for achieving these targets.

CIP 2013 selected updates and outcomes:

- *Graduate Programming Quality*: An internal review and assessment of institutional strategies and operations for graduate education structures, systems, and programming was completed. From the recommendations, a number of changes have been implemented, including the establishment of a framework for graduate program quality, and more efficient oversight procedures for various graduate student matters were delegated to the departments or faculties.

Strategic Issues and Priorities

- As outlined in the access and enrolment section, the U of A will continue to reallocate positions from undergraduate to graduate programs where demand and opportunity emerge, while continuing to ensure that the academy meets the demand for its excellent undergraduate programming. This objective is challenged by fiscal constraints and funding models that do not capture the full cost of post-graduate medical/doctoral training.
- The U of A is exploring the inclusion of multi-year financial support packages with offers of admission to graduate programs, to increase the acceptance rate of our offers to top applicants. The U of A will honour commitments to current graduate students, but large faculties anticipate a significant cut in graduate admissions for 2014, with some disciplines accepting no new graduate students.
- Two objectives hinge directly on the U of A's ability to provide competitive graduate student support: the recruitment of the best domestic and international graduate students, particularly in competition with other Canadian institutions, and the ability to sustain graduate training in areas of institutional strength across all disciplines.
- Programming initiatives to prepare graduate students for non-academic careers remains a priority, subject to the availability of internal resources at the department and

faculty level to design and execute such initiatives. While the U of A continues to work with external providers of generic professional development seminars, there is a pressing demand from graduate students for training and recognized credentials that will enhance their academic knowledge and create professional capacity for the public and private sectors. A working group has been struck to develop solutions to these issues.

- The U of A continues with organizational transformation of graduate admissions and oversight, as followup on the 2012-2013 assessment.

Competitive and Well-Managed Research Resources

The University of Alberta acquires, sustains, and operates highly specialized and diverse research resources, facilities, and services that support discovery, translational, and pre-commercialization research activities. The U of A also provides the platform for regional development and the attraction of external private sector interests in biomedical, medical, livestock, and health sectors. These core research resources, facilities, and services support work undertaken with and on behalf of private and public sector stakeholders to advance the research priorities of the province.

There are other institutional core facilities (e.g., libraries, animal care facilities, research stations, specialized instrumentation units) that evolve not directly through infrastructure programs such as the Canada Foundation for Innovation, but as a natural requirement of the university's research and training enterprise. The quality of these facilities also contributes to and determines the quality and functionality of Alberta's overall research and innovation capacity. The ongoing operation of these broadly used facilities is a substantial operating expense for the university, one that is not covered by indirect costs of research or external research funding. The effective and competitive oversight of these resources ranges from the need for upgraded research computing infrastructure

to the need for sophisticated biosafety hazard facilities to full-time staff to support advanced biomedical and translational health research.

Canada, like other nations, has established federal programs, such as the Canada Foundation for Innovation, to ensure that it has globally competitive research and innovation infrastructure. Much of this infrastructure resides within Canada's research-intensive universities, where exceptionally skilled graduates are trained and advance discovery and innovation, often in partnership with external partners. The U of A's success in acquiring these resources depends solely on the excellence of its researchers and to date, we have been very successful in securing federal funding to obtain globally competitive research infrastructure. Federal funding agencies follow a strategy of partial, short-term operating funding, with the expectation that the receiver of infrastructure (i.e., the universities and their respective provinces) will assume responsibility for direct operating costs beyond this period. With success in acquiring such infrastructure, the university indirectly adopts responsibility for its long-term operation through highly specialized staff and other sustainability requirements.

Strategies

The U of A will work with the Ministry of Innovation and Advanced Education to develop a transformed funding and financial model that directly accommodates the direct operating costs of the institution's research enterprise and the platforms it offers for Alberta's advanced research, innovation, and technical services needs.

To be more efficient with limited internal resources, the U of A will continue to pursue strategies that lead to the consolidation of infrastructure capacity and human skills around core facilities, in cases where it makes sense to do so.

Faculties and departments will re-evaluate their business models and fee structures for external client use of facilities and services that fall outside of collaborative research agreements.

Advancing Alberta's Innovation Ecosystem

The quality and diversity of the University of Alberta's research capacity—consisting of globally competitive people and a globally competitive environment for discovery and creative activities—is one contributor to Alberta's innovation ecosystem. Knowledge transfer and commercialization initiatives remain institutional priorities. The U of A will continue to seek and develop long-term collaborations with municipal, provincial, national, and international partners; develop entrepreneurship and internship programs for students and professional development programs for Alberta's private sector; and aggressively pursue national and international funds to ensure that Alberta has the advanced infrastructure platforms required for innovation. The U of A will also support and champion opportunities that leverage its existing research capacity in ways that will support new economic engines for the province.

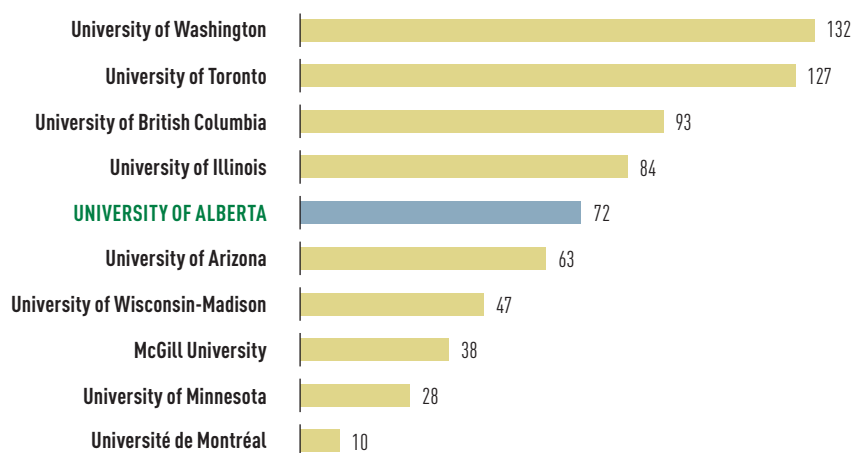

Key updates and outcomes since the 2013 CIP include the following.

- *TEC Edmonton*: In 2013, TEC Edmonton was named the 17th best university business incubator in the world—and the top Canadian incubator—by the University Business Incubator Index, a global index assessing and benchmarking the performance and best practices

of university business incubators. This assessment is based on 10 benchmark indicators and 50 performance indicators, including value delivered to the local economy, value to startup company clients, and post-incubator performance of startup companies.

- *Medical Isotope and Cyclotron Facility*: In 2013, the U of A opened the Medical Isotope and Cyclotron Facility at the south campus. This facility houses a \$28-million cyclotron research and production facility that will produce clinical-quality technetium-99m, an important isotope used for 80 per cent of nuclear medicine diagnostic procedures for patients across Alberta and Canada with cancer, cardiac, neurological and other diseases. It is expected that the facility will be in full production in the second quarter of 2014, a development that will help ensure that the country has a reliable supply of medical isotopes to fill the void resulting from the 2016 closure of the Chalk River reactor.
- *Smart City Alliance*: The U of A has joined St. Albert, IBM, Cisco and NAIT to advance the “Smart City” perspective in our region. The short-term objective is to enable communities and multi-sector partners to recognize opportunities for applying advanced communications technology and data analytics to identify and solve basic

FIGURE 13 CONTINUING SPINOFFS 1991-2012

Notes: Startups still in operation reflect companies started at any time during the report period that are still in operation as of the most recent AUTM Licensing Survey. **Source:** AUTM Licensing Surveys.

urban issues. The long-term objective is to accelerate the application of Smart City solutions and reduce time to market, where possible, of related technology applications. This alliance will leverage the U of A's activities in science and technology (advanced urban engineering systems, computing science) and in social structures and systems (city-region development, urban planning).

- *Metabolomics*: The U of A remains very interested in pursuing the provincial Metabolomics Initiative submitted to government.

Areas of Capacity and Alberta's Priorities

The University of Alberta takes a lead role in supplying Alberta with the research capacity it requires to achieve the continued and improved social well-being of its citizens, especially within a global context. Three of these objectives, as identified in the 2012 *Alberta Research Innovation Plan*, are the following.

- *Effective Resource and Environmental Management*: Manage the cumulative economic, social, cultural, and environmental effects of past, present, and foreseeable land-use activity associated with developing all of Alberta's natural resources through advances in identifying and understanding the complex environmental and social considerations for informed land use; defining appropriate analytic methods and data collection protocols to be developed with economic, social, and environmental risk assessment as a central component; developing and deploying advanced technologies to measure and mitigate cumulative effects; and understanding the complex interplay of social, cultural, economic, and environmental factors that determine the consequences of environmental and resource management decisions.
- *A Broadened Economic Base*: Develop a bioeconomy that transforms the province's biological resources into new sources of energy, new industrial sectors and value-added products, and new economic opportunities for rural communities and producers.
- *Resilient, Healthy Communities*: Provide individual Albertans and communities with effective, inclusive, and

accessible structures and systems for health services, education, and cultural engagement so that they can embrace regional and global changes and opportunities.

The sections below present brief descriptions of the U of A's activities in its seven thematic areas, and their alignment with Alberta's priorities. Appendix 8 presents details on areas of research capacity, including the federally, provincially, and privately funded research chairs; strategies for enhanced capacity and outcomes; intended areas for infrastructure capacity investment; and research capacity funding gaps.

HUMANITIES AND FINE ARTS

Humanities and fine arts scholarship and creative activity advances clarity, insight, and understanding about cultural development and interactions, historical influences and contexts, awareness and construction of meaning, and the multiple media and creative activities that individuals, societies, and cultures use to express themselves and their ideas.

Impact on Alberta: Alberta's vision for healthy and resilient individuals and communities has identified culture, community engagement, and "inclusion" as central areas of concern. U of A research capacity enables these topics to be framed and understood within the 21st-century context of increasing globalization, expanding digital information technologies, and shifting social and cultural values. Strong capacity exists in the history and culture of key international regions, including China, Japan, Ukraine, Africa, and central Europe, as well as of Canada's First Nations. Excellence in humanities computing spans the study and dissemination of philosophy, literature, women's and gender studies, gaming, and fine arts. Humanities research capacity also anchors some of the institution's new international activities. With the 2013 award of a Centre of Excellence in European Union Studies by the European Commission, the U of A is well positioned to advance social, cultural, and economic opportunities that emerge through new relationships between Canada and the EU. Humanities scholars also collaborate with Alberta ministries on a number of cross-disciplinary projects explore the intersection of arts and culture, community engagement, health, environment, and education.

Fine arts scholarship and creative activity at the U of A enriches the cultural environment of Alberta's capital region, and drives the cultural and artistic economic sectors. The university's investment in this area includes the Timms Centre for the Arts, the Camrose Performing Arts Centre, FAB Gallery, and Convocation Hall. The U of A also contributes through ongoing interactions with symphonies, theatre companies, the Edmonton Fringe Festival, the Works, and the Art Gallery of Alberta. There will be continued investment in partnerships with the City of Edmonton and the Edmonton Arts Council, and in activities undertaken within centres and institutes focused on francophone heritage, central and eastern European cultures, China, and Japan. Securing enhanced facilities for music performance remains an institutional priority.

Social Structures and Systems

Social sciences advance understanding of how social structures, institutions, and systems evolve, act, and interact to influence the behaviour, effectiveness, and well-being of individuals, groups, regions, and nations. Society's changing educational, political, economic, and legal objectives are realized through advances and innovations in its social structures and systems. The U of A has a strategic priority to foster collaborations with all of Alberta's ministries, the public sector, and non-governmental organizations to enhance the quality of life in our society.

Impact on Alberta. Alberta's research agendas for managing cumulative effects of resource development and for developing a bioeconomy identify notions of "social licence," corporate responsibility, community resiliency, and engagement as central challenges. The U of A provides broad socio-economic research capacity for addressing these complex challenges. This capacity can inform policy and program development related to areas such as market-based instrument programs for the provision of natural resources such as water; land use; community response to climate and population change pressures; and the collaborative community management and use of natural resources. In 2013, the U of A recruited an international scholar to hold the CAIP Research Chair in Innovation Policy and Technology Translation, with special focus on water and energy. Research capacity in professional learning, communities of practice, and lifelong learning also directly addresses the labour and workplace needs

of both urban and rural communities. Establishing new facilities to support research and teaching in finance and accounting, organizational behaviour, corporate structures, and other areas of business is an institutional priority.

The U of A is the lead institution for the multidisciplinary CIHR Alberta Network Environments for Aboriginal Health Research, which assembles professionals in Aboriginal health care, education, public health, sociology, nursing, and nutrition. As well, the U of A's Aboriginal Health and Education initiative investigates culturally appropriate health care and services, and indigenous approaches to health service and delivery issues.

Research capacity in social theory and socio-legal studies has been enhanced through a Canada Research Chair appointment. Health law and science policy continues as an institutional strength and contribution to federal initiatives on personalized medicine technologies.

SCIENCE AND TECHNOLOGY

The U of A sustains and develops expertise and impact in the natural and physical sciences, engineering, human behavioural sciences and neurosciences, mathematics and statistical sciences, computing sciences, nanoscience, and nanotechnology. The U of A aims to lead and to participate in national and global efforts aimed at advancing fundamental discoveries, particularly in domains such as space sciences and physics, which require the intellectual resources of multiple nations and institutions.

Impact on Alberta. The U of A's ability to lead and participate in multinational "big science" efforts in areas such as space sciences, climate change, and physics contributes to Alberta's intellectual reputation and global impact, and creates scientific and engineering training opportunities for Alberta students at the most elite science installations across Canada and the world (e.g., CERN). The U of A's capacity is also well established in provincial priority areas of nano, ICT, and "-omics," which serve as platform sciences for innovations in education, health, the bioeconomy, and sustainable energy and environment.

The U of A will continue to partner on initiatives in data analytics, identified as a strategic priority for Alberta

Innovates - Technology Futures. The IBM-Alberta Center for Advanced Studies connects U of A researchers and industrial partners to advanced data analytics research for health analytics, Earth observation sciences, resource geosciences, and drug design. Theoretical and applied mathematics and statistics serve as additional “platform” disciplines that enable advances in these areas as well as in economic and social modelling, business and finance, and industrial analytics. The university’s capacity in next-generation modelling methods, sciences, and technologies for environmental and natural resource applications (e.g., exploration, prediction, and monitoring) supports collaborative research projects with several Alberta ministries and with international partners in Germany and Brazil. Work in human cognition and behaviour contributes to evidence-based policies and practices for enhancing child and family development, developing innovative educational technologies, and diagnosing and treating neurological disabilities, diseases, and disorders, especially related to aging. These broad topics and related ones are signalled as priority concerns by different ministries in their respective strategic plans, and U of A researchers, graduate students, and post-doctoral fellows continue to work with those ministries on a number of initiatives.

ENERGY

The U of A’s cross-disciplinary and cross-sector energy research addresses all aspects of conventional and non-conventional energy development and distribution, environmental sustainability, and economic analysis, market instruments, and policy.

Impact on Alberta. Much of the U of A’s sustained and continued growth in energy research advances the broad objective of sustainable energy and environment, especially in areas of water usage, treatment, quality, and supply. The integration of disciplines to advance discovery and innovation for sustainable energy is a key strength at the U of A. This is reflected in deep and broad capacity in chemical engineering; materials sciences; chemistry, nanoscience, and molecular biology; legal and economic policy analysis; land use impact; and advanced ICT. This collective capacity supports the Government of Alberta’s resource stewardship objectives, and specific challenges identified by Alberta Innovates – Energy and Environment Solutions, such as reducing or eliminating the use of

water and tailings ponds in oilsands processing; effectively treating existing waste water and tailings ponds; developing science and technology for improved waste water quality in the future; addressing socio-economic issues arising from the cumulative effects of resource development; and analyzing policy for market-based approaches to land use, for environmental regulations, and for water use. Research capacity in energy was enhanced through recruitment of an international scientist to the Alberta CAIP Research Chair in Enhanced Geothermal Energy Systems. The U of A’s strength in energy research is the foundation for its international partnerships in Germany, China, India, and increasingly Brazil, which furthers Alberta’s goals for global interactions and connections with international industries. The U of A’s Water Initiative focuses on water use and reuse in natural resource exploration and processing as one of its three thematic areas of focus.

ENVIRONMENT

Environmental research advances scientific understanding, advanced analytic techniques and technologies, and best practices that are collectively required to sustain healthy ecosystems of water, air, plant, and animal life. It also examines the interaction of ecosystems with the physical health of individuals and the socio-economic health of communities, especially in response to both natural and human-induced pressures.

Water quality in non-urban communities is one of the three theme areas of the university’s Water Initiative. Water quality outside of urban centres affects the economic and social sustainability of Alberta’s small communities, and has an impact on recreation and tourism. This focus is driving both local and global projects that integrate the U of A’s capacity in public health and environmental chemistry, engineering, and cultural and social systems. The U of A has increased its capacity, and recruited a leading scientist from outside of Canada, through its 2013 nomination of an Alberta Innovates - Health Solutions Translational Research Chair in water and public health. Another 2013 international recruit is filling an industry-sponsored chair in water resources. This capacity supports Alberta’s priorities and objectives for healthy and resilient communities, and for informed environmental stewardship policies.

FOOD AND BIO-RESOURCES

Research in food and bio-resources is directed at discovering and applying the knowledge necessary for developing sustainable bio-economies; enhancing the health qualities of food and the resilience of crops, plants, and forests in response to human and climate-induced pressures; and addressing agribusiness sector challenges in food safety and animal health.

Impact on Alberta. The U of A's capacity in food science, food production, and the bio-economy—bioproducts, biomaterials, and bioenergy—creates the knowledge base for achieving provincial economic diversification. This capacity is built on depth in disciplines that include genetics, food and soil sciences, molecular biology, nanotechnology, and resource economics. The U of A is home to four nationally funded agricultural policy research networks in Canada. Integrated research in petrochemicals, nanoscience, biochemistry, proteomics, and systems biology is leading to the development of value-added products from the waste produced by wood, plants, and crops. New public and private sector research funding is accelerating the work to convert animal fats and crop seed oil into hydrocarbons, solvents and high-value chemicals. The development of a nano-enabled biomaterials program, leveraging the facilities and capacity at the National Institute for Nanotechnology, represents a significant new trajectory for Alberta's bio-economy.

Nutrigenomics and plant genetics research are advancing the food value of crops and their resistance to drought and disease. Much of the U of A's food and bio-resource research is done in collaboration with industrial partners from the agribusiness sectors and ministries, and includes a strong commercialization component. The future of Alberta's water supply is one of the three thematic areas of focus within the university's Water Initiative. Southern Alberta's agricultural and food production regions are currently affected by climate- and human-induced (e.g., population growth) stresses on water supply, and these stresses are predicted to increase over the coming decades. U of A cross-disciplinary capacity in sustainable agriculture, socio-economic analysis, and climate change supports Alberta's decision-makers in developing effective policies that will help sustain these regions and communities.

HEALTH AND WELLNESS

The U of A undertakes a fully integrated approach to human health and wellness research and training, one that addresses the full spectrum of human health determinants, including clinical factors and predispositions, socio-political and economic environments, and individual characteristics and behaviour. Activities advance and integrate discovery research, translational research, and clinical research across medical and life sciences, health professions, computing sciences, economics and law, nanoscience, engineering, and technology assessment.

Impact on Alberta. The U of A has developed health research expertise and reputation primarily around a small set of health and wellness concerns (e.g., chronic diseases, cardiology, oncology, infectious diseases, mental health, and special populations), with significant capital and operating investment in facilities for medical research, clinical research, and advanced clinical treatments. Translational research and knowledge transfer is supported by key partnerships with Alberta Health Services; a large complement of clinical research staff; expertise in social, cultural, environmental, and population health influences on individual and community health; biomedical engineering; and patient management and care. The Edmonton Clinic Health Academy supports institutional and provincial objectives for inter- and intra-professional health and wellness research and training.

U of A researchers and facilities advance initiatives and objectives set by Alberta Innovates - Health Solutions and Alberta Health Services, from improved health delivery systems to personalized medicine to Strategic Clinical Networks (SCNs). U of A faculty members are serving as medical directors or scientific directors of several of the SCNs within Alberta Health Services. In 2013, research chairs established in conjunction with Capital Health and AIHS increased capacity in the following areas of provincial priority and institutional strength: transplantation, psychiatry, cardiac sciences, primary care research, family medicine, oncology, and women's health research. The U of A's five-year contract to serve as one of 11 evidence-based practice centres with the U.S. Agency for Healthcare Research and Quality will connect external expertise and capacity with Alberta stakeholders and issues.

The Digital Environment

PRIORITY: The University of Alberta has secure information and communications technology infrastructure and systems that support research, creative activities, and digital learning technologies and pedagogies to enhance the on-campus, in-class experience and online learning environments.

Information and computing technologies infrastructure at the University of Alberta is complex. It includes networks that connect buildings and campuses, wireless services, and additional specialized local networks. This infrastructure is the foundation of the U of A's digital environment, supporting academic, research, and administrative requirements, and facilitating administrative efficiency and innovation.

Advances in information and communications technology, especially in the arena of mobile computing, continue to transform learning environments. The U of A has offered innovative and popular digitally supported programs off campus for some time, specifically physical therapy satellite programs in Calgary and Camrose. These programs were initiated to help deal with the supply and demand for therapists that have occurred in rural and southern Alberta. Individual units across campus have both developed and deployed advanced teaching and learning technologies for specific student audiences and outcomes, notably in medicine.

In 2012, the U of A began to engage more aggressively at the institutional level in developing and expanding the use of advanced learning technologies and their related pedagogies in undergraduate and graduate education. Although the focus of current media attention is online learning, opportunities for innovation go well beyond teaching to include research in education (pedagogy, instructional delivery techniques, learning outcomes assessment), computing science (adaptive learning experiences, automated assessment, collaboration tools, security), humanities (analysis of privacy, collaboration, ethics), business (case study analysis, market trends, analytics) and preservation (research data management, digital preservation). These are the areas in which the U of A is expanding its engagement in the digital environment.

CIP 2013 selected updates and outcomes:

- *Dino 101*: The world's first online paleobiology course was launched in 2013 and lauded in international media as one of the best examples of sophisticated, interactive MOOCs that currently exists. More than 20,000 individuals have registered for Dino 101. This course was also delivered internally as a fully online version and as a blended delivery version of a 200-level science course to 450 and 50 students, respectively. This work provides important benchmark data on high-quality online learning investments.
- *Synchronous Learning Environment*: The U of A is implementing a cross-university synchronous learning environment that allows for real-time, online instruction to support blended learning initiatives
- *Aboriginal Teacher Education Program*: The blended/online delivery version of Curriculum and Instruction in Elementary Music was delivered to the Aboriginal Teacher Education Program (ATEP) cohort in the Spring 2013 session. The implementation of music education courses to remote communities has been logistically

difficult in the past. The new blended/online version was successfully implemented and well received by students. The ability to deliver high-quality blended/online courses to very remote rural communities is critical to the future success of ATEP.

- *Education courses*: Blended delivery versions of four existing education courses were launched. Annual enrolments in these courses range from 400 to more than 900.
- *Blended delivery*: Quantitative and qualitative assessment strategies are in development for all current and future blended delivery and fully online courses.

Pending the availability of resources, the U of A will complete its planned three-year development and assessment work in e-learning, and evaluate the effort in terms of learning, teaching, and efficiency outcomes.

See Appendix 10 for details on selected e-learning and digitally supported teaching and learning activities across U of A campuses.

Access and Programming Measures

QUALITY

- admissions averages
- application to registration yield
- ratios of undergraduate to graduate students, professors to all students, professors to graduate students
- student satisfaction

THE LEARNING ENVIRONMENT

- participation rate in Centre for Teaching and Learning programming and number of Teaching and Learning Enhancement Fund applications
- number of national teaching award recipients
- student satisfaction
- number of rural and francophone students
- number of Aboriginal students, faculty, and staff
- number and diversity of international students
- retention and completion rates for undergraduate and graduate students

STUDENT EXPERIENCE AND ENGAGEMENT

- application, admission, and registration yields
- retention and completion rates
- student satisfaction
- average financial support for students
- number of funded internship and undergraduate research opportunities
- number of study abroad and international internship opportunities

INNOVATIVE PROGRAMMING

- number of new programs approved or implemented
- application, admission, and registration yield rates

CONNECTIONS AND COLLABORATIONS

- number of new collaborative partnerships each year
- participation rates in internship and study abroad programming

Access and Programming Strategies and 2013 Outcomes

QUALITY

Strategies

- Attract and retain outstanding students.
- Provide foundational support structures for students to create positive student experiences and engagement.
- Recognize and celebrate student accomplishments.
- Maintain a system of quality assurance processes and mechanisms to ensure the programs offered by the University of Alberta are of the highest quality.

Selected Outcomes

- In 2013, a U of A student received one of 10 prestigious 3M National Student Fellowships.
- Two more U of A professors received 3M National Teaching Awards in 2013: Kim Fordham Misfeldt (Augustana) and Heather Zwicker (Arts).
- The CCIS Career Centre hosted U School participants for three weeks. The U School program was initiated by the University Senate in order to introduce and connect Grade 4 through Grade 9 students to the U of A.
- Student Connect, the new Office of the Registrar student service centre, was formally launched in Summer 2013.
- A new visiting committee model for faculty review and renewal will be piloted at the U of A in 2013.
- The writing centre at Campus Saint-Jean has had an increase of approximately 15 per cent in the number of visits and number of students taking advantage of the centre.
- Dozens of the university's finest students, teachers, and researchers were recognized at the annual Celebrate! ceremony in September 2013. Those recognized include:
 - Henry Su, Engineering, winner of the President's Centenary Citation, awarded to students entering an undergraduate program from high school on the basis of superior academic performance
 - Megan Engel, Rhodes Scholar
 - Ten winners of the Vanier Canada Graduate Scholarships
 - David Percy, Law, winner of the University Cup, the highest honour bestowed on a member of the academic staff

THE LEARNING ENVIRONMENT

Strategies

- Ensure a high level of teaching quality.
- Ensure a diversity of students and faculty.
- Ensure the development and maintenance of quality formal and informal learning spaces.
- Enhance the digital environment and online presence of the institution.

Selected Outcomes

- Provost's Fellow and professor in the Faculty of Agricultural, Life and Environmental Sciences Naomi Krogman is completing a report and recommendations on the quality of graduate student supervision at the U of A.
- The Faculty of Medicine & Dentistry has developed a new Diversity Policy, targeting students from rural Alberta, students from Aboriginal backgrounds, and students from lower socio-economic backgrounds.
- The Faculty of Education has launched a student and faculty Diversity, Equity, Respect Climate survey. In addition, the faculty established the Stephen and Lynn Mandel Graduate Scholarship in Sexual and Gender Minority Studies, the first lesbian, gay, bisexual, trans-identified, or queer-specific graduate scholarship in the history of the U of A.
- The Faculty of Native Studies has created an online social media presence for the faculty, including Facebook and Twitter.
- In 2013, the Festival of Teaching evolved from a three-day event to a year-long series of events across the institution. The Festival of Teaching theme for 2013 was "Teaching Moves," highlighting the action of teaching, and the various ways in which teaching practices and teachers continuously evolve, pushing traditional boundaries while always striving to motivate, inspire, and move students.
- Ten new projects were funded by the Teaching and Learning Enhancement Fund in February 2013.
- Campus Saint-Jean integrated a new flag-raising event in 2013 in which flags were raised for each country from

- which the faculty hosts an international student. The flags remain visible at the campus's main entrance.
- The Faculty of Arts has developed an iTunesU site for media, podcasts, video segments, and public performances of arts-related teaching and research projects.
 - The campus-wide Safe Spaces Initiative is providing professional development training, campus-based workshops, and a safe space staff resource network.

STUDENT EXPERIENCE AND ENGAGEMENT

Strategies

- Improve admissions and registration processes for all students.
 - Support programs and initiatives to help increase retention and completion rates.
 - Provide enhanced experiential learning opportunities.
 - Enhance extracurricular and co-curricular learning opportunities (i.e., supporting services, activities, and campus facilities that encourage and help facilitate student success).
 - Continue to create international opportunities for students.
 - Provide foundational support structures for students in order to create a nurturing environment that allows for positive student experience and engagement.
 - Provide foundational support structures for Aboriginal students to create an environment that allows for positive student experience and engagement.
 - Create a safe and secure environment on U of A campuses that is supportive of a positive student experience.
- The Faculty of Nursing is conducting an undergraduate program review to explore how the undergraduate student experience can be enhanced.
 - A number of initiatives are underway in the Faculty of Arts to improve retention, including better communication with students about current academic standing, exploration of communication strategies exposing students to different majors, and encouragement of departments to review and simplify program requirements.
 - The Faculty of Native Studies has established a Winter Term admission route via the Transition Year Program.
 - A strong relationship between the Faculty of Native Studies and the Native Studies Students' Association continues to be fostered with a goal of strengthening the sense of community in the faculty.
 - The Office of Learner Advocacy and Wellness in the Faculty of Medicine & Dentistry assists all undergraduate professional program students and physician residents with resources and learner assessment.
 - The offering and expansion of the engineering co-operative education program to more than 1,770 students in 2013-2014 has significantly enhanced retention and completion rates by integrating academic study with paid, relevant work experience.
 - The Early Feedback System at Augustana helps to identify students experiencing serious adjustment or academic problems. In addition, Augustana has completed work on the development of program-level learning goals and four-year maps for all major programs to assist students in thinking about their degree programs in their entirety.
 - In working to meeting CePH completion rates, the School of Public Health has mandated regular, documented meetings between students in graduation programs and their supervisors to ensure that progress is monitored.
 - The Faculty of Education has implemented a new teacher education program model with a new compulsory Aboriginal component for all Education programs. This model is a first in teacher education in Alberta.
 - The Faculty of Pharmacy and Pharmaceutical Sciences has initiated discussions about developing additional

Selected Outcomes

- The Faculty of Science is participating in a pilot to house a mental health counsellor within the Student Services Office as a way of reducing barriers to access for students. The Faculty of Arts has similarly embedded a psychologist in its undergraduate student service unit to respond directly to the mental health needs of students in the faculty.

experiential learning sites in locations with large Aboriginal populations.

- An MBA Finance Club and a Women's MBA Network were added to the clubs available for participation by Business students in 2013.
- The Faculty of Engineering participates in up to 12 major student design competitions each year (e.g. EcoCar, great northern concrete toboggan, heavy lift aircraft, aerial robotics).
- The Office of Sustainability delivers more than 100 engagement activities, reaching more than 27,000 members of the campus community each year, and creates opportunities for about 100 student campus sustainability volunteers.

PROGRAMMING

Strategies

- Continue development of innovative programming to meet the needs of students and the community.
- Increase access to current high-demand programs.
- Ensure appropriateness and relevancy through course and program reform.
- Provide valuable laddering opportunities from high school to post-secondary study, undergraduate to graduate study, and post-secondary study to professional experience.
- Continue to offer a range of lifelong learning opportunities through continuing and professional education programs.

Selected Outcomes

- The following programs have been implemented in 2013:
 - Master of Coaching (January 2013)
 - Doctor of Pharmacy (September 2013)
 - Master of Science and Doctor of Philosophy in Laboratory Medicine and Pathology
 - Master of Financial Management (in China)
 - Master of Business Administration/Master of Library and Information Studies
 - Embedded Certificate in Computer Game Development
 - Embedded Certificate in Global Citizenship
 - Embedded Certificate in European Studies
- The Faculty of Nursing conducted more information sessions about the graduate program than in previous years and publicized these information sessions through Alberta Health Services.
- The Bachelor of Science in Radiation Therapy in the Faculty of Medicine & Dentistry was approved, and will be implemented in September 2014. The first cohort of students is in their pre-professional year in 2013-2014.
- The restructuring of the Bachelor of Science general program in the Faculty of Science was approved by University Governance for implementation in Fall 2014.
- The Faculty of Extension has implemented or is in the process of developing a number of new continuing and professional education programs, including the newly approved post-baccalaureate certificate in Sexual Health, a citation in Social Media Communications, an advanced citation in Global Leadership, and a post-baccalaureate certificate in Leadership and Professionalism.
- In 2012-13, the Faculty of Arts began to review the core Bachelor of Arts program as a first step in ensuring that the program is current and teaches students the skills needed for full and active participation in the 21st century.
- Director of the U of A's Office of Sustainability Trina Innes was appointed to the board of directors of the Association for the Advancement of Sustainability in Higher Education.

CAMPUS ALBERTA AND CANADIAN CONNECTIONS AND COLLABORATIONS

Strategies

- Increase interdisciplinary, collaborative program and initiative development in order to offer students innovative and relevant educational opportunities.
- Maximize program innovation at the Campus Alberta level in order to create exciting learning opportunities and program efficiencies.
- Maximize program innovation in collaboration with national partners in order to create exciting learning opportunities.

Selected Outcomes

- The Faculty of Education is continuing to grow off-campus collaborative programs in northern Alberta, the Aboriginal Teacher Education Program (which had the largest number of graduates to date in fall 2013) and the Career and Technology Bridging Program.
- The MOU between the University of Alberta and Dechinta Bush University has been signed. Courses from the Faculty of Native Studies are being taught via Dechinta and students from Dechinta are beginning to enrol in courses at the U of A.
- The Faculty of Rehabilitation Medicine is continuing with satellite clinics in Calgary (OT/PT) and Camrose (PT) and is pursuing an opportunity to create a satellite OT program at the University of Regina in Saskatchewan.
- The Faculty of Nursing collaborated with nursing faculty at collaborative program partners Grande Prairie Regional College, Keyano College, and Red Deer College regarding development and support of scholarship of teaching.
- The Faculty of Agricultural, Life, and Environmental Sciences developed new and improved block transfer agreements with Campus Alberta partners to permit smoother transition of students into the U of A.
- The Faculty of Medicine & Dentistry's newly approved Bachelor of Science in Radiation Therapy will collaborate

with the University of Calgary as well as with Alberta Health Services, the Cross Cancer Institute, and the Tom Baker Cancer Centre.

- In September 2013, 160 students transferred from Campus Alberta partners directly into second-year engineering specializations at the U of A.
- Under an MOU signed with Grande Prairie Regional College, Augustana has added two new 2+2 agreements to the existing one in the Bachelor of Music program: Bachelor of Science with a major in Biology and a Bachelor of Arts with a major in Psychology.
- The U of A has taken the lead in an initiative to develop a graduate program in Writing Studies for Western Canada in collaboration with major universities in Western Canada.
- During 2013, a total of 111 week-long DiscoverE camps were offered in rural and Aboriginal communities across Western and Northern Canada with 2,603 students participating.
- The Office of Sustainability co-chairs the Alberta network of the Canadian Alliance of College and University Sustainability Professionals.

INTERNATIONALIZATION

Strategies

- Selectively expand existing consortia and develop new ones that advance institutional objectives for innovative learning opportunities and for diversified excellence and impact across disciplines.
- Develop initiatives that create opportunities for joint projects, student mobility, undergraduate and graduate student recruitment, and international funding.
- Pursue global impact opportunities through CIDA and similar funding competitions.
- Invest resources to ensure conversion of international applicants to international registrations, and the subsequent academic success of international students at the U of A.

- Develop new credentials and programs that provide U of A students with the understanding and skills related to success in a globalized society.

Selected Outcomes

- New embedded certificates in International Learning and Global Citizenship were launched in September 2013.
- The Faculty of Science developed a new method for assisting students from abroad to register. These students participate in online registration webinars to guide them in understanding more about a science degree, to find their curriculum, select classes, build their schedules, and finalize their admission.
- A new course on Global Health was developed by the Faculty of Pharmacy and Pharmaceutical Sciences in partnership with Fudan University. The course was delivered in China in July 2013.
- The Faculty of Law signed a faculty-level student and faculty exchange agreement with Adelaide Law School at the University of Adelaide. The two institutions are currently working on developing a joint JD/LLB program.
- The Faculty of Education has made available new undergraduate internship opportunities at Gyeong-in National University of Education in South Korea, Lertlah Schools in Thailand, and Hedmark University College in Norway.
- The Faculties of Arts, Business, ALES and Engineering have collaborated in the new U of A e3 campus in Berlin. In Summer 2013, the U of A offered language instruction, internships and a course on “public life and institutions in Germany.”
- The School of Business will continue offering a special lecture section for international students but will use lab and seminar offerings as an opportunity to integrate international students with domestic students. Both of these decisions are based on student feedback.
- The Faculty of Agricultural, Life, and Environmental Sciences offered a highly successful undergraduate co-curricular “Alternative Reading Week” in India and Mexico in 2013.
- The Indigenous Study Abroad Program is progressing. Potential donors have been located to fund a specialized joint program with an Australasian university. This program will be aimed at providing students with academic, cultural, and community engagement within a different indigenous context.
- Sixty-four students participated in the Faculty of Medicine & Dentistry’s Global Health Field Station Program in the summer of 2013. This program provides a high-quality, safe experience for medical students in a developing world context.
- University of Alberta International is piloting an early admission program for international applicants.
- The Faculty of Extension’s professional development program for international faculty required to teach in their disciplines in English continues to expand. Two additional cohorts from 19 universities in Shanghai were added in each of 2012 and 2013, and the program is being marketed in Brazil, China, Japan, Turkey, and Ukraine.
- As a part of an accelerating international recruitment strategy, three agreements have been reached between Campus Saint-Jean and international schools in China.
- The School of Public Health is pursuing the development of a summer school in public health for students from Saudi Arabia.
- In 2013, six occupational therapy students and six physical therapy students travelled to Indonesia for clinical experiences. During this time, these students led workshops for Indonesia therapists, physicians and nurses to enhance the skill sets of practitioners within that country.
- A number of international partnerships are underway in the Faculty of Physical Education and Recreation in the developing field of Mountain Studies. These partnerships include the University of Central Asia and the University of Innsbruck.

Research Capacity and Impact Measures

Talented People

- Assessment of the University of Alberta relative to a selected peer group in total research funding and Tri-Council funding *
 - Total sponsored research dollars from Alberta companies, Alberta government, and NGOs *
 - Total international research investment from foreign national agencies and funding bodies *
 - Prestigious national and international awards for faculty, post-doctoral fellows, and graduate students *
 - Engagement of faculty in federal and international advisory roles *
 - National and international research and creative activity initiatives that the U of A leads or participates in *
 - Numbers of fully or partially funded graduate students, international graduate students, and post-doctoral fellows *
 - Research consortia and partnerships formed with top-tier international partners
 - Success in targeted federal competitions for innovative research, innovation, and creative activities programs
 - Success on institutional review visits by Tri-Council, CFI, and other agencies

Diversity in Areas of Excellence and Impact

- Diversity of external private, public, and NGO partners that fund or collaborate on research and creative activities
 - Research initiatives with city and rural stakeholders
 - Engagement of faculty in federal and international advisory roles on policy *

**Outcomes on these metrics are presented in the main text and figures.*

Competitive and Well-Managed Resources for Research, Innovation, and Creative Activities

- Reinstatement of specialized support staff
 - Upgraded shared research resources through deployment of special funding
 - Success in federal infrastructure competitions *

Impact on Alberta

- Number of private and public sector users of U of A centres, institutes, and specialized infrastructure
 - Number of graduate student internships occurring in Alberta
 - Number of formal undergraduate interns and co-op students undertaken in Alberta
 - Number of sponsored or contract research initiatives undertaken with Government of Alberta ministries
 - Number of continuing spinoff companies associated with U of A activities *
 - Number of patents, inventions, and licences stemming from U of A research through TEC Edmonton *
 - Direct contribution to the regional economy from TEC Edmonton activities (see TEC Edmonton Annual Report)

**Outcomes on these metrics are presented in the main text and figures.*

Research Capacity and Impact: Strategies and Outcomes

Strategies

- Invest in competitive recruitment offers to recruit exceptional faculty.
- Invest in mechanisms to ensure recognition of faculty accomplishments.
- Invest in external and internal research chair opportunities and infrastructure programs to build, retain, or enhance capacity in emerging areas of priority or impact across disciplines.
- Invest in centres, institutes, and initiatives that represent significant research capacity to address global challenges, and integrate these efforts with international strategies and opportunities.
- Establish internal mechanisms to assess, prioritize, and monitor current and proposed strategic investments.
- Invest in organizational units that lead to increased success within national and international funding competitions, especially on large cross-disciplinary team grants.
- Invest in graduate student recruitment strategies and partnership programs to recruit exceptional graduate students from Canada and internationally.
- Identify ways to fund the full costs of an increased post-doctoral fellow cohort that will complement existing programs.
- Foster collaborations with Alberta's ministries, health sector organization, the public sector, and non-governmental organizations to enhance the quality of life in society.
- Expand advancement activities to secure philanthropic and private-sector endowment funds for priority initiatives leading to excellence and impact.
- Invest in building research consortia with other Alberta and Canadian universities, and with select international partners to create new and broader avenues of impact.
- Partner with other Canadian universities to create national, leading-edge facilities.

- Invest in new academic programs and external collaborations that advance knowledge mobilization and technology transfer.
- Invest in research administration services and systems to ensure effective and responsive management of agreements and contracts with internal and external stakeholders.
- Invest resources as institutional funding contributions on multi-user and multi-team infrastructure proposals.
- Use eligible funding sources to temporarily bridge critical research operating shortfalls in multi-user core facilities.
- Develop structures, mechanisms, and resourcing frameworks to consolidate shareable facilities for research and creative activities, where possible.
- Invest resources in opportunities to establish national, leading-edge facilities that open up new research and innovation avenues.
- Increase formal and active mobility programs for researchers and students.

Selected Outcomes

- In collaboration with the universities of Calgary and Lethbridge, the U of A led a Campus Alberta initiative with the Canadian Institutes of Health Research, Alberta Innovates - Health Solutions, Alberta Health Services and Alberta Health to develop the Alberta Strategy for Patient Orientated Research (SPOR) Support Unit (funded in June 2013 for \$48 million over five years).
- The Financial Times 2013 ranking places the School of Business ninth among all publicly funded business schools and 33rd overall; the 2013 ranking places its MBA program at 100th in the world and 56th among publicly funded universities.
- Three new NSERC Industrial Research Chairs were approved and two were renewed.

- Twelve new Canada Research Chairs were awarded to the institution and there were three successful CRC renewals and two CRC advancements from Tier II to Tier I.
- Two of five winners of the Canada Council for the Arts Killam Prizes for 2013 were awarded to U of A researchers; three faculty (and one professor emeritus) were elected to the Royal Society of Canada; three faculty were elected Fellows of the Canadian Academy of Health Sciences; two faculty were awarded Sloan Research Fellowships; a professor was awarded France's highest academic distinction, the Order of Academic Palms; and one researcher was awarded a Trudeau Fellowship. A doctoral student in Law received the inaugural SSHRC Impact Talent Award.
- Canada Foundation for Innovation 2012-2013 Leaders Opportunity Fund awards yielded \$20 million in federal contributions towards \$54.2 million in infrastructure investments.
- The U of A led on more than \$7 million in research grants from the Canadian International Development Agency (CIDA).
- The U of A Research Experience Program (UARE) was expanded to include nine countries and 20 strategic partners. Eighty-seven students were placed in research placements in 2013-2014. The goal for 2014-2015 is to place 100 students.
- Thirteen academic and five affiliated centres and institutes have been or are in the process of being terminated; eight have been or are in the process of being terminated and reclassified as academic entities, physical entities, or core facilities.
- On behalf of Campus Alberta, the U of A successfully secured three years of funding for Phase II of the Alberta Saxony Intercultural Internship Alliance (ASiiA). This phase will fund 50 students each year (25 from Alberta and 25 from Saxony), for three years, to participate in research and industry internships in Alberta and Saxony.
- The U of A initiated new partnerships with COLCIENCIAS (the Administrative Department of Science, Technology, and Innovation of the Government of Colombia) and CONICYT (National Commission for Scientific and Technological Research in Chile) through the CALDO consortium; both agencies annually sponsor hundreds of graduate students to study overseas.
- In 2013, TEC Edmonton was named the 17th best university business incubator in the world—and the top Canadian incubator—by the University Business Incubator Index, a global index assessing and benchmarking the performance and best practices of university business incubators.
- In 2013, the U of A opened the Medical Isotope and Cyclotron Facility at the South Campus. This facility houses a \$28-million cyclotron research and production facility that will produce clinical-quality technetium-99m, an important isotope used for 80 per cent of nuclear medicine diagnostic procedures for patients across Alberta and Canada with cancer, cardiac, neurological and other diseases.
- The Canadian Bar Association awarded Professor Catherine Bell the Ramon John Hnatyshyn Award for Law. This is the association's highest award for lifetime contributions to the law and legal scholarship. Professor Bell is the second woman to receive the award in its 20-year history, and the first recipient whose contributions were made primarily in the field of Aboriginal law.
- Construction of the shell and core for the Innovation Centre for Engineering was completed.
- The Alberta Land Institute (ALI) was officially launched in Calgary in September of 2012. Support for ALI was solidified in 2012-2013 and 2013-2014 with the securing of an additional \$1.1 million. Further philanthropic opportunities were also identified.
- The following new endowed or industry-sponsored chairs were announced in 2013: Xstrata Chair in Mining and Mineral Process Engineering, Cisco Research Chair in Healthcare Solutions, two Alberta Biodiversity Conservation Chairs, and the EnCana Chair in Water Resources.

THE ACADEMY: APPENDICES

Appendix 1: Enrolment Targets Measured in FLEs (Does not include PGME/DE)

	2012-13 Target			2012-13 Actuals			2013-14 Target			2013-14 Estimated			2014-15 Target			2015-16 Target			2016-17 Target

Appendix 2: Aboriginal Access, Enrolment, and Programming Initiatives

INITIATIVE	FACULTY	NEW TO CIP 2014
Newly approved Bachelor of Science in Environmental and Conservation Sciences, Northern Studies Major, in collaboration with Yukon College and the Faculty of Native Studies	Agricultural, Life and Environmental Sciences	NO
Aboriginal Recruitment and Retention Officer to attract and support Aboriginal students	Arts	YES
Canadian Indigenous Languages and Literacy Development Institute offers summer courses to Aboriginal community members with a goal to preserve indigenous languages	Arts	YES
Partnership with Maskwacis Cultural College to improve flow of Aboriginal students to Augustana	Augustana	NO
Membership in Alberta Aboriginal Recruitment Network	Augustana	NO
Staff member appointed to serve as Aboriginal recruitment specialist	Augustana	NO
Development of a minor in Native Studies to be offered at Augustana	Augustana, Native Studies	YES
Development of an Aboriginal Governance and Industry Partnership program in the Executive Education program	Business, Native Studies	YES
New teacher education model with new compulsory Aboriginal component for all programs	Education	YES
New Master of Education in Indigenous People's Education cohort	Education	YES
Aboriginal Teacher Education Program: Two new ATEP cohorts in collaboration with Portage College and Northern Lakes College; new Northern Teacher Education cohort in collaboration with Keyano College	Education	NO
DiscoverE outreach program reaches 4,000 Aboriginal students from grades 1 to 12 with exciting engineering and science activities	Engineering	YES
Proposed Master of Arts in Community Engagement is part of a suite of stackable and ladderable programs that include a citation in Aboriginal Health Promotion (non credit) and a planned certificate in Aboriginal Industry Relations	Extension	YES
Board of Directors of the Circle for Aboriginal Relations motion to partner with the U of A in development of Industry Relations Training	Extension	YES
Adaptation, delivery and evaluation of a school-based drug and alcohol prevention program with the Alexis Nakota Sioux Nation	Extension	NO
Partnership with Enoch Cree Nation's Family Health Working Group	Extension	NO
Examination of a formal education program offered with Native Counseling Services of Edmonton	Extension	NO
Restructured staff complement to strengthen cultural support for Aboriginal students	Law	NO
Doctor of Medicine admission guidelines for admission of up to five students from Aboriginal backgrounds	Medicine and Dentistry	YES
Development of Diversity Policy as per requirements of accreditation process	Medicine and Dentistry	NO
New theme of social justice in undergraduate curriculum, beginning with sessions on Aboriginal Health in Year 1	Medicine and Dentistry	NO
Pipeline program for Aboriginal students with undergraduate degrees who do not meet the minimum GPA standard for admission to the MD program	Medicine and Dentistry	NO

INITIATIVE	FACULTY	NEW TO CIP 2014
Cree instruction now offered online in the Bachelor of Arts in Native Studies program	Native Studies	YES
Master of Arts in Native Studies online offering, developed for working professional and leaders in Aboriginal, Northern, and rural communities	Native Studies	YES
Development of a Doctor of Philosophy in Native Studies program	Native Studies	YES
MOU signed with Dechinta Bush University servicing Northern students	Native Studies	YES
Community service learning component added to the existing Master of Arts in Native Studies program	Native Studies	YES
Freestanding certificate in Aboriginal Governance and Partnership online offering	Native Studies	YES
Partnerships with Aboriginal groups and programs on campus on initiatives to improve recruitment, retention and completion rates	Native Studies	YES
Review of the existing certificate in Aboriginal Sport and Governance to ensure that program is meeting objectives	Native Studies, Physical Education and Recreation	YES
Aboriginal Nursing Initiative focus on attracting Aboriginal students to nursing education	Nursing	YES
Designation of six Nursing seats to Aboriginal students	Nursing	YES
Dedicated Aboriginal coordinator and faculty assignments that support Aboriginal student initiatives	Nursing	YES
Participation by two faculty members with the Canadian Association of Student Nurses Task Force on Cultural Competency and Cultural Safety on a document to increase the integration of Indigenous knowledge aligned with the cultural safety framework for faculty and students	Nursing	YES

Appendix 3: Rural Access, Enrolment, and Programming Initiatives

INITIATIVE	FACULTY	NEW TO CIP 2014
Alberta Centre for Sustainable Rural Communities fosters collaboration in research, undergraduate teaching and policy development	Agricultural, Life and Environmental Sciences	NO
MOU with Grande Prairie Regional College resulting in two new 2+2 agreements: Bachelor of Science with major in Biology and Bachelor of Science/Bachelor of Arts with major in Psychology; third new 2+2 agreement has been initiated in the Bachelor of Arts in Drama program	Augustana	NO
Rural Capacity Interns placed in projects in rural communities to assist in addressing capacity issues and to create meaningful rural-based undergraduate student experiences	Augustana	NO
Career and Technology Bridging Program in collaboration with communities, school districts, Alberta Schools, and Alberta Education with heavy emphasis on core trades and industries in Alberta	Education	YES
Alberta Teacher Education Program: collaboration with Portage College via blended delivery in two rural sites; collaboration with Northern Lakes College via blended deliver in two rural sites; continuing secondary northern and rural education cohort in collaboration with Grande Prairie Regional College (GPRC); continuing high demand for elementary teacher education north program in collaboration with GPRC	Education	NO
New online Master of Library and Information Studies program with online delivery to attract rural Alberta students	Education	NO
Master of Education in Education Policy Studies (Educational Administration and Leadership Specialization) in collaboration with Red Deer College, Central Alberta Public and Separate School jurisdictions, and Zone 4 College of Alberta School Superintendents, extended off-campus to meet demand for qualified school leaders in central rural Alberta.	Education	NO
Proposal for Master of Education in Teacher-Librarianship and Curriculum Studies online delivery in part to serve the needs of graduate students in rural Alberta	Education	NO
DiscoverE outreach program reaches 12,000 rural students from grades 1 to 12 with exciting engineering and science activities	Engineering	YES
Doctor of Medicine admission guidelines for admission of up to ten students from rural and regional backgrounds	Medicine and Dentistry	YES
Office of Rural and Regional Health now using a closed Wiki to connect with rural (distributed) preceptors	Medicine and Dentistry	YES
New theme of social justice in undergraduate curriculum including future development on rural health subthemes	Medicine and Dentistry	YES
Increased rural services including Diabetic Nephropathy Clinic and Rural Nephrology Clinics to address growth in end stage renal disease in Northern Alberta	Medicine and Dentistry	YES
Development of Diversity Policy as per requirements of accreditation process, including target of rural students	Medicine and Dentistry	NO
Expansion of rural/regional Family Medicine Residency Program into Fort McMurray; further expansion into regional centres planned	Medicine and Dentistry	NO
MD Ambassadors Program to introduce students from northern Alberta high schools to careers in sciences and health professions	Medicine and Dentistry	NO
Integrated Rural and Regional Health Community Clerkship offers selected medical students the opportunity to live and learn in a rural setting for their third year	Medicine and Dentistry	NO
Rural placement collaboration to bring together learners on rural placements	Medicine and Dentistry, Pharmacy	NO
MOU with Dechinta Bush University servicing Northern students	Native Studies	YES

INITIATIVE	FACULTY	NEW TO CIP 2014
Master of Arts in Native Studies online offering, developed for working professional and leaders in Aboriginal, Northern, and rural communities	Native Studies	YES
Travel bursary to be initiated in 2014 for Bachelor of Science in Pharmacy students accepting experiential rotations in rural sites.	Pharmacy	NO
Agreement with Alberta Health to perform community health needs assessments in northern communities	Public Health	NO
Alberta Centre for Injury Control and Research priority to reduce the incidence and severity of injuries to vulnerable populations including farming communities	Public Health	NO
Freestanding certificate programs offered via online delivery, designed to provide continuing education opportunities to individuals living in rural settings	Rehabilitation Medicine	YES
Ongoing satellite physical therapy program in Camrose to meet supply and demand issues related to physical therapists in rural Alberta	Rehabilitation Medicine	NO
Bachelor of Arts degree revision and restructuring	Campus Saint-Jean	YES
Maintenance of a Student Life Coordinator position to ensure a quality social and cultural life in French for students	Campus Saint-Jean	YES
Centre collegiale de l'Alberta programs to enhance access to college level programming for francophone students, including: Practical Nursing Business Administration Tourism Management	Campus Saint-Jean	NO
Proposal for enrolment expansion of Engineering program includes an additional proposed 20 students in the program that provides first year engineering courses in French at Campus Saint-Jean	Campus Saint-Jean, Engineering	YES
Development of pre-pharmacy program for francophone students	Campus Saint-Jean, Pharmacy	NO

Appendix 4: Francophone Access, Enrolment, and Programming Initiatives

INITIATIVE	FACULTY	NEW TO CIP 2014
Bachelor of Arts degree revision and restructuring	Campus Saint-Jean	YES
Maintenance of a Student Life Coordinator position to ensure a quality social and cultural life in French for students	Campus Saint-Jean	YES
Centre collegiale de l'Alberta programs to enhance access to college level programming for francophone students, including: Practical Nursing Business Administration Tourism Management	Campus Saint-Jean	NO
Proposal for enrolment expansion of Engineering program includes an additional proposed 20 students in the program that provides first year engineering courses in French at Campus Saint-Jean	Campus Saint-Jean, Engineering	YES
Development of pre-pharmacy program for francophone students	Campus Saint-Jean, Pharmacy	NO

Appendix 5: Graduates in Selected Fields

	2012	2013
Healthcare		
1 Physicians	152	181
2 Nurses	566	513
3 Pharmacists	128	117
4 Physical and Occupational Therapists	114	177
5 Speech Pathologists	60	59
6 Public Health Professionals	76	64
7 Dentists	38	35
8 Kinesiologists	76	72
9 Psychologists	12	14
Education and Knowledge Access		
1 Teachers	1249	1303
2 Librarians	43	52
Business, Government, and Legal		
1 Commerce/ Business	638	625
2 MBAs	150	187
3 Lawyers	170	166
4 Economists	183	203
5 Translators	26	32

	2012	2013
Culture, Arts, and Tourism		
1 Theatre Professionals	41	38
2 Musicians	39	45
3 Industrial, Graphic, and Theatre Designers	39	34
4 Visual Artists	45	52
5 Tourism Professionals	31	29
Resource and Agricultural Economy		
1 Engineers	805	755
2 Geologists	100	122
3 Foresters	12	12
4 Agricultural, Food and Environmental Professionals	368	415
Other		
BA (Residual numbers)	836	806
MA (Residual numbers)	133	144
MSc (Residual numbers)	381	398

Appendix 6: Campus Alberta, Canadian, and International Program Partnerships

Selected Programs Offered in Partnership with Campus Alberta Institutions

PROGRAM	FACULTY	PARTNER INSTITUTION	NEW IN CIP 2014
Bachelor of Science in Environmental and Conservation Sciences, and Bachelor of Science in Agriculture programs – block transfer agreements	Agricultural, Life, and Environmental Sciences	Campus Alberta partners	NO
Bachelor of Music (in development)	Arts	Grant MacEwan University	YES
Bachelor of Music, Bachelor of Science Biology major, Bachelor of Science and Bachelor of Arts Psychology major, Bachelor of Arts Drama major (in development)	Augustana	Grande Prairie Regional College	NO
Northern Teacher Education cohort	Education	Keyano College	YES
Aboriginal Teacher Education Program, new cohorts	Education	Portage College, Northern Lakes College	NO
Secondary Northern cohort, Rural Education cohort, Elementary Education North Program	Education	Grande Prairie Regional College	NO
Middle Years Education Program	Education	Red Deer College	NO
Master of Education in Educational Policy Studies (Indigenous Peoples' Education specialization)	Education	Grande Prairie Regional College	NO
First-year Engineering partnerships	Engineering	Grant MacEwan University, Red Deer College, Grande Prairie Regional College, Keyano College, Medicine Hat College	
Master of Science in Laboratory Medicine and Pathology, specialization for Pathologist Assistants	Medicine and Dentistry	University of Calgary	YES
Bachelor of Science in Radiation Therapy	Medicine and Dentistry	University of Calgary, Alberta Health Services, the Cross Cancer Institute and the Tom Baker Cancer Centre	NO
Collaborative Bachelor of Science in Nursing	Nursing	Grande Prairie Regional College, Keyano College, Red Deer College	NO

Selected Programs Offered in Partnership with Canadian Institutions

PROGRAM	FACULTY	PARTNER INSTITUTION	NEW IN CIP 2014
Bachelor of Science in Environmental and Conservation Sciences, Northern Systems major	Agricultural, Life, and Environmental Sciences	Yukon College	NO
Master of Elementary Education online collaborative program	Education	Onion Lake First Nation, Saskatchewan	YES
Writing Studies for Western Canada (in development)	Arts	Major universities in Western Canada	YES
Occupational Therapy satellite program (proposed)	Rehabilitation Medicine	University of Regina	YES
Course delivery agreement	Native Studies	Dechinta Bush University, NWT	NO

Selected Programs Offered in Partnership with International Institutions

PROGRAM	FACULTY	PARTNER INSTITUTION	NEW IN CIP 2014
Bilateral agreements and 2+2 undergraduate program agreements	Agricultural, Life, and Environmental Sciences	Institutions in Asia, Africa, Europe and South America	NO
International Dietetics internship program	Agricultural, Life, and Environmental Sciences	University of Ghana	NO
Dual Bachelor of Arts Degree	Arts	Ritsumeiken University, Japan	NO
eBerlin (three-part programming: language instruction, internships, and a humanities course)	Arts	Germany	NO
Study abroad in Telemark program	Augustana	Telemark University College	NO
Augustana-in-Cuba program	Augustana	Universidad de Oriente, Cuba	NO
Master of Financial Management	Business	Xi'an Jiaotong University, China	NO
French language program (two week)	Campus Saint-Jean	Université catholique de Lille, France	NO
Master of Education cohort with summer residencies	Education	University of Dodoma, Tanzania	YES
Juris Doctor/Bachelor of Laws program (in development)	Law	University of Adelaide	YES
Student exchange program	Law	University of Oklahoma	YES
Dual Juris Doctor program	Law	University of Colorado	NO
Joint Doctor of Philosophy	Medicine and Dentistry	Shantou University Medical College, China	NO
Global Health Course	Pharmacy and Pharmaceutical Sciences	Fudan University, China	YES
Undergraduate and graduate student exchange agreement	Physical Education and Recreation	Palacky University, Czech Republic	YES
Joint Doctor of Philosophy agreement	Science	Ludwig Maximilian University, Germany	NO
University Management Program	University of Alberta International	Select universities in China	NO

Appendix 7: Program Development

Recently Approved Programs

PROGRAM	FACULTY	FIRST INTAKE DATE
Bachelor of Science in Environmental and Conservation Sciences, Northern Systems Major (in collaboration with Yukon College)	Agricultural, Life and Environmental Sciences	Approved effective September 2013, to be implemented September 2014
Bachelor of Science in Agriculture, Agronomy Major and Plant Biotechnology Major	Agricultural, Life, and Environmental Sciences	Approved effective January 2014, implementation TBA
Bachelor of Science in Nutritional and Food Science, Honors in Food Science, Honors in Nutrition, Specialization in Dietetics, Specialization in Food Science and Technology, Major in Nutrition and Food	Agricultural, Life and Environmental Sciences	Approved effective September 2014
Doctor of Philosophy in the History of Art, Design and Visual Culture	Arts	September 2013 (delayed from September 2012)
Embedded certificate in International Learning	Arts	September 2013
Embedded certificate in European Studies	Arts	September 2013
Embedded certificate in Computer Game Development	Arts, Science	September 2013
Master of Financial Management (in China)	Business	September 2013
Master of Business Administration/Master of Library and Information Studies Combined Degrees Program	Business, Education	September 2013
Embedded Certificate in Global Citizenship	Education	September 2013
Bachelor of Science in Radiation Therapy	Medicine and Dentistry	Approved effective September 2013, to be implemented September 2014
Doctor of Philosophy in Laboratory Medicine and Pathology	Medicine and Dentistry	September 2013
Master of Science in Laboratory Medicine and Pathology	Medicine and Dentistry	September 2013
Doctor of Pharmacy	Pharmacy and Pharmaceutical Sciences	September 2013
Master of Coaching	Physical Education and Recreation	September 2013
Post-baccalaureate Certificate in Sexual Health	Extension	September 2013
Internationally Educated Physical Therapy Program	Rehabilitation Medicine	June 2013

Current Program Submissions

PROGRAM	FACULTY	APPROVAL STAGE
Bachelor of Science in Environmental and Conservation Sciences, Sustainable Agriculture Major	Agricultural, Life, and Environmental Sciences	Campus Alberta Quality Council
Master of Arts in Gender and Social Justice	Arts	To be resubmitted by UofA
Master of Arts in Community Engagement	Extension	System Coordination

Proposed Program Suspensions

PROGRAM	FACULTY	APPROVAL STAGE
Bachelor of Arts, Majors in: Combined Classics/Greek/Latin Combined French and Italian Combined Italian and Spanish Italian Studies Middle Eastern and African Studies Russian Language and Literature Combined Russian and Ukrainian Ukrainian Folklore Ukrainian Language and Literature	Arts	Proposals in Development
Bachelor of Design Computing Science Route Printmaking Route	Arts	Proposals in Development
Bachelor of Music Music History Concentration School Music Concentration Composition and Theory Concentration World Music Concentration	Arts	Proposals in Development
Certificate in Translation Studies, Chinese concentration	Arts	University of Alberta (Note: No government approval required)
Diploma in Special Education	Education	University of Alberta
Certificate for Adult and Continuing Education	Extension	Proposal in Development
Post-baccalaureate Certificate in Teaching and Learning in Higher Education	Extension	University of Alberta Approvals
Post-RN Program	Nursing	University of Alberta
Bachelor of Science, Bioinformatics Major	Science	Proposal in Development
Bachelor of Science, Mathematical Sciences Specialization	Science	Approved

Emerging Program Initiatives

PROGRAM	FACULTY	FUNDING SOURCE	NEW IN 2014 CIP
Embedded Certificate in International Nutrition and Food Security	Agricultural, Life and Environmental Sciences	Existing	NO
Master of Science in Land Reclamation	Agricultural, Life and Environmental Sciences	Funding proposal submitted	NO
Fashion Business Management Program	Agricultural, Life and Environmental Sciences; Business	Existing	NO
Embedded Certificate in International Agriculture	Agricultural, Life, and Environmental Sciences	Existing	NO
Embedded Certificates related to the fields of Conservation Biology, Land Reclamation, and Human Dimensions of Environmental Management	Agricultural, Life, and Environmental Sciences	Existing	YES
Watershed Management	Agricultural, Life, and Environmental Sciences	Existing	NO
Applied Civil Military Leadership Certificate (non-credit pilot project)	Arts	Existing	NO
Bachelor of Arts in Asian Studies	Arts	Existing	NO
Bachelor of Economics	Arts	Existing	YES
Doctor of Philosophy in Interactive Media	Arts	Existing	YES
Doctor of Philosophy in Writing Studies for Western Canada (in collaboration with major universities in western Canada)	Arts	Existing	NO
Embedded Certificate in Humanitarianism and NGO Governance	Arts	Existing	YES
Embedded Certificate in Latin American Studies	Arts	Existing	NO
Embedded Certificate in Writing Studies	Arts	Existing	NO
Master of Arts in Public Policy	Arts	Existing	YES
Post-baccalaureate Certificate in Translation	Arts	Existing	YES
Embedded Certificate in India Studies	Arts	Existing	NO
Reciprocal Minor Offerings	Arts, Business	Existing	NO

Appendix 8: Research Capacity Investments and Details

The University of Alberta builds capacity in research and creative activities through several means, including investments in research chairs, infrastructure, and the creation of special centres, institutes, and initiatives. Some mechanisms are targeted by federal and provincial funding programs, and cannot be used to sustain and develop capacity in other areas of institutional strategic importance and impact.

Research Chairs – 1 (as of December 2013)

** Source: NINT Business Plan 2013-2017, forecasted partner contributions. U of A contributions reported here are for salaries for U of A faculty cross-appointed as NRC Senior Program Officers, indirect costs of research, research grants to U of A cross-appointees, which support approximately 180 graduate students and PDFs for NINT programs; internal and federal funding for U of A core nano facilities; facilities and operations support; capital support; and flow through to NRC of utilities and operations grant.

Enhancing Capacity through Centres, Institutes, and Initiatives

The following areas of research capacity have been developed through university investment in centres, institutes, and initiatives. Descriptions provide further detail to clarify contribution to and alignment with the research priorities of the Government of Alberta and its ministries.

HUMANITIES AND FINE ARTS

Canada's Francophone Heritage: Francophonie, minority-language rights and legislation, and intercultural research that distinguishes the U of A nationally and supports provincial and federal mandates to recognize and preserve Canada's francophone heritage

Canadian Studies Centre; Institut pour le patrimoine de la francophonie de l'Ouest Canadien

Cross-Cultural Studies:

Central and Eastern Europe: emphasis on Ukrainian and Austrian history and society

Wirth Institute for Austrian and Central European Studies; Canadian Institute for Ukrainian Studies; Peter and Doris Kule Centre for Ukrainian and Canadian Folklore; Kule Institute for Advanced Study

China: emphasis on contemporary China, Chinese energy policy, politics, economy, social issues, culture and Canada-China relations

China Institute at the University of Alberta

Japan: Japanese language and culture from cross-disciplinary perspectives

Prince Takamado Japan Centre for Teaching and Research; Japan Canada Academic Consortium (member institution)

Indigenous Peoples: language and linguistic history; cultural, social, and legal frameworks

Canadian Indigenous Languages and Literacy Development Institute; Rupertsland Centre for Métis Research; Aboriginal Teacher Education Program

Information Sciences and Humanities: deployment of advanced computing technologies for historical, economic, health, social, and cultural research

Canadian Institute for Research Computing in the Arts

Ideas and Institutions: past and current systems of ethics, truth, social and cultural development, and political theory; interdisciplinary anthropology archeology; current cultural thought and social innovation

Baikal Archaeology Project; Cortona Italy School; Festival of Ideas

Written and Performed Word: study and high-calibre production of literature and theatre

Canadian Writing Research Collaboratory; Canadian Literature Centre; Timms Centre for the Arts

Music Performance and Theory: innovative music research, performance, and leadership for international-calibre concerts and choral experiences; cross-disciplinary work in acoustic engineering, sound, and performance for advances in sound quality and improving vocal health of music teachers

Canadian Centre for Ethnomusicology

Visual Expression: all aspects of art from its history to methods of production, with particular investment in printmaking, industrial design, and visual information communication

Enterprise Square Campus Gallery; FAB Gallery

SOCIAL STRUCTURES & SYSTEMS

Resilient Communities: frameworks, policies, and mechanisms that enable community innovation and vibrancy in urban and rural settings

Community-University Partnership, City-Region Studies Centre, Alberta Centre for Sustainable Rural Communities

Science and Society: legal, policy, and economic consequences associated with scientific and technological advances, especially in health

Health Law Institute; John Dossetor Health Ethics Centre; Institute of Health Economics (partner institution)

Corporate and Public Citizenship: the role of businesses, corporations, and public groups in defining the social good of communities and their enhanced quality of life, locally and internationally

Canadian Centre for Corporate Social Responsibility; Centre for Public Involvement

Entrepreneurship and Innovation: political, social, and economic aspects of innovation ecosystems, technology and knowledge transfer, and commercialization, especially at the science-business interface.

Technology Commercialization Centre; Centre for Entrepreneurship and Family Enterprise

Globalization: citizenship education, human rights education, and education for social justice and social development; cultural musical expression

Centre for Global Citizenship Education and Research; Canadian Centre for Ethnomusicology

Law, Justice, and Legal Frameworks: law, administration justice, social justice, and the interpretation and evolution of legal frameworks; interdisciplinary studies of constitutional issues

Alberta Law Reform Institute; Centre for Constitutional Studies; Health Law Institute

Educational Frameworks: scientific, mathematical, and technological literacy for citizens; curriculum and pedagogy; teacher education

Centre for Mathematics, Science and Technological Education; Centre for Research for Teacher Education and Development; Centre for Research in Applied Measurement and Evaluation

Political and Economic Systems: economic, social, political, and international influences on the economy and society, from both regional and national perspectives; design, execution, and analysis of public opinion sampling and surveys

Institute for Public Economics; Population Research Laboratory

SCIENCE AND TECHNOLOGY

Information Communication Technologies:

computational intelligence, especially machine learning and data mining; wireless and broadband communications, applied electromagnetics, information security and sensor networks; data analytics for geophysics, energy exploration, space sciences and drug design; advanced ground and satellite observation systems

Alberta Innovates Centre for Machine Learning; Centre for Earth Observation Sciences

Biochemistry, Chemistry, and “omics”: protein structure and function; lipids and membrane structure; glycomics; analytical chemistry and computational advances; metagenomics and metabolomics for infectious diseases, chronic diseases, and antiviral therapies; translational clinical biomarker discovery for personalized medicine; biochemistry and molecular biology of plant, animal, and human development and disease

Alberta Glycomics Centre; Metabolomics Innovation Centre; Li Ka Shing Institute of Virology

Nanoscience and Nanotechnology: integrated research in condensed matter physics, surface science engineering, inorganic and organic chemistry, and chemical engineering to advance metabolic sensor systems; hybrid nanoscale electronics; new materials and processes for energy generation and storage; nanotoxicology

National Institute for Nanotechnology; Integrated Nanosystems Research Facility; Nanofab, Ultrafast-Nanotools Facility

Mathematics and Analytical Methods: geological and geophysical imaging analytics; organic and inorganic analytic chemistry; biostatistics, psychometrics, sampling and surveys; qualitative methodologies; mathematical biology

Pacific Institute of Mathematical Sciences (member institution);

International Institute for Qualitative Methodology; Centre for Research in Applied Measurement and Evaluation; Alberta Glycomics Centre

Materials and Interfacial Science and Engineering:

condensed matter physics and high temperature superconductivity, physical chemistry, and nanoscience research for new catalysts, materials, and biomaterials; synthesis of new molecules for improved plastics, alloys, electronic components, and fuel cells

National Institute for Nanotechnology

Human Development: mechanisms of neurological and cognitive development and behaviour, especially aging and neurological disease

Centre for Neuroscience; Alberta Centre for Prions and Protein Folding Diseases

Foundations and Behaviour of Matter: theoretical and experimental high energy physics; astrophysics; solar physics and near-Earth space phenomena

Sudbury Neutrino Observatory Lab - SNOLAB (member institution); Institute for Space Science, Exploration and Technology

Earth Sciences: mineralogy, petrology, geochemistry, and geochronology; gas and hydrocarbon chemistry; petroleum hydrogeology

Canadian Centre for Isotopic Microanalysis; Helmholtz-Alberta Initiative

Engineered Structures and Processes: geotechnical and geo-environmental engineering for large earth structures, cold regions and permafrost engineering; pipelines and transport systems; risk management for environmental engineering and natural hazards

Markin/CNRL Natural Resources Engineering Facility; Canadian Rail Research Laboratory

ENERGY

Economics and Policy: applied economic analysis on risk and regulation in energy and electricity markets, within Canada and internationally; social and cultural impacts of resource extraction and land use policies; environmental deregulation and market-based approaches to meet land use and environmental quality objectives

Centre for Applied Business Research in Energy and the Environment; Oil Sands Research and Information Network; Alberta Land Institute

Conventional and Unconventional Fossil Fuels: all aspects of bitumen upgrading; new non-aqueous and advanced extraction technologies; carbon sequestration; reduced environmental impact of fossil fuel production and exploration

Institute for Oil Sands Innovation; Helmholtz-Alberta Initiative; Oil Sands Tailings Research Facility; Centre for Intelligent Mining Systems

Resource Geosciences: petroleum exploration, exploitation management, and monitoring; theoretical and applied seismology, geodynamics, and geomagnetism; 4-D rock physics and geophysical logging and data processing

Helmholtz-Alberta Initiative

Tailings and Water Management: integrated research in chemical engineering, ecology, metagenomics, and molecular biology for environmentally sustainable treatment of tailings, and water from resource extraction

Oil Sands Tailings Research Facility; Institute for Oil Sands Innovation; Helmholtz-Alberta Initiative

Clean Coal and Mining: coal cleaning and upgrading, pollution control strategies, greenhouse gas emission reduction, value-added products, and underground coal gasification; advanced ICT for mining; surface mining equipment design and operations

Canadian Centre for Clean Coal/Carbon and Mineral

Processing Technologies; Helmholtz-Alberta Initiative; Centre for Intelligent Mining Systems

Alternative Energies: Geothermal energy; biofuels; solar cells; power quality and advanced power distribution systems; nanoscale advances in advanced materials for solar cells; photovoltaics

National Institute for Nanotechnology; Biorefining Conversions Network

ENVIRONMENT

Biosystems and Ecosystems: plants, forest, and soil interactions; plant physiology, structure, genetics, growth, and adaptation processes; biological and genetic processes of plants and animals in response to environmental stresses; boreal, alpine, and Arctic ecology and wildlife; wildlife biology and management; paleontology and evolutionary systemics

Alberta Biodiversity Monitoring Institute (partner institution); Centre for Earth Observation Sciences

Aquatic Ecosystems: wetlands, hydrogeology, rivers systems, glaciers, polar ice; plant/animal interactions and effects; assessing, modelling, and mitigating climate and human-induced influences on water and air quality

Socio-Economics of Environmental Resource

Development: political, social, economic, and cultural requirements and consequences; land use policy and practices; policies and frameworks for sustainable rural communities; social responses to ecological change

Centre for Applied Business Research on Energy and the Environment; Alberta Land Institute; Canadian Circumpolar Institute; Alberta Centre for Sustainable Rural Communities

Animal and Human Health: Public health challenges related to water quality and waterborne diseases, animal-to-human pathogen spread, and soil and air contaminants; disease spread through wildlife; neurodegenerative disorders

and chronic wasting diseases in wildlife and livestock
Centre for Prions and Protein Folding Diseases; Centre for Earth Observation Sciences

Climate Change: Assessing and forecasting the impact of climate change on ecology, ecosystems, with emphasis on Alberta's boreal forests, water supply, and agricultural sectors; land and ecosystem changes in northern Canada and the Arctic; biodiversity throughout the Western Hemisphere
Canadian Circumpolar Institute; Centre for Earth Observation Sciences

Land Reclamation and Soil Remediation: ecosystem protocols and hydrological sciences for land reclamation; genetics and molecular biology for biodegradation of petroleum hydrocarbons in contaminated groundwater
Helmholtz-Alberta Initiative

FOOD AND BIO-RESOURCES

Biofuels, Bioenergy and Biomass Conversion: understanding and design of enzymes, catalysts, and other processes for biomass conversion and the development of higher value products from feedstock; nano-enabled biomaterials
National Institute for Nanotechnology; Biorefining Conversions Network

Swine, Livestock, and Poultry Sciences: optimizing production and quality of traditional and new species, and of novel traits through genomics, breeding, protection systems; food safety, food quality, production efficiency and sustainability, and environmental health
Dairy Research and Technology Centre; Poultry Research Centre; Swine Research and Technology Centre; Livestock Gentec Alberta Innovates Centre; Agri-Food Discovery Place

Sustainable Forestry: science, technology, and best practices to reduce soil erosion, water and fertilizer use and supply; plant genetics; environmentally sustainable forestry practices and enhanced wood production

Agricultural Resource Economics: market-based instruments for the regulation of resource allocation; interaction of energy-based stresses, climate-induced stresses, and human population increases on water for agricultural sectors; regulation issues related to food and consumers; agribusiness financing and business analysis

Crop and Plant Sciences: genomics, biotechnology, breeding, crop protection systems, and agricultural practices and management to enhance production and to identify mechanisms and traits for stress- and disease-resistant species

Healthy Foods: Development of agricultural biotechnologies for healthy food production, utilization of crop components and functional food production; development of probiotics, nutraceuticals, and specialized seed oils
Agri-Food Discovery Place; Alberta Innovates Phytola Centre

HEALTH AND WELLNESS

Advanced Interventions and Treatments: translational, clinical, and cross-disciplinary focus on chronic diseases, cancer, obesity, and improved organ and tissue transplantation; regenerative medicine; biomarker-based technologies for personalized treatment and diagnostics; advanced materials for implant devices and rehabilitation treatments; population health, health services, and health systems
Alberta Transplant Institute; Institute for Reconstructive Sciences in Medicine; Alberta Diabetes Institute; Muttart Diabetes Research and Training Centre; Alberta Cardiovascular and Stroke Research Centre; Mazankowski Alberta Heart Institute

Cross-Cultural Health: indigenous people's health and health training; complementary and alternative medicine; global health

Indigenous Health Initiative; Complementary and Alternative Research and Education Program - Integrated Health and Healing

Health Equity: social determinants of health equity; ethical, legal, and policy consequences of rapid advances in health innovations; disparities in health

John Dossetor Health Ethics Centre; Health Law Institute

Healthy Lifespans: cross-disciplinary research and training on individual, social, organizational, and community determinants of healthy living and healthy aging; nutrition; exercise, health promotion, and safe workplaces and behaviours; maternal and child health

Alberta Centre on Aging; Alberta Institute for Human Nutrition; Alberta Centre for Active Living; Women's and Children's Health Research Institute

Health Services and Outcomes: research on improved health service design and delivery; assessment of health service policy and technologies; primary care and rural health care

Interdisciplinary Health Research Academy; Institute of Health Economics; Alberta Research Centre for Health Evidence; Women's and Children's Health Research Institute

Interprofessional Training: Cross cultural, primary care and rural health care; evidence-based best practices in health sciences team education, health professional collaborative practice; and the use of technology to support and enhance teaching and learning

Edmonton Clinic Health Academy; Health Sciences Education and Research Commons

Medical Imaging Sciences: in vivo imaging of human diseases for improved diagnosis and treatments, especially chronic and neurological diseases, cancer, and drug development

National High Field Nuclear Magnetic Resonance Centre (NANUC); Edmonton PET Centre; Centre for Biological Imaging and Adaptive Radiotherapy; Peter S. Allen Magnetic Resonance Research Centre

Virology, Immunology, and Infectious Diseases:

virus discovery, metagenomic and microbial genomic analysis, viral disease prevention and treatment; infectious causes of inflammatory disease; translation of research technology into clinical and commercial practice; pathogen and biomarker discovery; bioinformatics; molecular and comparative immunology

Li Ka Shing Institute of Virology; Alberta Transplant Applied Genomics Centre; Advanced Microscopy Facility; Centre of Excellence for Gastrointestinal Inflammation and Immunity Research; Alberta Glycomics Centre

Appendix 9: Research Capacity Priorities

Enhanced Specialized Infrastructure

The University of Alberta has identified the following areas as strategic priorities for increased research capacity, and will submit proposals in support of these areas to the 2014-2015 Canada Foundation for Innovation's Innovation Fund Competition and to its 2014 John R. Evans Leaders Fund competition: digital social sciences; synthetic biology; glycomics and carbohydrate sciences; biomedical device engineering and fabrication; lipidomics; women and children's clinical and translational health; food safety; advanced radiotherapy cancer treatments; mining equipment innovation; construction automation.

The U of A will also join national initiatives for infrastructure in areas of institutional priority and strength, including neutrinos and dark matter (SNOLAB consortium member), computational infrastructure (Compute Canada and WestGrid), online arts and culture, and agricultural innovation.

The Canada Foundation for Innovation awards 40 per cent of the total capital cost for proposals, which are adjudicated on standards focused on excellence, institutional priority, impact on Canada, and uniqueness at a national or regional level. Following standard processes, the U of A will submit requests to the Ministry of Innovation and Advanced Education's Research Capacity Program for provincial funds, in order to accept any successful federal awards.

Direct Costs of the Research and Innovation Enterprise

The U of A develops, acquires, and works to sustain core infrastructure and services for Alberta's research and innovation enterprise. Examples of this infrastructure include animal care facilities, which enable innovation and discovery related to human and livestock health; research stations that support sustainable agriculture and environment; and highly specialized equipment for advanced imaging. This infrastructure provides a competitive innovation arena for Alberta's current industries and sectors, and demonstrates to those industries not yet invested in the province that their work can be executed here, in partnership with the U of A. Pre-commercialization development and testing for medical, health, and drug innovations could not be done without the provision of the facilities at the U of A.

One-time capital, infrastructure, and renovation costs to establish these facilities are often cost-shared by provincial and federal contributions. Ongoing direct operating costs greatly exceed revenue streams provided by service fees and researcher grants, and they are ineligible to be covered by any indirect cost of research funding. Indirect costs of research funding itself is insufficient to cover the corporate costs of the research administration within a large medical/doctoral research university, which include staff and systems to satisfy financial, legal, contract development, reporting, and regulatory compliance requirements (e.g., biohazard safety, animal care, experimental procedures, clinical trials).

These direct and indirect corporate costs of a research enterprise are predictable and steady. The U of A will work to specify a transformative funding and financial model that includes them.

Research Capacity Gaps — Graduate Student and Post-doctoral Fellow Funding

As one of Alberta's two medical/doctoral research universities, the U of A delivers master's and doctoral level programs, and trains post-doctoral fellows. The nature of facilities and space the U of A must provide for these members of its academy is qualitatively different from that required for undergraduate learning and teaching.

Direct post-doctoral fellow support is primarily provided through external funds secured by faculty members. Graduate student support comes mainly from internal sources. Two objectives hinge directly on the U of A's ability to provide competitive graduate student support: the

recruitment of the best domestic and international graduate students, particularly in competition with other Canadian institutions, and the ability to sustain graduate training in areas of institutional strength across the academy.

The U of A will work to specify a transformative funding and financial model that includes the costs necessary to achieve these objectives.

Research Capacity Gaps — Faculty and Staff

Some new faculty appointments will be made to ensure that the U of A has the necessary academic, research, and leadership expertise to move the academy forward.

Appendix 10: e-Learning

INITIATIVE	FACULTY	NEW IN CIP 2004
Bachelor of Science in ENCS, Northern Studies in collaboration with Yukon College: more development of distance delivery and video conferencing	Agricultural, Life, and Environmental Sciences	YES
Exploration of course offering via video conferencing for partners in China	Agricultural, Life, and Environmental Sciences	YES
Arts Pedagogy and Research Initiative Laboratory with a focus on two areas of research: Arts Pedagogy and the value of an Arts degree	Arts	YES
E-textbooks: three year pilot project on developing best practices in the use of mobile devices and electronic textbooks	Arts	YES
Multimedia group provides support for conversion of old media formats to digital formats and supports creation of podcasts, video production and lecture capture	Arts	YES
Development of an iTunesU site for media, podcasts, video segments, public performances of Arts-related teaching and research projects	Arts	NO
STS 350: A History of Video Games: a new MOOC for online distribution in 2014	Arts, Science	YES
E-Portfolio pilot project	Augustana	YES
Exploration of integration of internet, social media and course management software with face-to-face teaching	Augustana	YES
Provision of lab and TA resources to facilitate the implementation of the Bloomberg Aptitude Test	Business	YES
Development of new innovative, state-of-the-art learning tools	Campus Saint-Jean	YES
Master of Arts in Canadian Studies: now entirely accessible online	Campus Saint-Jean	YES
Testing of a pedagogical structure involving e-portfolio Magara, including integration with Moodle	Campus Saint-Jean	YES
New version of the Language Lab, including a video component useful for learning sign language	Campus Saint-Jean	NO
Speech Coach, a linguistic diagnostic tool	Campus Saint-Jean	NO
Text-to-speech tool now allowing for "on-the-fly" rendering	Campus Saint-Jean	NO
Bachelor of Education: conversion of courses to blended delivery	Education	YES
Creation of a mobile app to allow K-12 students in Alberta to use mobile devices to contribute authentic data to research projects	Education	YES
Development and evaluation of U of A computer-based testing system in support of strategy for blended-delivery courses and MOOCs	Education	YES
Master of Library and Information Studies: implementation of online cohort	Education	NO
SMART User Certifications: training sessions for integration of digital technology in the classroom	Education	NO

INITIATIVE	FACULTY	NEW IN CIP 2004
Reformatting of "Inclusive Education: Adapting Instruction for Students with Special Needs" for blended delivery	Education	NO
Mobile citizen Science project	Education, Science	YES
Bachelor of Science in Engineering: development of e-learning materials in support of large first and second-year courses	Engineering	NO
Alternate Delivery Programs: Master of Arts in Communications and Technology Applied Land Use Planning Certificate Information Access and Protection of Privacy Certificate Occupational Health and Safety Certificate National Advanced Certificate in Local Authority Administration Citation in Social Media Strategic Marketing Citation in Social Media Communications Advanced Citation in Global Leadership	Extension	YES
English Language Program: integrated online tools and resources	Extension	YES
Expansion of blended learning offerings	Extension	YES
Learning Engagement Office: instructional designers and e-learning specialists to enable development of new and innovative programs while supporting the use of digital learning technologies	Extension	YES
Online Medical English Course, allowing offshore delivery of course content	Extension, Medicine and Dentistry	YES
Interdisciplinary 410 Health Teach Education course incorporates online elements to accommodate distance delivery	Health Sciences Council	NO
Juris Doctor: exploration of use of video capsules as replacement to lectures to explain key concepts, class time to be spent on problem solving	Law	YES
Development of an interactive mobile app to enable faculty and students to record interactions on digital field notes	Medicine and Dentistry	YES
Doctor of Medicine, Doctor of Dental Surgery: various blended delivery course offerings using a variety of different technologies	Medicine and Dentistry	YES
Office of Rural and Regional Health: use of Wiki to connect with rural preceptors	Medicine and Dentistry	YES
Program administration sites developed to facilitate single-point schedule management and co-management of shared documents through integration of Moodle and Google calendars	Medicine and Dentistry	YES
Rural Family Medicine Program: video conferencing used to share academic programming across sites	Medicine and Dentistry	YES
Development and commercialization of Brainspan, an interactive gaming application for medical education	Medicine and Dentistry	NO
Freestanding Certificate in Aboriginal Governance and Partnership: online offering	Native Studies	YES
Master of Arts in Native Studies: online offering	Native Studies	YES
NS 200 Aboriginal Canada: offered via video conferencing for the second time in three years	Native Studies	NO
Clinical Teaching Program: online professional development resource designed to support the professional development of clinical teaching staff, full implementation anticipated for early 2014	Nursing	YES

INITIATIVE	FACULTY	NEW IN CIP 2004
Doctor of Philosophy in Nursing: creation of a cost-recovery online cohort using blended delivery	Nursing	YES
Master of Nursing: new online resource site for disseminating program information and access to instructional materials	Nursing	YES
Bachelor of Science in Nursing After-Degree and Bilingual programs: all examinations have been moved online	Nursing	NO
Laboratory Video Project: new courses have been added in the 2013 academic year	Nursing	NO
Open access webinars offered via the International Institute of Qualitative Methodology: courses will continue in 2014	Nursing	NO
Online preceptorship program	Nursing	NO
Doctor of Pharmacy: course content includes e-learning elements	Pharmacy and Pharmaceutical Sciences	NO
Distance learning technologies employed for professional development courses for practicing pharmacists	Pharmacy and Pharmaceutical Sciences	NO
Skill practice (courses, practice labs, experiential education) supported by eLearning technologies	Pharmacy and Pharmaceutical Sciences	NO
Bachelor of Science in Pharmacy: foundational knowledge in physiology and anatomy being developed and delivered in blended learning format with emphasis on e-Learning components	Pharmacy and Pharmaceutical Sciences	
Master of Public Health: offered via e-learning	Public Health	YES
Blended learning course in diagnostic imaging for physical therapists	Rehabilitation Medicine	YES
Development of an e-clinic using standardized patients so that students are able to work with clients over the course of an academic year.	Rehabilitation Medicine	NO
Expert-delivered webinars offered in a web-based synchronous environment	Rehabilitation Medicine	NO
Voice-over PowerPoint presentations so that students are able to review course content at any time	Rehabilitation Medicine	NO
Satellite programs in Calgary and Camrose are offered using real-time web/videocast technology	Rehabilitation Medicine	NO
Development of interactive applets and modules for use across the undergraduate curriculum	Science	YES
DINO 101: Successful launch in September 2013	Science	YES
New MOOC being developed in linear algebra for September 2014	Science	YES
Special topics course, Introduction to the Space Environment and Space Weather, offered by videoconferencing	Science (with the University of Calgary)	NO

BUILDING STUDENT COMMUNITIES

HOME: IT'S A SIMPLE YET POWERFUL WORD THAT CONJURES UP IMAGES OF BELONGING, DEVELOPMENT, COMMUNITY, AND PRIDE.

University of Alberta Residence Services provide students with more than basic housing amenities; they also create and implement opportunities that help students focus on academic achievement, develop leadership potential, and engage with local and global communities. With 12 residences, seven residence associations, three cohort programs, and 15 community service-learning programs available to choose from, students have multiple options to find—and then grow within—the housing community that can best meet their needs.

While students in residence benefit from easy access to campus amenities, in-house academic services, and ancillary supports, the social networking activities stemming from residence life also often serve as the focal point for resident and non-resident

students alike. Events such as the U of A's Break the Record dodgeball game have brought together an increasing number of students, staff, and alumni with each event (last reaching a total of 4,979 players, plus a large volume of volunteer organizers) and have helped to inspire the greater student population to embrace the University of Alberta as their home.

Increasing student housing is a major priority for the U of A, with the long-term goal of providing space for 25 per cent of full-time students. Since 2010, 474 beds for graduate and international students have opened in the university's East Campus Village, a well-planned student housing community that will eventually include a range of options from fraternity houses to an Eco-House to an additional undergraduate residence.

STUDENTS WHO LIVE IN RESIDENCE EXPERIENCE:

- greater student engagement, with enhanced participation rates in extra and co-curricular activities
- academic success, achieving higher grade point averages as a result of residing in an environment that prioritizes and provides access to the tools that can lead to academic achievement
- stronger retention with the social supports that often provide students who are at a higher risk of leaving with a greater sense of place
- increased community socialization as students are often encouraged to interact with their fellow students and neighbours, and are more actively taught how to use service professionals and faculty members as supports
- opportunities for leadership development resulting in greater personal growth and academic achievement

CAPITAL PLAN

In the competitive world of 21st-century post-secondary education, the vitality and vibrancy of the U of A's education and research ecosystem can only be maintained through well-supported, well-planned, and strategic repurposing and renewal of its facilities. As the university changes and the academy transforms, so must space needs and requirements.

Though the U of A has recently completed and opened several new and renewed formal learning and research spaces, increased enrolment and demand continue to strain existing academic support space such as fitness facilities, formal and informal collaboration/social space, libraries, collections and storage, housing, and daycares. These spaces help attract and retain students, faculty, and staff because together they form and support an environment conducive to a successful academic outcome and experience. Purpose-built student housing is a key driver leading to successful learner outcomes and strong alumni relations.

The university's ability to meet its own and the province's objectives depends on continued investment for new facilities and for renewal and repurposing, addressing deferred maintenance of older facilities. With the recent completion of several large-scale capital projects, the university now has the opportunity to sustainably maintain and, where appropriate, repurpose aging assets and infrastructure as new funding is made available. As areas and buildings are vacated by programs relocating to newly constructed buildings, smart, forward-thinking planning requires that we look beyond simple renewal and explore repurposing opportunities. By coupling renewal and backfill projects, the U of A provides a best-value model for creating projects that look toward our future

operational and academic needs at a reduced capital cost. However, strategic investment in new infrastructure and buildings remains vital in maintaining the delivery of first-in-class academic programs. To that end, wherever possible, the university will seek opportunities to leverage existing funding, utilize the equity in our current physical assets, and explore various partnerships and project delivery models.

As in previous years, the following Capital Plan endeavours to take a balanced approach in identifying planning, engineering, and construction needs. As we look forward, the following five strategic focus areas guide our capital planning efforts:

- Ensure that we continue to maintain the condition and functionality of the university's existing physical assets, which play a critical role in our ability to attract, support, and retain the best students, faculty, and staff.
- Couple backfill requirements with renewal projects to provide a best-value model for capital projects that meets the pedagogical needs of tomorrow's learners and the requirements of researchers in a more cost-effective manner while positively enhancing utilization of our space and meeting the goals of our sustainability plan.

- Fund pre-design services for strategic institutional capital priorities, creating an inventory of projects that can respond to future funding opportunities and can be readily implemented through a variety of project delivery models.
- Provide purpose-built, supportive student housing for up to 25 per cent of full-time enrolment to keep pace with U15 peers, enhance completion rates, and ensure accessibility for rural and underrepresented Albertan students as well as international students.
- Strategically plan and construct critical new facilities, respecting the varied needs of the university's five distinct campuses as they each serve unique and separate constituencies within Alberta.

Aligning with Alberta's Priorities

The University of Alberta's Capital Plan forms the basis of the institution's request for capital funding from the Government of Alberta—the U of A's primary funding partner. It outlines our capital priorities that address space, program, preservation and renewal needs over the next three to five years, as well as forecasting our anticipated long-term needs over the next 10 years. Through the Capital Plan, the university continues to align with government priorities and goals as identified through the Ministry of Innovation and Advanced Education and the Ministry of Infrastructure. At the same time, the plan is

also a critical tool in seeking and securing opportunities to leverage capital planning priorities with public, private, and institutional partners. The U of A works with a number of value-added, sustainable construction processes, and consultation with provincial officials is essential as Alberta Infrastructure further develops and implements such directives as achievement of sustainability through LEED®, Green Globes™, and BOMA BEST™ certification; prudent management of capital grant expenditure in capital project implementation; and identification of deferred maintenance.

The U of A's vitality and vibrancy can only be maintained through well-supported, well-planned, and strategic repurposing and renewal of its facilities. Currently, the university's total facility inventory is 1.7 million square metres, and while we realize there are limited dollars for new capital, we continue to plan and partner to accommodate strategic and critical expansion needs across the university's five campuses. Our current partnered initiatives include Arena and Academic Sport Centre, Student Residences/Workforce Housing, Galleria (formally Edmonton Downtown Academic and Cultural Centre), Physical Activity and Wellness Centre, Eco House, Students' Union Building addition, and Book and Record Depository (BARD) fit-out and expansion.

Envelope funding for planning and preliminary engineering of critical projects puts the U of A and government in the position to quickly enter the construction market as funds become available. This

planning process begins with updating and refining elements of the Long Range Development Plan (LRDP) to ensure that the university can continue to plan and develop its campuses to meet the short- and long-term needs of the institution. Envelope funding also allows the university to strategically advance high-priority projects, which in turn provides more refined project scopes and budgets necessary to identifying the most appropriate implementation strategy, including public-private partnership (P3) options. The U of A was able to capitalize on and leverage granting programs, such as KIP, and partnerships, such as with Go Sport and the City of Camrose, all of which aligned with the university's long-term academic vision.

Though the U of A has recently completed and opened several new and renewed formal learning and research spaces, increased enrolment and demand continue to strain existing academic support space such as fitness facilities, formal and informal collaboration/social space, libraries, collections and storage, housing, and daycares. These spaces help attract and retain students, faculty, and staff because together they form and support an environment conducive to successful academic outcomes and experience. Purpose-built student housing is key to successful learner outcomes and strong alumni relations. The university will continue to work with government to explore various delivery models for student housing that minimize initial capital investment and result in housing options that are attractive and supportive for students.

The capital priorities outlined within this plan are in direct response to the measures and goals outlined in the university's academic and research plans. They also address space pressures directly related to differential growth of our graduate programs, differing space requirements for graduate versus undergraduate space, approved and planned program growth, changing pedagogy and program delivery methods, and the need for additional academic support space. While all U of A campuses work together as a whole, each serves distinct and separate constituencies across Alberta and has critical capital priorities, putting the university in a unique position within the Campus Alberta model.

The long-term capital priorities outlined at the end of this chapter advance the goals of the institution and provide a rationale for addressing areas of greatest need. Outside of identifying needs and capital requests to government, the Capital Plan provides a mechanism for the university to target and leverage partner funding. The U of A remains committed to seeking partnership opportunities that leverage provincial funding and maintain the momentum of the university's initiatives in support of its vision and government's priorities for post-secondary education.

Highlights of 2013-2014

INITIATIVES

- **10-Year Strategic Preservation Plan for Maintenance and Functional Renewal:** The U of A and the provincial government continue to refine data, reporting, and collection tools for methods to assess priorities and understand the scope of conditional and functional problems, and to identify potential funds for remediation. With the reduction of the base Infrastructure Maintenance Program grant, the institution and the province are at risk as the levels of deferred maintenance slowly increase. Through ongoing consultation, government will be re-instituting the preservation category within BLIMS. This will allow for the prioritization of critical deferred maintenance projects that exceed current IMP limits and have been historically displaced against larger, critical renewal projects.
- **Campus Planning:** With the conclusion of the LRDP amendment for South Campus, the university is working with our neighbouring and university communities to prepare an amendment to the LRDP as it pertains to the North Campus. The ministry can expect this plan to come forward in the spring of 2014 in accordance with the terms and conditions outlined in the Post-secondary Learning Act.
- **Envision Program (previously Energy Management Program):** Given the success of the current program, the university has initiated a second generation of the Energy Management Program. As in previous years, the next generation of the EMP is financed through borrowing and paid back through resulting energy savings. The accumulated impact of our ongoing and significant investment in energy initiatives has aided in reducing greenhouse gas emissions and lowering operating costs.
- **Gathering Place:** The university continues to be engaged in discussion to advance the Gathering Place as an interdisciplinary centre of learning aimed at facilitating high-quality dialogue between Aboriginal students and staff across all academic disciplines of the university.
- **Leveraging/Collaboration:** The U of A continues to provide and explore additional collaboration opportunities with our Campus Alberta peers, with respect to our physical assets, professional staff, and programs and services.
- **Student Housing:** The university continues to develop plans and business cases to house up to 25 per cent of its full-time enrolment in purpose-built, supportive housing. Other activities are also taking place, such as sector planning of Michener Park, articulating student housing need within the General Space Program for Augustana, exploring housing partnerships, ongoing new construction within East Campus Village, and conducting various modernization studies. Collectively, these activities guide us in the creation of a comprehensive housing and residence program.

GOVERNMENT OF ALBERTA FUNDING

- **Dentistry/Pharmacy Repurposing:** Dentistry/Pharmacy is a landmark building on our North Campus and the university is committed to developing a plan that will see this building remain as a critical centre of campus. Government has provided much-needed funding to determine how this landmark can be recast to serve the university. A number of studies have been undertaken and a final design development report for the shell and core of the facility has been completed. The Design Development program has identified phasing options for the renewal project. Moving to construction documents for phasing and formalizing the functional program will allow for commencement on the interior design elements.
- **New Access for South Campus off 122 Street:** Engineering is now complete and tenders have been issued for this project. Through the funding received to provide for critical infrastructure improvements at South Campus, the university has been able to partner with the City of Edmonton which provided additional funding to advance a portion of its renewal program of 122 Street, originally scheduled for 2019. This partnership will reduce the impacts of multiple and protracted road construction projects, and eliminate future removals that would have been required if the city's work would have waited to proceed in 2019.
- **Infrastructure Maintenance Program:** Current funding levels of the Infrastructure Maintenance Program (IMP) grant, together with recent one-time project transfers, have allowed the university to maintain its trend in reducing its deferred maintenance liability; however, the recent reduction to the base IMP grant will cause a setback over the longer term. Restoration of IMP funding to 2011-2012 levels is critical for preventing increases in our deferred maintenance liability and reducing the risk of catastrophic failure of some of our buildings systems. Increases to base funding and additional one-time grants for large renewal projects such as Clinical Sciences or MSB are required to limit the growing risk to this liability. (See Figure 18 in the Current State of Assets section.)
- **Preservation Projects:** Projects funded and undertaken in recent years have resulted in reductions in the Facility Condition Index (FCI) of some facilities. (See Figure 16 in the Current State of Assets section for a listing of current preservation projects and their associated reduction in FCI.)
- **Renewal and Backfill Projects:** Prudent project management of capital projects has resulted in positive project variances as renewal and backfill has been completed. A number of repurposing and renewal projects have been identified in close collaboration with government, and are being completed.

PARTNERSHIPS WITH COMMUNITIES, POST-SECONDARY INSTITUTIONS, AND PRIVATE ORGANIZATIONS

- **Camrose Performing Arts Centre:** This project is the result of strong capital and program partnerships with the city and county of Camrose. Construction of this facility, located on Augustana Campus, started in the fall of 2012 with an anticipated completion date of March 2014. This facility will serve a large number of local and surrounding area groups. Through future expansion plans, this project also accommodates opportunities to develop and construct space to further support Augustana's Fine Arts program.
- **Canada Foundation for Innovation (CFI) Contributions:** Over the last 10 years (2004-2013), the university has received approximately \$150 million from CFI for major infrastructure purchases, including equipment, renovation, and new construction. This funding has directly leveraged approximately \$225 million from other sources, including the province of Alberta, corporate partners, and other funding agencies.
- **Enterprise Square Galleries:** In December of 2012, the City of Edmonton approved funding for joint programming and operation of the Enterprise Square gallery space, which will be used to showcase the city's and university's respective museum collections and the work of local artists. This space officially opened October 1, 2013, with the jointly hosted, inaugural exhibition featuring renowned artist and professor Fan Zeng.
- **TEC Edmonton:** TEC Edmonton has provided tremendous growth and program opportunities for all partners. They have indicated their desire and need to expand within Enterprise Square and are currently seeking funding for this work.
- **Islamic Garden:** In June 2009, His Highness the Aga Khan announced plans to create a traditional Islamic garden within the university's Devonian Botanic Garden (DBG) in recognition of the growing partnership between the university and the Aga Khan University. Due to recent planning exercises and a recent visit from His Highness, the Islamic Garden will be moved to a different location within the DBG than originally planned. The design team has completed the schematic design and budget estimate, which, hopefully, will allow the release of the basic infrastructure grant by Innovation and Advanced Education. The Ecological Learning Centre is a critical piece of garden infrastructure that is intended to integrate this and other gardens within the Devonian Botanical Garden site, providing learning and research space, community outreach programs, and visitor and tourism support.
- **The Galleria Project (E-DACC):** This proposed project continues to progress and we look forward to government's commitment. Proposed new infrastructure for the departments of Music, and Art and Design, in the Faculty of Arts would satisfy their space program requirements. This downtown revitalization project could also address space needs within the School of Business. The Galleria is an innovative collaboration of private philanthropy, corporate investment, and public funding involving all orders of government.

PROJECT COMPLETION

- **Li Ka Shing Centre:** This year, the capital fit-out of the CGMP (current good manufacturing practice) area was completed, which concludes the remaining major fit-up for this facility. The extensive commissioning process will continue throughout 2014 and final certification granted for 2014-2015.
- **Innovation Centre for Engineering:** Even with the renewal and repurposing of the existing Chemical and Materials Engineering building, there is a continued and pressing need for program space in the Faculty of Engineering. ICE will support the faculty's focus on providing space for increased access for graduate programs and associated faculty and staff. Construction of the base shell and core of this facility is nearly complete and fit-out of the facility is scheduled to proceed in the spring of 2014.
- **South Academic Building Repurposing:** A portion of the South Academic Building has been repurposed and renewed to accommodate the growing need for wet lab space for the Faculty of Agricultural, Life and Environmental Sciences, and School of Public Health. This space has attracted world-leading researchers in the areas of soil reclamation and water research.
- **Student Housing:** In September 2013, the university opened two new student residences located within East Campus Village. These facilities provided an additional 240 beds and increased our ability to provide on-campus housing to just over 13.75 per cent of full-time students. These new residences provide housing for undergraduate, international, and graduate students, and support the university's goal of providing purpose-built housing for up to 25 per cent of its full-time student population.
- **Medical Isotope and Cyclotron Facility:** The partnered project on South Campus for the redevelopment of the old Balmoral Curling Club into a state-of-the-art cyclotron facility was completed in late 2012. The university and its partners (Alberta Health Services, Natural Resources Canada, and Advanced Cyclotron Systems) will be moving into the space through 2013 and into 2015. University operation of the cyclotron and use of the space commenced January 2013.

MAJOR FUNDED CAPITAL PROJECTS UNDERWAY

- **Physical Activity and Wellness (PAW) Centre:** Construction of this facility began in late 2012 in response to growing demand for additional recreation and fitness space, as well as research and programming space in the Faculty of Physical Education and Recreation. This project is funded in partnership with the Students' Union, Graduate Students' Association, Alberta Lotteries, private donors, and institutional dollars.
- **Pharmacy Fit-Out:** Phase II of the Pharmacy fit-out within the Medical Sciences building has commenced. This space is connected to both the Katz Group Centre for Pharmacy and Health Research and the Edmonton Clinic Health Academy, and provides needed space for the dean's office, student services, and teaching and research. Scheduled completion is September 2014.
- **Innovation Centre for Engineering Fit-Out:** Due to the critical need to accommodate the demand and planned growth of our Engineering programs, the university has approved funding for the fit-out of this facility. Notwithstanding the self-funding of the entire project to date, the university continues to seek government support for a portion of the fit-out, which is highlighted in Table 3 – Highest New and Expansion Priorities.
- **Students' Union Building Expansion:** The SUB renovation project is intended to address current weak spots in how the building has developed over time. The project is designed to achieve two important long-term goals: ensuring that the building continues to be kept up to date and well maintained, and encouraging student involvement in campus groups, events, and volunteer opportunities. This project is funded through a ACFA mortgage and backed by fees collected by the Students' Union.
- **St. Joseph's Women's Residence:** This residence expansion project aims to introduce 282 beds to the U of A's on-campus housing inventory. An extension of St Joseph's College, the new, all-female residence will operate in a collaborative manner with the rest of the university's residence system. This project is funded through the support of St. Joseph's College funding and an AFCA mortgage that is supported through rent.
- **Leadership Residence:** This residence expansion project will add 144 beds to our on-campus housing inventory. The new residence will be part of the larger Peter Lougheed Leadership Initiative, a joint initiative between The Banff Centre and the U of A, focused on leadership development for undergraduate students.

Key Focus Areas and Capital Planning Considerations

The Capital Plan assumes that government guidelines and directions, including sustainability initiatives, must be met in undertaking planned projects. The university continues to work with government to develop a sustainability model for the institution that would be approved by all parties to facilitate sustainable design and operational practices.

The university's highest project priorities (See tables 1, 2, and 3) have been identified as requiring additional funding support from the Alberta government. Due to

continual review of budgets and scopes of previous and emerging projects, the priorities and estimated costs within the Capital Plan may not match the university's list of capital projects or values as outlined in the most recent BLIMS submission. Project cost estimates are reviewed and updated annually and adjusted as required. Estimates have been adjusted to align with current market conditions and the university's and government's experience of the current construction costs and projected market escalation.

FOCUS AREA 1: CONTINUED REDUCTION IN DEFERRED MAINTENANCE LIABILITY

Infrastructure Maintenance Program (IMP) funding remains critical, especially as a source of funding that continues to be leveraged in partnership with other internal and external funders, multiplying the value of the money many times over.

Recognized deferred maintenance specifically identifies condition-related deficiencies recommended for remediation within five years under a series of events that are established by the provincial government. At the time of this report, we are still awaiting release of information from Alberta Infrastructure on the 2013 updated audit values. Last year, the estimated total liability of recognized deferred maintenance on supported and unsupported university facilities was \$822 million: \$689 million for supported facilities and \$133 million for unsupported (ancillary) facilities.

Elements like code upgrades, hazardous material removal, functional program upgrades, barrier-free access upgrades, indoor air quality upgrades, and various energy and operational efficiency upgrades are not currently recognized by government in the deferred maintenance tracking tool. As government migrates its current software (ReCAPP) to a new tool (VFA), we understand that the intention is to track building code, hazmat, universal access, horizontal infrastructure, and other elements. While we fully support adding these elements in the values for deferred maintenance, it should be noted that this change will likely further increase the institution's current recognized liability by more than \$400 million.

The provincial reporting process for deferred maintenance uses Facility Condition Index (FCI) values, which are calculated by totalling the value of deferred maintenance and dividing it by the estimated replacement value of the facilities. The institution's deferred maintenance liability has shown a gradual reduction (with facilities

over 40 years of use showing the most improvement) as a result of grants and a strategic approach to addressing critical deferred maintenance. We anticipate that, if the previous funding levels are not restored, the recent trend of a reduction in deferred maintenance will be reversed. The university continues to strategically invest in our aging infrastructure, and the FCI for these targeted buildings has improved significantly as reported in the annual "Good News Stories" issued to the government.

ASSUMPTIONS

The university has assumed that, as a minimum, the current IMP funding levels will be maintained. The main focus will be on the continued preservation, repurposing, and renewal of its facilities. It is hoped that the economic slowdown will continue to present opportunities for more competitive bidding and excellent value for approved projects.

Any building planned for renovations will have associated decant space available during construction, and any facility planned for major renovation or renewal will remain in use for an extended period of time after the renewal program is complete. Also, the university and government assume that a portion of annual IMP funding available must be either initially uncommitted or have the potential to be reallocated to allow for contingency and emerging issues that arise during each year's operations.

Finally, the institution must support whatever a building's primary function is, now and in the future. This strategy is aimed at ensuring effective and efficient building use, and maintaining the university's existing inventory while transforming learning environments to meet the needs of tomorrow's learners, educators, and researchers.

OBJECTIVES

- Continue to maintain the condition and functionality of the university's physical assets, which play a critical role in our ability to attract, support, and retain the best students, faculty, and staff.
- Reduce the risk of buildings' system failures that could affect life safety or result in building closures.
- Identify and proactively address deferred maintenance in a sustainable manner and in collaboration with government. In this way we can jointly identify assets at or near the end of their functional life.
- Aid in the assignment of preservation funding. The university will continue to address renewal programs such as roofing, building envelopes, piping, sidewalks, life safety, and security. The university will support these programs by allocating a portion of IMP dollars across the institution, as accepted by the province and within the guidelines set by the IMP.
- Obtain sufficient resources to meet priority and contingent needs for maintaining and upgrading existing facilities.
- Maintain the reliability of our utility plant through focused investment in the functional renewal that deals with both deferred maintenance and increased efficiency with new technology.

INITIATIVES

- Three-Year Infrastructure Maintenance Program Expenditure Plans: This initiative was adopted by the university in 2004 and formalized with a request by government for an initial submission in 2008. The rolling three-year plan has been part of the university's annual reporting to government and is carried as a financial update in our quarterly reports to provide timely progress reports on the use of grants.
- Update to the 10-Year Strategic Preservation Plan for Maintenance and Functional Renewal: This initiative began in 2005 and was updated in 2010–2011. The next update is scheduled for 2014–2015 and will provide the university and government with updated strategies and project prioritization to maintain and renew the institution's owned facilities, as a result of new IMP funding commitments, IMP guidelines, and changes in building renewal priorities. For the next update, the university will be working through CAUBO on a national benchmarking initiative for deferred maintenance. As the western co-ordinator, we are working towards all Campus Alberta institutions participating, and sharing the outcome of the report with government.
- Life-Cycle Costing: The U of A will be working with government to prepare a planning document related to infrastructure, deferred maintenance, renewal, and repurposing needs that would provide a long-term life-cycle cost approach addressing all aspects of a facility. This plan would allow for a long-term funding approach to address the backlog of deferred maintenance and facilities renewal or repurposing requirements. This plan, which must be data driven, will break new ground regarding the process for funding requests, and provide another tool for a sustainable review of our assets.

- Preservation - “Good News Stories”: Since 2010, the university has prepared a trio of “Good News Stories” brochures on achievements in reduction of deferred maintenance and renewal of facilities. The university intends to continue reporting on an annual basis.
- Heating Plant Expansion and Renewal: The university will seek government funding to ensure the continued supply of reliable services to our campus and the surrounding government buildings served by our central plant. The possibility of leveraging this investment with additional institutional borrowing to install a new co-generation plant that could produce both steam and power simultaneously will also be examined. This project would reduce the campus’s overall carbon footprint, reduce our demand on the Alberta grid system, and increase our capacity to produce reliable power.
- Building Certifications: Committed to working within available budgets and maintaining sustainable construction practices, the university has started a trial process to ensure that major renovation and renewal projects are certified under “Green Globes.” Initial projects are showing significant reductions in consultant costs, reductions in contractor premiums, and quicker turnaround on the certifications. Projects that are targeted for sustainable construction certification are listed in the quarterly report.

KEY ISSUES

- Sustainability: Through recommissioning and sequenced renewal of targeted buildings that are functional and structurally sound, the university can lower the carbon footprint and energy requirements in older assets. The potential social, environmental, and economic benefits can be dramatic.
- Increased Liability: Current and previous IMP funding levels alone do not provide adequate funds to address current and trending levels of deferred maintenance. Stable, long-term funding will be essential, and the university will work with government to develop funding strategies that could support increased funding in the order of \$25-35 million annually.
- Operational Continuity: An inability to maintain the operations, functionality, and utilization of capital assets places the institution at risk of negatively affecting current and future research, teaching, and learning.
- Alternate Funding: The university continues to work with government to explore projects that could provide an opportunity for a brownfield redevelopment within a P3 project model and explore how our land assets could be leveraged in providing needed endowment reserves.

FOCUS AREA 2: COMBINATION PHYSICAL/FUNCTIONAL RENEWAL PROJECTS VIA BACKFILL OPPORTUNITIES

ASSUMPTIONS

Recent investment in new facilities has created an opportunity to creatively address both the physical and functional renewal of our buildings, resulting from the U of A's institutional mandate to grow research capacity as a comprehensive academic and research institution. However, older facilities are not designed to accommodate such increased functional and operational demands. Therefore, the coupling of functional and physical renewal projects through backfill projects provides a best-value model for capital projects that minimizes the need for new buildings and meets the pedagogical needs for tomorrow's learners and researchers at a significantly reduced capital cost.

OBJECTIVES

- Maximize the opportunities to identify and proactively address deferred maintenance in recently vacated space, through joint renewal and repurposing projects.
- Support the academic and research goals of the institution and maximize use and life of existing infrastructure, by ensuring that space is functional for current and future learning and research.

INITIATIVES

- **Renewal:** With the shift of focus to renewal of aged facilities, a methodical, planned approach has been developed to address various aspects of renewing older buildings that remain occupied.
- **Backfill Program:** The completion of the Edmonton Clinic Health Academy and Centennial Centre for Interdisciplinary Science has resulted in freeing a number of aging and outdated learning and research spaces within existing facilities on our campuses. This plan will provide a review of academic needs and how they could be best accommodated within these spaces. Conceptual scopes and budgets will be established to facilitate ongoing dialogue with government on how best to address these joint renewal and academic needs.
- **Functional Deficiencies Data:** The U of A, in partnership with government and other post-secondary institutions, is in discussions to develop a system that will supply data, currently unavailable, for functional deficiencies in buildings. This will be a long-term initiative.
- **Project Identification:** Working with various faculties' general space programs, the university will identify backfill opportunities that exist within buildings where there are high deferred maintenance needs.

KEY ISSUES

- **Reduce Capital Requirements:** Renewal and repurposing of target buildings that are functional and structurally sound result in lower overall capital costs when compared with the cost of a comparable new green field building.
- **Space Utilization:** The university is reviewing space utilization to determine how underused space could provide logical and comprehensive swing space during renewal or repurposing projects.
- **Renewal and Repurposing:** Adequate funding for repurposing space in key older buildings is still a challenge. Deferred maintenance is an ongoing issue, but when renewal projects are coupled with modernization projects, the entire functionality of the building is upgraded to meet the needs of today's learners, teachers, and researchers.
- **Backfill:** While not normally thought of as being a part of preservation, nearly every project has some backfill and adjacency impacts. Upgrades required in adjacent facilities have an impact on the cost of major projects, such as when these spaces can accommodate required swing space to lower project costs associated with multiple phasing of larger renewal projects.

FOCUS AREA 3: ENVELOPE FUNDING FOR PRE-DESIGN SERVICES

ASSUMPTIONS

Prior to entering design phases for a capital project, certain services, beyond the capacity of the institution's staff, must be procured in order to clarify needs (e.g., general and functional space programming), outline scope and size, identify solution alternatives, select the preferred solution, and determine a relatively firm cost. When dealing with existing facilities, it is imperative to understand the facility's constraints within which the project team must work. In addition, services of external professionals are often required to assist with significant initiatives, such as studies and master plans to clearly define objectives, future use, and adjacency issues. Past project experience has reinforced the value of preliminary engineering efforts, resulting in projects being delivered on time and on budget.

The traditional funding model sees projects initiated once full funding is secured; projects generally take three to five years to deliver, depending on scale and complexity. However, the university has also had significant success using partnerships to deliver its capital priorities, resulting in reduced capital requirements compared with the more traditional approach. To effectively develop and explore partnership opportunities, significant up-front work is required to properly scope, budget, and vet potential projects. The university is seeking pre-design funding to create an inventory of projects ready to move forward as new capital funding and partnership opportunities become available.

Pre-design services must provide a clear tie between campus development and the immediate and long-term strategic vision of the institution. The university understands that approval of pre-design does not

constitute approval for, or promise of, future capital funding for a specific project. However, being ready as funding becomes available, the university can potentially save millions of dollars in inflationary costs that might be incurred if construction is delayed.

There are a number of cases in which up-front pre-design has aided the university to actively engage and leverage partnership funding opportunities. For example, taking a staged approach with the Li Ka Shing Centre for Health Research Innovation and the Katz Group Centre for Pharmacy and Health Research buildings allowed for a proactive and quick response to the demands of the federal KIP program.

OBJECTIVES

- In the short term, seek funding for pre-design services related to strategic and critical projects or initiatives, both to provide greater scope and budget certainty and to enable responses to new funding in a timely manner. As greater levels of funding become available, seek a long-term funding envelope program that would include government contributions through capital grants as well as partnered contributions from internal sources where possible.
- Provide strong and clear campus planning documents that are rooted in leading urban design and sustainability principles. The plans will seek to provide the necessary direction, ensuring the academic program needs of the university are met, with careful consideration to the expressed interests of the surrounding neighbourhoods.

INITIATIVES

- **Secure Funding for Pre-Design Services:** In October of 2009, a letter was submitted to government outlining the importance of pre-design funding in the current economy. The letter outlined two potential approaches to pre-design funds. The first was a list of projects and estimated design costs per project, with funds proposed to be disbursed over three fiscal years. The second approach was to work with government to establish an annual funding allowance, which suggested an annual planning envelope in the range of \$2-3 million.
- **Project Readiness and Responsiveness:** Within this framework, projects yet to be approved would be partially advanced prior to project approval. Taking this action provides significant benefits; better defined project scopes and budgets provide a higher level of program and cost certainty. It also facilitates a quantitative and qualitative approach in matching the project with the most appropriate delivery model, whether a traditional design bid build or a more entrepreneurial P3 approach. Lastly, it positions the institution and government to respond quickly to the ever-changing construction marketplace and new potential funding programs.

KEY ISSUES

- **Backfill Planning and Repurposing:** With the completion of a number of new buildings, there is an opportunity to leverage renewal with redevelopment. Given the goals and aspirations outlined in the CIP and the existing deferred maintenance associated with these buildings, there are a number of factors that require consideration in assessing the residual capacity resulting from new construction. Up-front planning will enable the university to create a renewal and repurposing plan to ensure today's assets can deliver tomorrow's programs (as identified in the respective General Space programs for the various faculties and administrative units) in the most sustainable way.
- **Increased Research Intensity:** As a research-intensive institution, the U of A is faced with a growing need to convert administrative and undergraduate space to accommodate growth in graduate, doctoral, and post-doctoral programs. These research programs require significantly more physical space and infrastructure than the university's aging inventory can accommodate. Advanced planning is essential to investigate how to best renew and repurpose these areas to maximize utilization.

- **Increasing Area of Aging Infrastructure:** Though new construction has accommodated the planned growth of the institution, the university must continue to respond to its learning goals. There are a number of targeted buildings for which planning work must be completed: Dentistry/Pharmacy, the Medical Sciences Building, the Clinical Sciences Building, and the South Academic Building (formerly Civil Electrical Engineering Building). Advanced pre-design funding for condition concept studies and reports would provide the opportunity to responsibly accommodate future growth, while aligning with the expectations of government.
- **Campus Planning and Community Expectations:** The university continually engages its neighbours and stakeholders in the planning and design of its campuses as they develop. Communities increasingly demand that the university's planning documents be detailed enough

that they are fully aware of the impacts of development. Critical to meeting these expectations is our ability to continue to work alongside these communities and ensure that the consultation process is maintained through the development of sector plans, as well as project-specific siting, pre-design, and preliminary design efforts.

- **Long Range Development Plan:** The LRDP needs to be updated to reflect new lands acquired, such as Enterprise Square, St. Albert lands, Devonian Botanic Garden, Kinsella Ranch and Mattheis Ranch. Given the recent amendments to our north and south campuses, the university will be working to repackage its LRDP document so that each of our five geographically distinct campuses will have individual plans that properly reflect the unique and varied programming and community considerations associated with these campuses.

FOCUS AREA 4: STUDENT AND WORKFORCE HOUSING

ASSUMPTIONS

The university continues to respond to pressures for additional student residences, faculty and staff housing, and accommodation for visiting researchers. Research indicates that the quality of housing facilities and the academic programs correlate with academic performance and the success of students. These facilities are also a key tool in the university's ability to attract and retain students, faculty, and staff. The university aims to provide purpose-built housing for up to 25 per cent of full-time students, which is in line with our peer institutions.

To fulfil the objectives of the university's white paper on student housing, the academic plan, and the priorities of the Government of Alberta, the university plans to increase on-campus, purpose-built, supportive, and accessible housing, and also plans to answer an increasing need to integrate support programs and academic learning space into student housing that meets the needs of targeted groups such as graduate, rural, Aboriginal, and international students. Faculty, staff, and mature students with families are also increasingly seeking housing options at the university, and must be included in current planning.

OBJECTIVES

- Use the findings and recommendations contained in the U of A's white paper, "Student Housing – for Now and for the Future" (August 2009), to provide the context of further discussion and planning concerning housing on campus.

- Continue working with Innovation and Advanced Education, other ministries, and stakeholders to develop creative housing solutions that are sustainable and meet the goals of the university, students, and their families.
- Emphasize the importance of funding for residential program space that supports the academic mission and student success.

INITIATIVES

- Residence Services Accommodation and Program Study: This study presents a road map with respect to how residences might develop in the future as well as what types of programs and activities should occur in support of the development of the whole person. The university will be using this document as a guide in planning and developing additional space to provide opportunities and access to rural, Aboriginal, underrepresented, and international students, as well as students with families.
- Condition and Functionality: The university does not receive targeted deferred maintenance funding for student residences. Student residences have high infrastructure needs, compounded by the university's inability to recover the current backlog costs of maintenance or modernization via rental revenues. In 2010–2011, the university began reviewing strategies that would help build a reserve fund to be accessed for maintenance and renewal of student residences (Residence Services Capital Reserve Strategy, June 2010), and our newest student housing complexes

have building reserves integrated into the rental rates. Changing student demographics and requirements, as well as improved understanding of program delivery, are driving the need for modernization in several of our older student residence communities. The university will continue to work with government to identify one-time and continuing deferred maintenance funding for student housing in order to prevent closure of much-needed residence spaces.

- Capacity: The university continues to explore strategies to add student residence capacity on its campuses, as well as to provide workforce housing options on the West 240 lands on South Campus and Michener Park.
- Partners: The university will continue to meet with private sector developers to explore viable options to achieve our residence and housing targets.
- Property Taxes: The university will continue to discuss means of eliminating municipal property tax assessments on student housing, thereby directing more funds to critical deferred maintenance.
- Lights-On Funding for Academic Program Areas within Residence: In some student housing communities (especially in first- and second-year residences) as much as 20 to 35 per cent of the gross area is being used to provide space that accommodates co-curricular programming, study halls, and other student support services. If these spaces did not exist in residences, there would be pressure to provide these spaces elsewhere on campus. The university will continue to work

with government to find ways to acknowledge these aspects of student development and discuss ways to bring lights-on funding to academic program areas in residence spaces.

- Michener Park Redevelopment: Available and supportive family housing is essential for recruiting and retaining graduate students and post-doctoral fellows. Ancillary Services is undertaking community and business planning with a view toward advancing this important project. Phase one of this project will see an approximate doubling of our current married student housing units and the creation of a community that can seamlessly integrate with the surrounding communities. This project will also serve to eliminate the existing deferred maintenance liability at the Michener Park site.
- Modernization Studies of Lister Hall and HUB: Lister and HUB are two communities that support undergraduate and international undergraduate students. Their modernization is critical to the university's ability to continue to meet the needs of these important cohorts.
- East Campus Village (infill and new residence development): It is the university's intention to continue to develop East Campus Village as a vibrant and supportive student community. There is an opportunity to develop creative and appealing infill housing projects that meet the needs of the students and are respectful of the community's architectural heritage. The university plans to expand its successful cohort living and learning spaces by developing further residences in East Campus Village.

FOCUS AREA 5: NEW SPACE

ASSUMPTIONS

Over the last few years, the university, through the support of government, has added approximately 150,000 square metres of new and expanded space, most of which has already been accounted for in approved program expansions. As the university continues to take a measured response to growth, there is still a need for strategic construction of critical new facilities. It is also important to recognize that the needs of the U of A's five campuses vary, each serving unique and separate constituencies within Alberta.

The institution has identified a number of new expansion projects critical to the mission, vision, reputation, and global competitiveness of the institution, a majority of which were identified prior to the economic downturn. Some of the highest priority projects include the following: a building expansion to accommodate science programs at Augustana campus; a new School of Business building to accommodate growth within the faculty; a new School of Music and Art & Design facility within the Faculty of Arts; fit-up of the Innovation Centre for Engineering; and relocation and a new arena and metabolic unit replacement on South Campus.

There are also a number of critical academic support facilities that have been identified for expansion, including the Book and Record Depository [BARD]. Academic support facilities are discussed in greater detail in the next section.

OBJECTIVES

- Outline the capital needs of the institution in order to deliver the vision and programs included within this Comprehensive Institutional Plan. Space must not only provide simple access, but also ensure that the entire educational and life experience of students is supported.

- Confirm the state of the current inventory of academic support facilities; identify adequacy, appropriateness, and availability; and engage government in discussions to outline the importance of these facilities and remediate identified shortfalls in these integrated program areas.

INITIATIVES

- Priority Setting: Continue to work with government to align priorities for new capital and partnerships.
- Strategically Advance Planning: Continue to work on advance planning of high-priority projects so they are in a state of readiness once new capital funding becomes available.
- Partnerships: Continue to explore partnerships through donations, and alternate financing and project delivery models to leverage any available funding and reduce initial capital investment.

KEY ISSUES

- Provincial and Global Economies: Currently the key issue affecting new space and corresponding capital is continued economic uncertainty and volatility. The university needs to continue to work with government to develop strategies that maximize and leverage limited government resources.
- Lack of Adequate Academic Support Space: Over the past 10 years, there has been a concentrated focus on funding projects that lead directly to much-needed increases in access. This has now put a strain on our academic support spaces, which have not grown proportionally with recent increases in enrolment.

ADDITIONAL PLANNING CONSIDERATIONS

CAMPUS ALBERTA

The university continues to work with its post-secondary partners to explore opportunities for sharing resources, both physical and operational, for the mutual benefit of Campus Alberta. The university has a significant intellectual resource base and capacity to assist and support Campus Alberta institutions as requested. When reviewing capital and operational needs of the sector, synergies and economies of scale could be realized through joint use of our physical assets (e.g., Book and Record Depository, curatorial research facilities, and student housing). There is also an opportunity to leverage the operational and administrative skills (e.g., project management, cost control, sustainability, procurement) within the Campus Alberta model to the advantage of the various institutions and the ministry.

FINANCIAL STRATEGIES TO SUPPORT CAPITAL

There is a significant need for long-term funding certainty to facilitate institutional initiatives. While there will likely always be a need for traditional provincial investment through one-time grants, the university is committed to seeking other opportunities and avenues that minimize this dependency through a number of funding strategies.

- **Borrowing:** It is critically important that the university work with government and its financial entities to develop alternative financial models that address current fiscal constraints within government. Borrowing is part of planning and building an internationally recognized research-intensive institution that will attract the best and the brightest faculty and students in the years

to come. The university recently completed a briefing to Innovation and Advanced Education that outlined possible sinking fund scenarios that could be used to support these efforts and take advantage of high market returns and low long-term fixed borrowing rates.

- **Alternate Financing Arrangements:** Along with pursuing innovative partnerships for property development, the university also looks for alternative financing arrangements (e.g., bond issues and P3s) where feasible and advantageous. Increasingly, the funding of projects in this plan will reflect the partnerships noted above and will include funds from multiple sources. Donations, as well as partner contributions, will be sought and used to complete needed facilities. Leasing options will also be considered to lessen the demand for capital funding. The university will continue to seek ways to involve the private sector in the repair, development, and operation of new and existing housing inventory.
- **Partnership Development:** Opportunities to develop partnerships could allow the university to leverage funding and develop its physical resources in a cost-effective manner. While this priority initiative presents a major opportunity for the university to develop its physical resources in an innovative and cost effective manner, it also presents significant challenges to both the institution and province. First, the institution, along with government as its primary funding partner, must work within current public policy. Second, the university must carefully weigh the advantages apparent in a partnership arrangement against the potential loss of control over the future of its resources.

INFORMATION TECHNOLOGY

Although grants cover purchases for information technology, there is a need for agreement on government support of maintenance and replacement for core information technology services. A key element to this support is that it must flow from a new funding source and not be redirected from the existing facilities' deferred maintenance grant. Information technology is foundational in a modern building. It can be used to control security, power usage, air conditioning, elevators, telephones, and many other core services. This infrastructure eventually wears out or needs upgrading to continue meeting operational, teaching, and research needs.

OTHER INFLUENCES AND CHALLENGES

- Facility operating costs for high-intensity research facilities may still be greater than the funding provided through the base operating grants. The university must carefully monitor actual costs in these facilities to determine whether a significant shortfall continues and report to government accordingly.
- While the university appreciates and acknowledges the government's efforts to provide lights-on funding for the Centennial Centre for Interdisciplinary Science, failure to provide funding that bridges the difference between the lower historic funding associated with V-wing and today's funding requirements will result in a significant operational shortfall to the institution. This will directly affect overall operational service levels across our campus for existing facilities. As buildings are repurposed to accommodate additional

research-intensive programming, there may also be a need to review operating costs and associated funding requests for differential lights-on funding to accommodate program change within a building.

- The deferred maintenance liability cannot be significantly reduced unless an increase in annual grant funding or one-time funding is received for preservation and renewal projects. Although not recognized as deferred maintenance, there is also a need to expend significant amounts on functionality issues for which data are not readily available.
- The lack of available and affordable child care options on campus is becoming a deterrent, not only to the recruitment of staff and faculty, but also to the attraction and retention of graduate students and students from traditionally underrepresented groups, such as Aboriginal people.
- New construction is required to achieve the LEED® Silver certification level. The university is fully committed to sustainable construction and operations, continues to engage government to look for the most economical means of validating building designs and operations in the interest of achieving the university's sustainability goals, and is actively pursuing alternative, cost-effective strategies to provide equal or greater certification levels at a lower cost. Consideration for alternate certification systems allowing for more prudent application of grant funds must be considered.
- The university is considering how it might monetize land assets that are surplus to its academic and research needs.

Current State of Assets

The university manages a portfolio of facilities totalling 1.7 million gross square metres over more than 500 buildings, of which 50 per cent are more than 40 years old and 80 per cent are more than 20 years old. As part of reporting to government, we also report on our buildings' Facility Condition Index (FCI). Approximately 17 of our buildings have an FCI over 30, with Dentistry/Pharmacy being the highest at 66.

FIGURE 14 FACILITIES WITH SIGNIFICANT MEASURED FACILITY CONDITION IMPROVEMENTS

DEFERRED MAINTENANCE PROGRAM

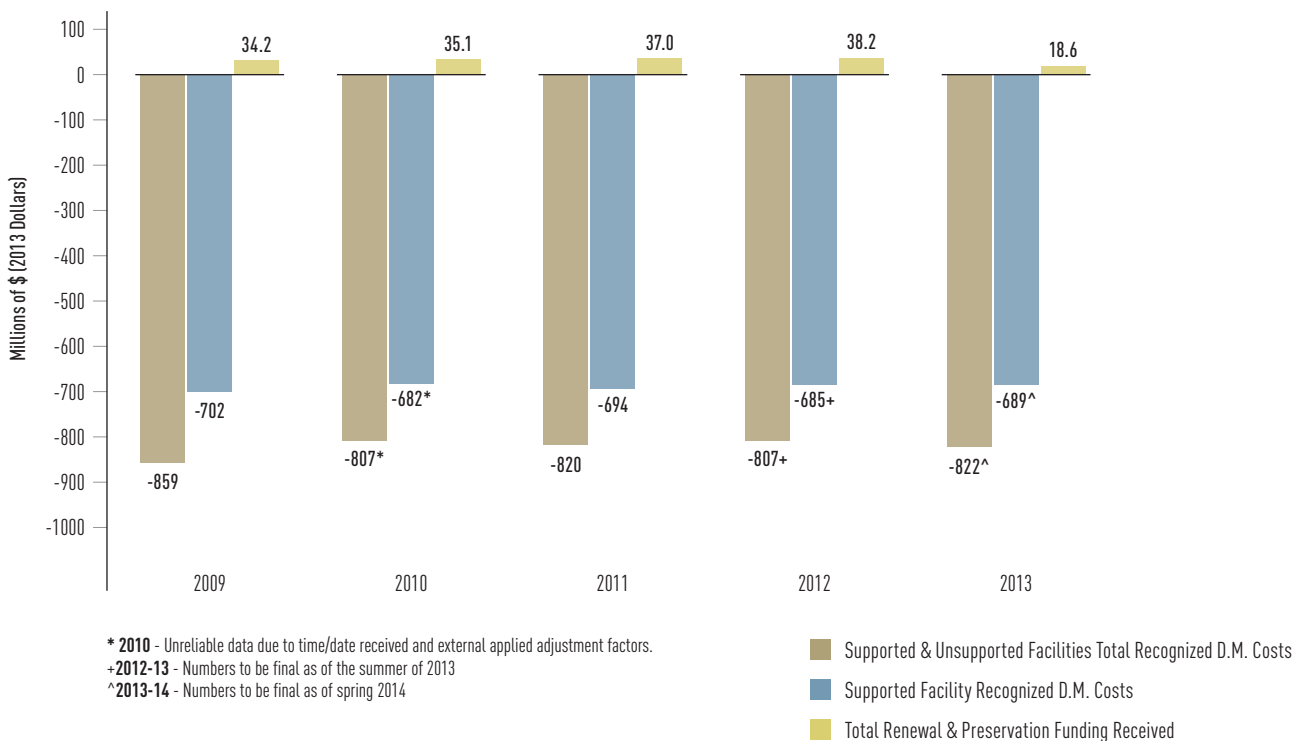

Funding cuts to the Infrastructure Maintenance Program, coupled with the loss of one-time grants for preservation and deferred maintenance projects, will reduce our ability to address deferred maintenance liabilities. As we work to renew our 10-year strategic plan in 2014-2015, we will work with government to articulate these impacts and develop a new plan that is balanced and responsive to these new realities, while outlining our needs and specific strategies to continue to aim at proactively managing these risks.

Notwithstanding the impacts and risks associated with these funding changes, the U of A, with assistance from the Government of Alberta, continues to make progress in

reducing the overall Facility Condition Index for buildings that have been strategically targeted for investment as they are critical to the delivery of our academic and research mission and priorities. (see Figure 16).

Current funding is inadequate to eliminate the backlog of infrastructure renewal required without supplementary one-time grants for large, high-priority projects, such as Clinical Sciences and Cameron Library exterior skin replacement or the renewal of the Medical Sciences Building and the Clinical Sciences Building. Should the pull-back on continuous and one-time funding assistance for preservation projects continue, the recent trend of

FIGURE 15 5 YEAR REPORTED FACILITY DEFERRED MAINTENANCE TREND VS. IMP AND ONE-TIME FUNDING

slightly decreasing the deferred maintenance liability will reverse and revert back to the trends experienced between 2000 and 2005.

Figure 17 (Facility Deferred Maintenance vs. IMP and One-Time Funding) illustrates current comparisons between deferred maintenance backlog, current funding commitments, and the trend over the last five years for both supported and unsupported (ancillary) facilities.

The largest area of deferred maintenance in our unsupported facilities is within our older student residences. While our newer facilities have a rental rate that supports a capital reserve as part of the operating budget, our older residences do not. Strategic funding for the renewal of some of these older facilities is necessary to prevent unintended closures.

Functional renewal costs associated with deferred maintenance are not recognized by government as deferred maintenance. It is expected that a systematic audit of functionality deficiencies will uncover substantially higher dollar figures. To date, the university has only completed an audit on asbestos and the associated removal costs.

Note: Failure replacements are audited events that are recognized as required to be done. Life cycle events are events that are projected typically in year five.

Risk Management and Life Safety Issues

Despite continued funding pressures and deferred maintenance backlog, some projects must proceed in order to respond to emergency situations. These projects may have to be funded from internal or alternate sources until specific grant funding is available from government. Also, contingency funds from existing funding can be inadequate to cover major system failures in large, aging facilities. Due to a number of major failures over the past three to four years, the university has advised government officials that adjustments may be required to the three-year rolling IMP plan to deal with emergent issues. The university continues to proactively monitor and coordinate with government on the growing operational pressures within our aging infrastructure so we can maintain access and minimize the risk of shutting down teaching, learning, and research space.

Capital Funding Requests

This section outlines the University of Alberta's current listing of highest priority capital and planning projects to ensure the institution can meet its mandate over the next three to five years. The projects listed within provide the foundation of our BLIMS submission for 2014-2015.

Pre-Design Projects Requiring Funding

Pre-design services work is critical to the long-range planning of the institution because it demonstrates how best to maximize utilization of land holdings, buildings available for repurposing, or projects critical to the delivery of the institution's academic program. The projects listed below represent priority planning projects that are planned over the next three to four years. Due to the critical nature of these projects, some of the planning projects have proceeded with partial funding in advance of needed and formalized government funding (denoted by *).

Unfunded Priorities

The following are the university's highest priorities in the categories of renewal, preservation, and new and expansion, for which the institution is requesting consideration of government approval and funding. Due to continual review of budgets and scopes of previous and emerging projects, the priorities and costs have not been included within the Capital Plan but will be identified in the 2014-2015 BLIMS submission. However, the university assumes that projects identified as priorities in this update will, for the most part, be carried forward in its BLIMS submission.

TABLE 1 PRE-DESIGN / DESIGN PROJECTS REQUIRING FUNDING (LISTED IN ALPHABETICAL ORDER)

PROJECT	DESCRIPTION
Agricultural, Life & Environmental Sciences (ALES)	Planning for the growth and emerging priorities of the faculty in research and teaching and the feasibility of consolidating faculty departments in a single facility on the South Campus, including the assessment of other lands.
Augustana Science Building and Classroom upgrade	Planning and design schematics to facilitate the renewal and expansion of the current labs servicing the Augustana science program and provide classrooms that meets today's pedagogical needs.
Biomedical Engineering Building (Pre-Design)	Pre-design to build infrastructure and acquire equipment necessary to facilitate development of Canadian Institute of Bio-Medical Engineering on the U of A North Campus.
Campus Space Planning *	In response to the CIP, increased growth in Graduate and post graduate programming, and increased utilization, the university continues to refresh faculty space needs and maximize repurposing and minimize new and/or expansion demands.
Campus Wide Renewal Project Planning	With limited decant space the institution needs to develop a holistic plan that allows the institution to plan how various renovations and renewals can occur with minimal disruption to teaching, learning, and research.
Cameron Library and Information Pavilion - Phase 3 (Curatorial)	With one of the largest collections in the country, the strength of our collections is critical not only to the researchers at the University of Alberta, but to those across Campus Alberta. Given that the current facility is not suitable for this program and is putting the collection at risk, replacement of this facility is becoming more pressing. Pre-design services would confirm the size of the facility, establish the operational requirements to maintain the integrity of our collections and possible tie into a larger Campus Alberta model.
Gathering Place *	Design for a centre focused on students, faculty, and staff to serve as a community gathering place that embraces and provides an inclusive and supportive learning environment to increase participation by First Nations peoples within the post-secondary sector.
Institutional Backfill/Repurposing Planning	With the recent turnover of new facilities there is a need to provide a coordinated review of critical institutional areas affected by changing use and occupancies. Primary building inventories would include Clinical Sciences, Medical Sciences Building (ECHA influenced) and Biological Sciences (CCIS influenced). Coordinating efforts would provide a consolidated approach for a "best fit" solution.
Long Range Development Plan (LRDP) Updates	The University will update its LRDP plans for North Campus, Michener, Enterprise Square, and Devonian. Considerable stakeholder engagement and consulting costs are associated with this work given the increased demands by our surrounding communities for detail and time to review. These plans are critical to the university's ability to maintain its ability to develop its lands to deliver on its Mission and Vision.
School of Business	Development of a building for the School of Business in a partnered opportunity with private sector. A building for the School of Business also accommodates backfill requirements of social sciences and supports their growth needs. Refer also to EDACC initiative
School of Music/Art and Design	Development of a building that could house the School of Music and the Department of Art and Design in partnership with a private sector developer. Concept pre-design, business case development to facilitate fund development, building schematics and delivery strategies. Refer also to EDACC initiative
South Campus Master Plan *	Sector planning needs to be completed for the land use and for a phased and sustainable utilities/infrastructure strategy that will accommodate projected long-term growth on this site and the possible relocation of some of the existing operations to off-site research stations.

TABLE 2 HIGHEST PRESERVATION PRIORITIES (LISTED IN ALPHABETICAL ORDER)

PROJECT	DESCRIPTION
Agriculture Forestry Lab * (P)	Upgrade base building infrastructure to allow for full functional renewal of laboratory spaces. This will permit increased program use in the facility.
Biological Sciences Renewal Program – Phase 1 (R)	Phase 1 of renewal program for Biological Sciences. Significant upgrades to mechanical and electrical base building infrastructure to support current and future needs.
Cameron Library Information Pavilions Phase 1 * (R)	Phase 1 redevelopment and upgrade of Cameron Library to create an integrated learning environment with comprehensive user support, group study rooms, and a variety of settings for group discussion and quiet study zones.
Campus Saint-Jean Electrical Distribution * (P)	Upgrade the existing site electrical distribution and main service to effectively manage the aging infrastructure issues and to facilitate future expansion objectives.
Campus Wide Fire Alarm Modernization *(P)	Replace/retrofit/renew fire alarm infrastructure in university buildings.
Campus Wide Fire Suppression Upgrade *(P)	Replace/retrofit/renew fire suppression infrastructure in university buildings.
Chemical and Materials Engineering Building – Renewal (Phase 2) (R)	Renewal and repurposing of the building to provide needed wet lab space for Engineering and address building envelope and operational issues. Phase 2 is the continuation of the project and would fully renew the existing building. Due to the critical need for this space, the Faculty of Engineering is providing bridge financing of \$5,000,000 toward Phase 2 of the renewal in advance of government funding.
Chemistry West – Phase 3 of Renewal – Building Envelope Perimeter Heating and Interior Upgrades (R)	Upgrades for remaining floors on the north portion of the facility to the same standard as floors 4 and 5. Remaining floors to be upgraded on north 50% - basement, L1, L2, and L3. Replacement of perimeter heating system with individual controlled room zones.
Chemistry West – Floor Renewal *(P)	As the base building upgrade and renewal work is now completed, the delivery model for the remaining fit outs can be accommodated as smaller phases of work.
Chemistry West & Chemistry East – Electrical Vault / Emergency Power Upgrade * (P)	Electrical services for the facility are at capacity; no emergency power is available for building life safety systems. New electrical room and generator required.
Clinical Sciences Building: Phase 1 Design and Renewal (R)	Building renewal and backfill with the completion of Edmonton Clinic Health Academy is complete. Focus is for renewal and repurposing. The project would be approached in three phases of renewal of the tower. Phase one is for design and building prep for phased renewal.
Clinical Sciences Building: Phase 2 Renewal and Repurposing (R)	Building renewal and backfill with the completion of Edmonton Clinic Health Academy is complete. Focus is for renewal and repurposing. Phase 2 would accommodate 1/3 of the project and allow for decanting of remaining tower.
Convocation Hall Renewal (P)	Renewal of hall stage, front lobby and interiors; all timed to coincide with building's Centenary.
Dentistry/Pharmacy Building – Renewal (R)	Functional renewal of the building once the Edmonton Clinic Health Academy is complete and faculties have relocated. The existing building, constructed in 1921, has a high deferred maintenance liability and must be completely retrofitted before new tenants can be moved in. This project restores and reuses and historically significant building to the campus, allows for greater administrative efficiencies with the co-locating of many of our central services, reducing demand for outside leases, and most importantly builds a new front door for our campus to the community of prospective students, current students, and our alumni. The university is also preparing a phasing plan, that while increasing the costs, will allow for the project to continue advancing as funding becomes available.

PROJECT	DESCRIPTION
Earth Science Building – Central System Upgrade * (R)	ESB has had a significant increase in wet lab space. This has driven the need for base building mechanical and electrical upgrades. Initial studies indicate the upper floor can be isolated from the existing base systems and would allow the existing systems to manage the remainder of the building.
Heating Plant – Boiler #7 (P)	Purchase and installation of new boiler required to ensure plant reliability. About 50 percent of the plant’s boiler capacity is close to 40 years old.
Medical Sciences Building: Phase 1 Renewal *(R)	Select building renewal and repurposing/backfill to occur once the Edmonton Clinic Health Academy is complete.
Medical Sciences Building: Phase 2 Building Upgrade (R)	Full facility renewal program and backfill.
Replacement of Remote Control Monitoring System (RCMS) * (P)	Current remote control monitoring system provides control and monitoring of the major mechanical systems and space conditions in all major buildings, both on and off main campus. Replacement of obsolete system which is critical to day-to-day operation of university buildings.
Roofing Program * (P)	Campus-wide program for upgrading of roofing systems for a three-year period to deal with roofing systems that are in the 12 to 15 year range and will be nearing the end of life expectancy.
Universiade Pavilion: Building Envelope Upgrade * (P)	Renewal of building envelope to replace failing panels.
Van Vliet East & West – Upgrade of Mechanical Systems * (P)	Complete renewal of building mechanical systems currently in very poor condition. Given student support of the Physical Activity and Wellness Centre project, there is an opportunity to partner for partial renewal of Van Vliet. Partial renewal deferred maintenance funds for this phase of work would be \$4 million.
Various Facilities – Electrical Vault Upgrades * (P)	Campus-wide upgrades of electrical vaults currently in poor condition and close to failure.

TABLE 3 HIGHEST NEW AND EXPANSION PRIORITIES (LISTED IN ALPHABETICAL ORDER)

PROJECT	DESCRIPTION	NEW SPACE (M ²)
Agricultural, Life & Environmental Sciences Bldg – South Campus	Planning for the growth and emerging priorities of the faculty in research and teaching, and the feasibility of consolidating faculty departments in a single facility within South Campus. Assessment of the impact of other lands being utilized by the faculty on its operations and programs.	58,650 - 61,000
Augustana Science Expansion and Renewal and Classroom Building Upgrade	Expansion and renovation of the existing building and infrastructure to meet the needs of the student enrolment and science program requirements. This is coupled with the need to repurpose the old library space to classrooms with the completion of the Library/Forum project.	6,592
Cameron Library & Information Pavilions (CLIP) – Phase 2: Book and Records Depository (BARD)	Renovation and expansion of a recently purchased Federal Archive building to support our need for a Book and Records Depository (BARD) facility. The purchase of this building facilitated the removal of our previous ask of \$85 million for a new facility.	
CLIP – Phase 3: Curatorial Facility	New space for Museum and Collections Services (MACS) to provide centralized space for collections with proper temperature and humidity controls.	32,437
Campus Saint-Jean Science Building	Expansion and renovation of existing facility to meet the needs related to differential program enrolment throughout the entire campus, the creation of new programs and partnerships with other faculties, and dedicated research space, which will allow opportunities for reuse within the backfill area. The university is targeting an additional \$10M in federal support. Total project estimate is \$46.4M	5,319
Innovation Centre for Engineering – Fit-out	Shell and core construction of an adjacent North Tower expansion (\$60,000,000) has proceeded with funding through the Faculty of Engineering. The fit-out is required to provide teaching and research space to accommodate the program growth within the faculty. This project will also consolidate and co-locate department offices and administrative units.	29,406
Ecological Learning Centre – Devonian Botanic Garden	New facility to allow Devonian Botanic Garden (DBG) to open year-round and support community outreach. Addition of parking lot and sound walls, as well as a new formal gate. The university is targeting \$10M of fundraising. Total project estimate is \$41M.	3,861
Gathering Place	Centre focused on Aboriginal students, faculty and staff to serve as a community gathering place that embraces and provides an inclusive and supportive learning environment. Project will be aligned with current Education Tower location and be aligned with the building's current infrastructure and program areas. The university has secured a donation of \$1M to initiate the project. Project is estimated at \$18M	2,100
Housing – East Campus Village	Development of up to 600 additional bed spaces to enhance the university's ability to accommodate projected growth. The request represents a cost of \$117,000 per bed with an equity component of 30 per cent.	32,900
Housing – Michener Park	Complete redevelopment of buildings and supporting infrastructure doubling the current density in Phase 1. Assumes a 30 per cent equity component.	N/A
Pedway – Underground 115 Street & 87 Avenue	Construction of an underground pedway to allow easy and safe access between the Physical Activity and Wellness Centre and the Edmonton Clinic Health Academy. This will finalize the connection of the Health Sciences precinct to the campus north of 87th Avenue.	N/A

PROJECT	DESCRIPTION	NEW SPACE (M ²)
Metabolic Research Facility	Replacement and relocation of the outdated and aged metabolic facility on South campus. The current facility is at the end of its life and relocation is part of the long term vision of the South Campus. See Arena project	TBD
Science Backfill	Various backfill renewal and repurposing of space as a result of the completion of CCIS (BioSci, Earth Sciences, Chemistry, South Academic Building)	
School of Business Building/Social Sciences Departments	Development of a building for the School of Business in a partnered opportunity with private sector. A building for the School of Business would facilitate accommodation of the backfill requirements of the social sciences and support their growth needs. The social sciences are currently experiencing significant shortfall of space.	27,900
School of Music/Art and Design	Development of a building that could house the School of Music and the Department of Art and Design in partnership with a private sector developer. The budget represents the potential equity required within the partnership arrangement.	32,500
South Campus – Infrastructure for Shared Use Facilities	New infrastructure to support the development of the NE sector of South Campus – deep sewer, water supply, road lighting, and improvements specifically to support the siting of community complexes on campus. Work has proceeded in support of projects and timelines to accommodate federal grant timing.	N/A
South Campus – Utility Infrastructure	Initial Infrastructure to provide first phase of utility and services in support of campus growth and to accommodate infrastructure located on adjacent Government of Alberta land (could also be provided through a P3 model).	N/A
TEC Edmonton Expansion	The success of TEC Edmonton in assisting start-up companies through mentorship and business planning calls for a need to fit-up additional space within ESQ as per original vision. Next expansion of 20,000 sq.ft.	
Arena and Academic Sport Centre	The Arena Project is part of the long range plan of moving all varsity programs to South Campus and having these buildings serve not just the university but the community at large. This facility will provide needed space for our Hockey, wrestling and Golf program and will provide needed admin, learning, and research space associated with our varsity programs. The Project assumes a partnered which would see this \$55-60 Million project being funded through partnership, philanthropy, borrowing and Government Support. As well, this facilities the replacement and relocation of our aging and antiquated metabolic facility	TBD

BRIDGES OF KNOWLEDGE: COMMUNITY SERVICE-LEARNING

A GROUP OF PEOPLE—MEN AND WOMEN OF EVERY AGE AND BACKGROUND—MEET TOGETHER IN A ROOM IN EDMONTON'S DOWNTOWN. THEY SIT IN A CIRCLE, LOOK TO THE INSTRUCTOR TO BEGIN THE CLASS, AND SOON ARE ENGAGED IN DISCUSSION OF A NOVEL OR PHILOSOPHICAL IDEA OR ABORIGINAL SPIRITUALITY.

The possibilities are as diverse as the members of this unusual university course called Humanities 101, a program devoted to bringing liberal arts learning and knowledge to those whose personal economic, social, or academic circumstances are compromised. Offered through the University of Alberta's Community Service-Learning Program, Humanities 101 is only one example of how CLS bridges campus and community, theory and practice, student life and so-called "real" life.

CLS connects students with community organizations related to their areas of study. Combining classroom and community-based learning, students undertake projects of about 20 hours as part of an academic course. Relevant to both the community organization's need and the goals of the course, these projects integrate classroom concepts with real-world experience, helping student develop the skills needed to translate great ideas into effective and applicable solutions and models.

Placements range widely, creating opportunities for students in majors as diverse as English and Rural Economy. Students might provide much needed tutoring to new immigrants, assist in writing successful grants, or create distribution networks for locally produced food. They might study the impact of major industry on fast-growing urban centres such as Fort McMurray.

Highly motivated students can earn a certificate in community engagement and service learning or complete a Non-Profit Board Student Internship. The experiences gained prepare them for a wide range of careers in non-governmental organizations, the volunteer sector, business and government and academic institutions.

Through the multiple avenues offered by CSL, students become more informed and engaged citizens who continue to give back throughout their lives, doing great things to make our communities better places to live.

OUTCOMES AND BENEFITS

- Eight faculties at the U of A offer 64 courses in 25 disciplines with a community service learning component.
- More than 3,400 students have participated in the CSL program since 2003. In 2013, 81 percent of students said they would recommend CSL to other participants.
- Some 164 community organizations in Alberta work with the university to educate students about the many social challenges communities face.
- Engaged students become engaged alumni. A recent survey shows more than 77 percent of University of Alberta alumni volunteer locally. Among CSL students, however, that number is even higher—89 percent volunteer locally, a quarter of whom continue to volunteer with their CSL placement.

INSTITUTIONAL BUDGET, 2014-2015

Although the University of Alberta continues to face significant budget challenges in 2014-2015, it is looking forward to a period of greater budget stability, helped by the government's decision to begin reinvesting in post-secondary education late in 2013-2014. As the university moves into 2014-2015, it will advance on the vision and academic priorities as laid out in *Dare to Discover* and this Comprehensive Institutional Plan.

With a positive consolidated budget and moving toward a structurally balanced operating fund, the university will leverage government's reinvestment strategically in 2014-2015. A major thrust of the reinvestment will be stimulation of new revenue (net) that will help to mitigate the impact of budget cuts planned for 2014-2015. All of this will be accomplished within the context of the university's four-point action plan focused on academic transformation, sustainable financial models, ongoing administrative effectiveness, and internal culture change.

As noted in last year's CIP, the university has been transitioning to Public Sector Accounting Standards (PSAS) incorporating required accounting adjustments and modifying budget tables to better align with the standards. This transition will continue over the next several years as the university receives further clarification from the provincial government on the application of standards.

In the 2014-2015 consolidated budget table, the 2013-2014 budget has been restated to reflect further PSAS adjustments. In particular, Amortization of Deferred Capital Contributions is no longer budgeted as a separate line item but distributed to the revenue source to which the deferral applies. This has resulted in an increase of \$98 million in provincial government revenue, an increase of \$9 million in federal government revenue, and an increase of \$13 million in investment income revenue. The net effect of this change on the total revenue budget is zero, as these revenue increases are directly offset by the elimination of the revenue line for the Amortization of Deferred Capital Contributions.

For 2014-2015 the university has also begun reporting the consolidated budget by fund, which offers a greater level of transparency and understanding of the university's budget, in particular the activity within the operating fund, the key teaching and learning budget.

Consolidated Budget

Prepared under Public Sector Accounting Standards (PSAS), the U of A's 2014-2015 consolidated budget (see Table 4) reflects the entire enterprise, including unrestricted and restricted funds. This includes funding for general operations, ancillary operations, research activities, and capital projects. Funding for general operations is fully unrestricted within the consolidated budget. Funding for ancillary operations remains within those operations, while the majority of research revenues, philanthropic sources of revenue, and capital project funding are fully restricted. The difference between unrestricted and restricted funds is in the degree of university control over the use of the funds. All unrestricted funds fall fully within the authority of the board to advance the institution's enterprise, whereas restricted funds can only be used for the purposes for which they were received. To further enhance the university community's understanding of the budget, a budget primer document was developed and is publicly available on the university's website, along with a supporting animated budget primer video.

Over the last year, the university has implemented plans that will realign the budget within a new funding context. For 2014-2015, the university has developed detailed plans and strategies that will achieve a consolidated balanced position for 2014-2015 and made limited strategic investments to advance the institution. Although the mid-year 2013-2014 2.6 per cent base funding increase to the Campus Alberta grant helped to reduce negative impacts,

and the university has advanced efforts to generate new sources of revenue, cuts across the institution will still need to be implemented in 2014-2015 to realign the university's expenditures with its budgeted and forecast revenues.

For 2014-2015, the consolidated budget reflects an excess of revenue over expense of \$9.5 million on total revenue of \$1,749 million. This represents less than one per cent of the university's budgeted consolidated revenue. The \$35-million change between the 2013-2014 preliminary actuals and the 2014-2015 proposed budget is driven by a number of factors. First, there was the specific decision by the Board of Governors to approve a consolidated budget deficiency in 2013-2014 and phase in budget cuts over two years in an effort to plan effectively and limit the impact of the cuts on the institution. Second, in 2013-2014 the university booked the full impact of the Voluntary Severance Program along with other one-time severance payments associated with 2013-2014 budget cuts. Finally, and based on current assumptions of no increase to the Campus Alberta grant, the 2014-2015 consolidated budget has factored in seven per cent budget cuts to the academic units and eight per cent budget cuts to the administrative units in order to bring the university's consolidated budget into a balanced position.

The Statement of Operations (consolidated budget) under the PSAS, and the Statement of Cash Flows are presented in tables 8 and 9 on pages 168 and 169.

TABLE 4 CONSOLIDATED BUDGET, 2014-2015 (\$,000)

¹ Budget revenue distribution restated under PSAS. Amortization of deferred capital contribution has been re-allocated to revenue sources - there is no change to the revenue total.

CONSOLIDATED REVENUE

Budgeted revenue for 2014-2015 is \$1,749 million. As illustrated in Figure 16, 49 per cent or \$860 million comes from the Government of Alberta, mostly through the Campus Alberta grant, sponsored research funding, and capital funding. Of the \$861 million, \$591 million represents the Campus Alberta Grant, the primary source of unrestricted funding for the university's day-to-day operating activity. The 2014-2015 budget has been prepared on the assumption that there will be no increase to the Campus Alberta grant. If there is an increase to the Campus Alberta grant, the university is committed to applying that increase, dollar for dollar, to reducing the planned budget cuts factored into the budget.

The federal and other government revenue of \$189 million largely reflects the funding received by the university in support of its research mandate. This revenue is budgeted to be marginally greater than the 2013-2014 preliminary actuals. Any change in this revenue source is driven by the federal government's level of investment in Tri-Council funding and the university's national competitiveness in

these and other funding competitions. The university's competitiveness is a direct function of the number and quality of faculty, the research environment, and administrative support the university provides them.

Tuition and related fees are budgeted at \$314 million and, at 18 per cent, represent the second-largest source of consolidated revenue. This includes all instructional fees, market modifiers, and non-instructional fees. The fee revenue is largely unrestricted, resides in the operating fund, and is used for the day-to-day general operations of the university. In December 2013, pursuant to the provincial tuition fee regulation, the Board of Governors approved a one per cent increase to general tuition fees, program fee differentials, and market modifiers, and an effective five per cent increase in undergraduate international tuition fees including international program differentials, course differential and market modifiers. The one per cent increase applies to 2012-13 general tuition fee levels due to government's 2013 decision to freeze tuition at 2012-13 levels. The budget has factored in a one per

cent increase to all mandatory non-instructional fees with the exception of the athletics and recreation fee. Through a comprehensive student consultation process, the Faculty of Physical Education and Recreation has proposed an increase of \$16.38 per term to the athletics and recreation fee. The non-permanent CoSSS fee is budgeted to generate \$12 million of revenue in 2014-2015. For 2013-2014 the government provided the university with one-time funding of \$4 million to make up the revenue shortfall as a result of the tuition freeze. For 2014-2015, the university has assumed that it will receive a one-time base adjustment of \$4 million to replace the lost tuition revenue on a permanent basis. This assumption reflects a \$4-million risk to the university's budgeted revenue.

The fourth-largest source of revenue comes from sales of services and products, representing 11 per cent of

total consolidated revenue, or \$193 million. This revenue is primarily derived from ancillary operations such as residence services, the bookstore, parking, and food services. For 2014-2015, these revenues were adjusted based on a board-approved weighted increase to residence fees of 3.76 per cent at all campuses, with a base increase of 1.75 per cent to most products, and adjustments to parking rates of 1.14 per cent. Sales of services and products revenues are also derived from operating activities across all faculties and units. Examples include sales associated with physical education and recreation activities (passes, camps, etc.), medical clinical assessments, and rental of equipment.

The other sources of consolidated revenue for 2014-2015 include grants and donations of \$133 million, and investment income of \$59 million.

FIGURE 16 CONSOLIDATED REVENUE BUDGET, 2014-15 (\$MILLION)

CONSOLIDATED EXPENSE

For 2014-2015, consolidated expense is budgeted at \$1,739 million. The budgeted expense for 2014-2015 reflects expenditure reductions of \$56 million in the operating fund including a seven per cent budget cut to the faculties and an eight per cent budget cut to administrative units. These cuts have been distributed throughout the various expense categories based on previous trends on where cuts have been applied. The expenditures also reflect further one-time severance payments of approximately \$14 million in response to the faculty and administrative unit budget cuts.

As Figure 17 illustrates, investments in salaries and benefits to maintain teaching, research, and other critical activities account for 60 per cent of total expense. The salary and benefit expense lines reflect a combination of the implementation of the contractually agreed to salary and merit adjustments (1.65 per cent and two per cent respectively), the inflationary costs of benefits as well as that portion of the budget cuts that have been applied to positions. The net effect of these changes is an overall \$25-million reduction in salary and benefit expense from the 2013-2014 preliminary actuals.

Of significant concern to the university is the rate of increase to the university's benefit program costs including its pension plan contribution rates. Although total benefit expense is budgeted to decline in 2014-2015 from 2013-2014 due to the reduction in staff, benefit program costs continue to escalate. For example, the university's 2014-2015 benefit plan costs are budgeted to increase by 7.2 per

cent from the 2013-2014 estimated actuals. At the same time, with continuing uncertainty in the equity markets, historically low interest rates, unfunded liabilities and actuarial reviews, the university is forecasting continuing increases in pension plan contribution rates. Although a relatively small increase in pension plan contributions is budgeted for 2014-2015, over the following three years, pension plan contributions are forecast to increase 22 per cent. The Universities Academic Pension Plan board undertook negotiations to address this challenge, but to date those efforts have not come to fruition.

The university's next largest expense is materials, supplies, and services. Budgeted at \$292 million, these expenses provide essential support across the campuses, including information systems and technology, research expenditures, library resources, maintenance, and day-to-day operations such as insurance premiums, communications, and classroom support. This expense line also includes the costs of goods sold and recovered. In budgeting for these expense items, the university continues to face the challenge whereby inflation within higher education significantly exceeds general inflationary pressures. Examples of this include library collections increasing by 6.9 per cent, information technology licences increasing by 6.1 per cent, waste removal increasing by four per cent, a broad range of industrial supplies increasing by five to eight per cent, and various health and safety maintenance contracts increasing in the range of 2.2 to 2.7 per cent.

On a continuous basis, the university implements plans and strategies that maximize administrative efficiencies in delivering vital services in direct support of the university's core mission. In fact, the university is required to track and report to the provincial government the proportion of operating expenditures directed toward administrative purposes over a two-year cycle. The provincial government establishes the criteria for the specific expenditures that must be included in the calculation and sets five per cent as the benchmark for administrative expenditures as a proportion of operating expenditures. Based on the ministry's own criteria, for the 2010-11 to 2011-12 cycle, the university allocated only 3.8 per cent of its expenditures for administrative purposes versus the maximum target allocation of five per cent.

A further significant expense in the consolidated budget is \$177 million for the amortization of capital assets. Under PSAS, amortization is an annual expense that is calculated based on the estimated useful life of the asset. These assets include such things as buildings, scientific and computing equipment, software, and learning resources.

For 2014-2015, scholarships and bursaries expense are budgeted at \$85 million, marginally less than the 2013-2014 preliminary actuals. The 2014-2015 scholarship budget reflects reductions that were applied in 2013-2014, plus an adjustment based on a lower than anticipated uptake of scholarships and bursaries by students. Going forward, the university is committed to growing its scholarships and bursaries through advancement activities.

FIGURE 17 CONSOLIDATED EXPENDITURE BUDGET, 2014-15 (\$MILLION)

Operating Fund

In an effort to increase the transparency of the budgets, in addition to the consolidated budget, for 2014-2015 the university has included budgets by fund including the operating fund (see Table 5).

As noted, the operating fund is unrestricted and is used to support the primary teaching and learning activities of the university. To ensure alignment of the operating fund with the consolidated budget, this fund is presented using PSAS and therefore includes the amortization of capital assets.

For 2014-2015 the university has budgeted total operating fund revenues of \$998 million and total operating fund expense of \$1,011 million for an operating fund deficiency of \$13 million. The operating fund has been prepared based on the core assumptions of no increase to the Campus Alberta grant, along with the implementation of budget cuts to the faculties and administrative units. In the event of any increase in the Campus Alberta grant, those dollars will be used to offset and reduce the impact of the planned budget cuts. For every one per cent increase in the grant, the university will be able to reduce budget cuts across the institution by 0.7 per cent.

The two primary sources of revenue within the operating fund are the Campus Alberta grant, and tuition and related fees totalling \$903 million or 90 per cent of the operating fund revenue. The remaining 10 per cent of revenue is derived from federal and other government funding, donations and investment income, and sales of services and products.

Within the operating fund, 76 per cent of expenses are associated with salaries and benefits. Ten per cent of expenses are associated with the materials, supplies, and services that support teaching and learning, with the remaining 14 per cent of expenses associated with utilities, maintenance, amortization expense, and scholarships and bursaries.

In November 2013, the provincial government announced a 2.6 percent or \$14.4-million increase to the university's 2013-2014 base Campus Alberta grant. Because the funding was received late in the fiscal year, the university did not make any base allocations in the 2013-2014 budget. Instead, the university will make one-time investments of \$14.4 million to address immediate budget pressures, and will also make permanent base allocations of \$14.4 million in the 2014-2015 budget, for a total investment in the academy of \$28.8 million.

One-time investments will mitigate the impact that 2013 provincial budget cuts have had on the teaching and learning enterprise of the U of A. A total of \$2.6 million was immediately reinvested in the 2013-2014 budget for graduate assistantships to maintain expected graduate student support, and ensure that labs, tutorials and courses led by graduate students are maintained to the greatest extent possible. In 2014-2015, this one-time investment will become a permanent base allocation.

One-time funding of \$3 million will also be distributed to faculties in 2014-2015 to seed revenue generation projects that will assist in easing enrolment pressures, maintaining access, and enabling strategic faculty and staff renewal. New revenue streams will, in future, increase faculties' ongoing capacity to hire faculty and staff needed to maintain student access to programs and provide a high-quality educational experience to all enrolled students. A further one-time investment of \$5.1 million will be allocated over a three-year period to fund continuing efforts to develop and offer high-quality digital learning options for students in both blended and massive online open course formats. The balance of the one-time funding (\$3.7 million) will be allocated to various academic and administrative initiatives that will assist the

¹ Budget revenue restated under PSAS. Amortization of deferred capital contribution has been re-allocated to revenue sources - there is no change to the revenue total.

² Research and Capital funds includes both restricted and unrestricted activity.

university to maintain and manage current and predicted levels of student enrolment. This includes investments in information technology infrastructure, the Registrar's Office, libraries, and other areas that provide vital support to the core teaching and research activities of the institution.

Base allocations, totalling another \$14.4 million, will also be made in the 2014-2015 budget. As already mentioned, the first priority is funding for graduate assistantships, and thus, the one-time allocation of \$2.6 million to support graduate assistantships will become a permanent base allocation. A further \$5 million will be allocated by the Provost's Office to faculties to provide continued assistance in the hiring and retention of professors and other faculty costs associated with delivering excellence in research and teaching. \$1 million will be allocated for core supports for students, researchers, and faculties.

The U of A recognizes that public funding models for universities are shifting and that new financial realities demand that all post-secondary institutions seek multiple sources of revenue to support their core mission. Stimulating ideas for revenue generation has been a major priority of university senior leaders over the last year. Turning ideas into reality is, in many cases, a long-term endeavour requiring dedicated seed funding. As such, \$6 million will be available to faculties to help implement revenue generation initiatives. Another \$6-million fund can be accessed by faculties as an internal loan to be repaid as new revenue streams come online. With \$3 million in one-time funding, plus \$6 million base allocation and access to a further \$6 million in a repayable loan, faculties will have access to \$15 million in funding to strategically plan for and generate new

revenue. The proposed objective is that faculties will raise \$2 of new net revenue for every \$1 provided as seed money. If successful, the university will generate \$30 million of new net revenue over time that will be used to increase faculty numbers, reduce student-to-professor ratios, and continue strengthening the overall academy.

Finally, a further \$6.1 million in base funding will be transferred to the faculties in 2014-2015 as a result of changes to the revenue-sharing formula for international differential fees and the indirect costs of research for grants and contracts. Previously that \$6.1 million in revenue flowed to the centre to support core administrative services. However, in an effort to further mitigate budget cuts in the faculties and to provide them with additional incentives to generate new revenues, this base funding has been transferred to them.

The approach that the university has taken will enable it to achieve three primary goals: one, address 2013-2014 enrolment pressures; two, mitigate the impact of the 2014-2015 budget cuts; and three, leverage the government's reinvestment to increase the university's capacity to raise revenues and continue to provide high-quality educational experiences.

The university has taken significant steps in 2013-2014 and 2014-2015 in an effort to move toward a structurally balanced operating fund. However, the ability to sustain a structurally balanced position will be subject to the university's capacity to generate these new and ongoing revenue streams while continuing to manage ongoing operating expenditures.

Operating Fund Budget Assumptions and Sensitivities

The university prepares its budgets using a comprehensive integrated planning and budget process, involving key stakeholders from across the institution. Key budget assumptions and sensitivities are cornerstones of the university's multi-year budgeting process. The goal is to achieve improved accuracy in forecasting elements of the budget and provide common assumptions for budget planners across the university.

2014-2015 BUDGET ASSUMPTIONS

Key highlights of the university's revenue assumptions include:

- a zero per cent adjustment to the Campus Alberta grant. Any increase in the grant will be used to offset budget cuts.
- an estimated \$4-million base increase to the Campus Alberta grant to replace tuition revenue following government's decision to freeze tuition at 2012-13 levels
- a one per cent increase in general tuition fees and graduate student international differential fees and an effective five per cent increase to undergraduate international student tuition fees
- continued phased approach to full implementation of market modifier tuition
- a one per cent increase to all mandatory non-instructional fees with a proposed \$16.38 per term increase to the athletics and recreation fee
- marginal growth in investment income

Key highlights of the university's expenditure assumptions include:

- salary increases driven by negotiated salary settlements (1.65 per cent across the board increase and an average two per cent increase for merit)

- employer-paid non-statutory benefit cost increases averaging 7.2 per cent
- a seven per cent overall average cut to faculties and eight per cent to administrative units
- one-time severance costs associated with budget cuts
- marginal decline in utility expenditures
- stable scholarship funding

2014-2015 BUDGET SENSITIVITIES

Revenue Approximate Value

- one per cent on Campus Alberta grant: \$5.8 million
- 0.25 per cent on short-term interest rate: \$1.3 million
- one per cent increase on credit tuition: \$2.5 million

Expense Approximate Value

- one per cent increase in salary settlements: \$5.5 million
- one per cent increase in benefits: approximately \$1.4 million
- \$1/gigajoule increase in natural gas: \$2.3 million (ancillary budget)
- one per cent operating budget reduction: \$7 million

FORECAST BUDGET ASSUMPTIONS

The university has used the following forecast budget assumptions.

Revenue assumptions:

- There will be no increase in the Campus Alberta grant for each of 2015-2016 to 2017-2018.
- Regulated tuition will increase annually by Alberta CPI (approximately two per cent per year) as confirmed by the ministry.
- All non-regulated tuition are forecast to increase annually at rates more closely associated with the actual cost increases in the delivery of the university's academic programs. (approximately 3 to 5 per cent)

- All mandatory non-instructional fees will increase by a minimum of Alberta CPI.
- Interest income will remain at historically low levels.

Expenditure assumptions:

- There will be a revenue gap of one per cent per year between 2015-2016 and 2017-2018.
- Changes to ATB salary increases, merit and benefit costs will be subject to collective agreement negotiations for 2015-2016 and beyond.
- All other expenditures are forecast to increase in the range of two to seven per cent.

Institutional Budget Risks

As a result of the current market conditions, government funding levels, and uncertainty around key government policy decisions, the budget risks to the university are substantial.

Specific factors affecting the university's budget risks include the following:

- **Campus Alberta Grant.** Although greatly appreciated, the 2.6 per cent mid-year increase to the Campus Alberta will not eliminate the need for budget cuts in 2014-2015. A return to multi-year grant increases of two to four per cent is required to avoid ongoing disruption to the institution. Further risks are associated with the current funding model review by government and any changes that may bring to the university's Campus Alberta grant.
- **Tuition revenue.** The university has budgeted for \$4 million in base replacement funding associated with the 2013-2014 tuition freeze. This source of funding is at risk. Tuition policy is currently under review by government. Subject to the outcome of this review, the results could negatively affect the ability of the university to responsibly manage tuition and fee levels in response to costs, competition, and market conditions.
- **Interest Rates.** Interest rates in the immediate to mid-term are forecast to remain at historically low levels.
- **Exchange Rates.** In recent months, the Canadian dollar has declined against the U.S. dollar. Although a lower Canadian dollar benefits the provincial government in terms of revenue and reduces some international students' cost of tuition, a declining Canadian dollar also increases the costs of library and lab materials.
- **Alternative Revenue.** The university must increase its capacity to generate alternative sources of revenue to offset changes to grant funding, tuition revenue limitations, and historically low investment income returns. However, these strategies will take several years to fully implement and may be subject to significant fluctuations.
- **Compensation.** Compensation levels including negotiated changes to ATB increases and the cost of merit must be negotiated in the context of new levels of government funding support and the capacity of the university to generate new sources of revenue. The long-term financial sustainability of the university is at risk if an alignment between compensation expenditures and revenue cannot be achieved.
- **Benefit Costs.** The current rate of benefit cost increases is unsustainable given the university's limited ability to increase revenues. There is a need to examine the level of employer contributions to the staff benefit programs.
- **Pension Plan Contribution Rates.** The continuing increase in pension plan contributions represents a significant risk to the university. Without structural reforms to the pension plans, the level of pension plan contributions as a percentage of total benefit costs will become unsustainable.

Capital and Ancillary Budgets

CAPITAL

While the university received nominal new one-time funding grants, positive project variances, along with borrowing, internal funding, and partnerships, has allowed the university to continue an active capital program. For 2014-2015, the university's capital budget reflects \$176 million in capital projects and a further \$19 million in capital program spending, for a total capital budget of \$195 million. This includes projects underway or proceeding, and annual capital programs in support of health and safety, energy management, building systems, renovations, and site replacement or upgrading.

Capital projects ultimately support the university's academic plan and are aligned with the goals and objectives within this Comprehensive Institutional Plan. They also align with provincial priorities in addressing space and program needs, and focus on renewal and preservation of facilities. Further, these projects have been approved through the university's capital expenditure authorization request policy and, as required, approved by the Board of Governors.

Table 6 lists the capital projects for 2014-2015. The major capital projects at various stages of construction for the fiscal year include ongoing construction and fit-up of the Innovation Centre for Engineering, construction of the Physical Activity and Wellness Centre, and continued residential development within East Campus Village and St. Joseph's College. These projects account for \$120 million of the \$176 million in capital projects. The capital budget also includes just over \$19 million in capital program spending. This includes \$17 million in funding from the provincial infrastructure maintenance program (IMP), which is \$5 million less than the \$22 million previously budgeted for IMP funding.

Detailed information on the university's capital plan can be found on pages 117 to 146.

TABLE 6 CAPITAL BUDGET 2014-2015

	Prior Years Actuals	Forecast to Complete			Total Estimated Final Cost
		2013-2014 Preliminary	2014-2015	Future Years	
Capital Projects (underway or proceeding):					
Agricultural Research Infrastructure - St Albert / Kinsella / Mattheis	8,080	3,610	500	-	12,190
Medical Isotope and Cyclotron Facility	28,135	865	-	-	29,000
Dentistry Pharmacy Redevelopment	3,878	610	1,212	-	5,700
Devonian Botanic Garden - Infrastructure Upgrades ¹	-	-	5,000	8,000	13,000
Leadership Residence	-	750	25,950	9,000	35,700
East Campus Village Infill Housing Phase I	9,139	15,387	500	-	25,026
East Campus Village Infill Housing Phase II	-	500	5,000	-	5,500
St Joseph Women's Residence	-	3,000	27,500	4,500	35,000
Edmonton Clinic Health Academy	370,565	2,196	6,950	9,300	389,011
Federal Building (BARD replacement)*	-	6,000	12,000	16,650	34,650
HM Tory - Phase 2 Building Systems Upgrade	6,020	2,021	400	-	8,441
HRIF Project (Li Ka Shing / Katz Group) Base Bldgs	234,546	75	-	-	234,621
HRIF Project (Li Ka Shing / Katz Group) Fit Outs	105,563	1,956	6,800	3,500	117,819
HRIF Project (CTRIC cGMP Fit Out - Li Ka Shing Level 7)	12,600	3,097	100	-	15,797
Innovation Centre for Engineering (ICE) Shell and Core	52,506	18,178	45,025	18,691	134,400
Pharmacy Fit Up	32,751	12,260	2,130	49	47,190
Physical Activity & Wellness Centre (PAWC)	8,012	24,530	21,458	4,000	58,000
Scientific Support Facilities	45,956	15	-	-	45,971
South Campus Infrastructure - Phase I	4,639	814	-	-	5,453
South Campus - Intersection 63 Ave / 122 Street	39	-	3,889	-	3,928
South Campus Parkade	-	-	-	41,000	41,000
Students Union Building	-	6,000	7,000	-	13,000
Other Capital Projects	541,140	5,232	4,404	6,729	557,505
Total	1,463,569	107,096	175,818	121,419	1,867,902
Annual Capital Programs:					
Infrastructure Maintenance Program ¹			17,405		
Envision Program**			2,000		
Total			19,405		
TOTAL			195,223		

¹ Infrastructure Maintenance Program had ongoing funding *still pending formal GOA approval to proceed ** Envision programs overlap, therefore, no prior years amount is included
 NB: The Capital Budget was finalized on October 10, 2013, and contains values which may not align with or may not include projects identified in the CIP.

ANCILLARY OPERATIONS

The university runs several ancillary operations: Ancillary Services (Residence Services, Hospitality Services, Parking, Real Estate and Commercial Property Management Services, ONEcard) the Bookstore, Enterprise Square, the University Health Centre, and utilities. These ancillary operations provide services to the campus community in support of the university's mission and vision. In the case of utilities, in addition to providing services to North Campus, the operation provides services to a number of other organizations.

Ancillary Services

Ancillary Services provides services to the university's campuses in support of the vision and mission. In 2013-2014, Ancillary Services completed a number of major initiatives, including the opening of 244 new bed spaces in East Campus Village, commencement of Lister residence operations as a first-year and transition student-only community, and completion of Lister dining hall renovations. The ONEcard office was relocated to HUB Mall in partnership with the Students' Union Infolink service. For 2014-2015, residence rates will be increased by a weighted average of 3.76 per cent at all campuses, with a base increase of 1.75 per cent to most products. Annual parking rates were increased by 1.14 per cent. Several

challenges facing Ancillary Services include deferred maintenance, particularly within Michener Park and the older units within East Campus Village; inflation rates of some operating costs; the anticipated reduction on parking demand; the difficulty of fully funding the Transportation Demand Management programs; and the fact that residence and parking rates are nearing market rates, which will reduce revenue generation opportunities.

Bookstore

The Bookstore underwent significant restructuring and reorganization in 2013-2014 in an effort to reduce costs and respond to continuing market pressures. These steps are beginning to achieve the desired results; however the Bookstore continues to face a number of substantive challenges. These include the need for store refurbishment and updating, the impact of the SUB renovations on Bookstore space, and the need for a new point-of-sale system, all of which have capital cost implications. As well, there is the continuing pressure from the growth of e-books and their impact on gross revenues and overall operating costs within the different branches of the Bookstore. Bookstore management is continuing to develop strategies in response to these challenges.

Enterprise Square

Enterprise Square is the university's campus located in downtown Edmonton. It is occupied by a combination of university units and commercial operations. The majority of the building is occupied, with the exception of approximately 9,000 sq. ft. on the main floor and 16,000 sq. ft. on the third floor. Real Estate and Property Management Services is responsible for leasing space within Enterprise Square. The maintenance of high occupancy levels is important to generate the necessary revenues to offset the building's operating costs and mortgage commitment. Enterprise Square has the cash flows to maintain the necessary operating and capital reserves. Challenges going forward include the renewal of the Rogers lease in 2015 and the impact on the Faculty of Extension if classroom space in the adjoining 102 St. Centre is lost due to proposed office space development for that site.

University Health Centre

The University Health Centre (UHC) provides an extensive range of health services to the student community. A major focus of the UHC in the last few years has been to expand its student mental health services. The goal of the UHC is to significantly enhance these services, developing a

more distributed, proactive, and preventative model than the current model that is in place. In January 2013, the provincial government announced \$3 million in funding over three years to pilot a new health delivery model led by the U of A, with a primary focus on student mental health services.

Utilities

Utilities provides services not only to university operations on the North Campus, but also to Alberta Health Services, the Cross Cancer Institute, the Jubilee Auditorium, and Canadian Blood Services. There are three major factors that affect the utility budget: weather, natural gas prices, and pool (electric) prices. Utilities continually reviews and revises rate models in light of its experience and expectations for loads, prices, and market activities, and where appropriate, enters into long-term pricing contracts. Going forward major priorities for the Utilities ancillary include adding a co-generation unit to provide power and steam capacity in the Heating Plant located on North Campus and continuing investigation of a district energy plant for South Campus.

Proceeds on sale of capital assets	163	-	-	-
Cash provided by (applied to) capital transactions	(171,726)	(196,851)	(256,777)	(173,167)
Investing Transactions				
Sales of investments, net of purchases	9,052	31,883	66,855	17,311
Endowment investment earnings (loss)	(1,191)	21,998	23,090	24,261
Cash provided by (applied to) investing transactions	7,861	53,881	89,945	41,572
Financing Transactions				
Endowment donations	30,096	31,693	33,752	35,946
Debt - new financing, net of repayments	(7,491)	48,256	24,700	(6,658)
Cash provided by (applied to) financing transactions	22,605	79,949	58,452	29,288
Increase (decrease) in cash and cash equivalents	(3,769)	1,067	5,108	(11,303)
Cash and cash equivalents, beginning of year	20,925	17,156	18,223	23,331
Cash and cash equivalents, end of year	\$17,156	\$18,223	\$23,331	\$12,028

RESOURCE AND RISK IMPLICATIONS

In November of 2013, the provincial government announced \$50 million in reinvestment in Alberta's publicly funded post-secondary institutions of which \$14.4 million was reinvested at the University of Alberta. As outlined in the budget chapter, the university will invest this money strategically in 2014-2015.

Notwithstanding this reinvestment, the university remains concerned about its capacity to realize its bold vision and at the same time contribute to the province's vision of an Alberta powered by innovation, ingenuity, and an entrepreneurial spirit. What is needed is a commitment to a long-term funding model that recognizes the unique aspects of a comprehensive academic research institution including the funding of graduate students, the research enterprise and the facilities that support not only the university's mandate, but also much of Campus Alberta.

COMMITMENT TO LONG-TERM SUSTAINABLE FUNDING

The 2013-2014 budget year was challenging, affecting all aspects of the university including its students, staff, faculty, alumni, donors, and strategic partners. In addition to dealing with the unanticipated cut to the Campus Alberta grant, there has been the uncertainty in government policy and funding support going forward. This has made all aspects of planning extremely difficult and any type of long-term strategic planning almost impossible. This lack of certainty affects the university's capacity to recruit and retain the brightest students and world-leading faculty. This uncertainty hinders the

ability of the university to attract new resources through donors, international consortia, and governments. The university is committed to expanding its resource base and generating new sources of revenue; however, stability in its base funding and an understanding of matching fund opportunities is critical in achieving this goal. Long-term predictability in the level of government funding will also help facilitate greater co-operation and co-ordination of activities within Campus Alberta.

❖ **The University of Alberta seeks from government three-year rolling commitments of increases to the Campus Alberta grant enabling all of Campus Alberta to more effectively plan and fulfil their post-secondary education mandates.**

INVESTING IN ALBERTA'S INNOVATION ENGINE

The university must continue to attract increasing numbers of high-calibre graduate students and post-doctoral fellows. Graduate students, the engines of innovation, are vital to the province's economic diversification and competitiveness, and require more resources than undergraduate students. They require different types of space, competitive funding, and most importantly, more individualized time with internationally recognized faculty who can mentor and support them in their learning and research endeavours. The fact is that graduate students cost more than undergraduate students.

Top universities in North America and around the world strive to achieve specific critical minimum target ratios including 1:3 graduate students to undergraduate students and 1:4 faculty members to graduate students. If the University of Alberta is to achieve these target ratios and position itself to compete internationally and meet the growing demands of the Alberta economy, new resources must be invested in post-doctoral fellows, graduate students, and new faculty positions.

❖ **The University of Alberta seeks government's commitment to the development of a funding envelope that supports and appropriately funds growth in the number of graduate students, post-doctoral fellows, and the required professorial positions.**

DIRECT COSTS OF THE RESEARCH AND INNOVATION ENTERPRISE

The university develops, acquires, and works to sustain core infrastructure and services for Alberta's research and innovation enterprise. Examples of this infrastructure include green houses and growth chambers; animal care facilities, which enable innovation and discovery related to human and livestock health; research stations that support sustainable agriculture and environment; highly specialized equipment for advanced imaging; and specialty fabrication labs for the design and manufacture of unique research equipment. In addition, there are core costs associated with the increasingly complex areas of intellectual property regulation, external research grant and contract negotiation, financial management, and accounting standards along with the critically important health, safety, and regulatory functions. This infrastructure provides a competitive innovation arena for Alberta's current industries and sectors, and demonstrates to those industries not yet invested in the province that their work can be executed here, in partnership with the university. Pre-commercialization development and testing for medical, health, and drug innovations could not be done without the provision of the facilities provided at the University of Alberta. These facilities are required for the discovery, translational, and pre-commercialization activities that we undertake internally and with private sector partners.

The current funding models and previous contributions to these costs are no longer sufficient to sustain the university's direct costs of the research and innovation enterprise. The university and CARI sector requires a long-term funding model that acknowledges and funds these critically important costs.

❖ **The University of Alberta seeks government's commitment to the provision of new targeted resources to fund the direct costs of the research and innovation enterprise.**

INVESTING IN THE DIGITAL ENVIRONMENT

The information and computing technologies infrastructure at the university is complex. It includes networks to connect buildings and campuses, wireless services, and additional specialized local networks. This infrastructure is the foundation of the university's digital environment that supports its academic, research, and administrative requirements, and its aspirations for efficiency and innovation.

Advances in information and communications technology, especially in the arena of mobile computing, continue to transform learning environments. There are many examples across the university, notably digitally supported programs in physical therapy and medicine. At the same time, the opportunities for the university to leverage digital technologies to enhance its efficiency and reduce administrative costs are substantial. These digitally supported academic programs as well as the opportunities to reduce administrative costs through the leveraging of technology, not only benefit the university but can also benefit Campus Alberta.

The government has several examples of the benefits associated with sharing the cost of various technologies. The university strongly supports this approach and believes that it should be expanded.

❖ **The University of Alberta seeks government's commitment to the provision of matching dollars in support of digital technologies that will enhance the learning and research environments and achieve efficiencies within the university while bringing benefits to Campus Alberta.**

INVESTING IN CAPITAL INFRASTRUCTURE

In the competitive world of post-secondary education, it is important for the university to provide high-quality learning experiences and infrastructure that attracts, retains, and engages outstanding faculty and students.

The university has been able to leverage significant and continued capital funding and planning to build new learning and discovery spaces, advance projects that address the university's deferred maintenance liability, and repurpose space to address changes in pedagogy and increase research intensity. Going forward, the university has identified five priority areas for infrastructure investment, including deferred maintenance funding, renewal and repurposing, planning and development dollars, student and workforce housing, and capital funding for critical projects on each of the university's distinct campuses.

While the university has built a number of sustainable and leading-edge teaching and research buildings over the past 10 years, the university continues to maintain a number of buildings more than 40 years old (over 50 per cent of total buildings). Adequate funding to protect against infrastructure operational failures and safety concerns is vital for the university to avoid risks such as building closures and envelope failures. The university has modified its deferred maintenance priorities in response to the 2013-2014 cut that was made to the Infrastructure Maintenance Program. This reduction has put increased pressure on the need for additional long-term envelope funding of \$25 million to \$35 million per annum to address the university's renewal needs and does not account for reducing the current deferred maintenance liabilities.

We appreciate that government has had to limit new capital funding over the past few years, and the university has responded by seeking out alternate funding opportunities through strategic partnerships. To effectively develop, explore, and respond to partnership opportunities, significant planning and pre-design work is required. This pre-design work is critical in enabling the university to properly scope, budget, vet, and respond to opportunities. The university has identified the need for a funding envelope for continued planning and pre-design of priority projects and initiatives of \$3 million to \$4 million per annum.

Given continued fiscal constraint, the opportunity of leveraging the low cost of long-term borrowing, higher rates of investment returns, and a relatively stable construction market, the university has completed a white paper outlining the benefits of the creation of a sinking or revolving fund as a potential mechanism to provide stable, long term funding for various capital priorities. We will continue to work with government on further developing this model to assist in meeting the capital needs across the entire sector and freeing up budget dollars for other provincial priorities.

To address critical constraints in the U of A's ability to deliver on the collective visions of the university and government, and to ensure that critical capital projects for each of the university's distinct campuses is addressed, the university has identified the following one-time capital funding requirements:

North Campus

- Innovation Centre for Engineering Fit-Out (\$42.7 M)
- Dentistry-Pharmacy Repurposing (\$250 M)
- Heating Plant Expansion (\$40 M)

Campus Alberta/Partnership

- BARD Fit-Out and Expansion (\$28.65 M)
- Edmonton Downtown Arts Campus (\$30 M/year operating lease: Lease term of 30 years)

South Campus

- Twin Arena (\$30 M)
- District Energy Plant - Phase 1 (\$127 M)

Augustana Campus

- Augustana Science Building (\$50 M)

Campus Saint-Jean

- Campus Saint-Jean Science Lab Renovation (\$15 M)

As in the past, the university will continue to investigate strategies for leveraging existing assets through partnerships, and alternative and private funding.

❖ **The university is seeking funding for critical deferred maintenance, planning and pre-design, and capital projects as indicated.**

COMPLETING THE ACCESS TO THE FUTURE PROGRAM

Strong endowments are critical and necessary funding for universities around the world. They provide a relatively stable and predictable source of ongoing funding that allows academic institutions to sustain their efforts over time and tackle large-scale, complex problems that may take generations to solve. Endowments also help attract and retain exceptional faculty and students, sending a signal of significant commitment and support for their work and allowing them to commit to in-depth study.

The university has made a strategic decision to diversify its funding base by growing its endowment to at least \$1.5 billion by 2020. An endowment at this level would put the university on the path to being competitive with its peer public universities. At \$800 million, the university's endowment is currently smaller than those of the University of British Columbia, the University of Toronto and McGill University, as well as those of benchmark U.S. institutions, for both absolute and per-student values.

With the desire to grow its endowment, the university directed donations made as a result of the Access to the Future Fund to its endowment. Founded in March 2005, the Access to the Future Fund successfully stimulated \$425 million in philanthropic support. The program was suspended in April 2011, with only \$25 million in donations having been matched by the province.

The suspension of the program frustrated and disappointed a significant number of donors, making it much more difficult to engage with them for further donations until their matching gifts are received. It is vitally important to the university that the remaining balance of the Access to the Future funds be paid out.

❖ **The university is seeking a payout of approximately \$400 million in yet unmatched donations within the Access to the Future Fund. Completing the match of donations in the program will increase the institution's success in securing philanthropic funding that supports broad-based excellence.**

Risk Implications

Like all internationally competitive research-intensive universities, the U of A must deal with a variety of risks that have the potential to hinder its growth and the realization of its vision, mission, and strategic objectives. Many of these risks have been identified throughout this document.

1. The dramatic cuts in provincial funding, uncertainty regarding government policy on tuition, and low interest rates, combined with underlying cost pressures, have required the university to undergo significant structural changes across the academy and administrative operations. This new financial reality gives rise to numerous institutional risks including the impact on quality; ability to grow research and establish international partnerships; maintenance of program accreditation; ability to attract and retain the highest-quality faculty, staff, and students; maintenance of infrastructure; and overall institutional reputation.
2. Enrolment growth must be managed from the perspective of meeting the labour demands of the province and supporting the research mandate of the university. This will require the university striking the right balance of undergraduate to graduate students to position the university as an internationally competitive research-intensive institution. In order to grow its graduate student numbers, the university needs the necessary funding support for graduate students and the capacity to grow its professoriate.
3. Without the appropriate number of leaders, teachers, researchers, and support staff contributing to their full potential, the university will not be able to provide the quality of the learning experience or participate in the world-leading research expected of an internationally competitive research university. Previous and planned budget reductions may negatively affect the capacity of the university to attract and retain the appropriate number and type of staff.
4. For the university to remain relevant to its students and meet the needs and expectations of its faculty to engage in the highest-calibre research, it requires continuous investment in leading-edge IT infrastructure, highly skilled personnel, and support. Previous and planned budget reductions may negatively affect the capacity of the university to make the required investments in information technology.
5. Continuation of appropriate levels of Infrastructure Maintenance Program funding to avoid a return to increasing levels of deferred maintenance is vital. In addition, limited or no funding of capital for new, expansion, or renewal projects will affect the capacity of the university to meet its strategic goals and will have a negative impact on the economic goals of the province.
6. An institution that aspires to be among the top research-intensive universities in the world can only achieve that goal through the establishment of strategic collaborations and partnerships with an extensive range of stakeholders. At the same time, the university must have the capacity to sustain its core research and innovation infrastructure. The university requires access to and flexibility in funding that would enable it to leverage tens of millions of research dollars from provincial, national, and international sources, and permanent base funding to support core research infrastructure.

7. In moving toward the vision of being one of the world's great public universities, the U of A's national and international profile has increased. The university must address the current economic and financial challenges it faces in such a way that it does not negatively affect its increasing national and international reputation as an exceptional place to learn and work.
8. While the university must assume risks in support of its mandate as an internationally recognized research-intensive institution, it must also promote appropriate risk management plans and strategies that develop responsive attitudes and behaviour at all levels of the organization in order to maintain a healthy and safe environment for all.
9. All students who attend the university arrive with their own expectations, abilities, talents, experiences, and levels of maturity. The university must strive to ensure that students have the best possible opportunity to reach their potential, however that may be measured or defined. If our students do not develop their academic or personal potential, the university will fail to achieve its mission. Previous and planned budget reductions may negatively affect the capacity of the university to provide the programs and services required for students to meet their potential.

Through its integrated enterprise risk management framework, the university will monitor, manage, and mitigate these and other emerging risks in an effort to avoid substantial impact on its ability to fulfil its strategic objectives.

“uplifting the whole people”

MARCOM-12324

OUTLINE OF ISSUE

Agenda Title: **Proposed Changes to Existing Mandatory Student Instructional Support Fees, Proposed New Mandatory Student Instructional Support Fees, a Proposed Change to the Existing Undergraduate Application Fee for New Students, and the Updated Non-Instructional Fee Schedule**

Motion: THAT the Board of Governors, on the recommendation of the Board Finance and Property Committee, approve the proposed changes to existing Mandatory Student Instructional Support Fees (set forth in Attachment 1), proposed new Mandatory Student Instructional Support Fees (set forth in Attachment 2), and a proposed change to the existing Undergraduate Application Fee for New Students (set forth in Attachment 3) as submitted on behalf of the relevant Faculties/Departments by the Registrar’s Advisory Committee on Fees (RACF), to take effect as noted in each respective attachment.

Note: Also included herein is an updated Non-Instructional Fee Schedule, for information purposes only, as set forth in Attachment 4.

Item

Action Requested	<input checked="" type="checkbox"/> Approval <input type="checkbox"/> Recommendation <input type="checkbox"/> Discussion/Advice <input type="checkbox"/> Information
Proposed by	Vice-Provost and University Registrar and the Faculties and Departments that have proposed the new and changed fees.
Presenter	Lisa Collins, Vice-Provost and University Registrar
Subject	<u>Mandatory Student Instructional Support Fees</u> – proposed new fees and proposed changes to existing fees; and a proposed change to the existing Undergraduate Application Fee for New Students

Details

Responsibility	Provost and Vice-President (Academic)
The Purpose of the Proposal is (please be specific)	To establish new Mandatory Student Instructional Support Fees, to change certain existing Mandatory Student Instructional Support fees, and to change the existing Undergraduate Application Fee for New Students.
The Impact of the Proposal is	See ‘Purpose’.
Replaces/Revises (eg, policies, resolutions)	Adjusts certain existing and creates new Mandatory Student Instructional Support Fees and adjusts the existing Undergraduate Application Fee for new students.
Timeline/Implementation Date	Implementation dates vary; see the attachments for detail.
Estimated Cost	N/A
Sources of Funding	N/A
Notes	

Alignment/Compliance

Alignment with Guiding Documents	<i>University of Alberta Calendar</i> , UAPPOL (University of Alberta Policies and Procedures On Line)
Compliance with Legislation, Policy and/or Procedure Relevant to the Proposal (please quote legislation and include identifying section numbers)	1. Post-Secondary Learning Act (PSLA): Sections 61(1) and (2)(a) - “Tuition fees 61 (1) The board of a public post-secondary institution shall set the tuition fees to be paid by students of the public post-secondary institution. (2) The tuition fees under subsection (1) for all public post-secondary institutions other than Banff Centre

(a) must be set in accordance with the regulations[.]”

2. *Post-Secondary Learning Act (PSLA) Regulations – Alberta Regulation 273/2006 – Section 2:*

“Definition of tuition fees for Act purposes, etc.

2. For the purposes of the Act and this Regulation, ‘tuition fees’ in respect of an institution means the following:

(a) fees identified in the institution’s calendar or in a supplement to its calendar as tuition fees or fees for instruction for courses that are part of programs approved by the Minister under the *Programs of Study Regulation (AR 91/2009)* or for the purposes of the *Student Financial Assistance Act*, excluding the following:

- (i) courses taken as part of a distance delivery program by individuals who do not reside in Alberta;
- (ii) apprenticeship programs under the *Apprenticeship and Industry Training Act*;
- (iii) off-campus cost recovery instruction programs;
- (iv) courses provided under a third party contract;
- (v) any differential or surcharge in fees that the board of the institution may set for courses taken by individuals who are not Canadian citizens or permanent residents of Canada;

(b) mandatory fees that are payable to the institution by students for materials and services that facilitate instruction in the courses included in clause (a), excluding the following:

- (i) fees for equipment or materials that are retained or leased by students;
- (ii) fees charged in respect of work placements or practicum experience where the persons or unincorporated bodies providing the work placement or practicum experience do not receive funding from the Government in respect of it.”

3. *Post-Secondary Learning Act (PSLA):* The *PSLA* gives GFC responsibility, subject to the authority of the Board of Governors, over academic affairs (Section 26(1)). Section 26(1)(o) provides that GFC may make recommendations to the Board of Governors on a number of matters including the budget and academic planning. GFC has thus established an Academic Planning Committee (GFC APC), as set out in Section 3 of the GFC Policy Manual. GFC delegates its power to recommend to the Board on the budget to the GFC APC.

4. *Board of Governors General Terms of Reference, Section 1 (b):*
“The Board has delegated to each Committee responsibility and authority to make decisions on behalf of the Board in the Committee’s defined area of responsibility except to the extent that such authority has been specifically limited by the Board in the Terms of Reference for the Committee.”

5. *Board Finance and Property (BFPC) Terms of Reference, Section 3(d):*

“3. Without limiting the generality of the foregoing, the Committee shall:
[. . .]

	<p>d) review and recommend to the Board tuition and other like fees[.]”</p> <p>6. UAPPOL Student Instructional Support Fee Definition of Mandatory Instructional Support Fee: “Mandatory fees assessed in anticipation of costs for supplies, equipment, materials, or services which are not directly related to the delivery of instruction in a course or program, but are considered required elements of a course or program. Examples include but are not limited to the costs of food, lodging, and transportation for required field trips; supply of certain specialized professional tools which the student will retain; and fees for arranging professional placements such as practica, internships, and work experience. All mandatory instructional support fees require the approval of the Board of Governors.”</p> <p>7. University of Alberta Calendar Section 22.2.3: “The University of Alberta complies with the Government of Alberta’s Tuition Fee Policy which states that postsecondary institutions may charge mandatory student fees for instruction to support the provision of supplies, equipment, materials and services to students.”</p> <p>8. GFC Academic Planning Committee (APC) Terms of Reference, Section 3.4.b: GFC APC is “[t]o recommend to the Board of Governors on the annual budget [which includes all of the above-noted fees-related matters], excluding budgets for ancillary units.”</p> <p>9. At its meeting of February 10, 2012, the Board of Governors approved the following Motion:</p> <p>“THAT the Board of Governors, on the recommendation of the Board Finance and Property Committee, rescind the “Church/Minsos” Board-approved Motion of May 5, 2000 regarding the Indexing of Mandatory Non-Instructional Fees; and</p> <p>THAT the Board of Governors, on the recommendation of the Board Finance and Property Committee, approve the annual adjustment of all Mandatory Non-Instructional Fees (MNIF), as determined by Administration, up to and including the Annual Alberta Consumer Price Index and that the MNIF be reported for information to the GFC Academic Planning Committee, the Board Finance and Property Committee, and the Board of Governors on an annual basis.”</p>
--	---

Routing (Include meeting dates)

<p>Consultative Route (parties who have seen the proposal and in what capacity)</p>	<p>Registrar’s Advisory Committee on Fees (RACF), at which each proposal was discussed with the Committee members and the representatives from the Faculties and Departments that were recommending the new or revised fees.</p> <p><u>Regarding the Proposed Increase to the Existing Undergraduate Application Fee for New Students:</u> Vice-Provosts Council – October 21, 2013; Tuition Task Force – November 24, 2013; Mandatory Non-Instructional Fee Budget Advisory (MBAC) – December</p>
---	--

	10, 2013; Registrar’s Advisory Committee on Fees (RACF) – December 17, 2013; Board of Governors’ Budget Briefing (with the GFC Academic Planning Committee) – February 7, 2014
Approval Route (Governance) (including meeting dates)	GFC Academic Planning Committee – February 12, 2014 (for recommendation); Board Finance and Property Committee – February 25, 2014 (for recommendation); Board of Governors – March 14, 2014 (for final approval)
Final Approver	Board of Governors

Attachments:

The overall attachment represents the proposed changes to existing Mandatory Student Instructional Support Fees, proposed new Mandatory Student Instructional Support Fees, a proposed change to the existing Undergraduate Application Fee for New Students, and the updated Non-Instructional Fee Schedule. It is subsequently broken down in the following manner:

1. Attachment 1 (pages 4 – 30): Proposals for Changes to Existing Mandatory Student Instructional Support Fees
2. Attachment 2 (pages 31 – 66): Proposals for New Mandatory Student Instructional Support Fees
3. Attachment 3 (pages 67 – 74): Proposal for Change to the Existing Undergraduate Application Fee for New Students
4. Attachment 4 (pages 75 – 76): Updated Non Instructional Fee Schedule (for Informational Purposes Only)

Prepared by: Sandra Der, Office of the Registrar, sandra.der@ualberta.ca

Mandatory fees assessed in anticipation of costs for supplies, equipment, materials, or services which are not directly related to the delivery of instruction in a course or program, but are considered required elements of a course or program. Examples include but are not limited to the costs of food, lodging, and transportation for required field trips; supply of certain specialized professional tools which the student will retain; and fees for arranging professional placements such as practica, internships, and work experience. All mandatory instructional support fees require the approval of the Board of Governors.

Definition taken from UAPPOL

Registrar's Advisory Committee on Fees (RACF)

Item No. <04>

Request for Approval for:

**Fee increase REN R 441 – Soil Formation and Landscape Processes
(Formerly SOILS 420)**

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: A \$20 increase is requested, to keep pace with inflation. The existing fee was established through a request in 1998.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Faculty of Agricultural, Life & Environmental Sciences Department of Renewable Resources
Dean/Chair	Vic Liefers, Department Chair
Primary Contact (Name, phone number, and e-mail)	Bob Longworth, Assistant Chair (Administration) 492-1428 / bob.longworth@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Dr. Scott Chang, Professor, Forest Soils and Nutrient Dynamics 492-6375 / scott.chang@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	The fee covers transportation costs for course field trips covering soils and their environmental context. The trips allow students to consolidate their understanding of course lectures, and provide invaluable career-related field experience. The current fee is no longer covering the actual costs of the school buses involved.
Proposed Amount	\$70
Previous Fee Amount (if this is a new fee, please indicate that here)	\$50
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	Enrollment is typically 35-45 students.
Collected Centrally or by Department	Collected centrally

Course Information (if fee is attached to a course)

Course Name(s)	REN R 441 – Soil Formation and Landscape Processes (formerly SOILS 420)
Required Course(s)	REN R 441 is a required course in one of the BSc Agriculture majors (Sustainable Agricultural Systems). <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
New or Existing Course(s)	Existing
New or Existing Program (include name)	The course is part of the BSc Agriculture program, and is a course that can also be used in fulfilling requirements in some BSc Environmental & Conservation Sciences majors.
Course Description(s)	REN R 441 Soil Formation and Landscape Processes *3 (fi 6) (first term, 3-0-3). Soil formation, with emphasis on landscape processes as factors in soil development; pedogenic processes and their relation to environmental issues; soils; vegetation, and geological associations; kinds and distribution of soils in Canada; soil classification; field examination and computer-assisted learning of soils and their landscape. Field trips. Requires payment of additional student instructional support fees. Refer to the Fees Payment Guide in the University Regulations and Information for Students section of the Calendar. Prerequisite: REN R 210 or SOILS 210 or consent of instructor. Credit may be obtained for only one of REN R 441 or SOILS 420.

Details

Estimated Costs (Budget information may be included here or as an attachment)	<p>The fee is to cover the cost of school buses used for transporting the students. 4-5 trips are taken during the semester for each lab section. As costs have risen over the years since the fee was established in 1998, the Department has subsidized the shortfalls in covering student transportation and wishes to adjust the fee so as to again cover the actual costs.</p> <p>Budget:</p> <table> <tr> <td>\$ 2,627</td> <td>Actual REN R 441 student transportation costs, 2012-13</td> </tr> <tr> <td>\$ 39</td> <td>5-year average Alberta CPI inflation, 1.5% (Statistics Canada)</td> </tr> <tr> <td>\$ 2,666</td> <td>Estimated student transportation costs, 2013-14</td> </tr> <tr> <td>\$ 40</td> <td>5-year average Alberta CPI inflation, 1.5% (Statistics Canada)</td> </tr> <tr> <td>\$ 2,706</td> <td>Estimated student transportation costs, 2014-15</td> </tr> <tr> <td>38.8</td> <td>Average student enrollment, 2010-11 to 2013-14</td> </tr> <tr> <td>\$ 70</td> <td>Estimated transportation costs per student, 2014-15</td> </tr> </table>	\$ 2,627	Actual REN R 441 student transportation costs, 2012-13	\$ 39	5-year average Alberta CPI inflation, 1.5% (Statistics Canada)	\$ 2,666	Estimated student transportation costs, 2013-14	\$ 40	5-year average Alberta CPI inflation, 1.5% (Statistics Canada)	\$ 2,706	Estimated student transportation costs, 2014-15	38.8	Average student enrollment, 2010-11 to 2013-14	\$ 70	Estimated transportation costs per student, 2014-15
\$ 2,627	Actual REN R 441 student transportation costs, 2012-13														
\$ 39	5-year average Alberta CPI inflation, 1.5% (Statistics Canada)														
\$ 2,666	Estimated student transportation costs, 2013-14														
\$ 40	5-year average Alberta CPI inflation, 1.5% (Statistics Canada)														
\$ 2,706	Estimated student transportation costs, 2014-15														
38.8	Average student enrollment, 2010-11 to 2013-14														
\$ 70	Estimated transportation costs per student, 2014-15														
Explanatory Notes	<p>Typical field trip destinations include locations such as the St. Albert Research Station, Tofield, and Beaumont areas, allowing students to examine sequences of soils in situ, understand soil formation influences and progressions, appreciate associated landforms, and gain hands-on experience in identifying, describing, classifying and mapping soil types.</p> <p>Experiences from these trips help students to consolidate lecture materials, and give students direct field knowledge of actual soil types and their diverse environmental contexts. This is an invaluable counterpart to the academic concepts involved, and gives the students practical skills they carry into their careers.</p>														

	This course is taught concurrently with REN R 741, the graduate-level Soil Formation and Landscape Processes course, maintaining an equivalent course fee. Students in both courses participate in the same field trips.

Item No. <05>

Request for Approval for:

Fee increase REN R 741 – Soil Formation and Landscape Processes

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: A \$20 increase is requested for this graduate-level course fee, covering student transportation costs. A matching increase is being proposed under separate cover for the associated undergraduate course REN R 441, as explained below.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Faculty of Agricultural, Life & Environmental Sciences Department of Renewable Resources
Dean/Chair	Vic Liefers, Department Chair
Primary Contact (Name, phone number, and e-mail)	Bob Longworth, Assistant Chair (Administration) 492-1428 / bob.longworth@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Dr. Scott Chang, Professor, Forest Soils and Nutrient Dynamics 492-6375 / scott.chang@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	<p>The fee covers transportation costs for course field trips covering soils and their environmental context. The trips allow students to consolidate their understanding of course lectures, and provide invaluable career-related field experience.</p> <p>This course is taught concurrently with REN R 441, the undergraduate-level Soil Formation and Landscape Processes course. A separate submission has been made at this time for a fee increase in REN R 441. Since students in REN R 441 and 741 simultaneously participate in the same field trips, involving the same pooled transportation costs, this REN R 741 proposal is submitted to maintain a course fee equal to that for REN R 441.</p> <p>The current REN R 441 / 741 fee is not sufficient to cover the costs of the school buses involved.</p>
--	---

Proposed Amount	\$70
Previous Fee Amount (if this is a new fee, please indicate that here)	\$50
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	<p>In keeping with the establishment of new course-based Masters programs in Renewable Resources, REN R 741 was established in 2013-14, with a fee matching that of its undergraduate counterpart, REN R 441 (which has been running for many years, formerly as SOILS 420).</p> <p>While long-term enrollment in REN R 741 is not yet clear, it is anticipated that fewer than 5 graduate students will enroll each year in REN R 741 involving participation in the combined REN R 441 / 741 field trips. Typically 35-45 students enroll in REN R 441.</p> <p>Combining the REN R 741 and 441 field trips and fee calculations maintains equity for all students involved, and allows for economies of scale that keep costs down for both the graduate and undergraduate students.</p>
Collected Centrally or by Department	Collected centrally

Course Information (if fee is attached to a course)

Course Name(s)	REN R 741 – Soil Formation and Landscape Processes
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
New or Existing Course(s)	Existing
New or Existing Program (include name)	Available to students in the course-based Master of Agriculture, Master of Forestry, combined Master of Business Administration / Agriculture, or combined Master of Business Administration / Forestry programs.
Course Description(s)	<p>REN R 741 Soil Formation and Landscape Processes *3 (fi 6) (first term, 3-0-3). Soil formation, with emphasis on landscape processes as factors in soil development; pedogenic processes and their relation to environmental issues; soils; vegetation, and geological associations; kinds and distribution of soils in Canada; soil classification; field examination and computer-assisted learning of soils and their landscape. Field trips. Requires payment of additional student instructional support fees. Refer to the Fees Payment Guide in the University Regulations and Information for Students section of the Calendar. Not available for students with credit in REN R 441 or SOILS 420. Available only to students in MAg, MBA/MAg, MF, or MBA/MF, or by consent of Department.</p>

Details

Estimated Costs (Budget information may be included here or as an attachment)	The fee is to cover the cost of school buses used for transporting the students. 4-5 trips are taken during the semester.
---	---

	<p>Efforts are made to keep the fee for REN R 741 identical to the fee for REN R 441, since both the undergraduate students in 441 and the graduate students in 741 accompany each other on the same field trips.</p> <p>A matching fee increase proposal is concurrently being submitted for REN R 441 (formerly SOILS 420); costs have risen over the years since that fee was established in 1998.</p> <p>Budget:</p> <table data-bbox="565 436 1429 678"> <tr> <td>\$ 2,627</td> <td>Actual REN R 441 student transportation costs, 2012-13</td> </tr> <tr> <td><u>\$ 39</u></td> <td>5-year average Alberta CPI inflation, 1.5% (Statistics Canada)</td> </tr> <tr> <td>\$ 2,666</td> <td>Estimated student transportation costs, 2013-14</td> </tr> <tr> <td><u>\$ 40</u></td> <td>5-year average Alberta CPI inflation, 1.5% (Statistics Canada)</td> </tr> <tr> <td>\$ 2,706</td> <td>Estimated student transportation costs, 2014-15</td> </tr> <tr> <td><u>38.8</u></td> <td>Average student enrollment, 2010-11 to 2013-14</td> </tr> <tr> <td>\$ 70</td> <td>Estimated transportation costs per student, 2014-15</td> </tr> </table>	\$ 2,627	Actual REN R 441 student transportation costs, 2012-13	<u>\$ 39</u>	5-year average Alberta CPI inflation, 1.5% (Statistics Canada)	\$ 2,666	Estimated student transportation costs, 2013-14	<u>\$ 40</u>	5-year average Alberta CPI inflation, 1.5% (Statistics Canada)	\$ 2,706	Estimated student transportation costs, 2014-15	<u>38.8</u>	Average student enrollment, 2010-11 to 2013-14	\$ 70	Estimated transportation costs per student, 2014-15

Registrar's Advisory Committee on Fees (RACF)

Item No. <15>

Request for Approval for: ANTHR 396

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE:

There is already a MSISF approval in place for the ANTHR 396 field school held in Alberta. A separate section from what has already been approved has been added to ANTHR 396, and this is a field school held in Japan beginning summer 2014. We are asking to increase the upper existing range of the mandatory fee for ANTHR 396 to \$3,000.00. Presently the fee is listed in the calendar at \$600-\$1000.00. We are asking the existing fee take into account our new location in Japan and be listed at \$600-\$3,000.00. The present \$1000.00 upper limit is not sufficient to cover the extra costs to run a field school in Japan. A similar field school in Japan was run in 2013 through Grant MacEwan University (GMU), also in association with Baikal-Hokkaido Archaeology Project (BHAP), and the fee was \$2000.00. Based on this experience, we believe the upper limit of the MSISF should be increased to \$3,000.00 taking into account 1) the UA field school in 2014 will be up to 10 days longer and 2) inflation over the next 3 years (Rebun Island, Japan location is being offered 2014-2017).

Secondary Contact (Name, phone number, and e-mail)	Andrea Hiob, 780-492-9269, ahiob@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	Accommodations, food, transportation, excavation materials
Proposed Amount	\$600 - \$3,000.00 CAD
Previous Fee Amount (if this is a new fee, please indicate that here)	ANTHR 396 MSISF presently listed in the calendar at \$600-\$1000.00.
Requested Implementation Date	May 1, 2014. Note: \$500.00 deposit due May 1, 2014 with remaining fee to be paid by June 15, 2014.
The Impact of the Fee (number of students affected, etc.)	15
Collected Centrally or by Department	Collected by the Department of Anthropology

Course Information (if fee is attached to a course)

Course Name(s)	ANTHR 396: Archaeological Field Training on Rebus Island, Japan (Summer 2014)
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
New or Existing Course(s)	Existing course. ANTHR 396. However, Rebus Island, Japan, is a new location offered by UA in addition to, and separate from, ANTHR 396 held in Alberta.
New or Existing Program (include name)	Existing program. Special Sessions Summer Term, Department of Anthropology: <i>ANTH 396: Archaeological Field Training</i>
Course Description(s)	ANTHR 396: Archaeological Field Methods is designed to build student practical skills in archaeological field techniques, including: surveying, excavation, documentation, photography, conservation, and analysis. The bulk of the students' time in Japan will be spent engaged in the hands-on practice of data collection through the excavation, and students will be responsible for recording their observations in drawings, photographs, and written notes. Both formal and informal instruction in field methods will be provided on an ongoing basis.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Total MSISF requested for 2014: \$2,500.00 CAD Accommodations per student: \$1,600.00 Food per student: \$750.00 Transportation per student: \$70.00 Excavation materials per student: \$80.00
Explanatory Notes	As mentioned, we are asking to increase the MSISF based on the \$2,000.00 fee charged by GMU for its 2013 field school. We are increasing these fees to \$2,500.00 this year because our 2014 UA field school will be up to 10 days longer than the 2013 GMU field school. Since we are planning on running the Japan field school every summer until 2017, we are still requesting that the upper limit be increased to \$3,000.00 to take into account inflating costs over the next 3 years. Note: we have applied for an Education Abroad Group Award / Campus Alberta Grant for International Learning grant and have recently been informed that we were successful. Each student will receive \$750.00 to put towards their fee.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Consultative Route (parties who have seen the proposal prior to Registrar's Advisory Committee on Fees and in what capacity)	Tim Khaner (Assistant Chair Administration, Anthropology) Pamela Willoughby (Chair, Anthropology) Susan Main (Special Sessions) Robin Cowan (Senior Officer, Student Programs & Services, Arts)

Request for Approval for: Field trip fee for AUBIO/AUGEO 351 Biogeography

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: Request the implementation of a modified MSISF fee of \$10-50 for field trips in AUBIO/AUGEO 351.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Augustana Faculty, Department of Science
Dean/Chair	Jonathan Mohr, Chair
Primary Contact (Name, phone number, and e-mail)	Jonathan Mohr 780-679-1514 jmohr@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	To cover the transportation costs of a field trip to a Miquelon Lake field station to conduct a vegetation assessments of south-facing and north-facing slopes.
Proposed Amount	\$10-50
Previous Fee Amount (if this is a new fee, please indicate that here)	\$0-30
Requested Implementation Date	September 1, 2014.
The Impact of the Fee (number of students affected, etc.)	Enrollment capacity of the course is currently 20.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUBIO/AUGEO 351 Biogeography
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on the BSc Major in Environmental Science; the BA Major/Minor in Environmental Studies; the BA/BSc Major/Minor in Biology and the BA/BSc Minor in Geography)
New or Existing Course(s)	Existing
New or Existing Program (include name)	Existing (BA and BSc)
Course Description(s)	Analysis of the spatial patterns of biotic systems and species. The course examines their past and present distribution patterns in the context of biological and ecological processes and human impacts. The course employs several methods of analysis, including geographic information systems. Prerequisite: AUBIO 253. Note: Credit may be obtained for only one of AUGEO 351 and AUBIO 351. Requires payment of additional student instructional support fees. Refer to the Fees Payment Guide in the University Regulations and Information for Students section of the Calendar.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Augustana's 24-passenger bus would usually suffice for a field trip to the Miquelon field station in this course, so costs would be relatively low, assuming the trip was not more than about 200 km round trip.
Explanatory Notes	A range is proposed for this fee in case transportation costs increase, an additional field trip is included, or the class size increases and an additional or larger bus is required.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Details

Estimated Costs (Budget information may be included here or as an attachment)	N/A
Explanatory Notes	<p>The Augustana China Tour was offered for the first time in Fall 2012. Evaluation afterwards indicated that the amount of preparation and study involved was significant for a *3 course. Also, some student feedback indicated a desire for a course that did not require the actual tour.</p> <p>In response, the Social Sciences Department split the course into two *3 offerings. AUECO 354/AUPOL 358 remains as a *3 Augustana-based lecture course on Development and Institutional Change in China, intended for offering in winter terms. It will be strongly encouraged for students desiring the new AUECO/AUPOL 356 course, which now includes just the 3-week study trip to China in the Spring session.</p> <p>As the intention is for AUECO 354/AUPOL 358 to be a lecture course based entirely on Augustana campus, the MSIS fee is no longer necessary.</p>

Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on several

	programs)
New or Existing Course(s)	Existing
New or Existing Program (include name)	AUIDS 270 is available for use by most of the degree/major/minor programs at Augustana Faculty.
Course Description(s)	AUIDS 270 Topics in Integrative Studies *3 (fi 6) (either term, 3-0-0). Selected topics on the integration of knowledge between different disciplinary perspectives. . The focus and content of each course are determined by student and faculty interests, and vary from year to year. Each course is team-taught by faculty from at least two distinct disciplines.

Details

Estimated Costs (Budget information may be included here or as an attachment)	N/A
Explanatory Notes	<p>The Augustana Dogsledding Expedition has been a fairly unique experience offered every other year for several years. Historically, it has been offered as AUIDS 270, with the course team-taught by instructors in Physical Education and Scandinavian Studies. It has always been a very successful and much anticipated offering.</p> <p>Difficulties have arisen with the coordination and cost of the team-taught model, and with the lack of clarity at times over where and how an 'Selected Topics' Interdisciplinary course fits into a degree program, especially for Physical Education majors (who usually comprise the majority of the registered students). As such, the course has been redesigned as AUPED 281, offered solely by Augustana's Physical Education discipline, and clearly articulated in the Calendar as a dogsledding expedition. As such, the current fee for AUIDS 270 is no longer required.</p>

Registrar's Advisory Committee on Fees (RACF)

Item No. <06>

Request for Approval for: Increasing Fee Recovery EAS 234, EAS 333 and EAS 354

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE:

Three EAS field schools are required for the completion of Specialization and Honors programs in Geology (EAS 234 and 333) and Environmental Earth Sciences (EAS 234 and 354). Field experience is also a requirement for professional accreditation in Geoscience with APEGA. These are delivered offsite as residential courses, so there is substantial travel and accommodation costs incurred for students, teaching assistants and faculty. Historically, these courses have been offered to students at a greatly subsidized rate. For example in 2013, EAS 234 had a total cost per student of \$1,830 per student, for which EAS could recover ~\$600 per student. The difference between field-school cost and recoverable fees is approximately \$200,000.

Historically, funding for field school has come from the Faculty of Science and from Industry Sponsorship, but recent budgetary uncertainty and the risk of raising no corporate sponsorship, which is allocated competitively on an annual basis, not as long-term support, could leave us in a position where we cannot deliver these crucial parts of our curriculum. Please note that we have already moved to managed enrolment of these the geology and environmental programs because of limits on the number of students we could afford to have attend. Field school costs were a key factor in a recent decision to decline to respond to an invitation from the province to bid for the opportunity to grow enrolments in our programs. In short, we need another mechanism to deal with financial limitations.

Because the costs can be variable from year-to-year and also since our level of sponsorship is variable, we request a range that we can use as a fee target for these courses. These ranges are based on recent field school costs and include a small adjustment for anticipated inflation over the next 3 years.

Put N/A in any boxes that do not apply

Registrar's Advisory Committee on Fees (RACF)

Item No. <10>

Request for Approval for: Increase in Mandatory Student Instructional Support Fees

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: The Faculty of Nursing requests approval for an increase in the current mandatory, non-refundable Student Instructional Fees associated with its undergraduate programs effective Fall 2014. Instituted in 2008, the Fees vary across the Faculty's undergraduate programs and recover a portion of actual costs incurred for laboratory kits; the Faculty absorbs the additional costs associated with handling and distribution. These kits contain supplies necessary for students to learn and practice skills, techniques, and procedures in laboratory courses (e.g., dressing supplies). At their inception, the Fees were \$70 per year of the four year BScN Collaborative Program; \$100 per year of the three years of the four year Bilingual BScN Program; and \$150 per year of the two year BScN After Degree Program; over the past five years, the Fees have increased to \$100, \$130, and \$200 respectively. This represents a 20% – 30% increase and now exceeds the maximum of the range approved by the Board of Governors in 2008. The lower end of the proposed new Fee range reflects the current actual cost of student lab kits; the upper end of the range allows for incremental increases (up to 30%), which will be applied only if the actual cost of lab kits increases over the next five academic years (2014/15 – 2018/19). Advantages of the Fee to students are that it minimizes the cost of lab kits to students; it moderates cost variations across program years; and it is eligible for inclusion on student loan applications and as T2202 deductions.

BScN Program	Approved Range of the Instructional Support Fees 2008 -2013	Actual Cost of Lab Kits 2012- 2013**	Proposed Instructional Support Fee Range 2014/15 – 2018/19***
Collaborative	\$70 - \$100 per yr. x 4 yrs.	\$110.23 per yr. x 4 yrs.	\$116.00 - \$150.00
Bilingual	\$100 - \$130 per yr. x 3 yrs.	\$137.06 per yr. x 3 yrs.	\$143.00 - \$185.00
After Degree*	\$150 - \$200 per yr. x 2 yr.	\$205.59 per yr. x 2 yrs.	\$211.00 - \$275.00

*Includes the RPN to BScN Program

**This does not include the cost of additional supplies required by students for practice labs or handling and distribution costs, which are absorbed by the Faculty

*** The lower end of the proposed new Fee ranges reflect the actual current cost of student lab kits; the upper end of the range allows for incremental increases (up to 30%), which will be applied only if the actual cost of lab kits increases over the next five academic years (2014/15 – 2018/19).

Collected Centrally or by Department	Centrally

Course Information (if fee is attached to a course)

Course Name(s)	<p><u>Collaborative Program</u> NURS 103 (this is a new course offered in winter 2015 and replaces NURS 190/194/195) NURS 290/291/294/294 NURS 391/394 NURS 491</p> <p><u>After Degree Program</u> (Includes the RPN to BScN Program) NURS 303 NURS 307 NURS 407</p> <p><u>Bilingual BScN Program</u> SCINF 217/218 NURS 307 NURS 407</p> <p><u>Practice Labs</u> Practice labs are available to all students across all years of all programs and they provide opportunities for students to practice skills/procedures/techniques they have learned during regularly scheduled labs. Since students use up many of the items (consumables) in their kits during regularly scheduled labs, they require replenishment of supplies for these additional practice sessions.</p>
Required Course(s)	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
New or Existing Course(s)	Existing courses except NURS 103 - a new course in the redesigned undergraduate curriculum, which begins in the 2014 -2015 academic year. NURS 103 replaces NURS 190/194/195.
New or Existing Program (include name)	Existing Programs: Collaborative BScN (including Honors stream); After Degree BScN (including the RPN to BScN Program); Bilingual BScN; Practice Labs across all years/ programs
Course Description(s)	<p><u>Collaborative Program</u></p> <p>NURS 103 Intro to Nursing Theory I *6 (fi 12) (either term, variable). Focus is on the basic concepts of the nursing profession and discipline: nursing, person, health and environment. These concepts will be explored within the context of primary health care and changing perspectives of health and how this evolution has impacted the</p>

development of the profession of nursing. The philosophical, theoretical, historical, ethical and legal underpinnings of professional nursing practice will be examined.

NURS 290 Nursing in Context B *5 (fi 10) (first term, 1.5-6s-3 in 6 weeks). Within the context of primary health care, the focus shifts to restoration, rehabilitation and support of clients experiencing chronic and less acute variances in health. Discussion related to health promotion and disease prevention continues. Intermediate health assessment and nursing skills are introduced.

NURS 291 Nursing Practice III *7 (fi 14) (either term, 3-25c-3 in 7 weeks). Practice focuses on restoration, rehabilitation and support (including health promotion and disease prevention) of clients with chronic and less acute variances in health across the life span. Practice occurs primarily in primary-level acute care centres and continuing care agencies.

NURS 294 Nursing in Context B1 *(fi 10) (second term, 1.5-6s-3 in 6 weeks). Continuation of NURS 290 with increasing situational complexity.

NURS 295 Nursing Practice IV *7 (fi 14) (either term, 3-25c-3 in 7 weeks). Practice focuses on health across the life-span in child-birth facilities, homes, community health clinics, schools and other community based settings. Integration of the concepts of primary health care, health promotion and disease prevention and determinants of health are examined in the community context.

NURS 390 Nursing in Context C *5 (fi 10) (first term, 1.5-6s-3 in 6 weeks). Within the context of primary health care focus is on restoration, rehabilitation and support of clients experiencing more acute variances in health. Discussion related to health promotion and disease prevention continues. Advanced health assessment and nursing skills are introduced.

NURS 391 Nursing Practice V *7 (fi 14) (either term, 3-26c-2 in 7 weeks). Practice focuses on restoration, rehabilitation, and support (including health promotion and disease prevention) of clients experiencing more acute variances in health across the life-span. Practice occurs in primary-, secondary-, and tertiary-level acute care settings.

NURS 394 Nursing in Context C1 *5 (fi 10) (either term, 1.5-6s-3 in 6 weeks). Continuation of NURS 390 with increasing situational complexity. Management and care of clients in ambiguous, complex, situations occurring over a variety of settings.

NURS 491 Nursing Practice VII *7 (fi 14) (either term, 3-26c-2 in 7 weeks). Management and care of clients in ambiguous, complex, situations occurring over a variety of settings.

After Degree Program

NURS 303 Introduction to Nursing Theory *6 (fi 12) (either term, 3-3s-2). Focus is on the basic concepts of the nursing profession and discipline: nursing, person, health and environment. These concepts will be explored within the context of primary health care and changing perspectives of health and how this evolution has impacted the development of the profession of nursing. The philosophical, theoretical, historical, ethical and legal underpinnings of professional nursing practice will be examined.

NURS 307 Acute Care Nursing Theory I *6 (fi 12) (either term, 2-4S-3). The primary focus is the theoretical foundation for the client-centred care of adults and elderly clients and their families experiencing variations in health (acute and chronic illnesses). Comprehensive assessment and best practice interventions are addressed within the context of a primary health care framework and a nursing model.

NURS 407 Acute Care Nursing Theory II *6 (fi 12) (either term, 2-4S-3). A comprehensive approach to primary health care components in the care of clients in complex situations locally, nationally, and internationally. High acuity health assessments and interventions are introduced. Case management, interdisciplinary collaboration, community development, and sociopolitical action are emphasized.

Bilingual Program

SC INF 217 Introduction aux sciences infirmières *8 (fi 16) (premier semestre, 2-6s-2). Une introduction à l'étude des sciences infirmières centrée sur la pratique professionnelle, et sur les soins communautaires et de longue durée (résidence assistée). L'accent est mis sur les communautés et client(e)s francophones.

SC INF 218 Introduction à la pratique infirmière *6 (fi 12) (premier semestre, 0-0-14c). Pratique infirmière novice dans la communauté francophone, les centres de soins de longue durée et les résidences assistées. L'accent est mis sur la promotion de la santé des client(e)s dans toutes les phases de la vie.

NURS 307 Acute Care Nursing Theory I *6 (fi 12) (either term, 2-4S-3). The primary focus is the theoretical foundation for the client-centered care of adults and elderly clients and their families experiencing

	<p>variations in health (acute and chronic illnesses). Comprehensive assessment and best practice interventions are addressed within the context of a primary health care framework and a nursing model.</p> <p>NURS 407 Acute Care Nursing Theory II *6 (fi 12) (either term, 2-4S-3). BOT 314	September 2014	\$100 - \$150	59
BOT 322	September 2014	\$340 - \$440	61
BOT 332	September 2014	\$100 - \$150	63
NS 592	May 2014	\$200 - \$400	65

Mandatory fees assessed in anticipation of costs for supplies, equipment, materials, or services which are not directly related to the delivery of instruction in a course or program, but are considered required elements of a course or program. Examples include but are not limited to the costs of food, lodging, and transportation for required field trips; supply of certain specialized professional tools which the student will retain; and fees for arranging professional placements such as practica, internships, and work experience. All mandatory instructional support fees require the approval of the Board of Governors.

Definition taken from UAPPOL

Registrar's Advisory Committee on Fees (RACF)

Item No. <08>

Request for Approval for: Field trip fee for AUENV 252 Wildlife Diversity of Alberta

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: Request the implementation of a \$10-50 MSISF for a required field trip in AUENV 252.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Augustana Faculty, Department of Science
Dean/Chair	Jonathan Mohr, Chair
Primary Contact (Name, phone number, and e-mail)	Jonathan Mohr 780-679-1514 jmohr@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	To cover the transportation costs of a field trip to Miquelon Lake to explore wildlife diversity in a different setting. Possibility exists for additional field trip depending on instructor/course structure.
Proposed Amount	\$10-50
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee
Requested Implementation Date	September 1, 2014.
The Impact of the Fee (number of students affected, etc.)	Enrollment capacity of the course is currently 24.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUENV 252 Wildlife Diversity of Alberta
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on the BSc Major in Environmental Science; the BA Major/Minor in Environmental Studies; and the BA/BSc Minor in Geography)
New or Existing Course(s)	Existing; will be offered for the first time in Fall 2014.
New or Existing Program (include name)	Existing (BA and BSc)
Course Description(s)	Ecology, conservation, and identification of Alberta's common wildlife species, with a focus on mammals, birds, amphibians, reptiles, fish, and invertebrates. A mandatory field trip will be included. Prerequisites: AUENV 120, AUGEO 120 or AUBIO 110.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Augustana's 24-passenger bus would usually suffice for a field trip in this course, so costs would be relatively low, assuming the trip was not more than about 200 km round trip.
Explanatory Notes	A range is proposed for this fee in case transportation costs increase, an additional field trip is included, or the class size increases and an additional or larger bus is required.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Consultative Route (parties who have seen the proposal prior to Registrar's Advisory Committee on Fees and in what capacity)	Department of Science, Augustana Faculty Augustana Faculty Curriculum Committee Augustana Faculty Council
Advisory Route (RACF) Include dates	RACF – October 24, 2013
Approval Route* (Governance) *The approval process is initiated in January for the next academic year	GFC Academic Planning Committee (APC) Board Finance and Property Committee (BFPC) Board of Governors (BG)
Final Approver	Board of Governors

Item

Purpose of Fee (what it is to be used for)	To cover the transportation costs of a field trip to Miquelon Lake Provincial Park for the enhancement of course instruction and student research. Possibility exists for additional field trip depending on instructor/course structure.
Proposed Amount	\$10-50
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee
Requested Implementation Date	September 1, 2014.
The Impact of the Fee (number of students affected, etc.)	Expected enrollment of the course is 24.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUENV 327 Environmental Education and Heritage Interpretation
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on the BSc Major in Environmental Science; and the BA Major/Minor in Environmental Studies)
New or Existing Course(s)	Existing; will be offered for the first time in Fall 2014.
New or Existing Program (include name)	Existing (BA and BSc)
Course Description(s)	Theory and methods of communicating environmental and heritage subject matter to a broad audience. Includes discussion of the history, theory, planning, management, implementation, and evaluation of environmental programs. Techniques will apply to a variety of personal and non-personal techniques. Prerequisites: AUENV 120 or AUGEO 120.

Details

Item

Purpose of Fee (what it is to be used for)	To cover the transportation costs of a field trip to a Miquelon Lake field station to conduct student research in Miquelon Lake Provincial Park
Proposed Amount	\$10-50
Previous Fee Amount (if this is a new fee, please indicate that here)	New fee
Requested Implementation Date	September 1, 2014.
The Impact of the Fee (number of students affected, etc.)	Enrollment capacity of the course is currently 55. Enrollment averages 30-50.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUENV/AUGEO 320/420 Parks and Wilderness
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on the BSc Major in Environmental Science; the BA Major/Minor in Environmental Studies; and the BA/BSc Minor in Geography)
New or Existing Course(s)	Existing.
New or Existing Program (include name)	Existing (BA and BSc)
Course Description(s)	Examination of scientific principles and concepts underlying parks, wilderness and other protected area systems with emphasis on Canada. Topics include history, philosophy, conceptual frameworks, roles in sustainability, and types of biological and geographic designations. Prerequisite: One of AUBIO 253, AUENV 120, AUGEO 120, consent of the instructor. Note: Credit may be obtained for only one of AUENV 320, 420, AUGEO 320, 420.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Given the course enrollment, Augustana's 24-passenger bus would usually make 2 trips for a field trip to the Miquelon field station in this course, or 2 buses may be necessary, or one larger bus maybe need to be rented. Costs would still be relatively low, but could vary depending on class size and transportation options.
Explanatory Notes	A range is proposed for this fee in case transportation costs increase, an additional field trip is included, or the class size increases and an additional or larger bus is required.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Consultative Route (parties who have seen the proposal prior to Registrar's Advisory Committee on Fees and in what capacity)	Department of Science, Augustana Faculty Augustana Faculty Curriculum Committee Augustana Faculty Council
Advisory Route (RACF) Include dates	RACF – October 24, 2013
Approval Route* (Governance) *The approval process is initiated in January for the next academic year	GFC Academic Planning Committee (APC) Board Finance and Property Committee (BFPC) Board of Governors (BG)
Final Approver	Board of Governors

Registrar's Advisory Committee on Fees (RACF)

Item No. <13>

Request for Approval for: Field camp fee for AUENV/AUGEO 334 Field Studies in Environmental Science and Ecology

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: Request the implementation of a \$500-2000 MSISF for a three week field camp experience in AUENV/AUGEO 334.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Augustana Faculty, Department of Science
Dean/Chair	Jonathan Mohr, Chair
Primary Contact (Name, phone number, and e-mail)	Jonathan Mohr 780-679-1514 jmohr@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	To cover the transportation, lodging, and food costs of a field camp/research experience, likely at Miquelon Lake, for development of hands-on research skills and experience in areas such as ecology, conservation biology and resource management. This is intended as a Spring/Summer term course.
Proposed Amount	\$500-2000
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee
Requested Implementation Date	September 1, 2014.
The Impact of the Fee (number of students affected, etc.)	Expected enrollment of the course is 24.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUENV/AUGEO 334 Field Studies in Environmental Science and Ecology
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on the BSc Major in Environmental Science; and the BA Major/Minor in Environmental Studies)
New or Existing Course(s)	Existing.
New or Existing Program	Existing (BA and BSc)
Course Description(s)	A 3-week field course that provides students an opportunity to develop skills in research and study design in the field of Environmental Science and Ecology. Students will live in a field camp to allow them to fully immerse themselves in their research projects. Course content also includes instruction in key aspects of conservation biology and resource management. Prerequisites: AUSTA 215 and AUENV 120 or AUGEO 120 and one of AUGEO 218, AUGEO 230, AUENV 252, AUBIO 253. Notes: Credit may be obtained for only one of AUENV 334 and AUGEO 334.

Details

Estimated Costs (Budget information may be included here or as an attachment)	The estimated costs, based on a full enrollment of 24 students would be: Travel: $(100\text{km} \times \$1.50/\text{km})/24 = \$6.25/\text{student}$ Lodging: $\$35/\text{student}/\text{night} \times 20 \text{ days} = \$700/\text{student}$ <u>Food: $\\$20/\text{day} \times 20 \text{ days} = \\$400/\text{student}$</u> Total: $\$1106.25/\text{student}$
Explanatory Notes	A range is proposed for this fee in case the costs of transportation, lodging and food increase. The travel numbers assume a camp based around Miquelon Lake, but the course offers the flexibility to be offered elsewhere – the greater the distance, the greater the travel cost.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Consultative Route (parties who have seen the proposal prior to Registrar's Advisory Committee on Fees and in what capacity)	Department of Science, Augustana Faculty Augustana Faculty Curriculum Committee Augustana Faculty Council
Advisory Route (RACF) Include dates	RACF – October 24, 2013
Approval Route* (Governance) *The approval process is initiated in January for the next academic year	GFC Academic Planning Committee (APC) Board Finance and Property Committee (BFPC) Board of Governors (BG)
Final Approver	Board of Governors

Registrar's Advisory Committee on Fees (RACF)

Item No. <12>

Request for Approval for: AUPED 185 Introduction to Ski Touring

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: Request the implementation of a \$50 – 150 MSISF for the proposed AUPED 185 course, a 100-level version of the current AUPED 285 course, which allows Augustana Outdoor Education students greater flexibility in degree planning.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Augustana Faculty, Social Sciences
Dean/Chair	Dean of Augustana Faculty: Allen Berger Chair of Social Sciences Department: Jeremy Mouat
Primary Contact (Name, phone number, and e-mail)	Morten Asfeldt, 780.679.1158, morten.asfeldt@ualberta.ca Jeremy Mouat, 780.679.1633 jmouat@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	Transportation and food/camping supplies.
Proposed Amount	\$ 50 - 150
Previous Fee Amount (if this is a new fee, please indicate that here)	None – AUPED 185 is a new course. It is, however, a 100-level version of the current AUPED 285 course, which has an approved MSIS Fee of \$50-150.
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	Current enrollment capacity of AUPED 285 is 16; combined enrollment in offerings of AUPED 185/285 is not likely to exceed 20.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUPED 185 Introduction to Ski Touring
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
New or Existing Course(s)	New, but linked to existing AUPED 285 course.
New or Existing Program (include name)	Existing programs include BA/BSc in Physical Education – Outdoor Education stream; BA in Environmental Studies – Outdoor Education stream; BA/BSc/BMgt minors in Physical Education.
Course Description(s)	AUPED 185 Introduction to Ski Touring *3 (fi 6) (either term, 3-0-0). Course includes a 1 week expedition. Opportunity for self-awareness and leadership development through outdoor tripping and small-group living. The students will learn skills associated with ski touring, traveling in avalanche terrain, telemark skiing, and Leave No Trace camping. Students will have an opportunity to obtain Canadian Avalanche Association Avalanche Safety Training level one certification. Prerequisites: One of AUPED 184 or 286 and successful completion of a ski competency test. Notes: A student must demonstrate basic competency in skiing (downhill or cross-country). The course requires participation in field trips. A student must furnish his or her own outdoor clothing and sleeping bag. Credit can be received for only one of AUPED 185 and AUPED 285.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Costs will vary depending on the number of students enrolled and actual destination of winter expedition. The MIS Fee is intended to cover transportation to the expedition site, and some of the food/camping supplies costs for the expedition.
Explanatory Notes

Item No. <16>

Request for Approval for: AUPAC 191, 192, 193, 291, 292, 293 Selected Topics in Physical Activity courses MSIS Fee

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE:

Request the implementation of a \$0 – 1500 MSIS Fee for the Augustana Faculty AUPAC Selected Topics courses, primarily to facilitate opportunities for development of future AUPAC courses (at the 100-level) or special one-time offerings of specialized Physical Activity offerings aligning with particular instructor skills and abilities.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Augustana Faculty, Social Sciences
Dean/Chair	Chair of Social Sciences Department: Jeremy Mouat
Primary Contact (Name, phone number, and e-mail)	Jeremy Mouat, 780.679.1633 jmouat@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	Costs of transportation, meals, and possible accommodation, depending on nature of Selected Topics offering
Proposed Amount	\$0 - 1500
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	Will vary depending on particular topic and destination, but typical Physical Activity courses do not exceed 24 students per offering.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUPAC 191, 192, 193, 291, 292, 293 Selected Topics in Physical Activity
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (Any program requiring a specific number of AUPAC credits offers a wide range of options for achieving the requirement)
New or Existing Course(s)	Existing
New or Existing Program (include name)	Existing programs include BA/BSc in Physical Education; BA in Environmental Studies – Outdoor Education stream; BA/BSc/BMgt minors in Physical Education.
Course Description(s)	<p>AUPAC 191/192/193: An introduction to selected physical activities.</p> <p>AUPAC 291/292/293: Advanced study and practice of selected physical activities. Prerequisite: Second-year standing; variable according to activity.</p> <p>191 and 291 are *1 courses; 192 and 292 are *2; 193 and 293 are *3.</p>

Details

Estimated Costs (Budget information may be included here or as an attachment)	<p>Will vary depending on the particular activity and/or destination.</p> <p>For a specialized offering available on campus, no charge is required.</p> <p>Potential options for future offerings include alpine skiing and snowboarding, organized as a condensed course during the Spring Break period. In this case, transport to a suitable mountain venue (probably Jasper), accommodation, and possibly meals will require the higher fee.</p> <p>Sample budget for 3 AUPAC courses (max enrollment 16 each) collectively held in Jasper over Spring Break:</p> <p>Transportation (56 Passenger bus): \$7000.00 Accommodation (Jasper Hostel): \$6000.00 <u>Lift Tickets/Lessons/Instruction: \$15000.00</u> Total = \$28000.00/48 students = \$583.33 per student</p> <p>This scenario assumes students are responsible for their own equipment and meals.</p>
Explanatory Notes	In cases where a fee is collected, it will generally reflect the standard costs of a significant field trip or extended travel course offering, namely transportation, meals and accommodation and other program or specialized equipment costs.

Item

Purpose of Fee (what it is to be used for)	Accommodation, meals, travel costs, programme fees at United International College
Proposed Amount	\$3500 - 5500
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee for the AUECO 356/AUPOL 356 course, but essentially the same fee currently attached to AUECO 354/AUPOL 358
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	8 -12 is the anticipated enrollment of the two courses for any particular tour.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUECO/AUPOL 356 China Tour: Experiencing Development and Change
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on a variety of programs)
New or Existing Course(s)	New (currently in GFC circulation)
New or Existing Program (include name)	Existing programs include BA major and minor in Economics; BA major and minor in Political Studies; BMgt in Business Economics major; BMgt minor in Political Studies; BSc minor in Economics or Political Studies.
Course Description(s)	<p>AUECO 356 China Tour: Experiencing Development and Change *3 (fi 6) (Spring/Summer term, variable) A three week study trip to China, including travel to educational institutions in Zhuhai, the Zhuhai Special Economic Zone and other locations depending on the year. Through lectures, tours and research taking place in China, this course explores the effects of economic and institutional reforms as well as those of globalization, with links to China's history and to its culture. Note: Credit may be obtained for only one of AUECO 356 and AUPOL 356.</p> <p>AUPOL 356 China Tour: Experiencing Development and Change *3 (fi 6) (Spring/Summer term, variable) A three week study trip to China, including travel to educational institutions in Zhuhai, the Zhuhai Special Economic Zone and other locations depending on the year. Through lectures, tours and research taking place in China, this course explores the effects of economic and institutional reforms as well as those of globalization, with links to China's history and to its culture. Note: Credit may be obtained for only one of AUECO 356 and AUPOL 356.</p>

Details

Estimated Costs (Budget information may be included here or as an attachment)	Based on enrollment of 10 students: United International College Program Fees \$ 4500 International Airfare and visitor visas \$ 24000 Accommodation \$ 4000 Meals \$ 2500 Travel in China \$ 4000 Total \$ 39000 or \$3900/student
Explanatory Notes	<p>The Augustana China Tour was offered for the first time in Fall 2012. Evaluation afterwards indicated that the amount of preparation and study involved was significant for a *3 course. Also, some student feedback indicated a desire for a course that did not require the actual tour.</p> <p>In response, the Social Sciences Department split the course into two *3 offerings. AUECO 354/AUPOL 358 remains as a *3 Augustana-based lecture course on Development and Institutional Change in China, intended for offering in winter terms. It will be strongly encouraged for students desiring the new AUECO/AUPOL 356 course, which now includes just the 3-week study trip to China in the Spring session, which will continue in partnership with Augustana's partner institution in China, United International College (UIC).</p>

	United International College (UIC) fees include a formal program opening and closing event (likely a luncheon and banquet, respectively) as well as facilities usage at UIC during the tour. UIC is located in Zhuhai, in southern China – the tour will also feature visits in the region away from the UIC campus.

Request for Approval for: AUPED 281 Explorations of the Canadian North MSIS Fee.

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE:

Request the implementation of a \$2000 – 4000 MSIS Fee for the redesigned Augustana Faculty dogsledding expedition, now offered as AUPED 281 Explorations of the Canadian North.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Augustana Faculty, Social Sciences
Dean/Chair	Chair of Social Sciences Department: Jeremy Mouat
Primary Contact (Name, phone number, and e-mail)	Jeremy Mouat, 780.679.1633 jmouat@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	Accommodation, meals, travel costs, costs for dogsledding company which facilitates and guides the expedition
Proposed Amount	\$2000 - 4000
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee for the AUPED 281 course, but similar to the fee currently attached to AUIDS 270, which was course number used previously for this expedition. The proposed fee increases the range from the AUIDS 270 fee of \$2000-3000 in order to allow greater planning flexibility and for increasing costs.
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	The anticipated enrollment of the course is 12 for any particular expedition.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUPED 281 Explorations of the Canadian North
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on several programs)

New or Existing Course(s)	New
New or Existing Program (include name)	Existing programs include BA/BSc in Physical Education – Outdoor Education stream; BA in Environmental Studies – Outdoor Education stream; BA/BSc/BMgt minors in Physical Education.
Course Description(s)	AUPED 281 Explorations of the Canadian North *3 (fi 6) (second term, 3-0-0). In this course students will examine the Canadian North from an experiential perspective. Students will study the many factors involved in an extended winter expedition in sub-arctic Canada and will spend two weeks in the North participating in dogsled expedition, seminars, personal narrative writing, and a variety of other outdoor activities. In addition, students will analyze narratives from the Canadian North, with a focus on the expedition region. This course includes a 17-day expedition during February Spring Break and the week following. Prerequisite: AUPED 184.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Based on enrollment of 12 students: <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 80%;">Hoarfrost River Huskies Expedition Fees</td> <td style="text-align: right;">\$ 17000</td> </tr> <tr> <td>Transportation (ground and charter air)</td> <td style="text-align: right;">\$ 15000</td> </tr> <tr> <td>Accommodation</td> <td style="text-align: right;">\$ 1500</td> </tr> <tr> <td>Meals</td> <td style="text-align: right;">\$ 2500</td> </tr> <tr> <td>Total</td> <td style="text-align: right;">\$ 36000 or \$3000/student</td> </tr> </table>	Hoarfrost River Huskies Expedition Fees	\$ 17000	Transportation (ground and charter air)	\$ 15000	Accommodation	\$ 1500	Meals	\$ 2500	Total	\$ 36000 or \$3000/student
Hoarfrost River Huskies Expedition Fees	\$ 17000										
Transportation (ground and charter air)	\$ 15000										
Accommodation	\$ 1500										
Meals	\$ 2500										
Total	\$ 36000 or \$3000/student										
Explanatory Notes	<p>The Augustana Dogsledding Expedition has been a fairly unique experience offered every other year for several years. Historically, it has been offered as AUIDS 270, with the course team-taught by instructors in Physical Education and Scandinavian Studies. It has always been a very successful and much anticipated offering.</p> <p>Difficulties have arisen with the coordination and cost of the team-taught model, and with the lack of clarity at times over where and how an 'Selected Topics' Interdisciplinary course fits into a degree program, especially for Physical Education majors (who usually comprise the majority of the registered students). As such, the course has been redesigned as AUPED 281, offered solely by Augustana's Physical Education discipline, and clearly articulated in the Calendar as a dogsledding expedition. As such, this proposal requests the transfer of the current fee for AUIDS 270 towards the new AUPED 281 offering (taking the opportunity to increase in the range to allow greater flexibility in planning and to cover potential longer term cost increases).</p>

Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	To cover the transportation costs of a field trip to provide a practical hands-on experience at soil testing, research and management
Proposed Amount	\$10-50
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee
Requested Implementation Date	September 1, 2014.
The Impact of the Fee (number of students affected, etc.)	Proposed enrollment capacity of the course is 24.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUENV 233/AUGEO 233 Soil Science and Soil Resources
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on the BSc Major in Environmental Science; the BA Major/Minor in Environmental Studies; and the BA/BSc Minor in Geography)
New or Existing Course(s)	New
New or Existing Program (include name)	Existing (BA and BSc)
Course Description(s)	Soil characteristics, formation, processes, occurrence, classification, and management in the natural and modified environment. Prerequisites: *3 course in AUBIO, AUCHE, AUENV, or AUPHY. Notes: Credit may be obtained for only one of AUENV 233 and AUGEO 233.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Augustana's 24-passenger bus would usually suffice for a field trip in this course, so costs would be relatively low, assuming the trip was not more than about 200 km round trip.
Explanatory Notes	A range is proposed for this fee in case transportation costs increase, an additional field trip is included, or the class size increases and an additional or larger bus is required.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Secondary Contact (Name, phone number, and e-mail)	Jonathan Hawkins 780-679-1117 jh12@ualberta.ca

Item

Purpose of Fee (what it is to be used for)	Accommodation, some meals, and travel costs.
Proposed Amount	\$0 - 2000
Previous Fee Amount (if this is a new fee, please indicate that here)	New Fee.
Requested Implementation Date	September 1, 2014
The Impact of the Fee (number of students affected, etc.)	The anticipated enrollment of the course is 8 for any particular offering.
Collected Centrally or by Department	Department

Course Information (if fee is attached to a course)

Course Name(s)	AUPED 385 Advanced Ski Touring
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (optional course on several programs)
New or Existing Course(s)	New
New or Existing Program (include name)	Existing programs include BA/BSc in Physical Education – Outdoor Education stream; BA in Environmental Studies – Outdoor Education stream; BA/BSc/BMgt minors in Physical Education.
Course Description(s)	AUPED 385 Advanced Ski Touring *3 (fi 6) (second term, 3-0-0). This course follows the curriculum similar to the Canadian Avalanche Association Avalanche Safety Training Level II course. Specifically, students will learn to use thevaluator(Trademark) tool, practise monitoring weather and snow conditions as well as logbook keeping, be able to identify and practise route finding and decision-making in avalanche terrain, develop and practise avalanche rescue, winter camping and telemark ski skills. The course includes a 5-10 day ski touring expedition. Prerequisite: AUPED 185 or 285.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Based on enrollment of 8 students, with expedition to Jasper: Transportation (ground and helicopter) \$ 3300 Accommodation and onsite meals \$ 2500 Total \$ 5800 or \$725/student
Explanatory Notes	AUPED 385 Advanced Ski Touring builds on the Introductory Ski Touring courses (AUPED 185/285), but comes with a higher level of training in more challenging conditions. Students travel to Jasper, then helicopter to a more remote location for 4 days. This travel, and the basic accommodations and meals on the remote location account for the fee.

Request for Approval for: RLS 331 - LEISURE EDUCATION

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE:

I am proposing \$30.00 per student which gives us a total of \$600.00 per year. The total budget for supplies is \$834.00 but we always have some supplies from the previous years, use "found objects" or build upon supplies the Faculty, students or communities have. The supplies are purchased at the Paint Spot or Delta and we do receive a educational discount or buy around their sales, which also keeps the costs within the budget. The class does a lot of art work and the instructor was either paying for the supplies out of her own pocket or seeking help from the faculty.

Registrar's Advisory Committee on Fees (RACF)

Item No. <06>

Request for Approval for: NS592

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee**
- Alternate Delivery Fee**
- Cost Recovery Fee**
- Other**

OUTLINE OF ISSUE: The Fee is to defer travel and accommodation costs for a field trip to Ottawa to research archival materials in the Library and Archives of Canada (costs over and above are provided by support from the Provost's Office which is related to a SSHRC project). Students will be responsible for all meals and ground transportation from home to Edmonton airport and return. Since we will stay at a suite hotel, students will be able to cook their own meals. As indicated, a fee for NS403 was approved summer 2006; this proposal will provide the same opportunity to graduate students. NS592 is a recently approved course, and in the past (e.g. 2010, 2012), graduate students have registered in NS503 and paid the same fee. Due to increased costs, a few range of \$200 to \$400 is necessary.

Put N/A in any boxes that do not apply

Proposer

Faculty/Department	Native Studies
Dean/Chair	Brendan Hokoshitu
Primary Contact (Name, phone number, and e-mail)	Frank Tough ftough@ualberta.ca
Secondary Contact (Name, phone number, and e-mail)	Freda Cardinal <fcardina@ualberta.ca>

Item

Purpose of Fee (what it is to be used for)	Makes a contribution to the travel costs (airline fares, ground transport in Ottawa, and Ottawa living accommodations near Library and Archives in Ottawa; students are responsible for their own meals, but each group of 4 students will have access to a kitchen.
Proposed Amount	approval permitted 200-400\$, \$325 for 2014
Previous Fee Amount (if this is a new fee, please indicate that here)	approval permitted 200-400\$
Requested Implementation Date	May 1, 2014
The Impact of the Fee (number of students affected, etc.)	1 or 3
Collected Centrally or by Department	collected centrally

Course Information (if fee is attached to a course)

Course Name(s)	NS592 Historical and Archival Research Methods
Required Course(s)	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No NS592 is one of several courses that meets a methods course requirement in the MA program.
New or Existing Course(s)	New
New or Existing Program (include name)	Recently approved MA in Native Studies
Course Description(s)	Through a critical survey of published and unpublished primary sources relating to Native history, students will acquire skills and understandings of historical methods.

Details

Estimated Costs (Budget information may be included here or as an attachment)	Per students costs: Hotel (8 nights) = \$625.00, airfare \$667.00; and ground transport in Ottawa = 40\$ = total course cost = \$1332. Thus 75% of the travel and living accommodations for the Ottawa field trip are covered by faculty funds and the students are only responsible for 25% of these estimated direct costs (i.e., 325).
Explanatory Notes	Estimate only, airfares could go up, but hotel charges are fixed.

Routing (For Mandatory Student Instructional Support Fees and Non-Instructional Fees)

Consultative Route (parties who have seen the proposal prior to Registrar's Advisory Committee on Fees and in what capacity)	This course fees are the same rationale for NS403/NS503 as it is essentially the same class or group of students. NS403/NS503/NS592 will have the same in class experience and make the same trip to Ottawa.
Advisory Route (RACF) Include dates	RACF – January 28, 2014
Approval Route* (Governance) *The approval process is initiated in January for the next academic year	GFC Academic Planning Committee (APC) Board Finance and Property Committee (BFPC) Board of Governors (BG)
Final Approver	Board of Governors

Proposals for Existing Undergraduate Application Fee for New Students

Course	Implementation	Current Fee	Proposed Fee	Page Number
Undergraduate application fee	July 2014	\$115	\$125	68

Registrar's Advisory Committee on Fees (RACF)

Item No. <04>

Request for Approval for: Increase to application fee

Fee Type (see end of form for definitions)*:

- Mandatory Student Instructional Support Fee
- Alternate Delivery Fee
- Cost Recovery Fee
- Other

OUTLINE OF ISSUE:

The undergraduate application fee was last increased by \$15 in 2008 in anticipation of the annual institutional that is assessed by ApplyAlberta to support the operating costs of the system. At that time, the Registrar's Office anticipated a \$15 per applicant charge; however, the actual fee now rests at \$17.55 and may increase in the future. In addition to the \$2.55 shortfall, the University's total costs associated with application processing continue to increase.

An increase of \$10 is proposed, for a total undergraduate application fee of \$125. This increase is for new applicants and will not affect students transferring within or returning to the University, the fee for whom will remain at \$75. Applicants to the Faculty of Graduate Studies and Research will be unaffected. The increase to \$125 would put the University of Alberta's fee lower than that charged by Ontario Universities' Application Centre (OUAC) institutions (within the top third of U15 institutions) and make the University's fee the highest in Alberta. Early indications from University of Calgary are that they are currently considering an increase of the same amount to their current fee of \$115 although their final decision cannot be confirmed at this time.

1. UG App Fee Increase - Proposal Summary (MBAC)
2. 2014 UG App Fee Increase UofA Consultation Letter(2)

2014 Undergraduate Application Fee Increase Proposal - Summary

The Office of the Registrar is proposing an increase of \$10 to the application fee for all new undergraduate applicants to the University of Alberta for a total fee of \$125 effective July 2, 2014.

Rationale

The undergraduate application fee was last increased by \$15 in 2008 in anticipation of the annual institutional that is assessed by ApplyAlberta to support the operating costs of the system. At that time, the Registrar's Office anticipated a \$15 per applicant charge; however, the actual fee now rests at \$17.55 and may increase in the future. In addition to the \$2.55 shortfall, the University's total costs associated with application processing continue to increase.

Amount of Increase

An increase of \$10 is proposed, for a total undergraduate application fee of \$125. This increase is for new applicants and will not affect students transferring within or returning to the University, the fee for whom will remain at \$75. Applicants to the Faculty of Graduate Studies and Research will be unaffected. The increase to \$125 would put the University of Alberta's fee lower than that charged by Ontario Universities' Application Centre (OUAC) institutions (within the top third of U15 institutions) and make the University's fee the highest in Alberta. Early indications from University of Calgary are that they are currently considering an increase of the same amount to their current fee of \$115 although their final decision cannot be confirmed at this time.

Implementation

The new fee will be implemented July 2, 2014 which aligns with the regular application cycle. This date gives the Registrar's Office and the institution sufficient time to communicate the new fee to prospective applicants, high school counselors, etc., and to update websites and publication materials.

Impacts

Based on the number of undergraduate applications received by the University in previous years, if we expect roughly the same number of applications for the Fall 2015 term, a conservative estimate of the gross revenue the University can expect to receive as a result of the increase is between \$200,000 and \$250,000.

Although a slight drop in the number of applications was experienced when the fee was increased in 2004, the institution saw an increase in the number of applications following the latest application fee increase in 2008. Demand for University of Alberta programs continues to be high and, as such, we do not expect a significant impact on applicant numbers for the 2015-16 year based on this application fee increase.

In summary, we are proposing a \$10 increase to the fee for Applications for Undergraduate Admission for a total application fee of \$125, to be implemented on July 2, 2014.

APPLICATION FEES AT COMPARATOR INSTITUTIONS

Overview of Findings

An application fee increase to \$125 would make the University of Alberta's fee the highest in Alberta and put the UofA fee lower than that charged by Ontario Universities' Application Centre (OUAC) institutions.

Re: Proposed Undergraduate Application Fee Increase

Dear Colleagues,

The Office of the Registrar is proposing an increase of \$10 to the application fee for all new undergraduate applicants to the University of Alberta for a total fee of \$125 effective July 2, 2014.

Rationale

The undergraduate application fee was last increased by \$15 in 2008 in anticipation of the annual institutional charge that is assessed by ApplyAlberta to support the operating costs of the system. At that time, the Registrar's Office anticipated a \$15 per applicant charge; however, the actual fee now rests at \$17.55 and may increase in the future. In addition to the \$2.55 shortfall, the University's total costs associated with application processing continue to increase.

Amount of Increase

An increase of \$10 is proposed, for a total undergraduate application fee of \$125. This increase will not affect applications for readmission or internal transfer or to the Faculty of Graduate Studies and Research. The increase to \$125 would put the University of Alberta's fee lower than that charged by Ontario Universities' Application Centre (OUAC) institutions (within the top third of U15 institutions) and make the University's fee the highest in Alberta. Early indications from University of Calgary are that they are currently considering an increase of the same amount to their current fee of \$115 although their final decision cannot be confirmed at this time.

Implementation

The new fee will be implemented July 2, 2014 which aligns with the regular application cycle. This date gives the Registrar's Office and the institution sufficient time to communicate the new fee to prospective applicants, high school counselors, etc., and to update websites and publication materials.

Impacts

Based on the number of undergraduate applications received by the University in previous years, if we expect roughly the same number of applications for the Fall 2015 term, a conservative estimate of the gross revenue the University can expect to receive as a result of the increase is between \$200,000 and \$250,000.

Although a slight drop in the number of applications was experienced when the fee was increased in 2004, the institution saw an increase in the number of applications following the latest application fee increase in 2008. Demand for University of Alberta programs continues to be high and, as such, we do not expect a significant impact on applicant numbers for the 2015-16 year based on this application fee increase.

We welcome any feedback that you may have regarding the application fee increase, please send your comments to Bobbi Schiestel, Faculty Awards Facilitator, at 780.492.1952 or via email at bobbi.schiestel@ualberta.ca by January 10, 2013.

Sincerely,

A handwritten signature in cursive script that reads "Lisa M. Collins".

Notes for Non-instructional Fees

- † These fees have been adjusted by the Non Instructional Fee increase based on the annual average Alberta CPI increase (September through August) at 1.10%
- Mandatory health coverage will be provided to international students admitted to a course of studies in January, 1998 and thereafter, who are not Canadian Citizens or Permanent Residents and whose course of studies at the University of Alberta is greater than six weeks and less than twelve months. The health coverage under this program is provided by a private insurer in accordance with a contract signed with the University of Alberta and in accordance with policies governing this coverage approved by the Board Finance and Property Committee, acting under delegated authority from the Board of Governors, at its meeting of November 7, 1997. UAHIP fees are confirmed in June for the following academic year.
 - Augustana Student Insurance Policy fee. As Augustana Faculty students are not covered under the U of A Alberta Education, Alberta Worker's Compensation Board no fault insurance, Augustana Faculty proposes this accidental death or dismemberment insurance fee for all their full-time students (*9 UCW or more). The policy is renewed each September.
 - These fees have been adjusted based on the Board of Governors approved policy with respect to the annual indexing of Mandatory Non-instructional Fees which reads, "That effective September 1, 2000, there will be a regular adjustment to the Mandatory Non-instructional Fees (MNIF) [i.e., the University Health Services Fee; the Registration and Transcript Fee; the Student Services Fee; and the Athletics and Recreation Fee]. This increase will be equal to 0% or the Alberta Consumer Price Index (CPI) in the previous year, whichever is greater."
 - Athletics fee revenue assessed to Augustana students will be directed to the Augustana Athletics program except for Spring/Summer Terms. For 2014-2015, Athletics is bringing forward a new fee separate from this fee schedule. If approved, the amounts will be amended.
 - The Health Services Fee will not be assessed for Augustana Faculty students.
 - U-Pass Transit pass – implementation September 2007. The fee will be assessed each Fall, Winter, and Spring/Summer terms.
 - The CoSSS fee was approved by the Board of Governors at its March 26, 2010 meeting and implemented as of Spring term 2010. The Board of Governors retains the right to review and adjust the fee annually per Board policy and government regulations.

OUTLINE OF ISSUE

 Agenda Title: **Appendix XX: North Campus Long Range Development Plan Amendment 2014**

Motion: THAT the Board of Governors, on the recommendation of the Board Finance Property Committee, approve the proposed *Appendix XX: North Campus Long Range Development Plan Amendment 2014*, as set forth in Attachment 2, as the basis for further planning; and recommend that the Board of Governors approve the concurrent rescission of ‘Section 6.1’ of the Long Range Development Plan 2002.

Attachment 1

Appendix XX: North Campus Long Range Development Plan Amendment 2014

Background

Consultation on the land use plan for the University's North Campus has been ongoing since 2002. After considerable planning and community consultation, the University has begun the formal process of amending the Long Range Development Plan (LRDP) as it pertains to 'Sectors 1 to 11'.

In addition to supporting the academic mission for the institution, the principles of smart growth and planned communities were developed and incorporated into the plans. These principles reference best practices and adopted a triple bottom line approach that balances the environmental, economic and social aspects of sustainability.

The following planning subjects identified in the 2002 document have been updated:

- Land Use North Campus
- Campus Life and Housing
- Open Space System
- Public Vehicular Transportation Systems/Parking
- Pedestrian and Bicycle Circulation

Over the past 4 years as part of the development of the sector plans, there have been numerous consultation and planning meetings. These discussions have led to a series of active dialogues resulting in the development of land use plans that are different from that which was approved by the Board in 2002. At this time the university and the communities agree that these discussions should be captured and that the LRDP should be formally amended as it pertains to Sectors 1 to 11. In accordance with the consultation process outlined within the LRDP (per appendix XVIII), two Focus Group meetings and two formal community wide open houses were held on September 10, 2013, November 5, 2013, September 25, 2013 and November 19, 2013, respectively. The community was provided access to the Open House materials on-line, with the submission of comments closing 3 weeks later on October 16, 2013 and December 10, 2013, respectively.

Presentation boards for the September 25, 2013 Public Information Open House, together with a summary of community consultation and evaluations were presented to Facilities Development Committee (FDC) members on October 24, 2013 to review the consultation comments received to date as well as obtain further opinion and comment for integration into our consultation summary.

Summary

The following is a summary of substantive land use elements and design principles that remain unchanged, as well as key recommended changes and updates.

What Has Been Maintained:

1. The 2002 LRDP that embeds the principles of Smart Growth and Planned Communities.

Appendix XX:

North Campus Long Range Development Plan Amendment 2014

2. North Campus is, and will continue to be, the urban campus site of the University of Alberta and will be the hub for Faculties and for the majority of the facilities for the next 30 years accommodating 37,000 students.

What has changed:

1. Development sites are identified to allow for compatible intermediate-term and long-term growth of the faculties. In the intermediate-term, most new development will occur on lands in the northeast sector, on sites along 114 and 116 Streets, and along 87 Avenue.
2. Update North Campus Land Use and Development Plan to include:
 - a. New buildings completed and in construction since 2002.
 - b. Proposed demolition of Administration, Human Ecology, Remote Control Monitoring Station and Industrial Design Buildings.
 - c. Refine land use development sites for North Campus.
 - d. Five new development sites that require additional study:
 - i. Corner of 116 Street and Saskatchewan Drive (Sector 2);
 - ii. North of Earth and Atmospheric Science Building and south of Saskatchewan Drive (Sector 4);
 - iii. Area south of Corbett Hall to Whyte Ave (Sector 10);
 - iv. Site of Material Management Building;
 - v. Site west of west pool at Van Vliet Centre.
3. Revisions and updates to Campus Life and Housing.
4. Revisions and updates to Open Space.
5. Revisions and updates to Public Vehicular Transportation System and Parking.
6. Revisions and updates to Pedestrian and Bicycle Circulation.

The proposed revised land use plans for Sectors 1 to 11, consultation report consistent with Appendix XVIII: University of Alberta Consultation Protocol, evaluation summaries of two open houses, and the University's responses are incorporated into Appendix XX: North Campus Long Range Development Plan Amendment 2014. This document is submitted through University Governance to seek a formal approval of the LRDP amendment by the Board of Governors by March 2014. When approved, Appendix XX: North Campus Long Range Development Plan Amendment 2014 will replace Section 6.1 in the Long Range Development Plan 2002.

Recommendation

THAT the GFC Facilities Development Committee, recommends that the Board Finance and Property Committee approve the proposed *Appendix XX: North Campus Long Range Development Plan Amendment 2014*, as the basis for further planning; and recommend to the Board of Governors the concurrent rescission of 'Section 6.1' of the *Long Range Development Plan 2002*.

APPENDIX XX

LONG RANGE DEVELOPMENT PLAN

NORTH CAMPUS AMENDMENT

MARCH 2014

REPLACES SECTION 6.1 IN THE LONG RANGE DEVELOPMENT PLAN 2002

CONTENTS

6.0	BUILDING FROM THE 2002 LRDP AND VARIOUS SECTOR PLAN DEVELOPMENT	3
6.1.1	LAND USE	5

6.1.6	COMMUNITY CONSULTATION PROCESS	14
6.1.7	CONSULTATION SUMMARY	18
6.1.8	UNIVERSITY OF ALBERTA RESPONSES TO COMMUNITY FEEDBACK	24

WHAT IS A LONG RANGE DEVELOPMENT PLAN (LRDP)?

The Long Range Development Plan (LRDP) is responsive to the University of Alberta's Academic Plan, Strategic Research Plan and Strategic Business Plan. It is, therefore, a flexible document rather than a rigid template or "master plan" and it will need amendment when substantial alterations are made in the university's guiding plans.

The LRDP identifies a set of strategic planning principles that should form the basis for achievement of the goals, objectives and strategies expressed in the academic, research and business plans. It identifies as well, how the university lands and facilities should be developed in response to these plans, and outlines the operational planning initiatives and guidelines that will direct development.

The LRDP is the overall organizing framework for development and is approved by the Board of Governors as the guiding document for physical planning. The university will develop detailed administrative plans for various geographic sectors in conjunction with the timing of development in these sectors.

WHY IS THE LONG RANGE DEVELOPMENT PLAN NEEDED?

The university has always maintained a sufficient land base to meet its development requirements. However, from time to time, it is necessary to review the ways in which development of those lands is planned.

With growth continuing at the university and with higher rates of growth anticipated, continued facilities growth requires a useful framework within which to deploy physical assets effectively, efficiently and in a timely manner in response to academic and research priorities.

6.0 BUILDING FROM THE 2002 LRDP AND VARIOUS SECTOR PLAN DEVELOPMENT

- The University of Alberta's students, faculty and staff, along with neighbouring communities and other stakeholders, have expressed interest in the principles of smart growth and planned communities. This LRDP amendment reinforces these principles.
- The 2002 LRDP planning principles have laid the foundation for guiding further planning and development of University of Alberta campuses.
- The amended North Campus LRDP document will include changes to sections 6 and 7 of the 2002 document:
 - North Campus will continue to be the urban campus site of the university. This will create one of the most densely populated campuses in Canada, accommodating approximately 37,000 students on 230 acres.
 - North Campus will be the primary campus of the university for the next 30 years and will be the hub for a majority of the university's faculties and facilities.
- The land use and campus element plans for the North Campus reflect the strategic planning principles of the 2002 LRDP. The subsequent illustrative series of plans captures physical systems and elements that require supervision and management. This section offers system-specific initiatives and guidelines appropriate to those systems.

6.01 SMART GROWTH PRINCIPLES

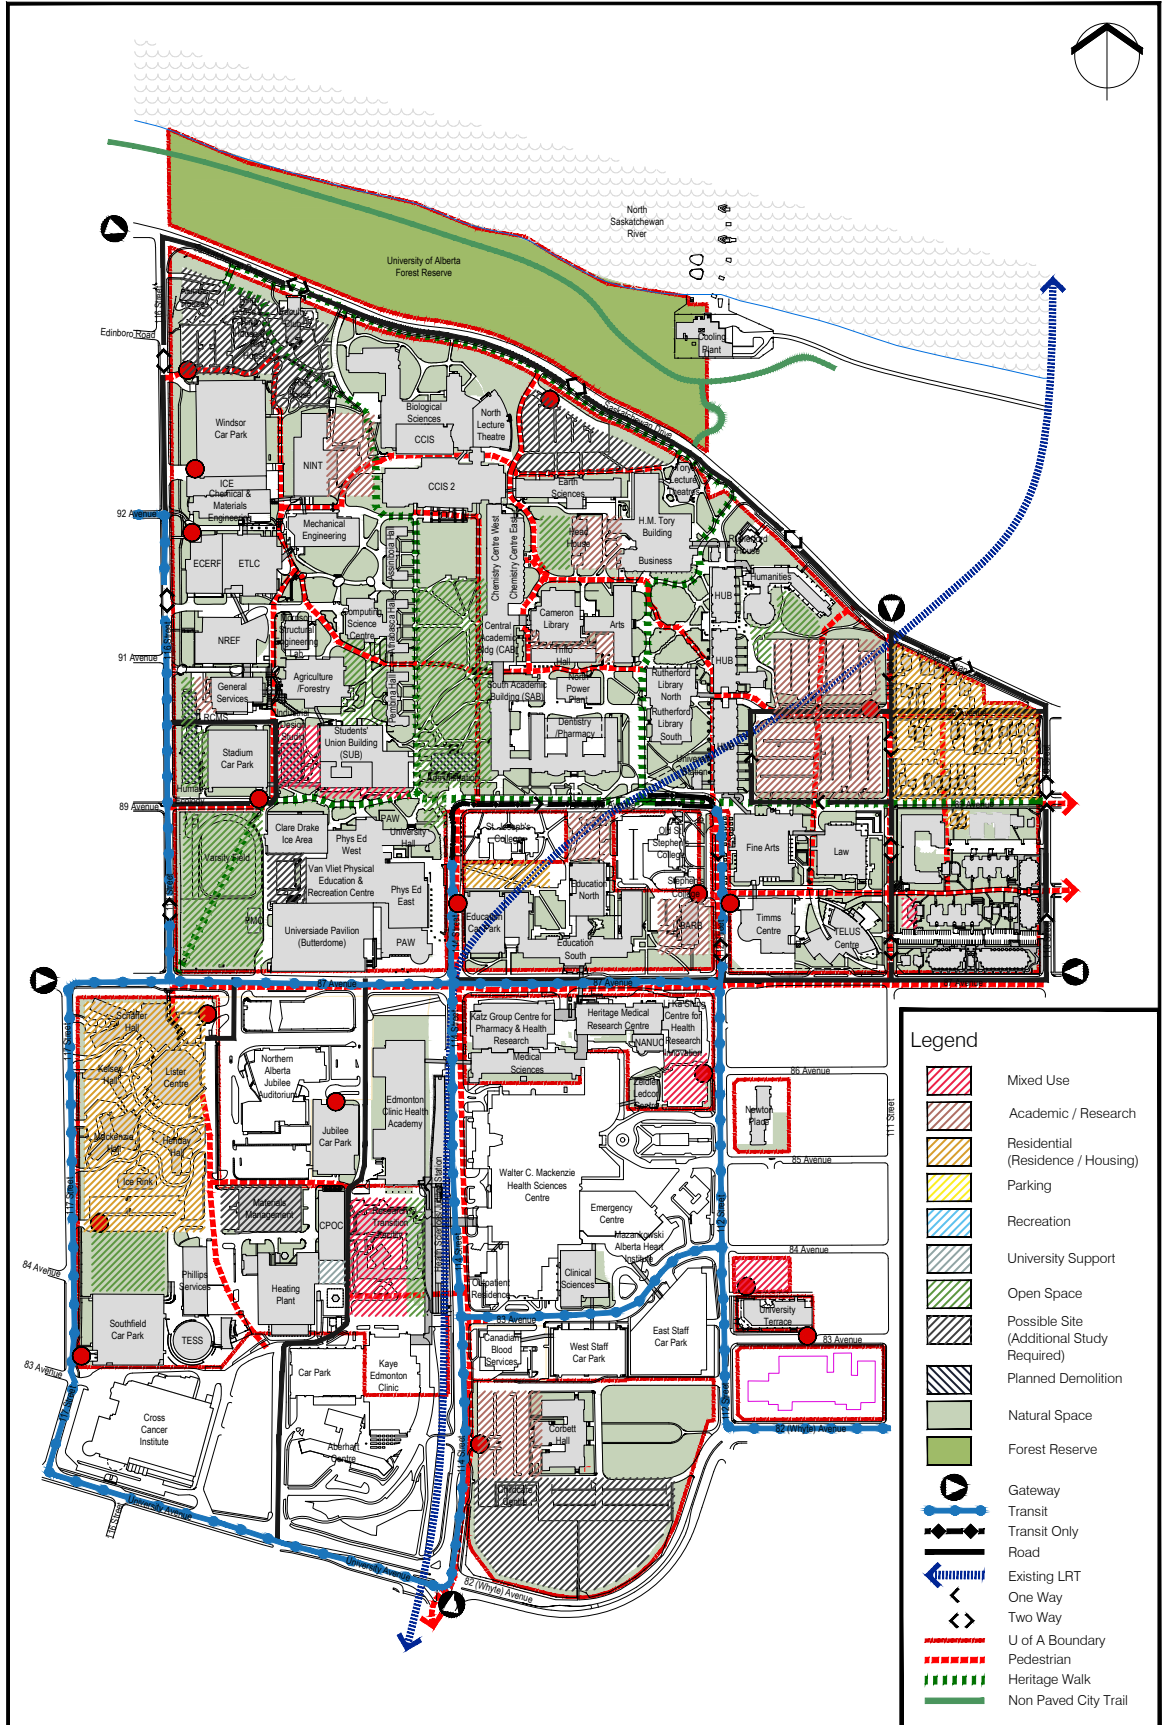

- Pursue a healthy and sustainable campus
- Realize operational, academic and social benefits to the university and surrounding communities
- Promote greater connections and communication with the surrounding community
- Create lasting, meaningful and accessible places
- Promote a pedestrian-oriented campus to the extent possible, while maintaining barrier-free access and services to various facilities
- Promote smart growth with each phase of campus development

6.02 PLANNED COMMUNITY PRINCIPLES

Our campuses will embody and balance social, ecological and economic sustainability in every aspect of campus design and function by:

- Enhancing and building upon the existing sustainability and resource stewardship philosophy of the U of A by balancing the three spheres of sustainability: social, economic and environmental;
- Creating an academic and residential environment that fosters the energetic exchange of ideas and creates a unique sense of place;
- Promoting opportunities for all U of A campuses to act as living laboratories, utilizing the site for the testing and integration of urban design innovations;
- Providing strong connections with neighbouring communities, allowing for shared amenities and services;
- Supporting and advancing the university's goal of becoming one of the world's top public educational institutions; and
- Making optimal use of the university's budgetary resources and partnership funding.

EXHIBIT 6.1.1
LAND USE
NORTH CAMPUS

6.1.1 LAND USE

The University of Alberta has been a successful post-secondary teaching, learning and research institution since its founding in 1908. Its North Campus has remained in continuous development, use and renewal for more than 100 years to serve its expanding academic mission and vision.

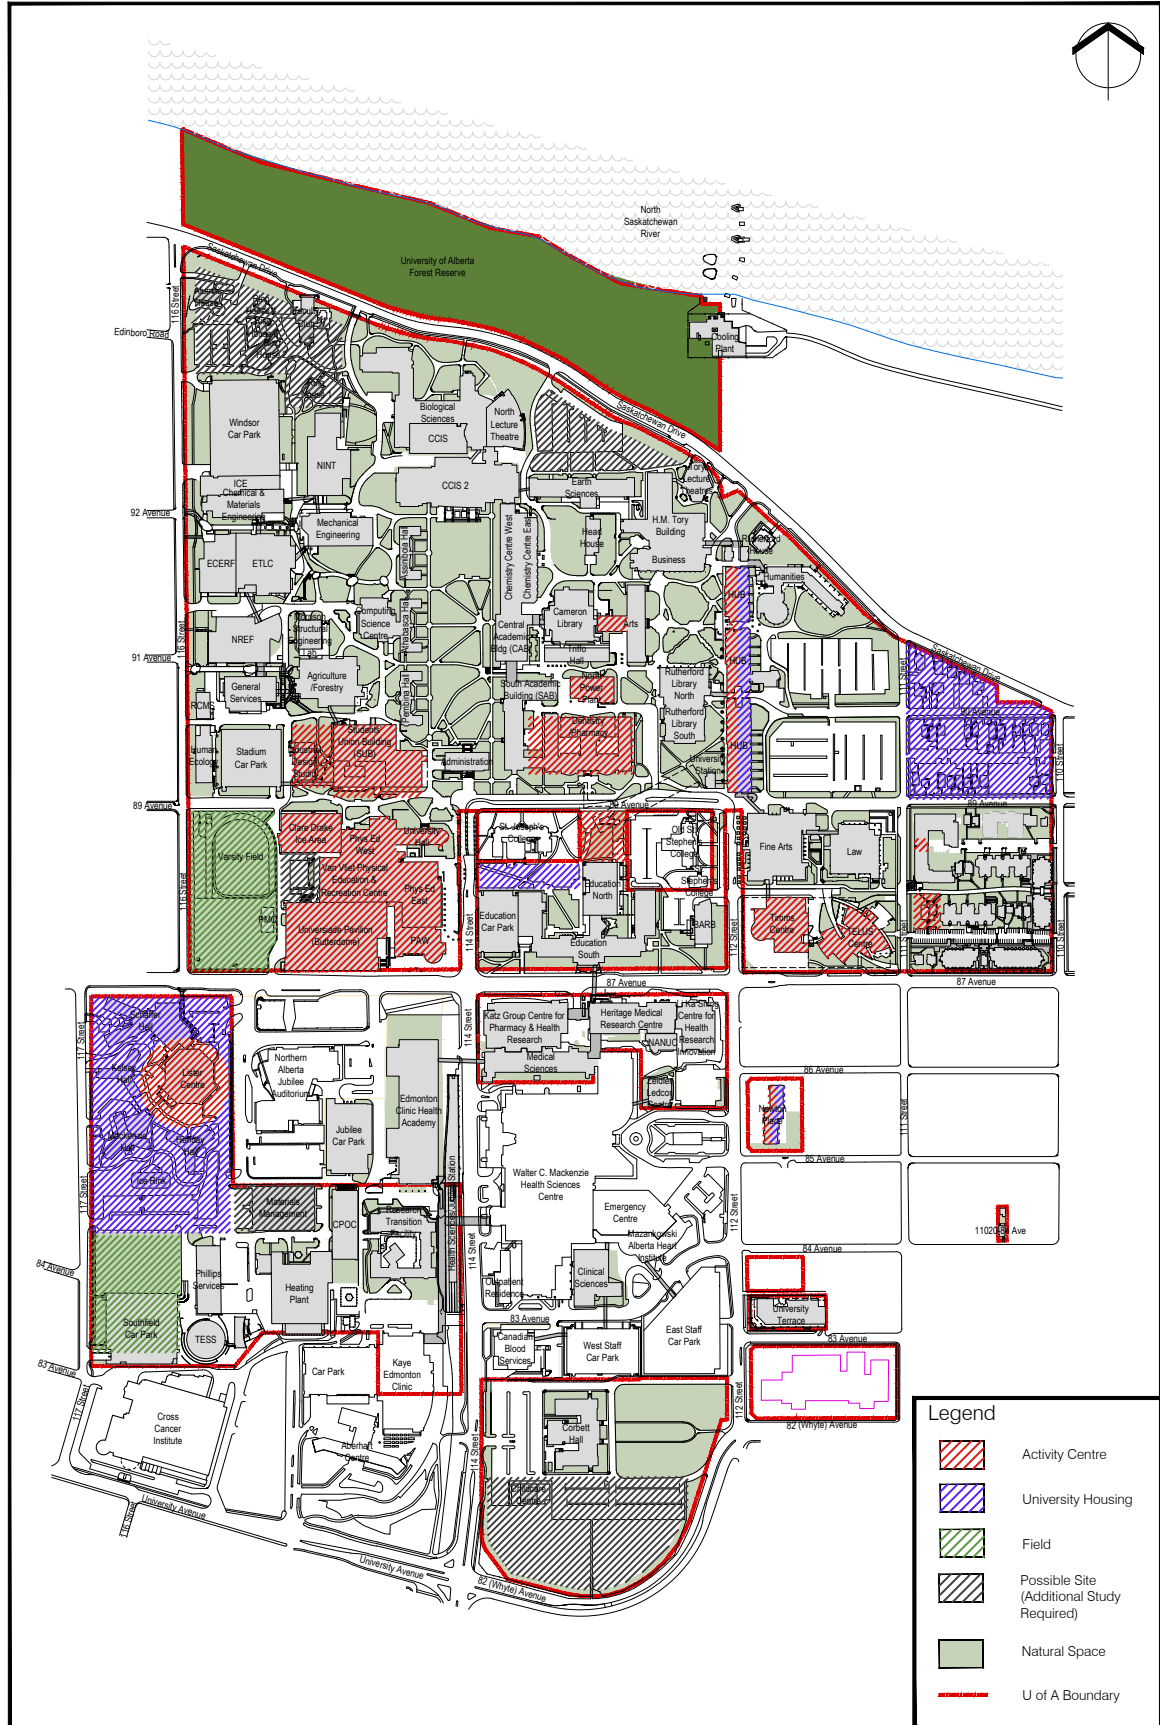

Land use purposes remain consistent and are divided in categories including academic/research, mixed use, residential (residence and housing), parking, recreation, university support, open space, and natural reserve.

To be effective, a land use plan needs to be grounded in sound smart growth and planned community principles. The land use plan also needs to engender resilience in adapting to changing demographics, space needs, functional programs, evolving pedagogy, social and flexible learning space requirements, and also changing mandates and expectations from the Ministry of Innovation and Advanced Education, as well as funding partners and requirements.

The resultant aspiration is a healthy and complete community that adequately provides the necessities of work, play and daily life for its inhabitants and users — a community that locates its various centres of activity in a connected, efficient and logical manner to support a high degree of livability and functionality.

A healthy and complete campus means a mixture of land uses: teaching and research, residential, recreational and service uses, integrated within buildings and across campus properties. It means having a campus where students, faculty and staff can feel at home and provide for their daily campus needs. It also pertains to how North Campus interacts with its surrounding neighbours.

EXHIBIT 6.1.2
CAMPUS LIFE
AND HOUSING,
NORTH CAMPUS

6.1.2 CAMPUS LIFE AND HOUSING

Universities are institutions of purpose and place, established to nurture the development of students. Beyond purpose-built facilities for academic purposes, the connectivity of educational community manifests itself through the campus residential and campus life experience.

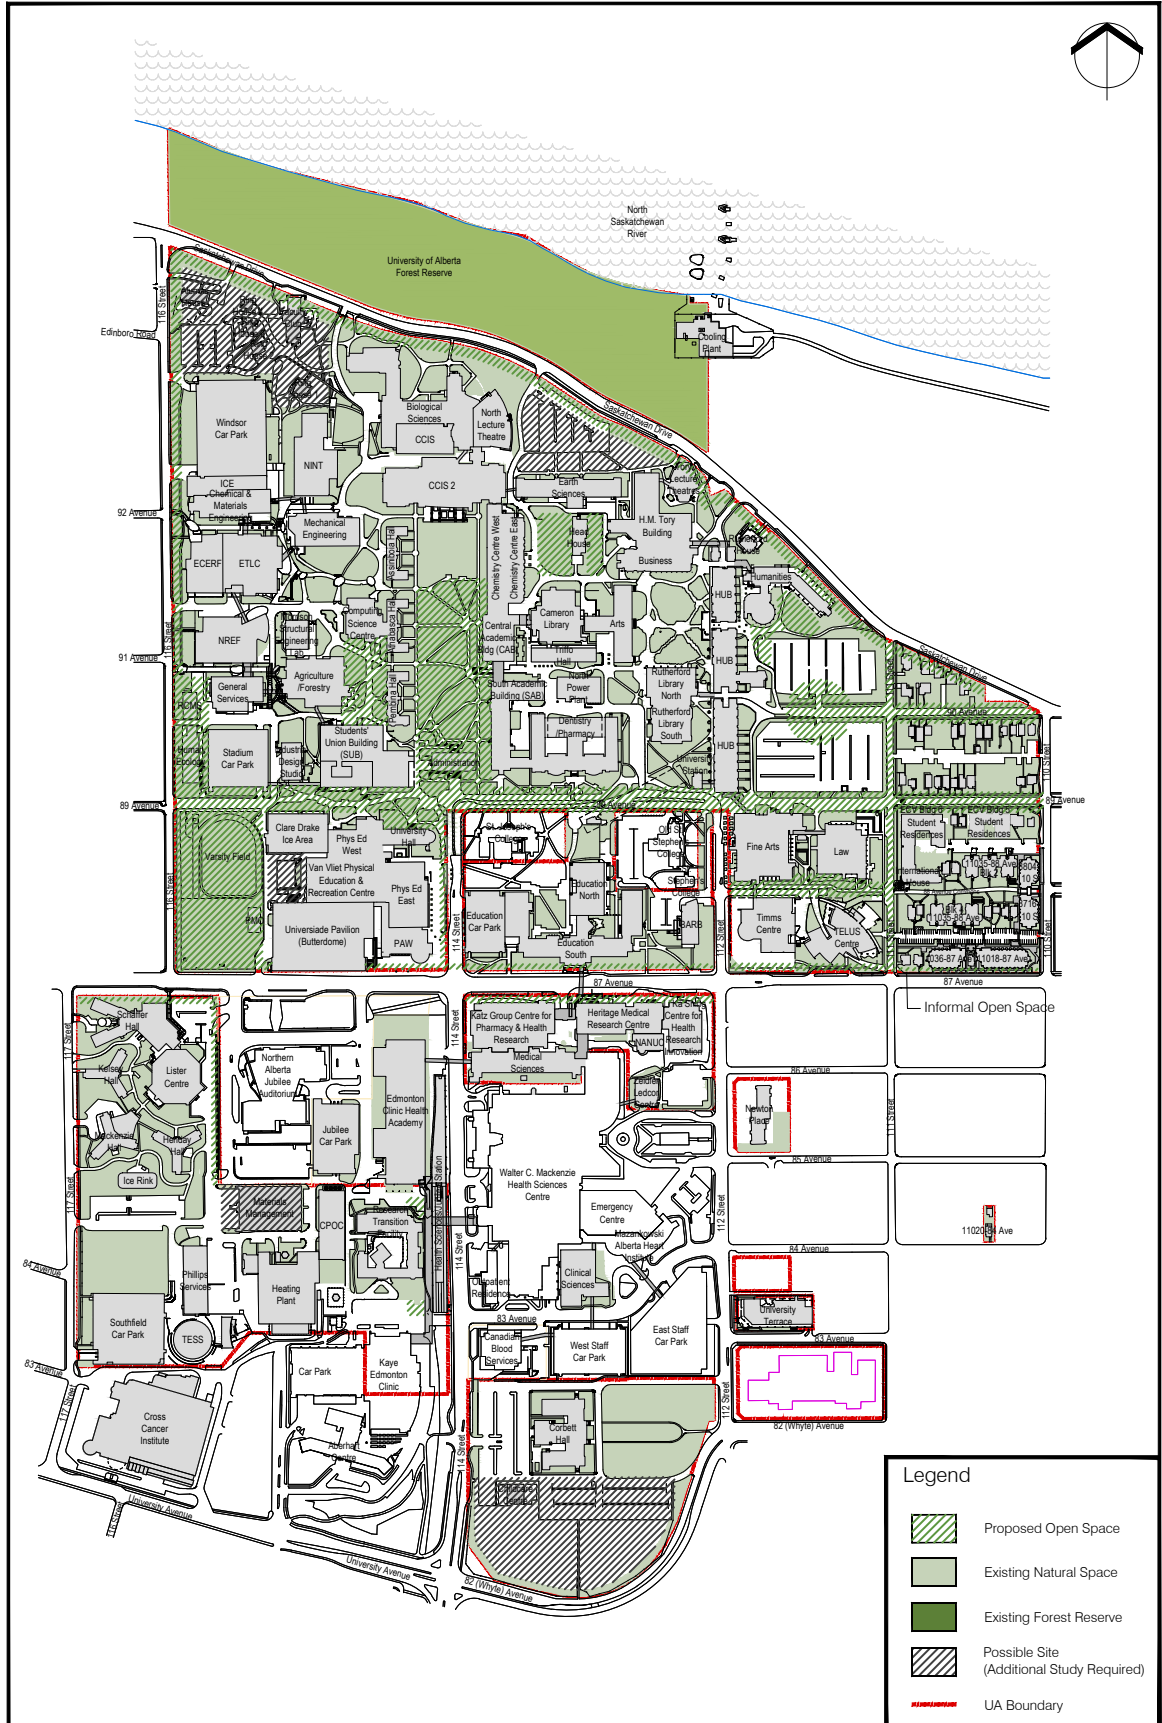

Supported through research and evidence-based design, the concepts of campus life and housing program aspire to “use campus residences to augment, complement, and enrich students’ academic success and experience.” Source: Kuh, G., Kinzie, J., Whitt, E., & Associates (2005). *Student Success in College: Creating Conditions That Matter*.

Good planning for student residences necessitates careful integration with recreation, leisure and student services, as well as neighbouring community resources and amenities. Residences will be planned and designed to function as components of campus neighbourhoods underpinned by sound urban planning and design principles that foster active street life and energize an integrated community, consistent with smart growth principles.

Five primary North Campus residential neighbourhoods are identified: Lister Centre, East Campus Village, HUB Mall, Newton Place and St. Joseph’s. Among the goals of the university will be to ensure sufficient quality student housing for up to 25 per cent of full-time equivalent students.

There are also multiple centres of campus life distributed throughout North Campus. However, a concentrated zone along 87 Avenue and 89 Avenue is being developed to provide a safe and active day and nighttime corridor. This includes Lister Centre, Varsity Field, the Universiade Pavilion, the Van Vliet Centre, the PAW Centre, the Students’ Union Building, the repurposed Dentistry/ Pharmacy Building, the North Power Plant, future Gathering Place, Convocation Hall, HUB Mall, Timms Centre for the Arts, Telus Centre and a future East Campus Village amenities building.

EXHIBIT 6.1.3
OPEN SPACE
SYSTEM,
NORTH CAMPUS

6.1.3 OPEN SPACE SYSTEM

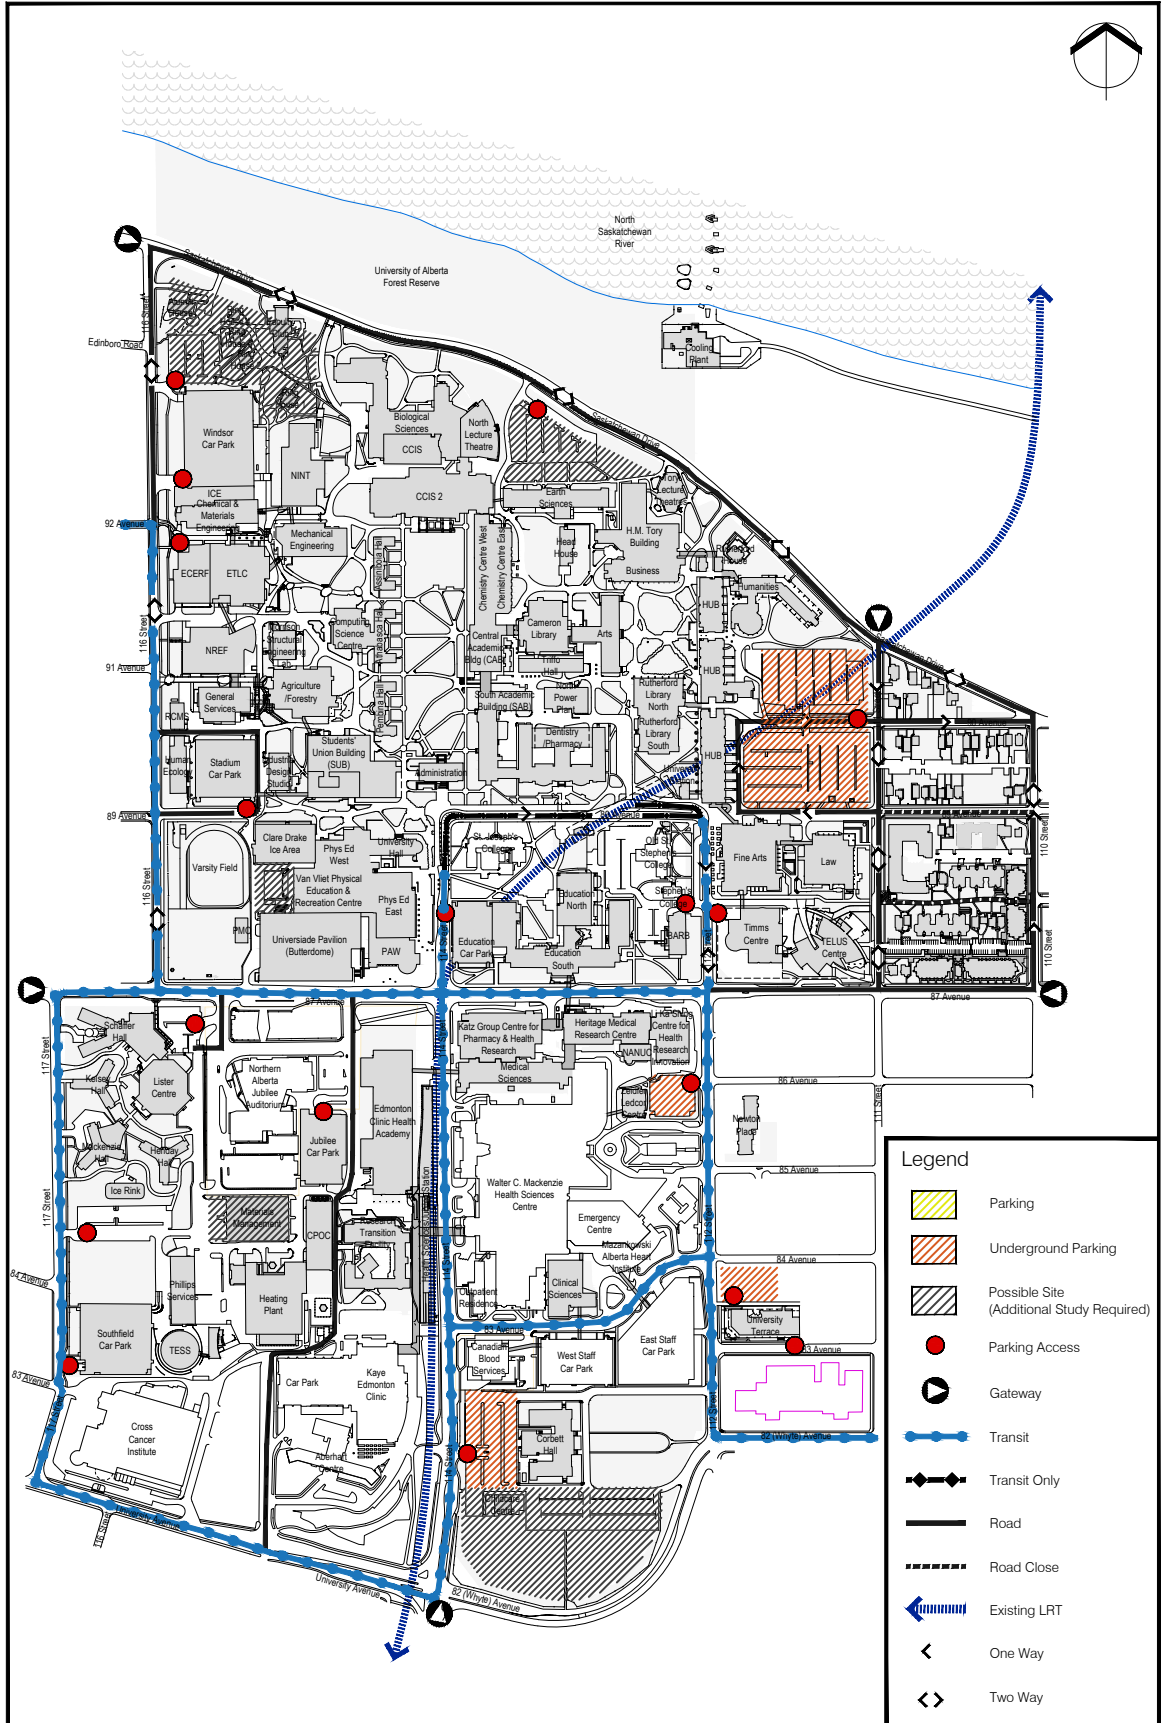

The campus open space system is composed of tree-lined boulevards, walkways, paths, quads, courtyards, commons, plazas, building entries, sculptures, art, commemorative plaques, lights and various landscape features in addition to open fields and active recreation areas. Together, it is a medium that connects individuals to the present and past experiences and achievements of the university in the social, historical and emotional realms.

The campus open space system is the connectivity system for the entire university campus by balancing increased density, improving livability and reinforcing a sense of community. It underpins and supports the public realm where campus life, activities, rituals and celebrations of the institution occur. In addition, it provides the necessary circulation movement, air, natural light, cultural and natural landscapes, contributing to the health and wellness of the university's physical space. Its physicality, geographic spatial breadth, connection to the history, legacy and community building give the campus a complexity of meaning, a sense of place and identity unique to this campus.

Campus open space demonstrates the university's commitment to environmental stewardship and support of the City of Edmonton's WinterCity Strategy, as well as smart growth principles of developing and building a healthy community for our campus, neighbouring communities and the general public.

On the experiential dimension, a well-developed campus open space system extends gestures of hospitality and welcome to greet its occupants, new recruits and returning alumni. As such, the articulation, preservation, development and integration of various open spaces into a coherent campus to support formal and informal place-making activities are the ultimate aspirations of a campus open space system.

EXHIBIT 6.1.4
PUBLIC
VEHICULAR
TRANSPORTATION
SYSTEMS /
PARKING

6.1.4 PUBLIC VEHICULAR TRANSPORTATION SYSTEMS / PARKING

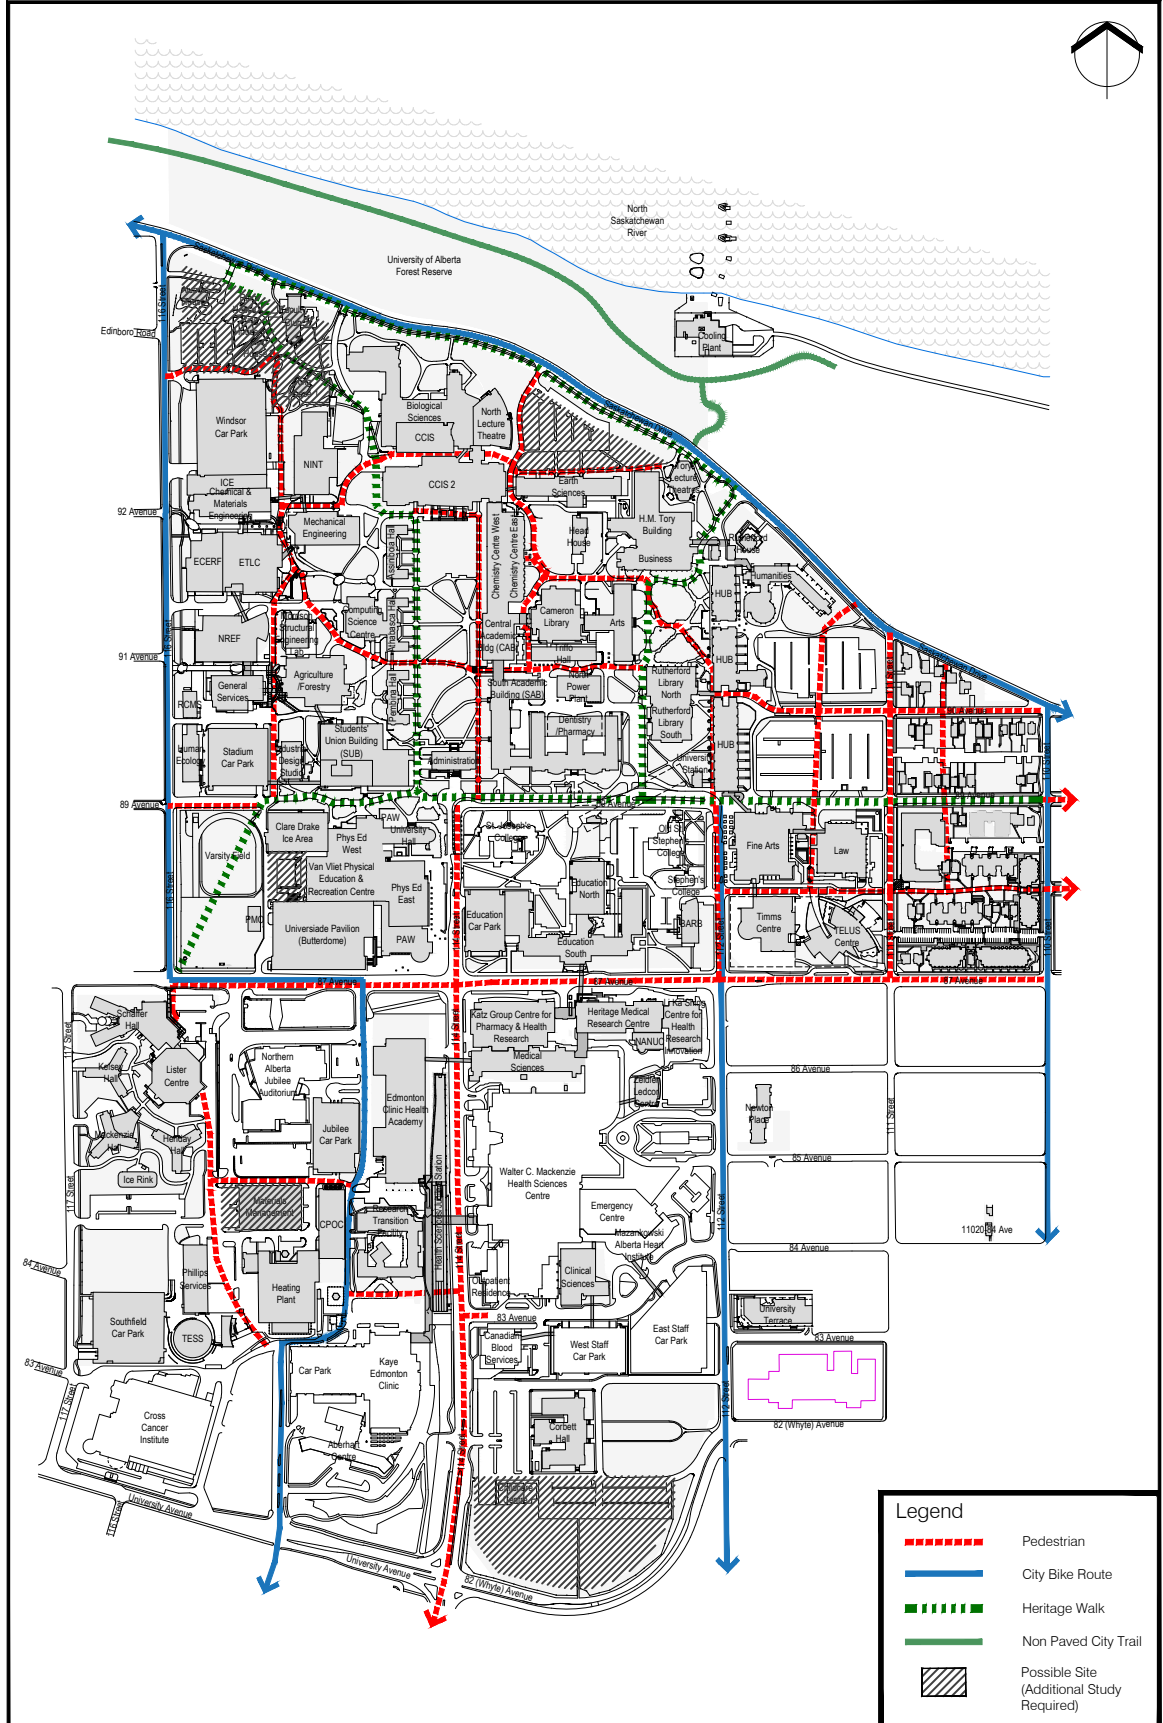

Campus planning for public vehicular transportation systems and parking requires balancing factors such as costs, convenience, infrastructural provisions by the Capital Region Municipalities for public transit systems, the number of students living in residences or within walking distance to the campus, commuters and visitors, and service vehicles.

Managing transportation and parking on campus remains an ongoing challenge. Progressive changes over the past decade have included the introduction of U-Passes for all students, increased staff usage of LRT between campuses, and other transportation demand management (TDM) initiatives. Recent university data show a marked decrease in parking demand, which supports a reduction in our total parking requirements. The gradual progress towards our target of providing on-campus housing of 25 per cent of our full-time enrolment population has also influenced the decline in vehicular access to North Campus.

Private vehicular access continues to be restricted to the periphery of the campus, where parking structures will be located along these access routes over time. Surface parking lots will be converted to underground parking with future development where feasible. In alignment with smart growth principles, TDM studies will be refreshed as required to examine the traffic flows and volumes coming in and out of North Campus.

The overall aspiration for transportation planning is to create an integrated transportation system that emphasizes non-vehicular movement, manages vehicular access, maximizes public transit use and minimizes the impact of traffic on neighbouring communities.

EXHIBIT 6.1.5
PEDESTRIAN
AND BICYCLE
CIRCULATION

6.1.5 PEDESTRIAN AND BICYCLE CIRCULATION

The LRDP amendment maintains and augments the pedestrian and bicycle circulation system of the North Campus. It promotes an integrated approach to enhance pedestrian and bicycle routes to improve intra-campus movement and external access to the campus. These pathways are part of a larger open space strategy to connect surrounding neighbours.

The existing access and circulation structure consists of vehicular, pedestrian, transit and parking elements. Although the university is generally well served by these elements, their overall organization and pattern will be improved to promote a unified connected system. Creating pedestrian/bicycle friendly precincts, where use of vehicles is restricted, allows people to move comfortably about the campus. Generally, there is a need to refine the integration of the network, improve safety, make it easier to move on campus and provide better wayfinding.

This network provides access from campus gateways and entrances, peripheral parking lots and transit locations to all areas of the campus. Working closely with the City of Edmonton, the university is providing shared-use network routes for both pedestrians and bicyclists.

The development of pedways will be encouraged to connect buildings and to provide safe passage over busy streets.

North Campus will be linked to community pedestrian and bicycle systems, and co-ordinated with City of Edmonton systems to promote increased participation and safer use.

Within East Campus Village, two-way traffic on Saskatchewan Drive between 111 Street and 110 Street and on 110 Street between 89 Avenue and 90 Avenue will be discussed with the City of Edmonton. Adjustments would be required to existing bicycle lanes.

Existing pedestrian spines will be extended and a hierarchy of pedestrian walkways will be developed to improve circulation and wayfinding.

6.1.6 COMMUNITY CONSULTATION PROCESS

6.1.6.1 HOW DID WE GET TO THE AMENDMENT?

The U of A follows the *Post-secondary Learning Act*, which outlines the consultation process required for an amendment for the LRDP. The university also follows a consultation protocol outlined in Appendix 18 of the LRDP, which was submitted to the Minister in 2004. An overview of community engagement and how the U of A fulfilled the consultation requirements outlined in Appendix 18 is provided below.

6.1.6.2 WHAT STEPS WERE TAKEN TO GET TO THE AMENDMENT?

The U of A has been consulting with the North Campus communities of Windsor Park, Garneau and McKernan since 2001. It is important to note that the community of McKernan has been significantly more involved in the consultation process for South Campus but has been invited to attend the North Campus LRDP Amendment focus groups and open houses.

6.1.6.3 A CHRONOLOGY OF THE CONSULTATIONS

During the LRDP development, numerous consultative opportunities occurred between 2001 and 2002:

- Three community workshops:
 - September 12, 2001, November 20, 2001, and February 4, 2002
- Five open houses:
 - September 26, 2001, and two on October 4, 2001 – first LRDP open houses
 - November 27, 2001 – second LRDP open house
 - February 25, 2002 – third LRDP open house
- Nine meetings where the LRDP was discussed at length
 - Eight University of Alberta Community Committee (UACC) meetings
 - One Garneau community meeting

After the LRDP consultation process, the U of A began to meet with the Garneau Community League representatives to discuss specific issues related to the LRDP that affected their community.

- December 2003 – University distributed *Historical and Architectural Assessment of the Houses in East Campus Village, University of Alberta*
- February 4, 2004 – University held an open house to review planning for sectors 3, 4 and 8
- May 20, 2004 – Garneau community representatives and the U of A met to discuss outcomes of February 4, 2004 open house

In 2005 the university and the Garneau Community League agreed to conduct facilitated community dialogues, which then resulted in the creation of the Design Guidelines for Infill Development.

- Twelve community dialogues occurred between March 2005 and September 2008
 - March 12, 2005 – Garneau/U of A community dialogue meeting – led by a facilitator
 - November 5, 2005 – Garneau/U of A community dialogue – led by a facilitator
 - January 17, 2006 – community dialogue – Design Working Group meeting
 - January 19, 2006 – community dialogue – Reuse Working Group meeting
 - February 15, 2006 – community dialogue – Design Working Group meeting
 - April 25, 2006 – community dialogue – Design Working Group meeting
 - May 2, 2006 – community dialogue – Reuse Working Group meeting
 - May 27, 2006 – community dialogue
 - January 27, 2007 – community dialogue
 - April 21, 2007 – community dialogue
 - September 22, 2007 – community dialogue
 - September 30, 2008 – community dialogue

Since the completion of the U of A and Garneau community dialogues, the university has met with representatives from Garneau to discuss sectors 7 and 8 and project-specific topics such as the development of graduate residences in East Campus Village in 2009 and 2012. The final results of the community dialogues resulted in input to the open house materials.

- February 10 and June 25, 2009 – East Campus Village dialogues
- August 5, 2009 – East Campus Village open house
- January 27, 2010 – East Campus Village project update with Garneau community
- August 24, 2010 – tour of East Campus Village graduate residences
- June 27 and November 21, 2011, and January 10, 2012 - Three dialogues on sectors 7 and 8
- March 19, 2012 – Sector 7 and 8 open house
- April 3, 2012, April 16, 2012, and April 26, 2012 – Three meetings to discuss the East Campus Village project
- August 16, 2012 – East Campus Village project open house
- September 12, 2012 – meeting to update Garneau UACC representatives on East Campus Village project (community representatives did not attend)
- August 22, 2013 – tour of Tamarack and Pinecrest residences – Two community representatives attended
- September 10, 2013 – Neighbouring communities (Windsor Park, Garneau, McKernan) and representatives for the Students' Union, Graduate Students' Association, NASA, AASUA, and the academic community invited to focus group to review draft material for first open house (for data gathering)
- September 16, 2013 – Garneau focus group attend meeting with U of A staff to review 5-year development plans for East Campus Village
- September 25, 2013 – North Campus Long Range Development Plan Amendment open house
- November 5, 2013 – Neighbouring communities (Windsor Park, Garneau, McKernan) and representatives for the Students' Union, Graduate Students' Association, NASA, AASUA, and the academic community invited to focus group to review material for second North Campus Long Range Development Plan Amendment open house (for proposed amendment)
- November 19, 2013 – North Campus Long Range Plan Amendment open house
- December 3, 2013 – U of A staff met with Students' Union Council for further questions or clarifications on the North Campus Long Range Development Plan Amendment

In addition, after the 2002 LRDP consultation process the U of A began to meet with the Windsor Park Community League representatives to discuss specific development projects.

The U of A also follows a consultation protocol outlined in Appendix 18 of the LRDP. The following are the processes as outlined in Appendix 18 – Long Range Development Planning and Amendments along with a list of actions the U of A has taken to meet all requirements.

6.1.6.4 APPENDIX 18 PROCESSES AND U OF A ACTIONS:

Long Range Development Planning and Amendments

a: When the university undertakes a new Long Range Development Plan, or amends its existing LRDP, owners of land within 60 metres of the university's land and the host municipality will be notified. Such notification will include date, time and location for an information session to present the conceptual plans, or substantive changes, and an invitation to review and comment on the planning, in writing 21 days following the presentation.

U of A action – The U of A mailed letters of notification that contained the date, time and location for an information session (open house) to present substantive changes of the North Campus LRDP Amendment to owners of land within 60 metres of the university's land and host municipality, the City of Edmonton. The open house took place November 19, 2013. The mailing list was identified by the City of Edmonton, Central Area Unit, City Wide Planning Section according to homeowner title information. The letters to residents within 60 metres of the U of A land and the City of Edmonton were mailed to allow a full two-week advance notification period prior to the open house.

b: Notification will take the form of a directed letter to each identified stakeholder in a). The planning document will be available through the communications website of the university.

U of A action – The notification in a) indicated where information for the amendment planning document could be found on the U of A website. Please note additional communication tools were used to advertise the November 19, 2013 open house:

- Portable road signs were placed in four locations from two weeks prior to open house.
- Information about the open house was placed on the U of A's Community Relations website.
- Email invitation sent to City of Edmonton councillor Ben Henderson and Member of Legislative Assembly Steve Young outlining details for the November 19, 2013 open house.

c: Following this presentation and invitation to direct stakeholders, the university shall publish, within a newspaper, newsletter or publication circulating in the areas in which the university's lands are located, notification of the public of its opportunity to review the proposed LRDP, or amendments, and comment upon it (them). The proposed plan/ amendments will be available upon the university's communications website. Comments will be received in writing up to 21 days of the notice.

U of A action – All materials presented and distributed at the November 19, 2013 open house were placed on the U of A website for 21 days (ending December 10, 2013). The U of A published an ad in the *Edmonton Journal* on November 20, 2013, inviting the public to review and comment on the information presented. Portable road signs were placed in four locations for 21 days to remind community members to review and comment on materials from the open house at the Community Relations website.

d: University administration will prepare a summary document that they believe accurately reflects the major concerns and comment expressed. This document will be reviewed by the stakeholders identified in a), and will be modified until agreement is reached on accuracy. During the planning stage, these concerns will be considered.

U of A action – A document that summarized the evaluations received from the November 19, 2013 open house was mailed to stakeholders identified in a) on December 18, 2013, along with a request to provide any further comments to the Office of Community Relations by January 8, 2014. A copy of the summary document was sent to the Office of the University Architect for review and consideration during future planning.

e: Recommendations to the Board of Governors with respect to the LRDP and/ or its amendments will include the consultation summary documents, and a document highlighting how administration has used these comments to develop the LRDP and recommendations.

U of A action – Sections 6.1.7 and 6.1.8 of this appendix include the summary document and a document highlighting how administration has used comments from the November 19, 2013 open house.

f: Upon Board of Governors approval, the LRDP and/or amendments will be sent to the Minister for review and confirmation that the contents of the amendment/LRDP comply with the *Regulations of the Post-secondary Learning Act*.

U of A action – Once the LRDP Amendment is approved by the Board of Governors, the amendment will be sent to the Minister of Innovation and Advanced Education for confirmation.

6.1.7 CONSULTATION SUMMARY

Amendment to Land Use Plan for North Campus

September 25, 2013 – 13 evaluations received
 November 19, 2013 – 4 evaluations received

6.1.7.1 QUESTIONS AND EVALUATIONS

1. If you reside in one of the following neighbourhoods please circle that neighbourhood:

September 25, 2013

November 19, 2013

2. If you reside in a different neighbourhood please provide the name of that neighbourhood.

September 25, 2013
 • Tweedle Place

November 19, 2013
 • No responses

3. Please check the age category that you are in.

September 25, 2013

November 19, 2013

4. How did you hear about this open house?

September 25, 2013

November 19, 2013

5. Are you familiar with the purpose of the Long Range Development Plan?

September 25, 2013

November 19, 2013

6. Did the material that was presented explain the purpose of the Long Range Development Plan?

September 25, 2013

November 19, 2013

7. Did the material that was presented explain the proposed amendments to the Long Range Development Plan for North Campus?

September 25, 2013

November 19, 2013

8. How do you see North Campus plans, both the proposed land uses and possible developments, fitting into your community?

September 25, 2013

November 19, 2013

9. Do you have any additional comments to the following planning elements:

September 25, 2013

- Land use – Board #3
 - Campus life and housing – Board #4
 - Open space system – Board #5
 - Public vehicular transportation systems/parking – Board #6
 - Pedestrian and bicycle circulation – Board #7
- Please use plain language on your display boards versus “planning and design definitions” which might not clearly explain what the university plans or may do in each area of development - it is better to be explicit about your plans and intentions so the public can provide direct feedback about this issue.
 - Board 6 As presently proposed we'd be unable to get into our neighbourhood on 89 Ave. (live on the south side of 89th is one-way going east) by only allowing for 2-way to the alley-way for north residents on 89th. Two way needs to be until 89th – 111st should be 2 way all the way to Sask Dr.
 - 3 – Not especially happy to see the ring houses or admin proposed for other uses/demo. W/ regards to admin, I believe quad is a more pleasant space as a closed-in square and the bldg. itself has some architectural value.
 - 4 - excellent to see the removal of the varsity park
 - I did not note anything that struck me as being contentious.
 - “circled the dot beside Pedestrian and bicycle circulation - Board #7 but nothing was written”
 - Board #6: There is a lot of emphasis placed on provision of parking space for private vehicles. Can the University not work to encourage better use of public transit, through for instance a staff u-pass, and reduce some of the need for parking? In addition, during rush/peak hours, campus area is a massive traffic jam - there is nothing in the plans to address this issue.
 - #Board 4 More student housing will diminish quality of life for others, but it's needed. #Board 5 Sad to see open space going. Please don't allow any more vehicles on campus. Those internal gates should stay closed.

November 19, 2013

- Sustainable systems – Board #3
 - Land use – Board #4
 - Campus life and housing – Board #5
 - Open space system – Board #6
 - Public vehicular transportation systems/parking – Board #7
 - Pedestrian and bicycle circulation – Board #8
- Ped'bike - happy with many of the changes esp. 89 Ave travel spine. Continue working with city to improve connectivity. Bike access on 114 from Univ. Ave to 87 Ave is terrible – shared use path on W side is a joke.
 - #3: This board is all motherhood statements and doesn't say anything. Wind turbines? Where? Are more details in the sector plans?
 - #4 – 8: These boards are good. Not to many changes proposed, it seems.

10. Please comment on your impressions regarding the amendment to land use plan for North Campus on 89 Avenue between 110 and 111 Street? Do you have any suggestions for routing into the area that the U of A should consider in co-operation with the City of Edmonton?

September 25, 2013

- Closing 89th to vehicles sounds reasonable, but traffic flow will need to be directed to decrease traffic away from residential areas (other than student housing).
- How will the university ensure that our community on 89th Ave (which has families with small children) will not be ??? with U of A employees trying to get out of the Univ. when traffic is congested?
- Ensure consultation with immediate neighbors/residents.
- This is an excellent idea so long as much more is done to make the space safer for cyclists. The forced routing of cyclists onto the sidewalk in front of the HUB CRT entrance is an accident waiting to happen.
- Don't mind 89 Ave closure or proposed 2 ways on 110 Street but please KEEP parking meters on 100 Street. It is difficult for dinner guests to find parking around here. Keep 100 Street one WAY SOUTH OF 89 Ave.
- In general I have no objections to the land use plan. Overall, the land use plan makes appropriate use of existing undeveloped space and fits the underlying principles adopted for planning in this area. Closing 89 Ave itself should still allow laneway access for residents. Alternative parking may have to be arranged on adjacent street.
- I thought it ok.

November 19, 2013

- I like the idea
- Please provide more details (outside of LRDP consultation) in regards to progress with City of Edmonton re: 110 Street 2-Way. This area has had restricted access for nearly 1 year, may be longer by the time this is done.
- Improvement in optics of the campus.

11. Please tell us the top three (3) topics you would like to have addressed with regard to the amendments to the land use plan for North Campus?

September 25, 2013

a)

- Traffic on the hill past sub - it would be great to see all delivery vehicles rerouted behind hub mall and efforts made to stop student drop off/ pick up and parking on the hill; sidewalks for pedestrian/ bike traffic on either side of the hill would be helpful and prompt ice and snow removal of this area. Currently a sign should be placed at the bottom of the hill redirecting student drop off/pick up away from this area like the sign used by ???.
- Maintaining the historic nature of N. Garneau community by keeping in line w/ its architectural flavor.
- Integration of cycling infrastructure needs to be given greater prominence.
- More detail concerning zone 2 in NW corner of N. campus as this is a possible area of impact for Windsor Park.
- Not sure enough of my positions.

b)

- Varsity Field - I am concerned about the noise and traffic issues that come with hockey players using these facilities during nonworking hours (early AM, late nights) and on campus parking for these players.
- How will noise from the new residences (particularly in the summer) be kept to a minimum?
- More thought given to street level commercial development. This was a missed opportunity w/ ECHA, and the demand most likely exists for expanding non-food court independent dining options in the area. Could also be a source of revenue for the U of A.

c)

- Efforts need to be made to provide parking for students and their visitors when new student residences are constructed on campus; students need to be aware that these new residences will be close to established neighbourhoods that need to be respected.
- Roads damaged by construction vehicles be repaired from both the Grad student house development on 110 St & the new residences on 89th Ave.

November 19, 2013

- Potential uses of Corbett Hall south area (still under discussion).
- Improving bike access into campus.

12. Please provide any other suggestions/concerns/questions about the amendment to the land use plan for North Campus.

September 25, 2013

Themes

- Continue to consult with surrounding neighbours, areas for future study will impact neighbours – consultation will be needed as this goes forward, disruption during construction projects to neighbours is significant – consultation and communication needs to continue.
- Traffic – promote use of transit and not cars, reduce parking spaces, do not expand parking structures.
- North Campus is becoming a crowded cement filled campus and losing its human scale, concerned that once admin building is taken down the Quad will be negatively impacted; the Quad is a special place please plan around it carefully.

November 19, 2013

- Thank you for clarifying things for someone new to all these acronyms.
- The changing student demographic from fewer undergraduates & more graduates was interesting also the changing housing in Lister Hall & going “dry” had impact on behavior of campus residences. Thanks for reaching out to the wider community.
- Although the location of the Faculty Club could change – it’s purpose and grand view should remain.

6.1.8 UNIVERSITY OF ALBERTA RESPONSES TO COMMUNITY FEEDBACK

9. Do you have any additional comments to the following planning elements:

September 25, 2013

- Land use – Board #3
- Campus life and housing – Board #4
- Open space system – Board #5
- Public vehicular transportation systems/parking – Board #6
- Pedestrian and bicycle circulation – Board #7

QUESTIONS & STAKEHOLDER COMMENTS:

- Please use plain language on your display boards versus “planning and design definitions” which might not clearly explain what the university plans or may do in each area of development - it is better to be explicit about your plans and intentions so the public can provide direct feedback about this issue.
- Board 6 As presently proposed we'd be unable to get into our neighbourhood on 89 Ave. (live on the south side of 89th is one-way going east) by only allowing for 2-way to the alley-way for north residents on 89th. Two way needs to be until 89th – 111st should be 2 way all the way to Sask Dr.
- 3 – Not especially happy to see the ring houses or admin proposed for other uses/demo. W/ regards to admin, I believe quad is a more pleasant space as a closed-in square and the bldg. itself has some architectural value.
- 4 - excellent to see the removal of the varsity park
- I did not note anything that struck me as being contentious.
- “circled the dot beside Pedestrian and bicycle circulation - Board #7 but nothing was written”
- Board #6: There is a lot of emphasis placed on provision of parking space for private vehicles. Can the University not work to encourage better use of public transit, through for instance a staff u-pass, and reduce some of the need for parking? In addition, during rush/peak hours, campus area is a massive traffic jam - there is nothing in the plans to address this issue.
- #Board 4 More student housing will diminish quality of life for others, but it's needed. #Board 5 Sad to see open space going. Please don't allow any more vehicles on campus. Those internal gates should stay closed.

UNIVERSITY RESPONSE:

- Both plain language and planning definitions are included in amendment.
- Comment incorporated in final amendment. 111 Street to remain a local street and not a 2-way street through campus.
- Opinion noted.
- No response required.
- Corrected and note added.
- University continues to balance modes of transportation to and from campus, including public transit and construction of parkades for private vehicles. Total parking spaces have been reduced.
- University continues to balance quality of neighbourhood and increased student housing. This includes provision of open spaces and restricting vehicles to peripheral of campus.

November 19, 2013

- Sustainable systems – Board #3
- Land use – Board #4
- Campus life and housing – Board #5
- Open space system – Board #6
- Public vehicular transportation systems/parking – Board #7
- Pedestrian and bicycle circulation – Board #8

QUESTIONS & STAKEHOLDER COMMENTS:

- Ped’bike - happy with many of the changes esp. 89 Ave travel spine. Continue working with city to improve connectivity. Bike access on 114 from Univ. Ave to 87 Ave is terrible – shared use path on W side is a joke.
- #3: This board is all motherhood statements and doesn’t say anything. Wind turbines? Where? Are more details in the sector plans?
- #4 – 8: These boards are good. Not to many changes proposed, it seems.

UNIVERSITY RESPONSE:

- No response required. Bike access on 114 Street south of 87 Avenue is city’s jurisdiction.
- No response required.
- No response required.

10. Please comment on your impressions regarding the amendment to land use plan for North Campus on 89 Avenue between 110 and 111 Street? Do you have any suggestions for routing into the area that the U of A should consider in cooperation with the City of Edmonton?

QUESTIONS & STAKEHOLDER COMMENTS:

September 25, 2013

- Closing 89th to vehicles sounds reasonable, but traffic flow will need to be directed to decrease traffic away from residential areas (other than student housing).
- How will the university ensure that our community on 89th Ave (which has families with small children) will not be ??? with U of A employees trying to get out of the Univ. when traffic is congested?
- Ensure consultation with immediate neighbors/ residents.
- This is an excellent idea so long as much more is done to make the space safer for cyclists. The forced routing of cyclists onto the sidewalk in front of the HUB CRT entrance is an accident waiting to happen.
- Don’t mind 89 Ave closure or proposed 2 ways on 110 Street but please KEEP parking meters on 100 Street. It is difficult for dinner guests to find parking around here. Keep 100 Street one WAY SOUTH OF 89 Ave.
- In general I have no objections to the land use plan. Overall, the land use plan makes appropriate use of existing undeveloped space and fits the underlying principles adopted for planning in this area. Closing 89 Ave itself should still allow laneway access for residents. Alternative parking may have to be arranged on adjacent street.
- I thought it ok.

UNIVERSITY RESPONSE:

- Comment incorporated in amendment.
- Comment incorporated in final amendment 110 Street and 89 Avenue remain to local traffic.
- Comment incorporated in amendment.
- Discussions with City of Edmonton will continue to resolve need for transit zone and accomodate pedestrians and bicycle circulation.
- Comment incorporated in amendment.
- No response required.
- No response required.

November 19, 2013

- I like the idea
- Please provide more details (outside of LRDP consultation) in regards to progress with City of Edmonton re: 110 Street 2-Way. This area has had restricted access for nearly 1 year, may be longer by the time this is done.
- Improvement in optics of the campus.
- No response required.
- Community will be engaged on discussion with City of Edmonton. A specific set of meetings will be set up to discuss this project when it proceeds.
- No response required.

11. Please tell us the top three (3) topics you would like to have addressed with regard to the amendments to the land use plan for North Campus?

QUESTIONS & STAKEHOLDER COMMENTS:

September 25, 2013

a)

- Traffic on the hill past sub - it would be great to see all delivery vehicles rerouted behind hub mall and efforts made to stop student drop off/ pick up and parking on the hill; sidewalks for pedestrian/ bike traffic on either side of the hill would be helpful and prompt ice and snow removal of this area. Currently a sign should be placed at the bottom of the hill redirecting student drop off/pick up away from this area like the sign used by ???.
- Maintaining the historic nature of N. Garneau community by keeping in line w/ its architectural flavor.
- Integration of cycling infrastructure needs to be given greater prominence.
- More detail concerning zone 2 in NW corner of N. campus as this is a possible area of impact for Windsor Park.
- Not sure enough of my positions.

b)

- Varsity Field - I am concerned about the noise and traffic issues that come with hockey players using these facilities during nonworking hours (early AM, late nights) and on campus parking for these players.
- How will noise from the new residences (particularly in the summer) be kept to a minimum?
- More thought given to street level commercial development. This was a missed opportunity w/ ECHA, and the demand most likely exists for expanding non-food court independent dining options in the area. Could also be a source of revenue for the U of A.

UNIVERSITY RESPONSE:

- Incorporated in LRDP amendment per expansion of SUB to the west.
- Incorporated into design guidelines.
- Duly noted.
- Noted at LRDP amendment per 'additional study required' where Windsor Park Community will be engaged and consulted.
- No response required.
- LRDP indicates land-use and not operational issues which would be managed to minimize negative impact to neighbourhood communities.
- As above.
- Site development will continue to serve the academic endeavors of the university primarily. Active street level activities will be considered.

c)

- Efforts need to be made to provide parking for students and their visitors when new student residences are constructed on campus; students need to be aware that these new residences will be close to established neighbourhoods that need to be respected.
- Roads damaged by construction vehicles be repaired from both the Grad student house development on 110 St & the new residences on 89th Ave.
- Parking spaces for students and their visitors are provided in Sector 7, west of 111 Street.
- Noted for operations and maintenance department.

November 19, 2013

- Potential uses of Corbett Hall south area (still under discussion).
- Improving bike access into campus.
- Addressed at LRDP amendment per 'additional study required.'
- Bike access into campus is integrated with City of Edmonton route.

12. Please provide any other suggestions/concerns/questions about the amendment to the land use plan for North Campus.

QUESTIONS & STAKEHOLDER COMMENTS:

September 25, 2013
Themes

- Continue to consult with surrounding neighbours, areas for future study will impact neighbours – consultation will be needed as this goes forward, disruption during construction projects to neighbours is significant – consultation and communication needs to continue.
- Traffic – promote use of transit and not cars, reduce parking spaces, do not expand parking structures.
- North Campus is becoming a crowded cement filled campus and losing its human scale, concerned that once admin building is taken down the Quad will be negatively impacted; the Quad is a special place please plan around it carefully.

November 19, 2013

- Thank you for clarifying things for someone new to all these acronyms.
- The changing student demographic from fewer undergraduates & more graduates was interesting also the changing housing in Lister Hall & going "dry" had impact on behavior of campus residences. Thanks for reaching out to the wider community.
- Although the location of the Faculty Club could change – it's purpose and grand view should remain.

UNIVERSITY RESPONSE:

- Noted at LRDP amendment per 'additional study required' where surrounding neighbours will be engaged and consulted.
- Public transit is currently promoted per U-pass for students and staff.
- Open Space System plan includes additional open space once Administration Building demolished.
- No response required.
- No response required.
- No response required.

WHY ARE WE HERE?

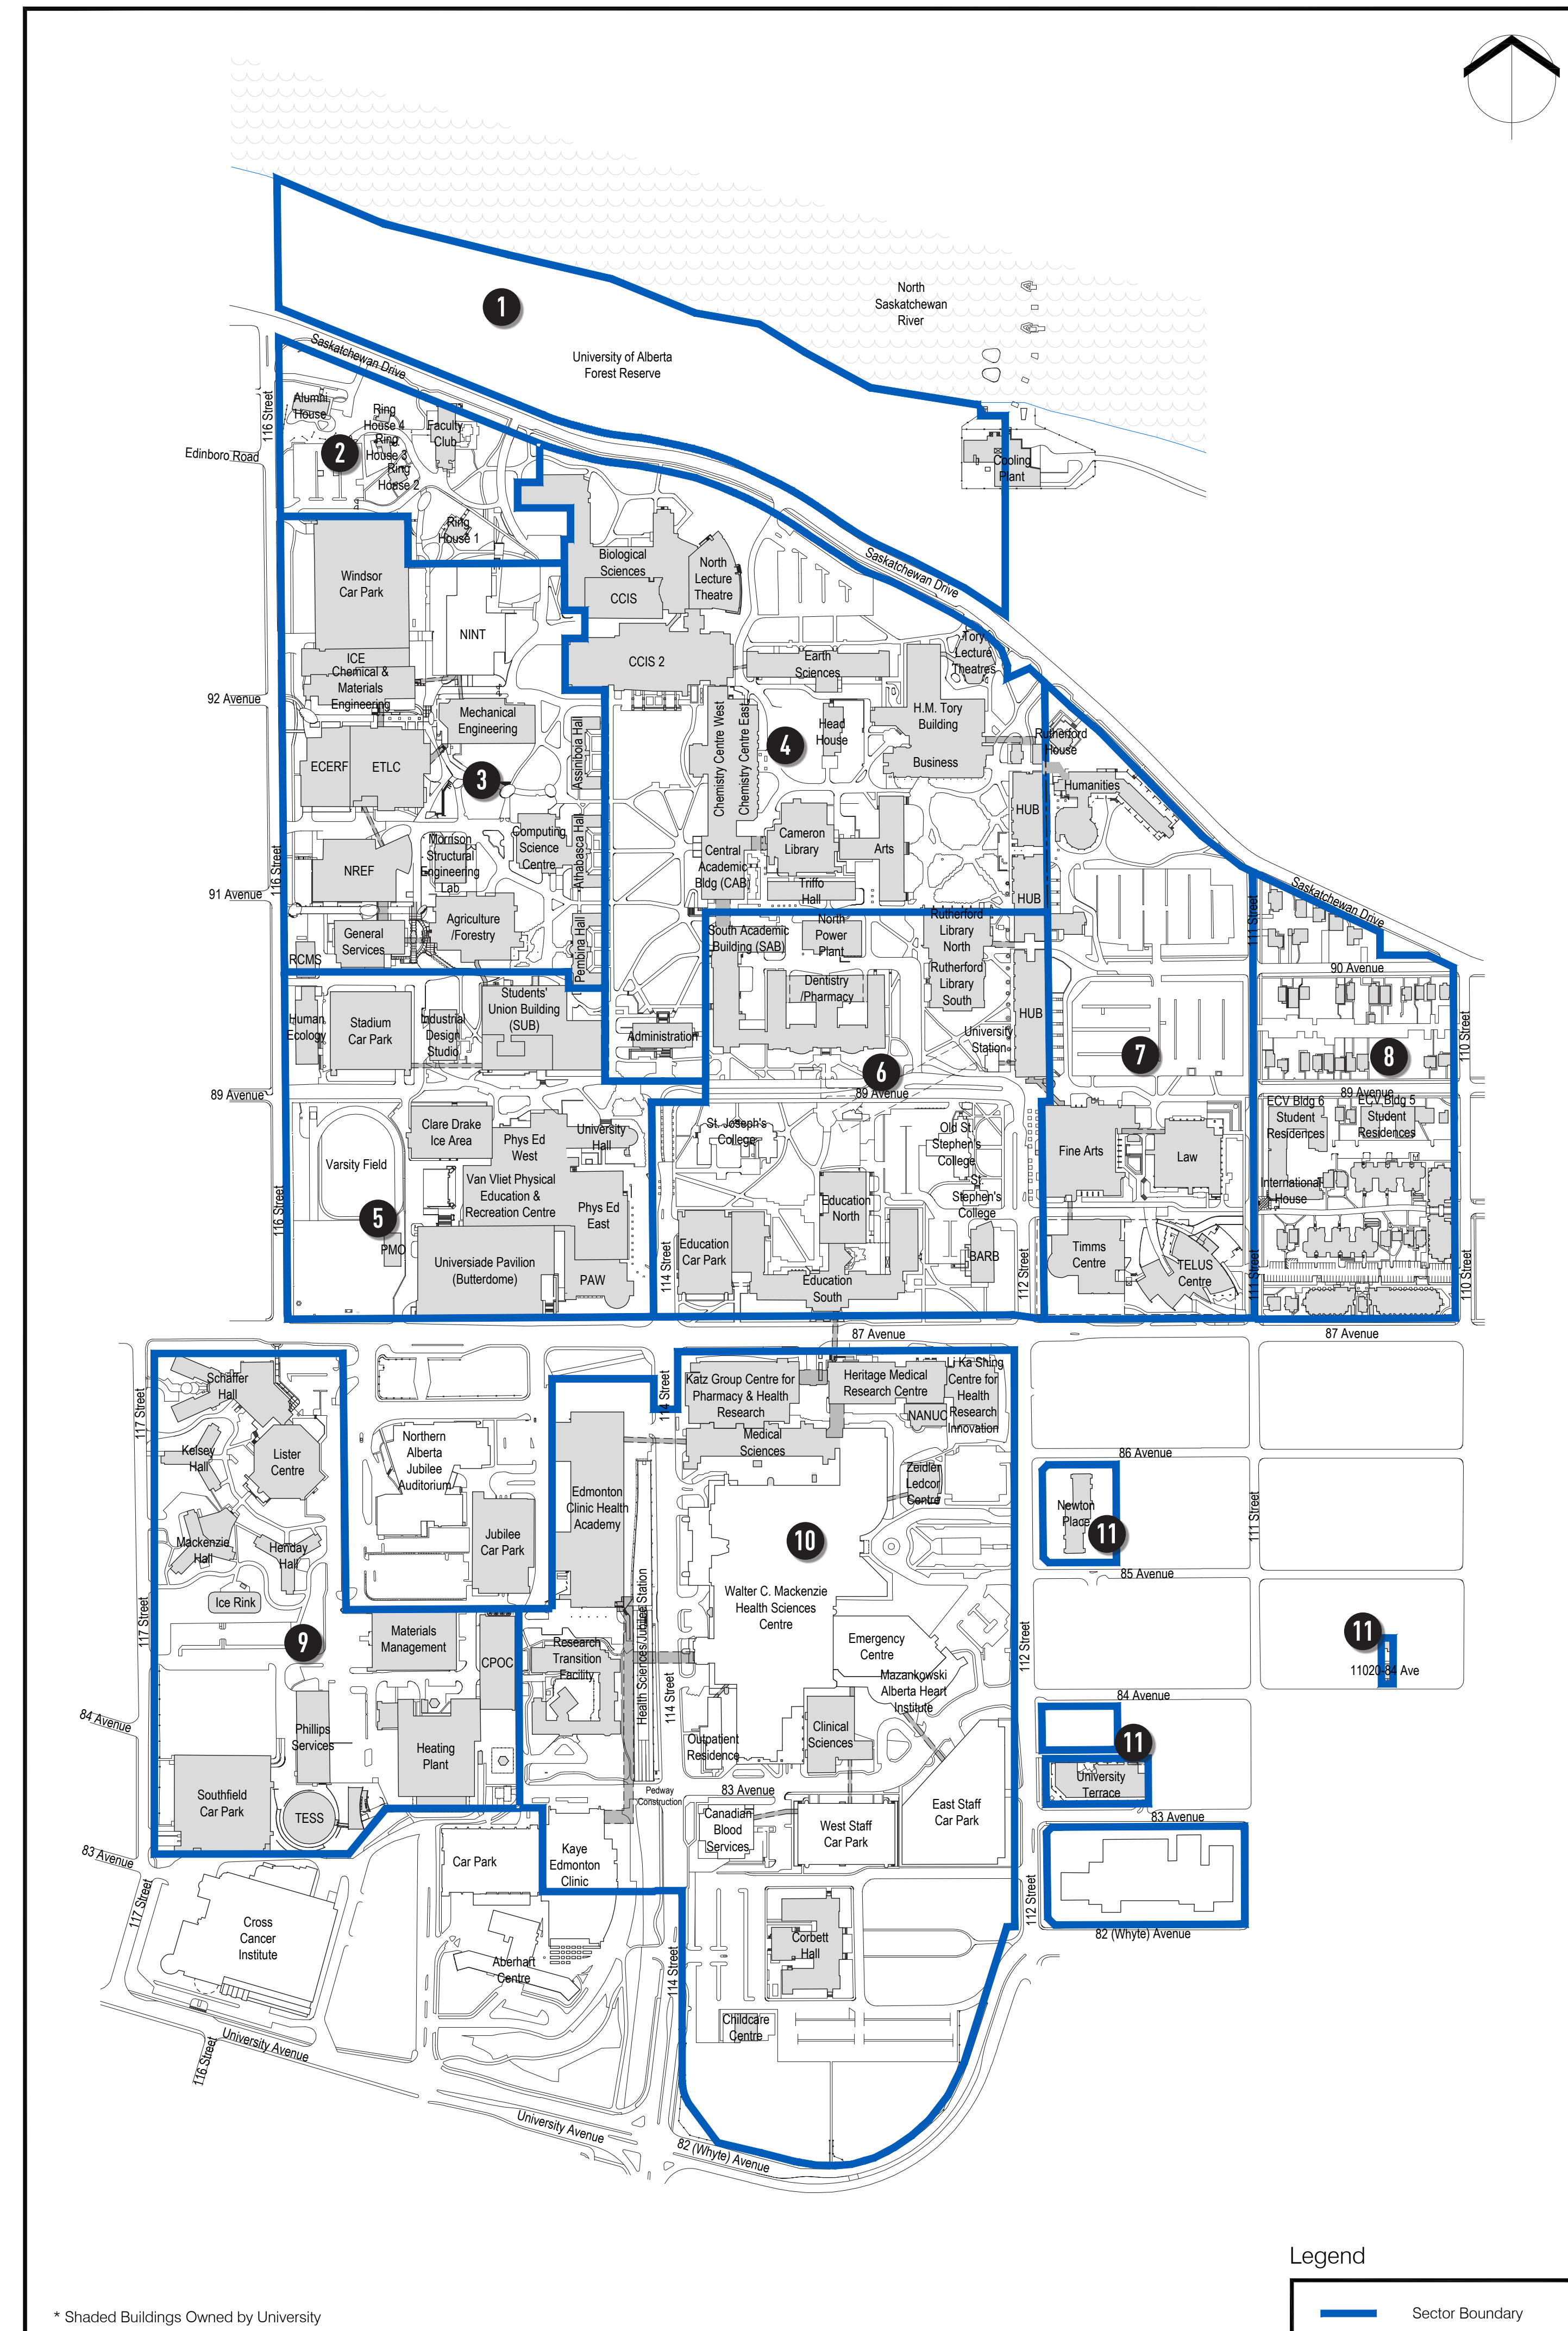

- To learn more about plans to amend the U of A Long Range Development Plan (LRDP) for its North Campus.
- To meet U of A staff involved in the long range planning of the U of A North Campus.
- To provide feedback on the proposed amendments to the LRDP for North Campus.

WHAT IS AN LRDP?

- The University's LRDP is the overall organizing framework for land use and development and is approved by the Board of Governors as the guiding document of physical planning and growth.
- The LRDP identifies and is responsive to a set of Strategic Planning Principles that form the basis for achievement of the goals, objectives and strategies expressed in the Academic, Research and Business Plans (currently referred to as the Comprehensive Institutional Plan).
- The U of A has completed a number of additional administrative implementation plans (sector plans) for each sector to address specifics of development and growth under the aegis of the LRDP and outline additional land-use details.
- The LRDP is developed and amended in accordance with the *Post-Secondary Learning Act* legislation.

NORTH LRDP SECTOR AREAS

BUILDING FROM THE 2002 LRDP AND VARIOUS SECTOR PLAN DEVELOPMENT

- The University, including students, faculty and staff, along with neighbouring communities and other stakeholders, have expressed interest in the principles of Smart Growth and Planned Communities.
- The 2002 LRDP Planning Principles have laid the foundation in guiding further planning and development of University of Alberta Campuses.
- This LRDP amendment embeds the principles of Smart Growth and Planned Communities.
- The amended LRDP document will include changes to section 6 and 7 of the 2002 document:
 - North Campus is, and will continue to be, the urban campus site of the University of Alberta. This will create one of the densest campuses in Canada and capable of accommodating approximately 37,000 students.
 - North Campus will be the primary main campus of the University for the next 30 years. It will be the hub for Faculties and for the majority of the facilities.
- The Concept Plans for the North Campus reflect the Strategic Planning Principles of the 2002 LRDP. The illustrative Concept Plan captures physical systems and elements that require supervision and management. This Section offers system-specific initiatives and guidelines appropriate to those systems.

SMART GROWTH PRINCIPLES

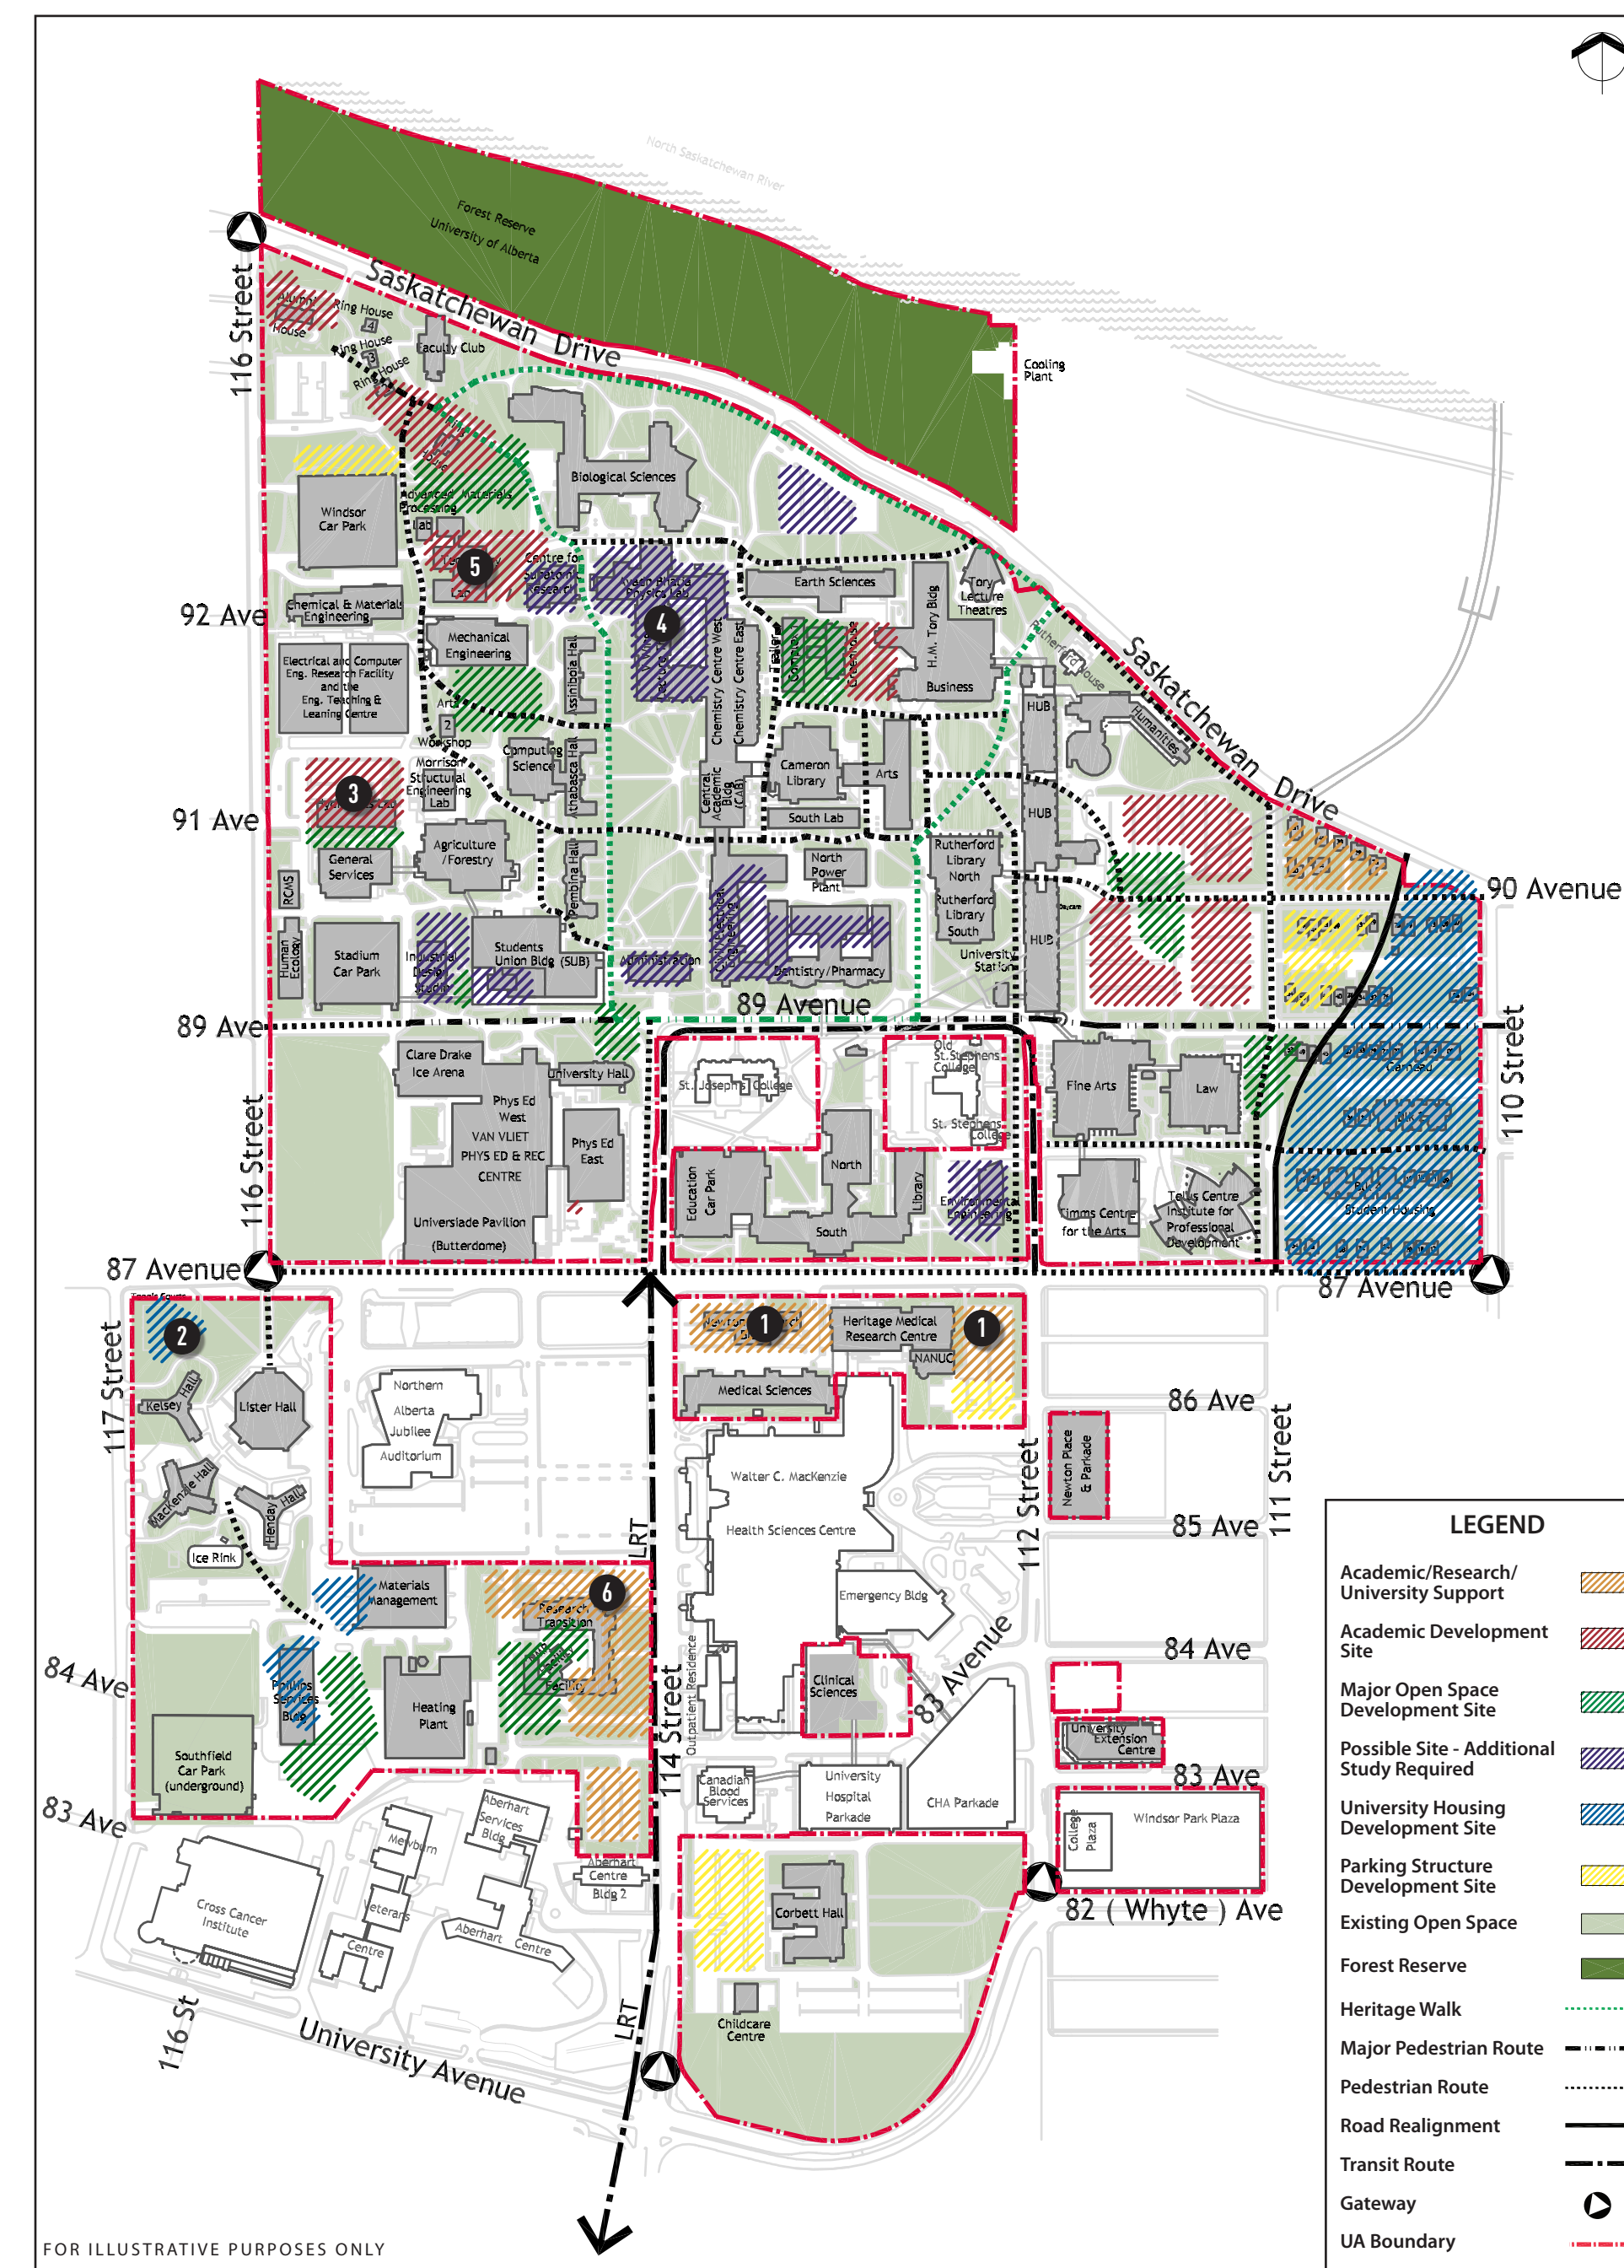

- Pursue a healthy and sustainable campus.
- Realize operation, academic and social benefits to the University and surrounding communities.
- Promote greater connections and communication with the surrounding community.
- Create lasting, meaningful and accessible places.
- While the U of A needs to maintain barrier-free access and service ability to various facilities, it will promote a pedestrian-oriented campus to the extent possible.
- Smart Growth appreciates that our campus will need to be phased as each campus develops.

PLANNED COMMUNITIES PRINCIPLES

- Our Campuses will embody and balance social, ecological, and economic sustainability in every aspect of its design and function.
- Enhancing and building upon the existing sustainability and resource stewardship philosophy of the University of Alberta by balancing the three spheres of sustainability: social, economic and environmental.
- Creation of an academic and residential environment which fosters the energetic exchange of ideas and creates a unique sense of place.
- Promoting opportunities for all U of A campuses to act as living laboratories, utilizing the site for the testing and integration of urban design innovations.
- Provide strong connections with neighbouring communities, allowing for shared amenities and services.
- Support and advance the University's goal of becoming one of the world's top public educational institutions.
- Making optimal use of the University's budgetary resources and partnership funding.

LAND USE NORTH CAMPUS

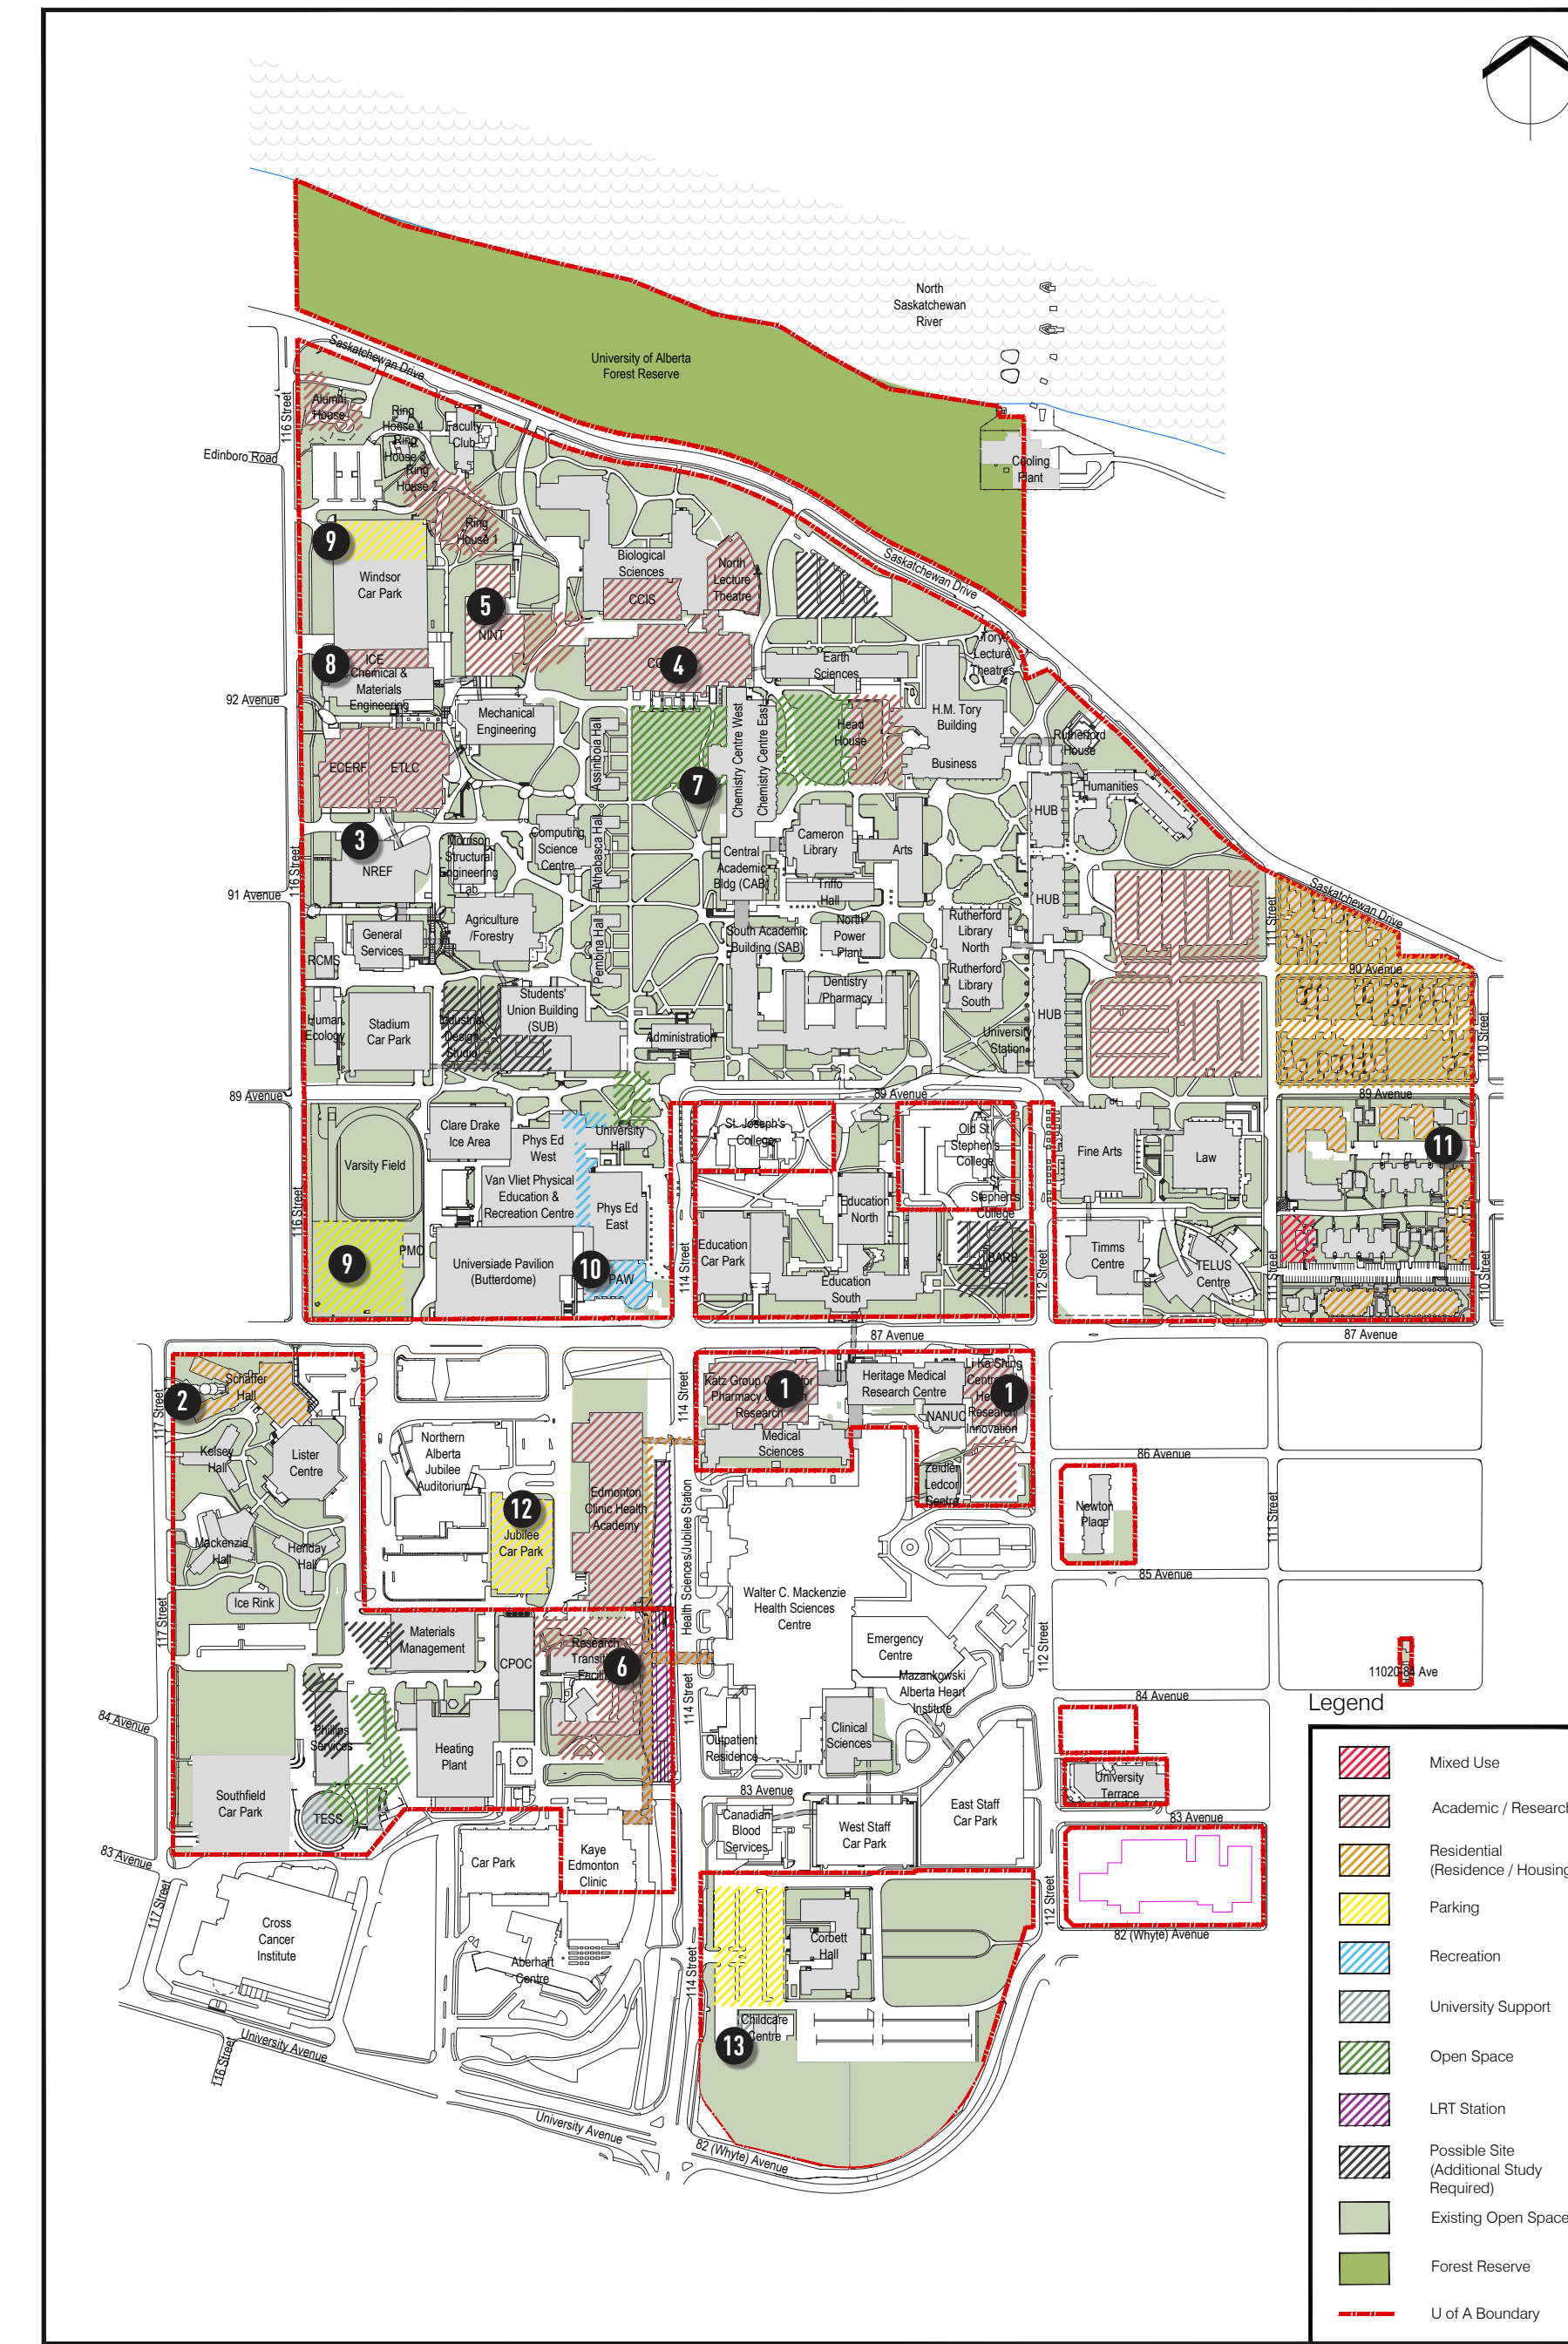

Potential Development Sites as per 2002 LRDP

Proposed Development Sites within the 2002 LRDP that have been built

1. Health Research Innovation Facility (Katz Group Centre for Pharmacy & Health Research, Li Ka Shing Centre for Health Research Innovation)
2. Student Residence (Schaffer Hall)
3. Natural Resources Engineering Facility - NREF
4. Interdisciplinary Science Building (Centennial Centre for Interdisciplinary Science - CCIS)
5. National Institute of Nanotechnology - NINT
6. Health Science Ambulatory Learning Centre (Edmonton Clinic Health Academy - ECHA)

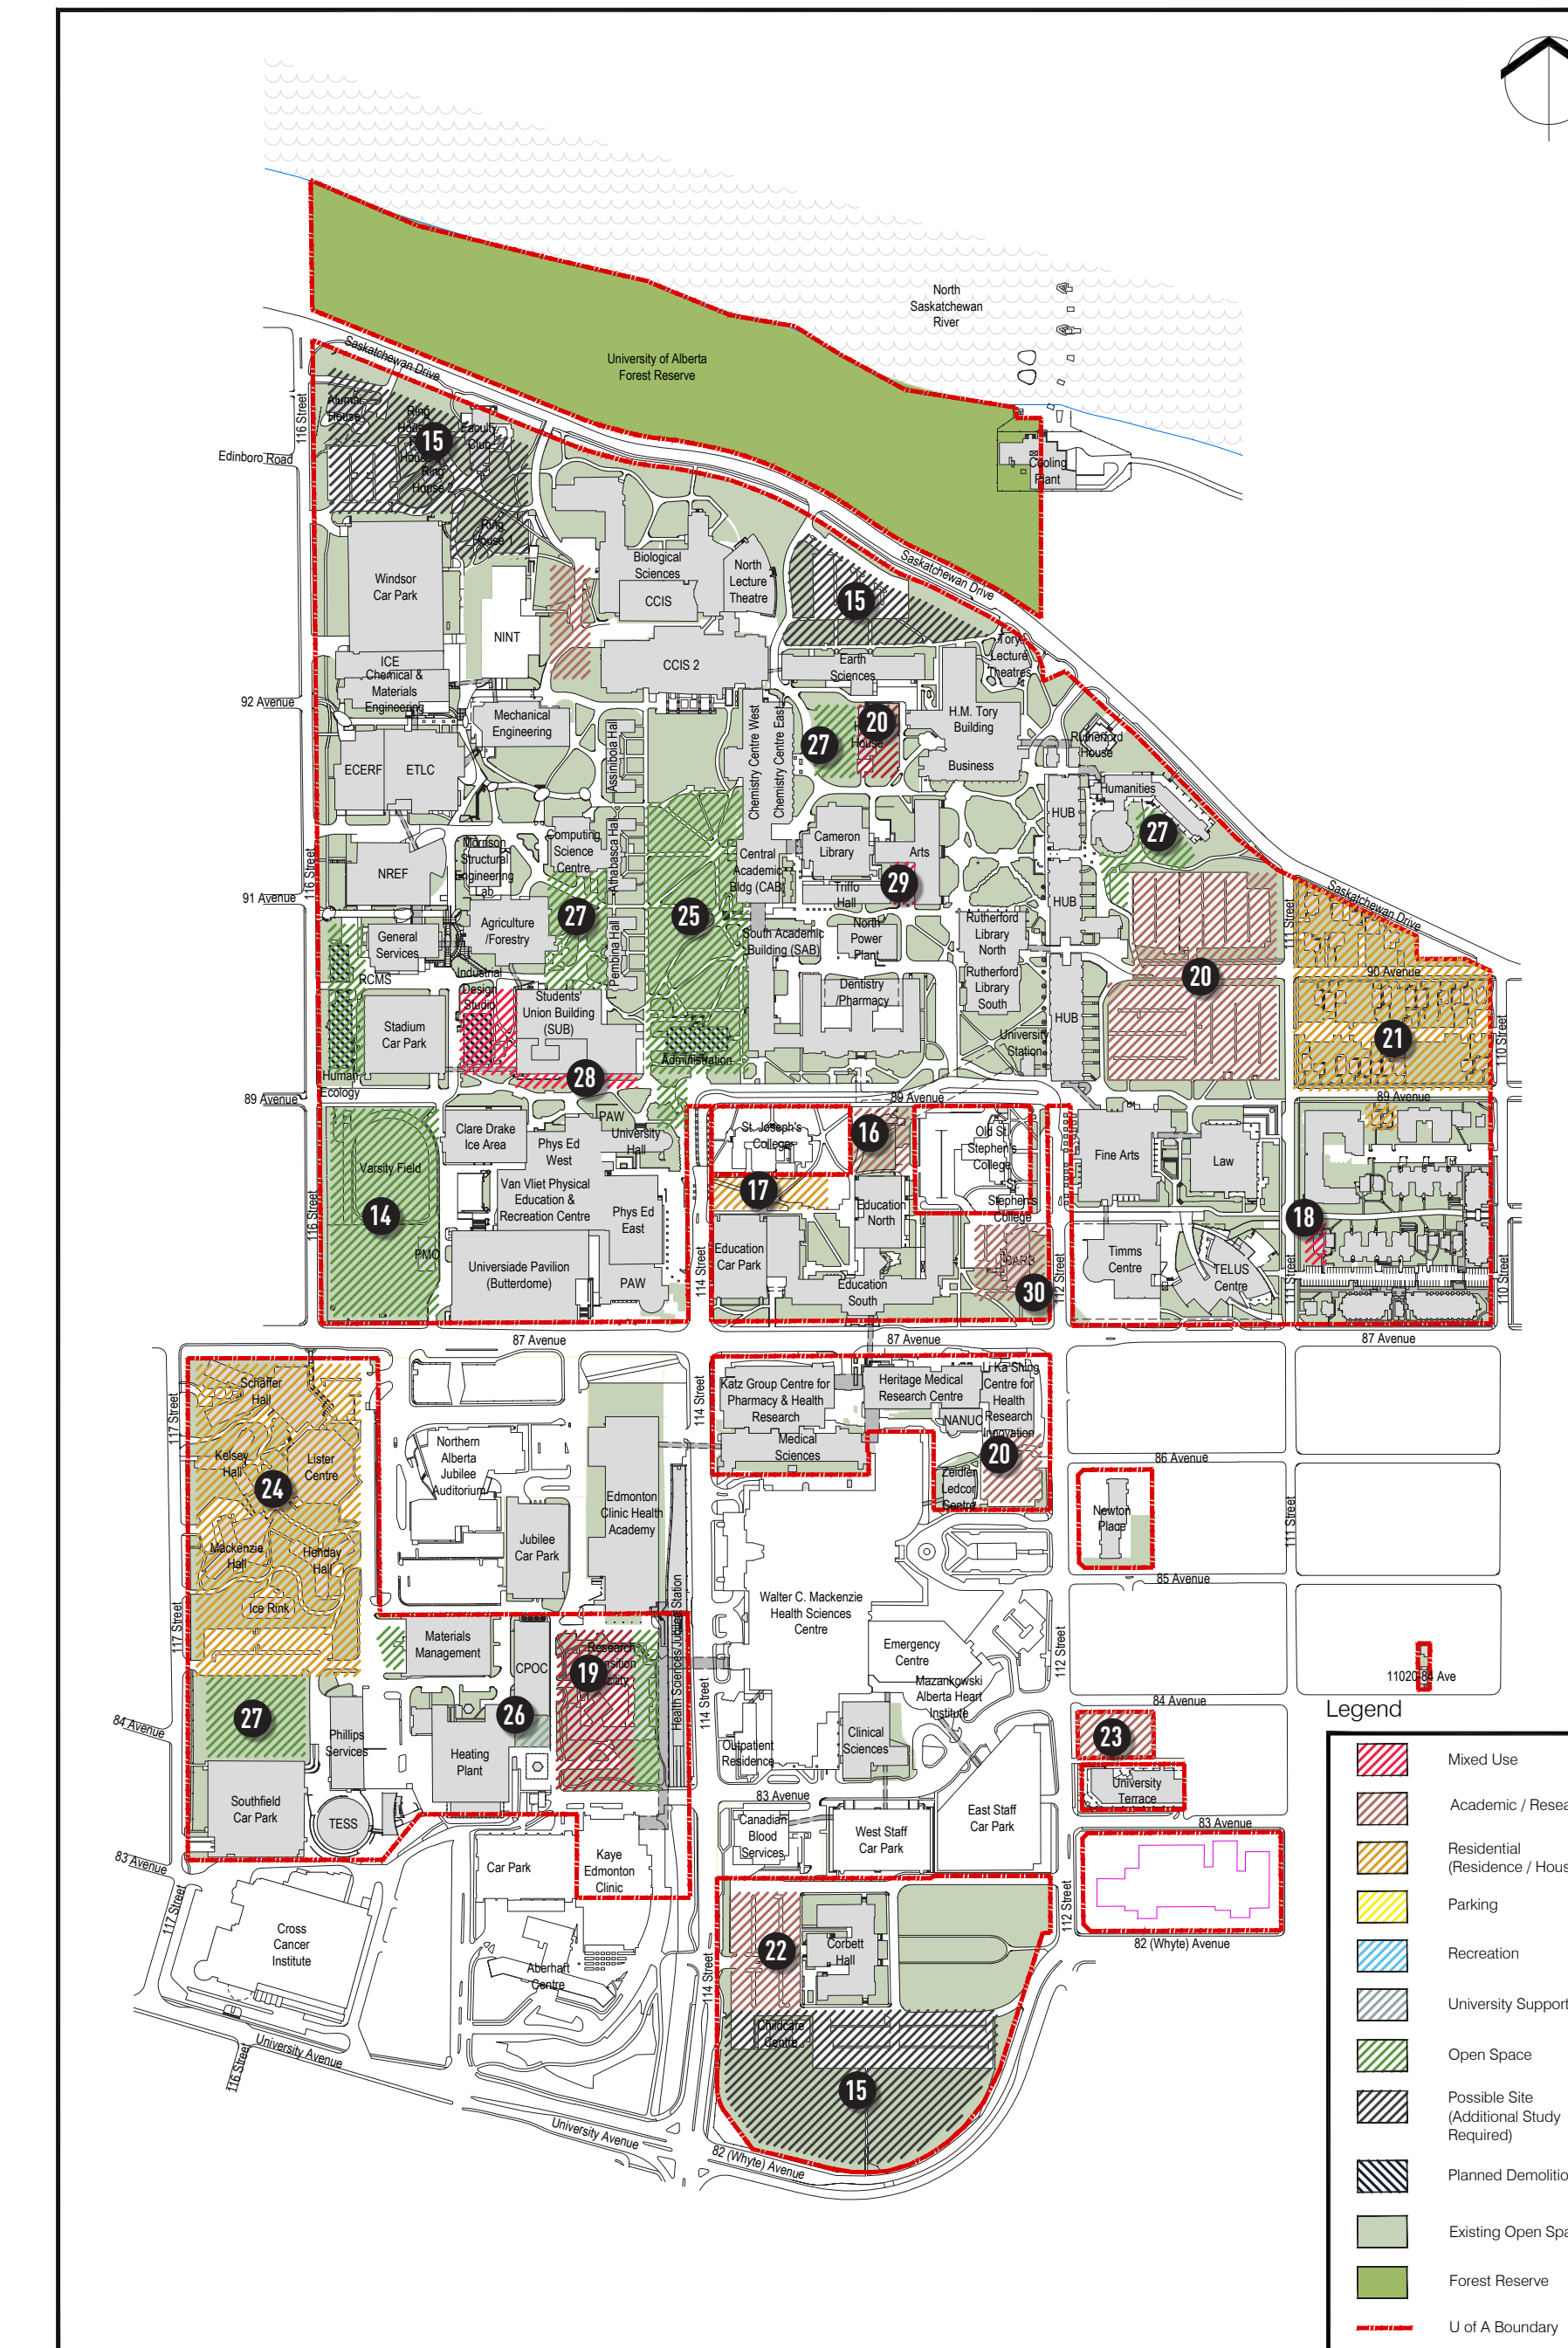

Construction since LRDP & Development Sites Identified by Current Sector Plans

Additional Construction Activities between 2002 and today

7. Removal of V-Wing & Quad Restoration
8. Innovation Centre for Engineering (ICE)
9. Additional Parking
10. PAW (Physical Activity & Wellness) Centre
11. East Campus Village Residences
12. Jubilee Car Park
13. Daycare Expansion

Proposed Development Sites for 2014 North Campus Amendment

Proposed Land Use Plans for the 2014 LRDP Amendment

- | | |
|---|--|
| 14. Varsity Field Open Space Redevelopment | 22. Corbett Hall Expansion |
| 15. Future Study Area | 23. University Terrace Expansion |
| 16. Gathering Place | 24. Lister Hall Expansion |

| 19. ECHA Expansion | 27. Open Space Redevelopment |
| 20. Academic/Research Expansions | 28. Students' Union Building Expansion |
| 21. East Campus Village Residential Development | 29. Convocation Hall Expansion |
| | 30. Future Academic Research |

CAMPUS DEVELOPMENT CONCEPTS & LAND USE PATTERNS

2002 LRDP STATED

- North Campus is, and will continue to be, the primary main campus of the University for the next 30 years. It will be the hub for the majority of the facilities, capable of accommodating approximately 37,000 students.
- Sector plans will be developed to assist in guiding development.
- Development sites are identified to allow for compatible intermediate-term and long-term growth of the faculties currently located there. In the intermediate-term, most new development will occur on lands in the northeast sector, on sites along 114 and 116 Streets, and along 87 Avenue.
- Over longer term, selective in-fill may occur as identified.

Planning & Consultations since 2002 that have fed into Proposed Amendment

- Sector Plans were completed and formalized to guide campus development:
 - Sector 1 Natural Reserve (No Sector Plan required);
 - Sectors 3 & 4 (December 2004);
 - Sectors 5 & 6 (November 2005);
 - Sector 7 (March 2003, revised March 2013);
 - Sector 10 (September 2004);
 - Sector 8 - East Campus Village: Historical and Architectural Assessment (September 2003), Design Guidelines for Infill Development (December 2007), Sector Plan (March 2013).
 - No sector plans have been developed for Sectors 2, 9, 10, and 11.
- Six priority projects listed on 2002 LRDP were completed.
- Total student enrolment has increased 20 percent fulfilling goals of both the Province and the University. Graduate student enrolment has nearly doubled.
- University set goal is to house up to 25% of its full time enrolment in purpose built, supportive housing.
- Providing and renewing space to meet the increased needs of comprehensive research-intensive activities.

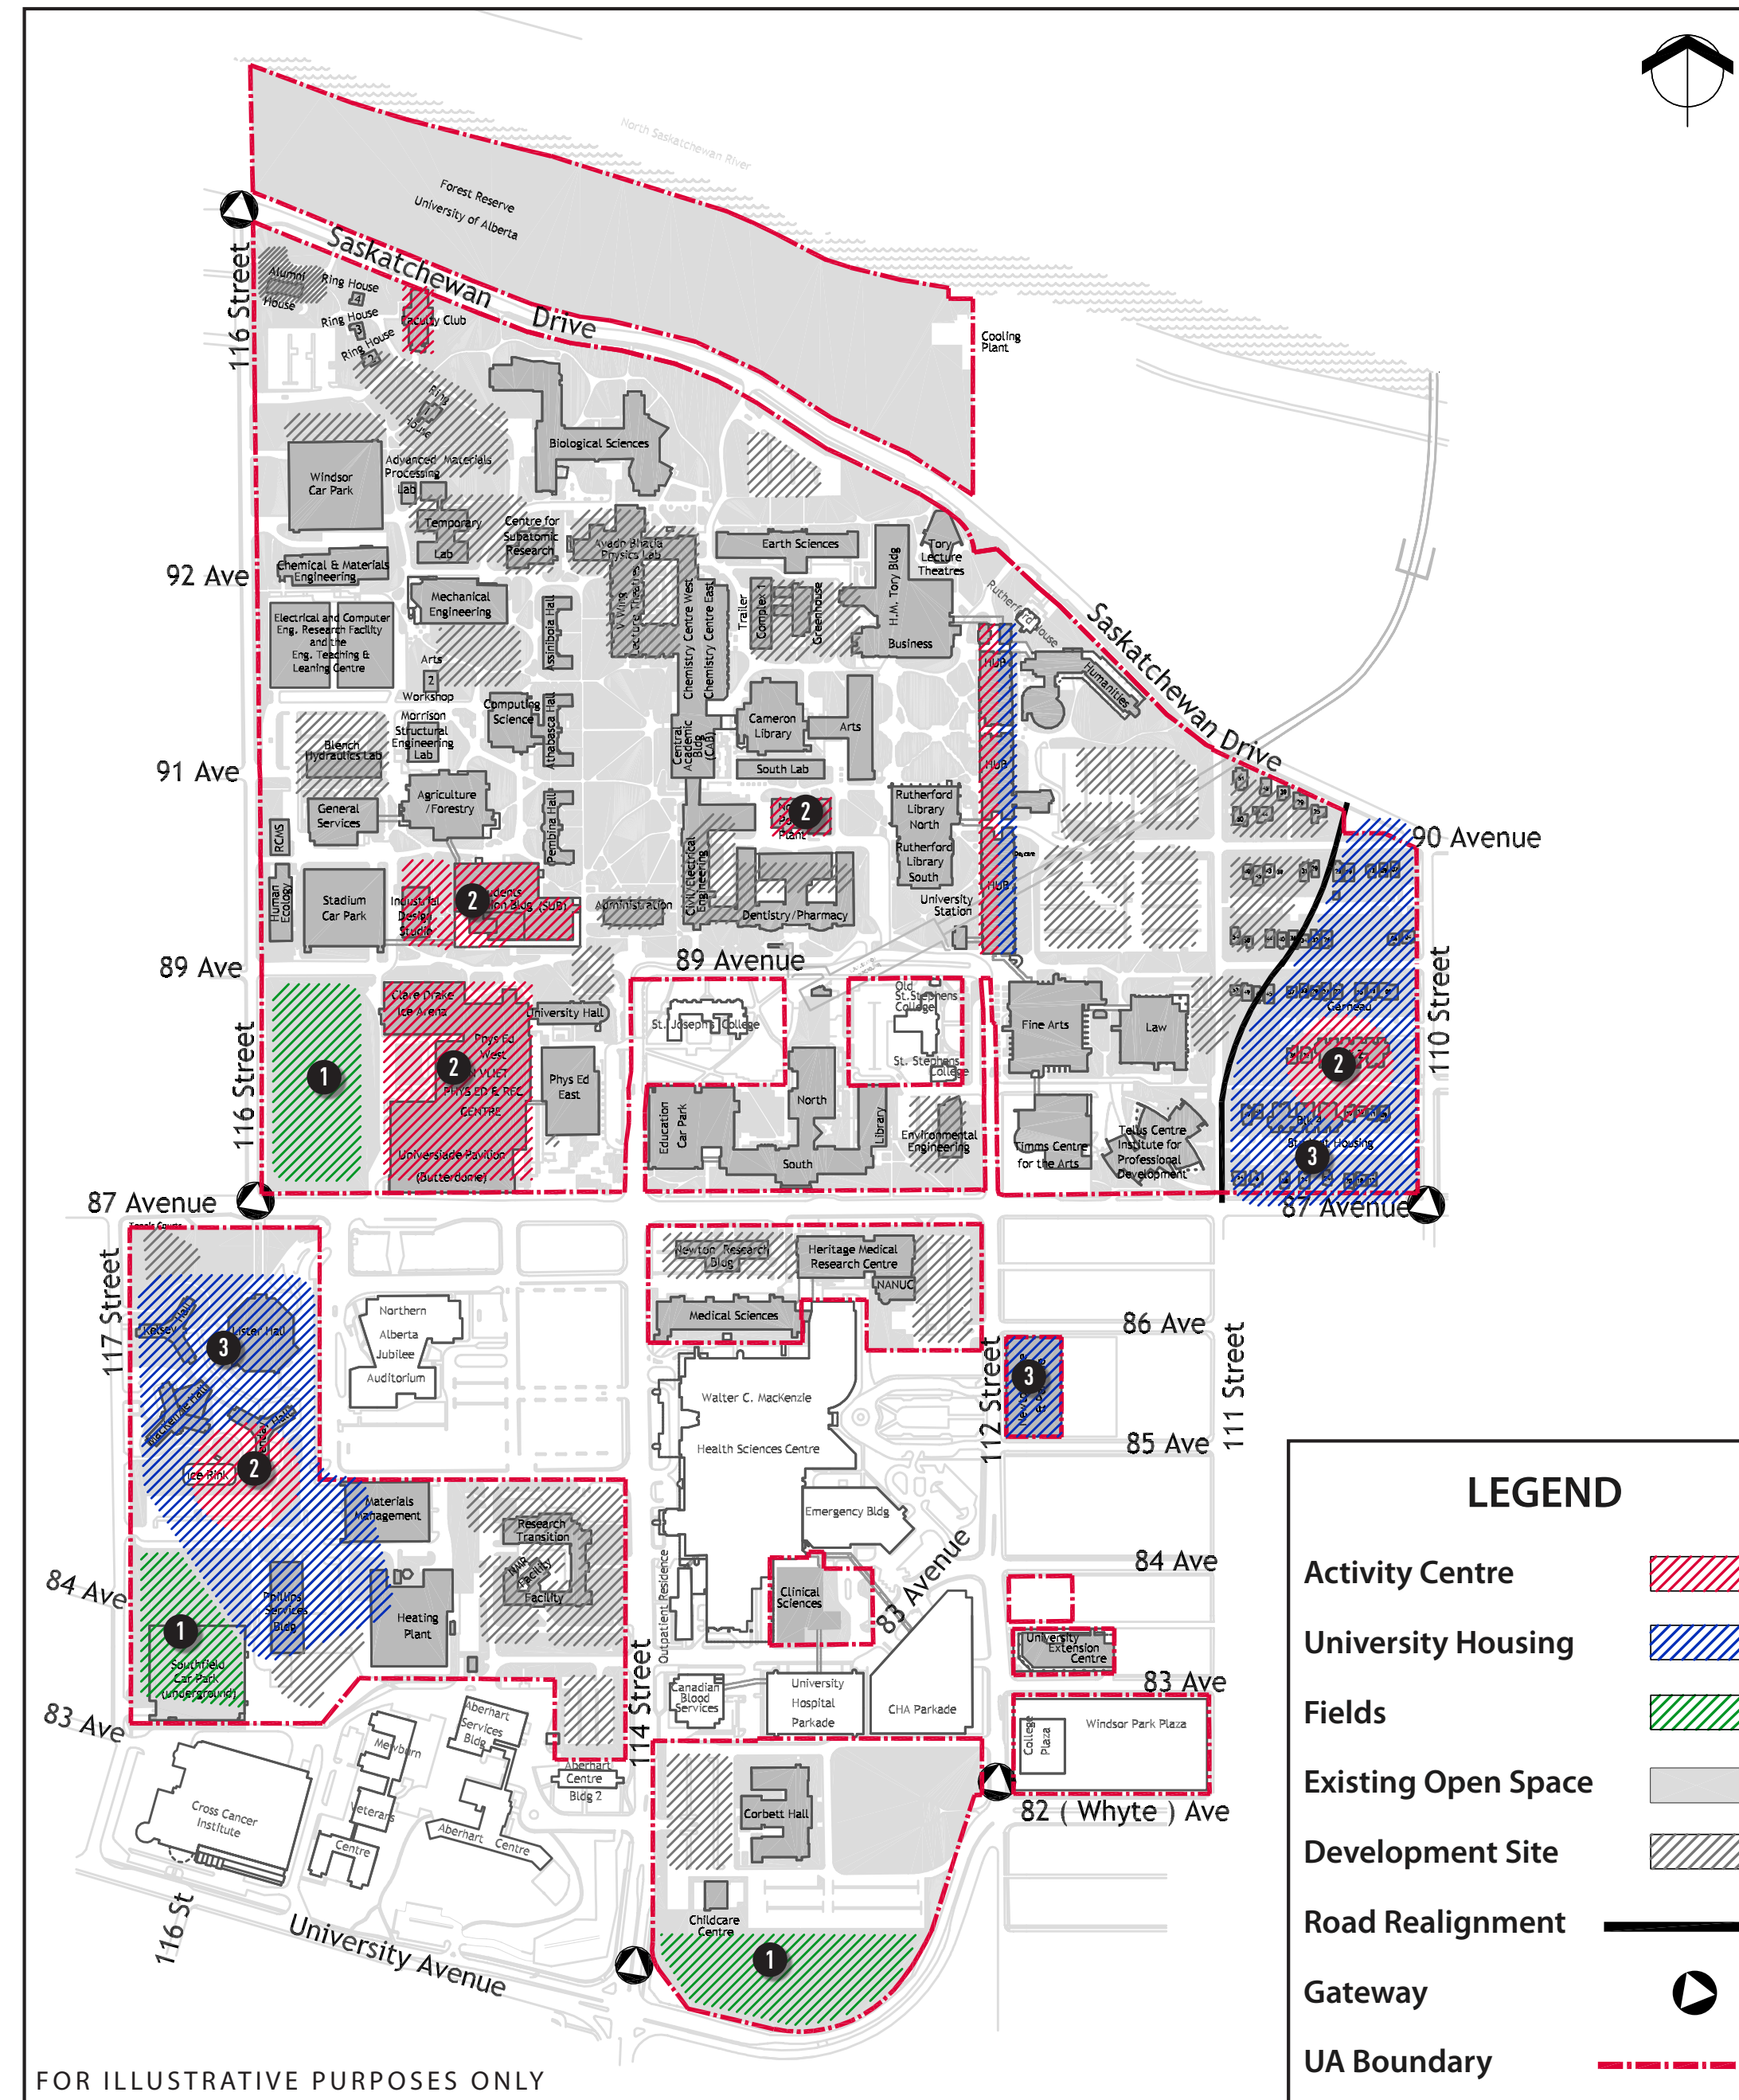

Proposed 2014 LRDP Amendment

- Update North Campus Land Use & Development Plan to include:
 - New buildings completed and in construction since 2002
 - Proposed demolition of Administration, Human Ecology, Remote Control Monitoring Station and Industrial Design Buildings
 - Refine land use development sites for North Campus
 - Three new development sites that require additional study:
 - Corner of 116 Street and Saskatchewan Drive (Sector 2);
 - North of Earth and Atmospheric Science Building and south of Saskatchewan Drive (Sector 4);
 - The area south of Corbett Hall to Whyte Ave (Sector 10).
 - Revisions and updates to Open Space
 - Revisions and updates to Campus Life and Housing
 - Revisions and updates to Public Vehicular Transportation System & Parking
 - Revisions and updates to Pedestrian & Bicycle Circulation
- The University will continue to provide strategic repurposing and upgrading of its facilities, which would lead to efficiency and effectiveness of utilization to support academic program needs, improve quality of student experience and enhance open spaces on campus.

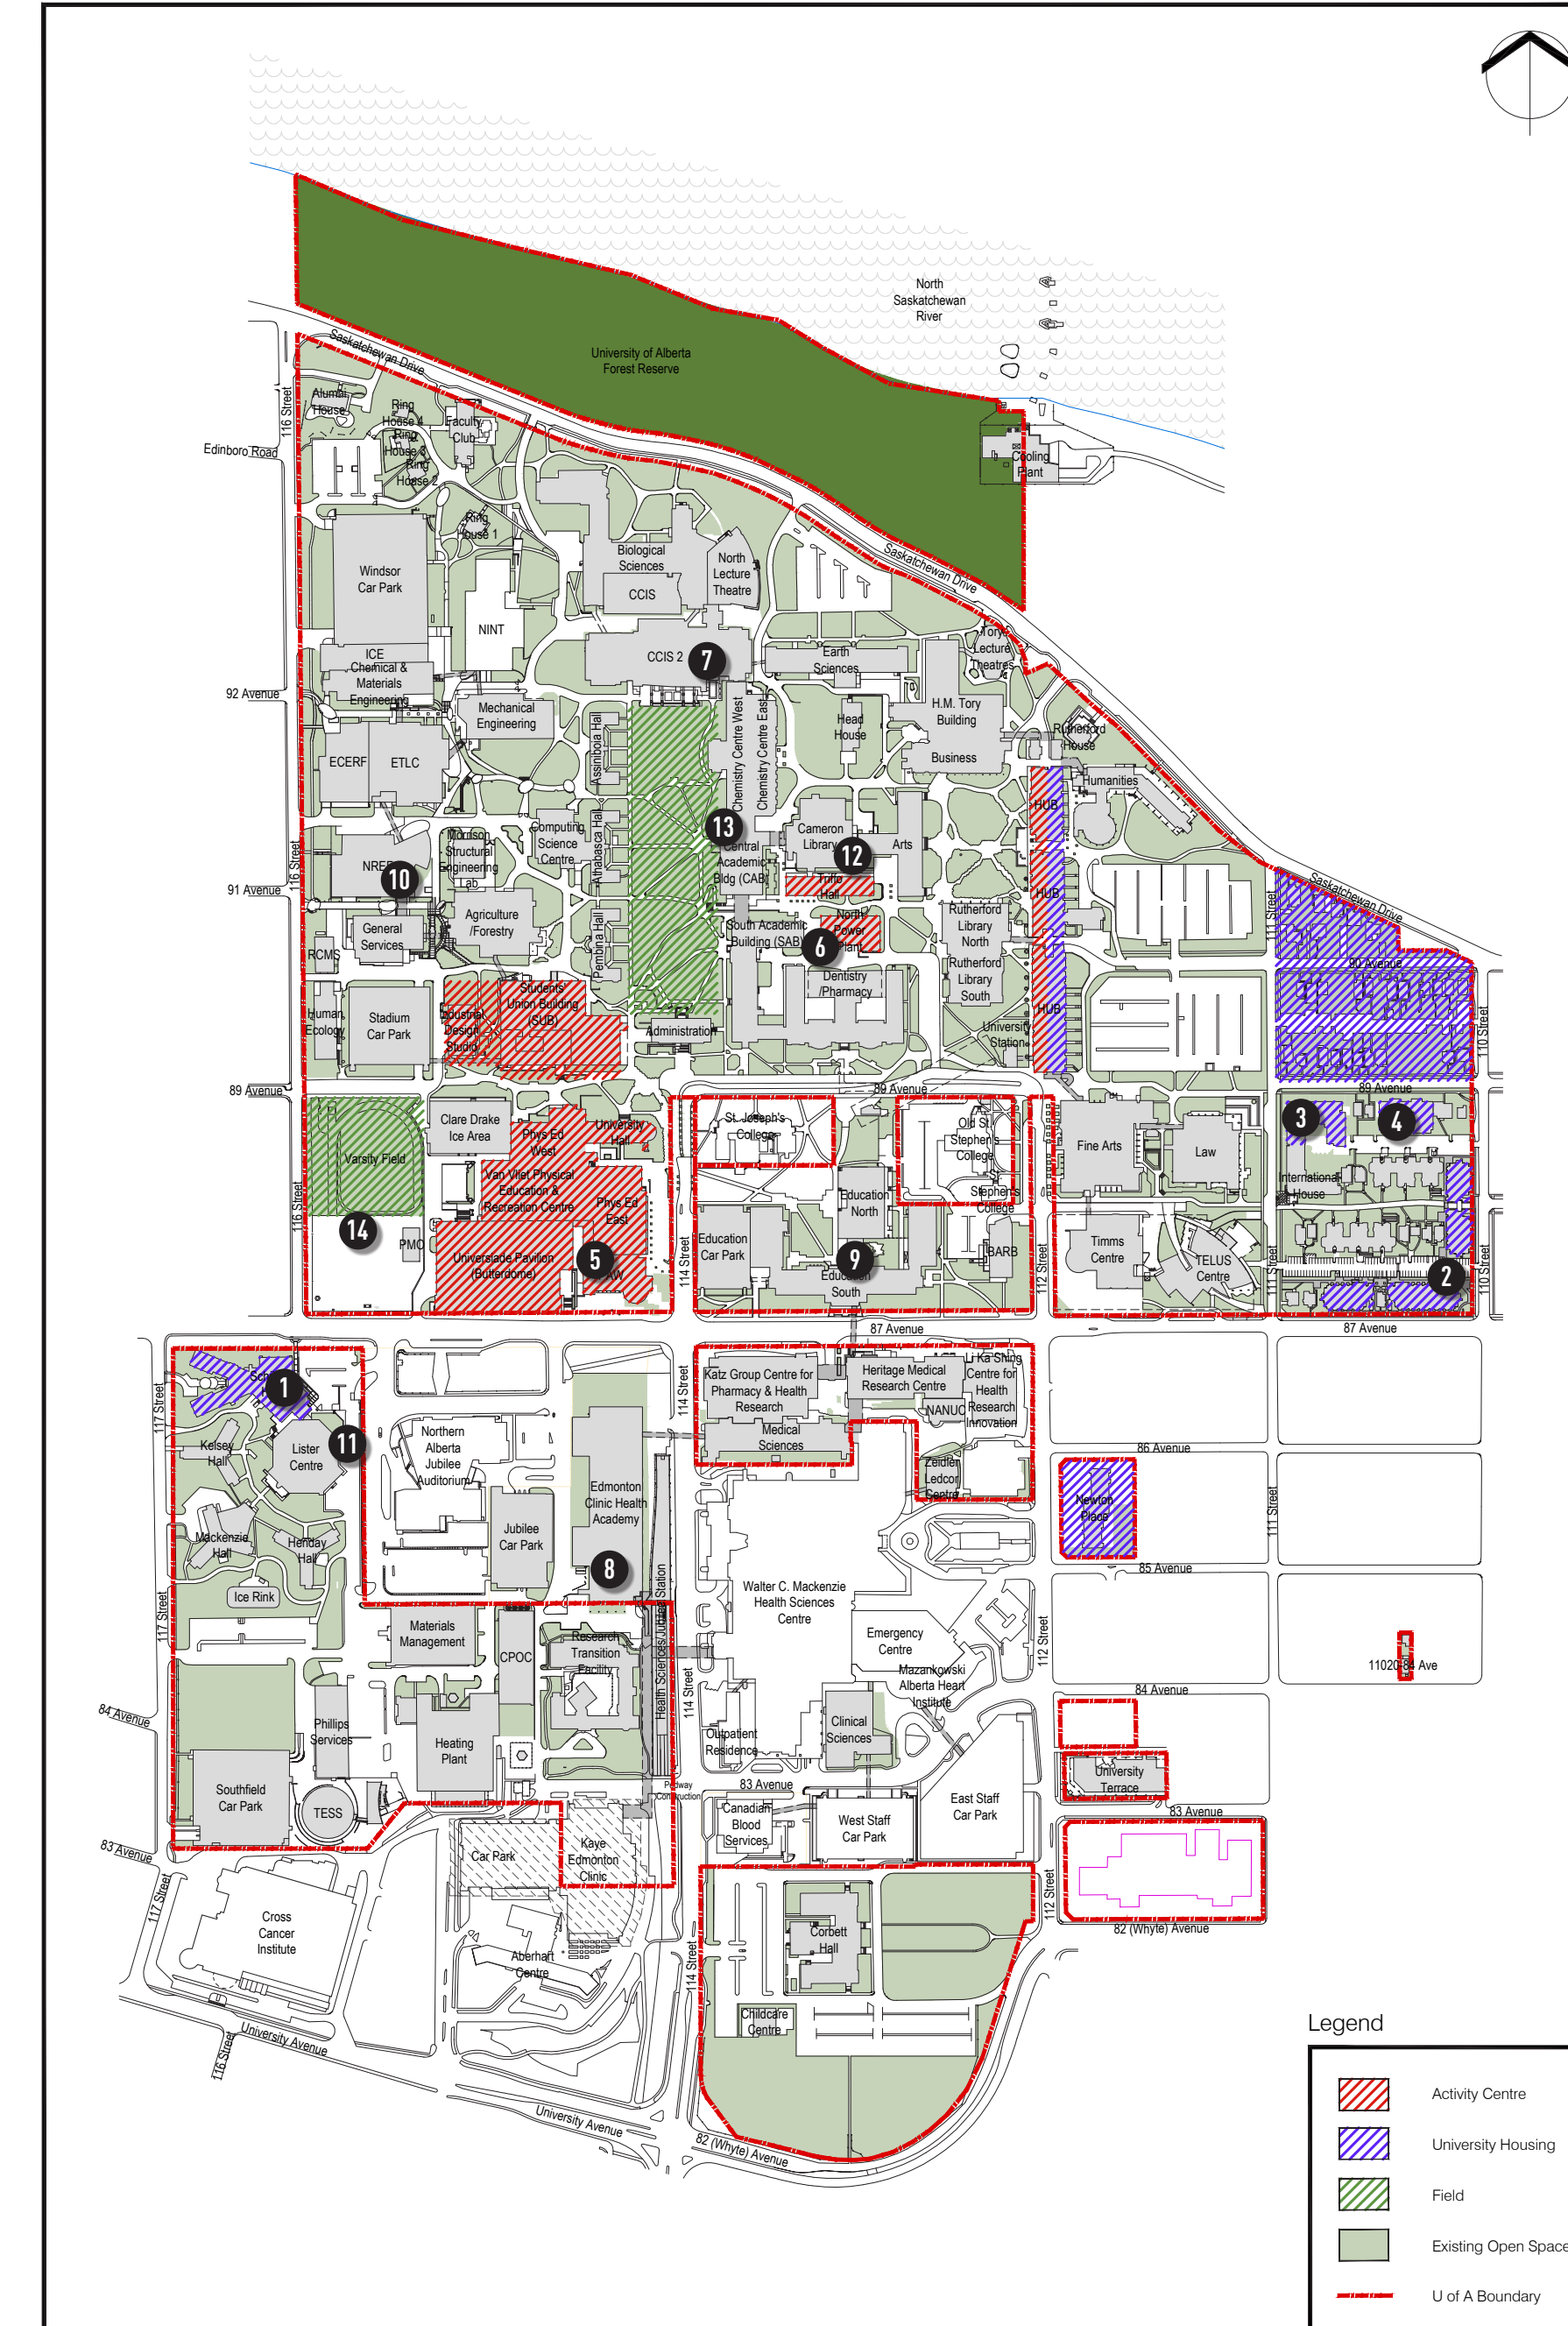

CAMPUS LIFE & HOUSING

CAMPUS LIFE & HOUSING

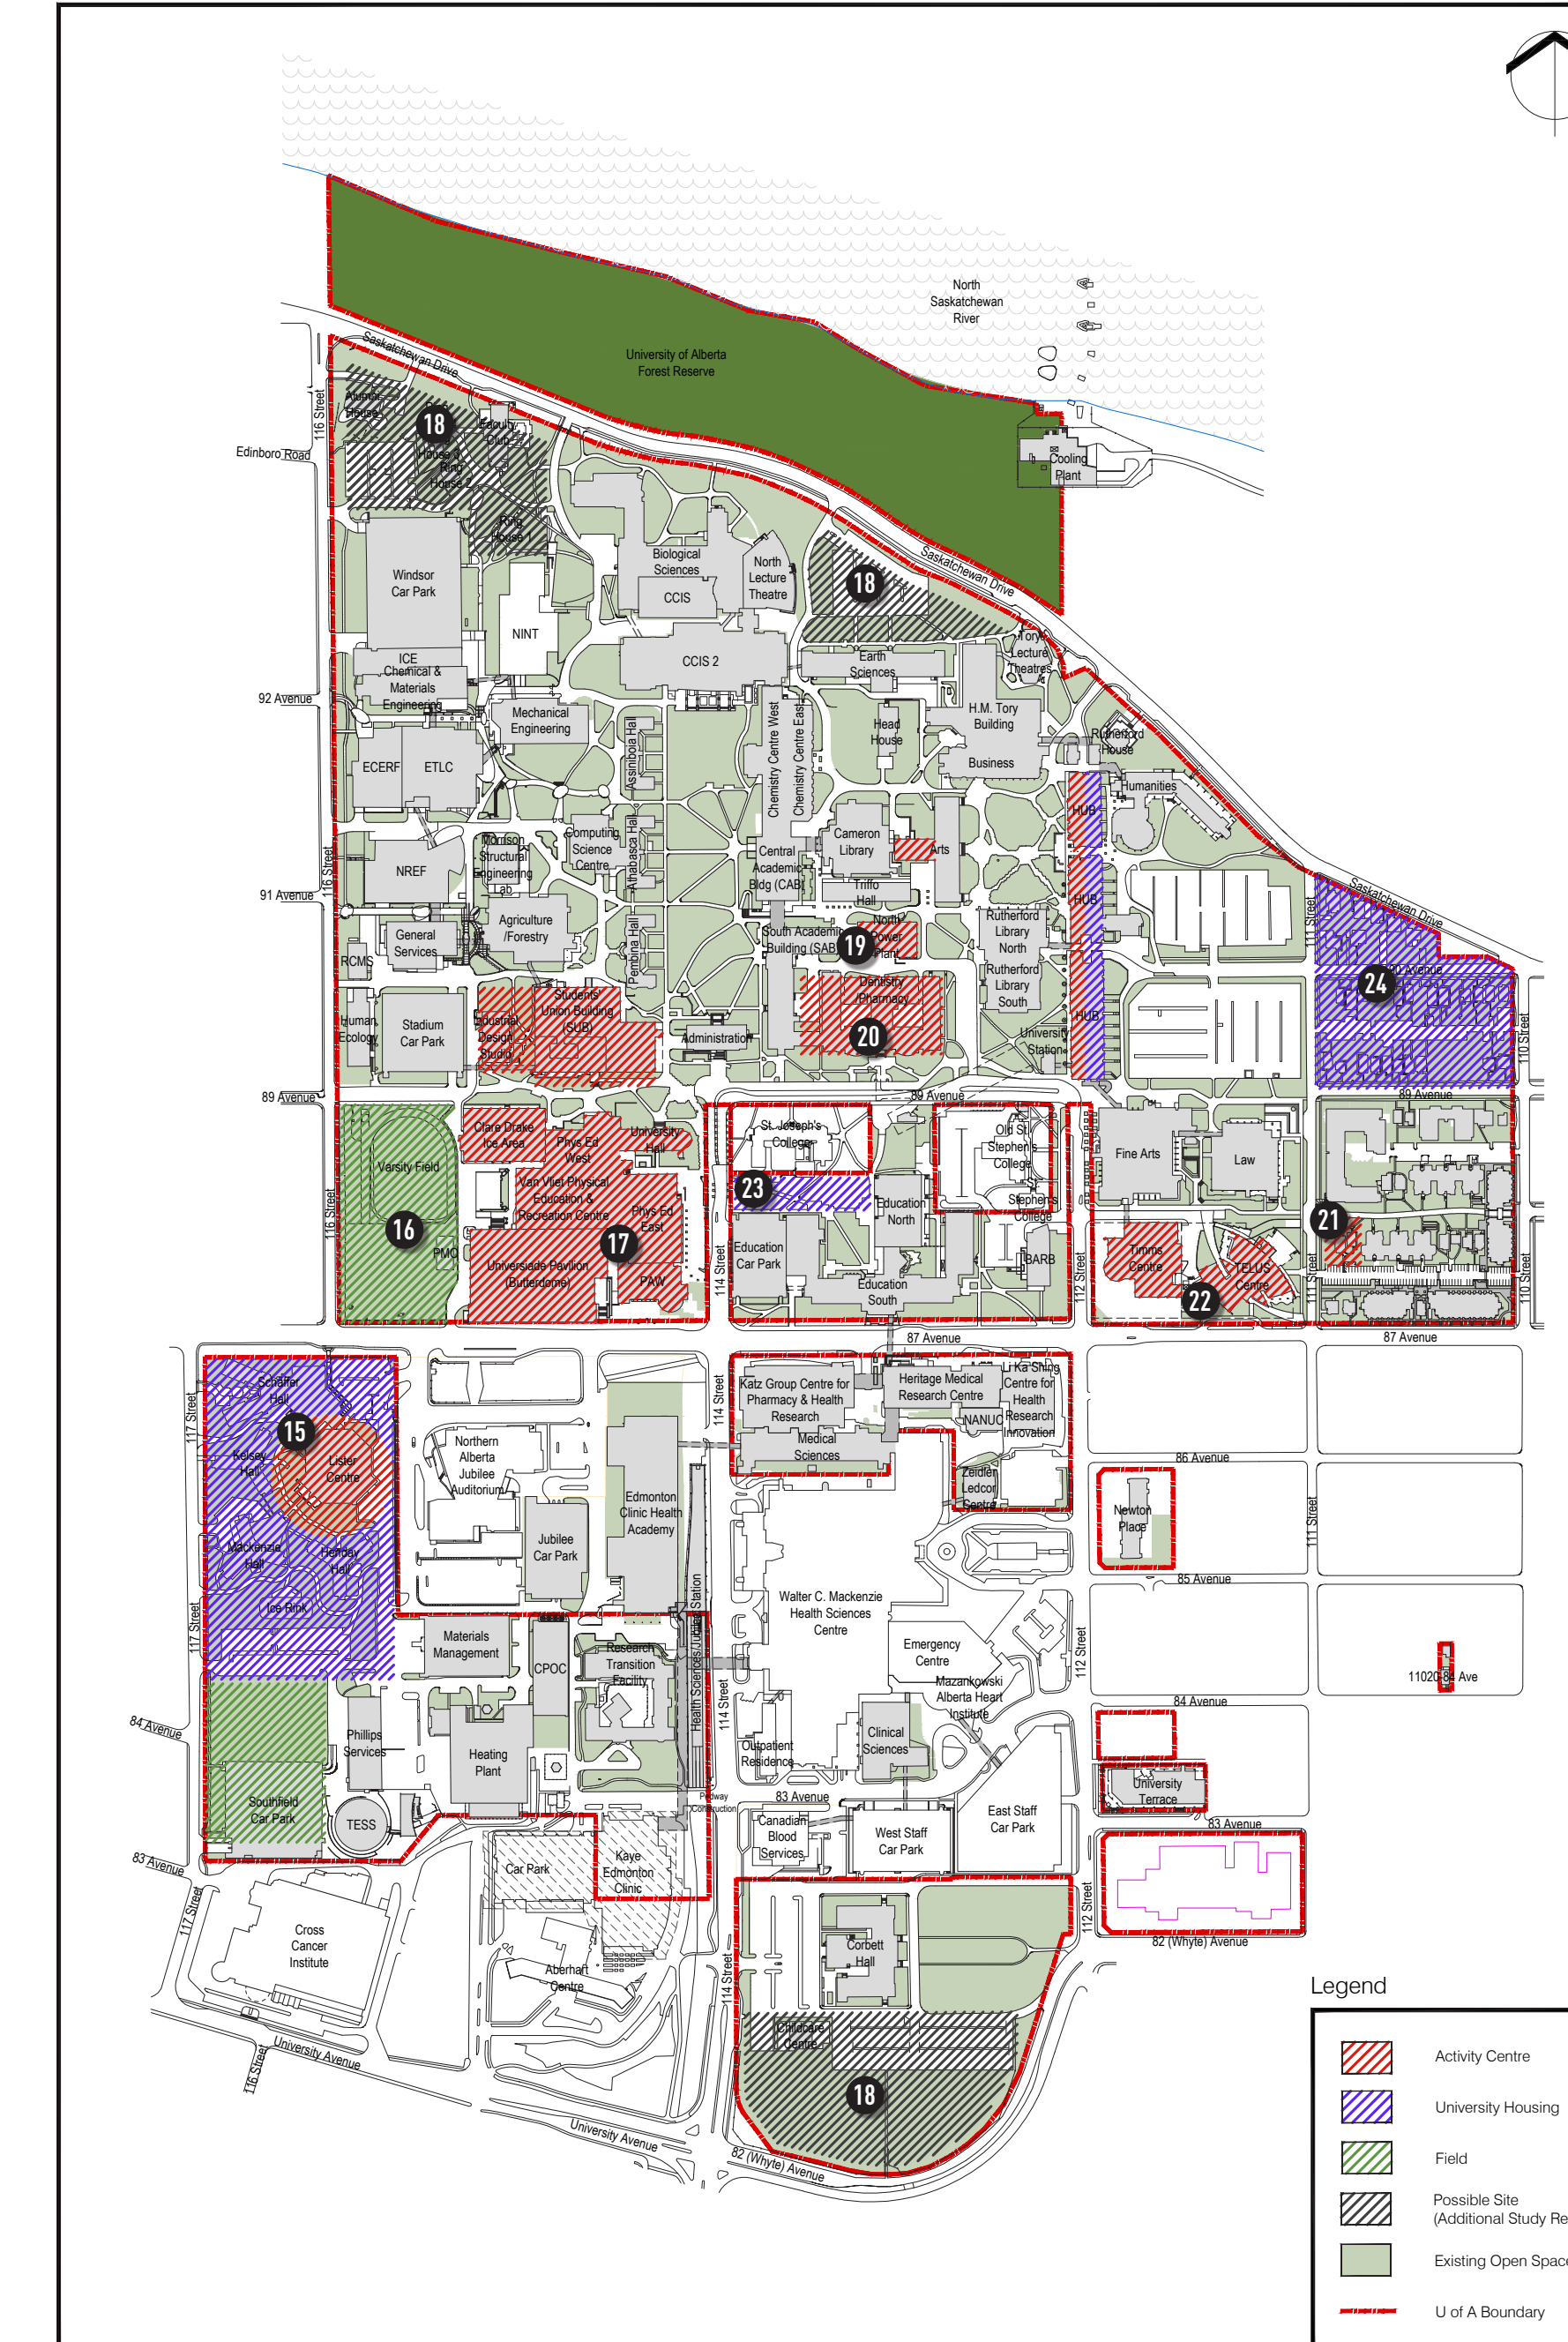

Potential Development Sites as per 2002 LRDP

Construction since LRDP & Development Sites Identified by Current Sector Plans

Proposed Development Sites for 2014 North Campus Amendment

Proposed Campus Life & Housing within 2002 LRDP

1. Playing field located at three locations within North Campus.
2. Development expansion of activity centre in proximity to student housing communities.
3. Development of additional purpose built student housing at Lister, East Campus Village, and Newton Place.

Development & Consultation since 2002

1. Lister Centre/Schaffer Hall expansion
2. Graduate Student Residences
3. Pinecrest House
4. Tamarack House
5. Physical Activity and Wellness (PAW) Centre
6. North Power Plant
7. Centennial Centre for Interdisciplinary Science and Student Commons area
8. Edmonton Clinic Health Academy and Student Commons Area
9. Education and Student Commons Area
10. Natural Resources Engineering Facility and Student Commons Area
11. Lister Centre food services expansion
12. Graduate Student Services (Triffo Hall)
13. Central Academic Building
14. Varsity Field reduction (Temporary Parking)

Proposed 2014 LRDP Amendment

15. Lister Centre/Schaffer Hall expansion
16. Varsity Field Restoration
17. Physical Activity & Wellness (PAW) Centre
18. Future Study Area
19. North Power Plant
20. Dentistry / Pharmacy Repurpose
21. East Campus Village Amenities Building
22. Telus Centre for International Studies
23. St. Joseph's Womens' Residence
24. East Campus Village Residential Development

2002 LRDP STATED

- Campus Life opportunities will be accommodated and expanded including student housing, recreation and leisure and student services.
- Housing is to incorporate student life, recreation and leisure facilities will be encouraged.
- The commercial and retail functions that support urban campus life will also be encouraged on campus. Major activity nodes including the SUB, HUB and residential clusters are locations well-suited for these functions.
- More recreational facilities will be required.

Development & Consultation Since 2002

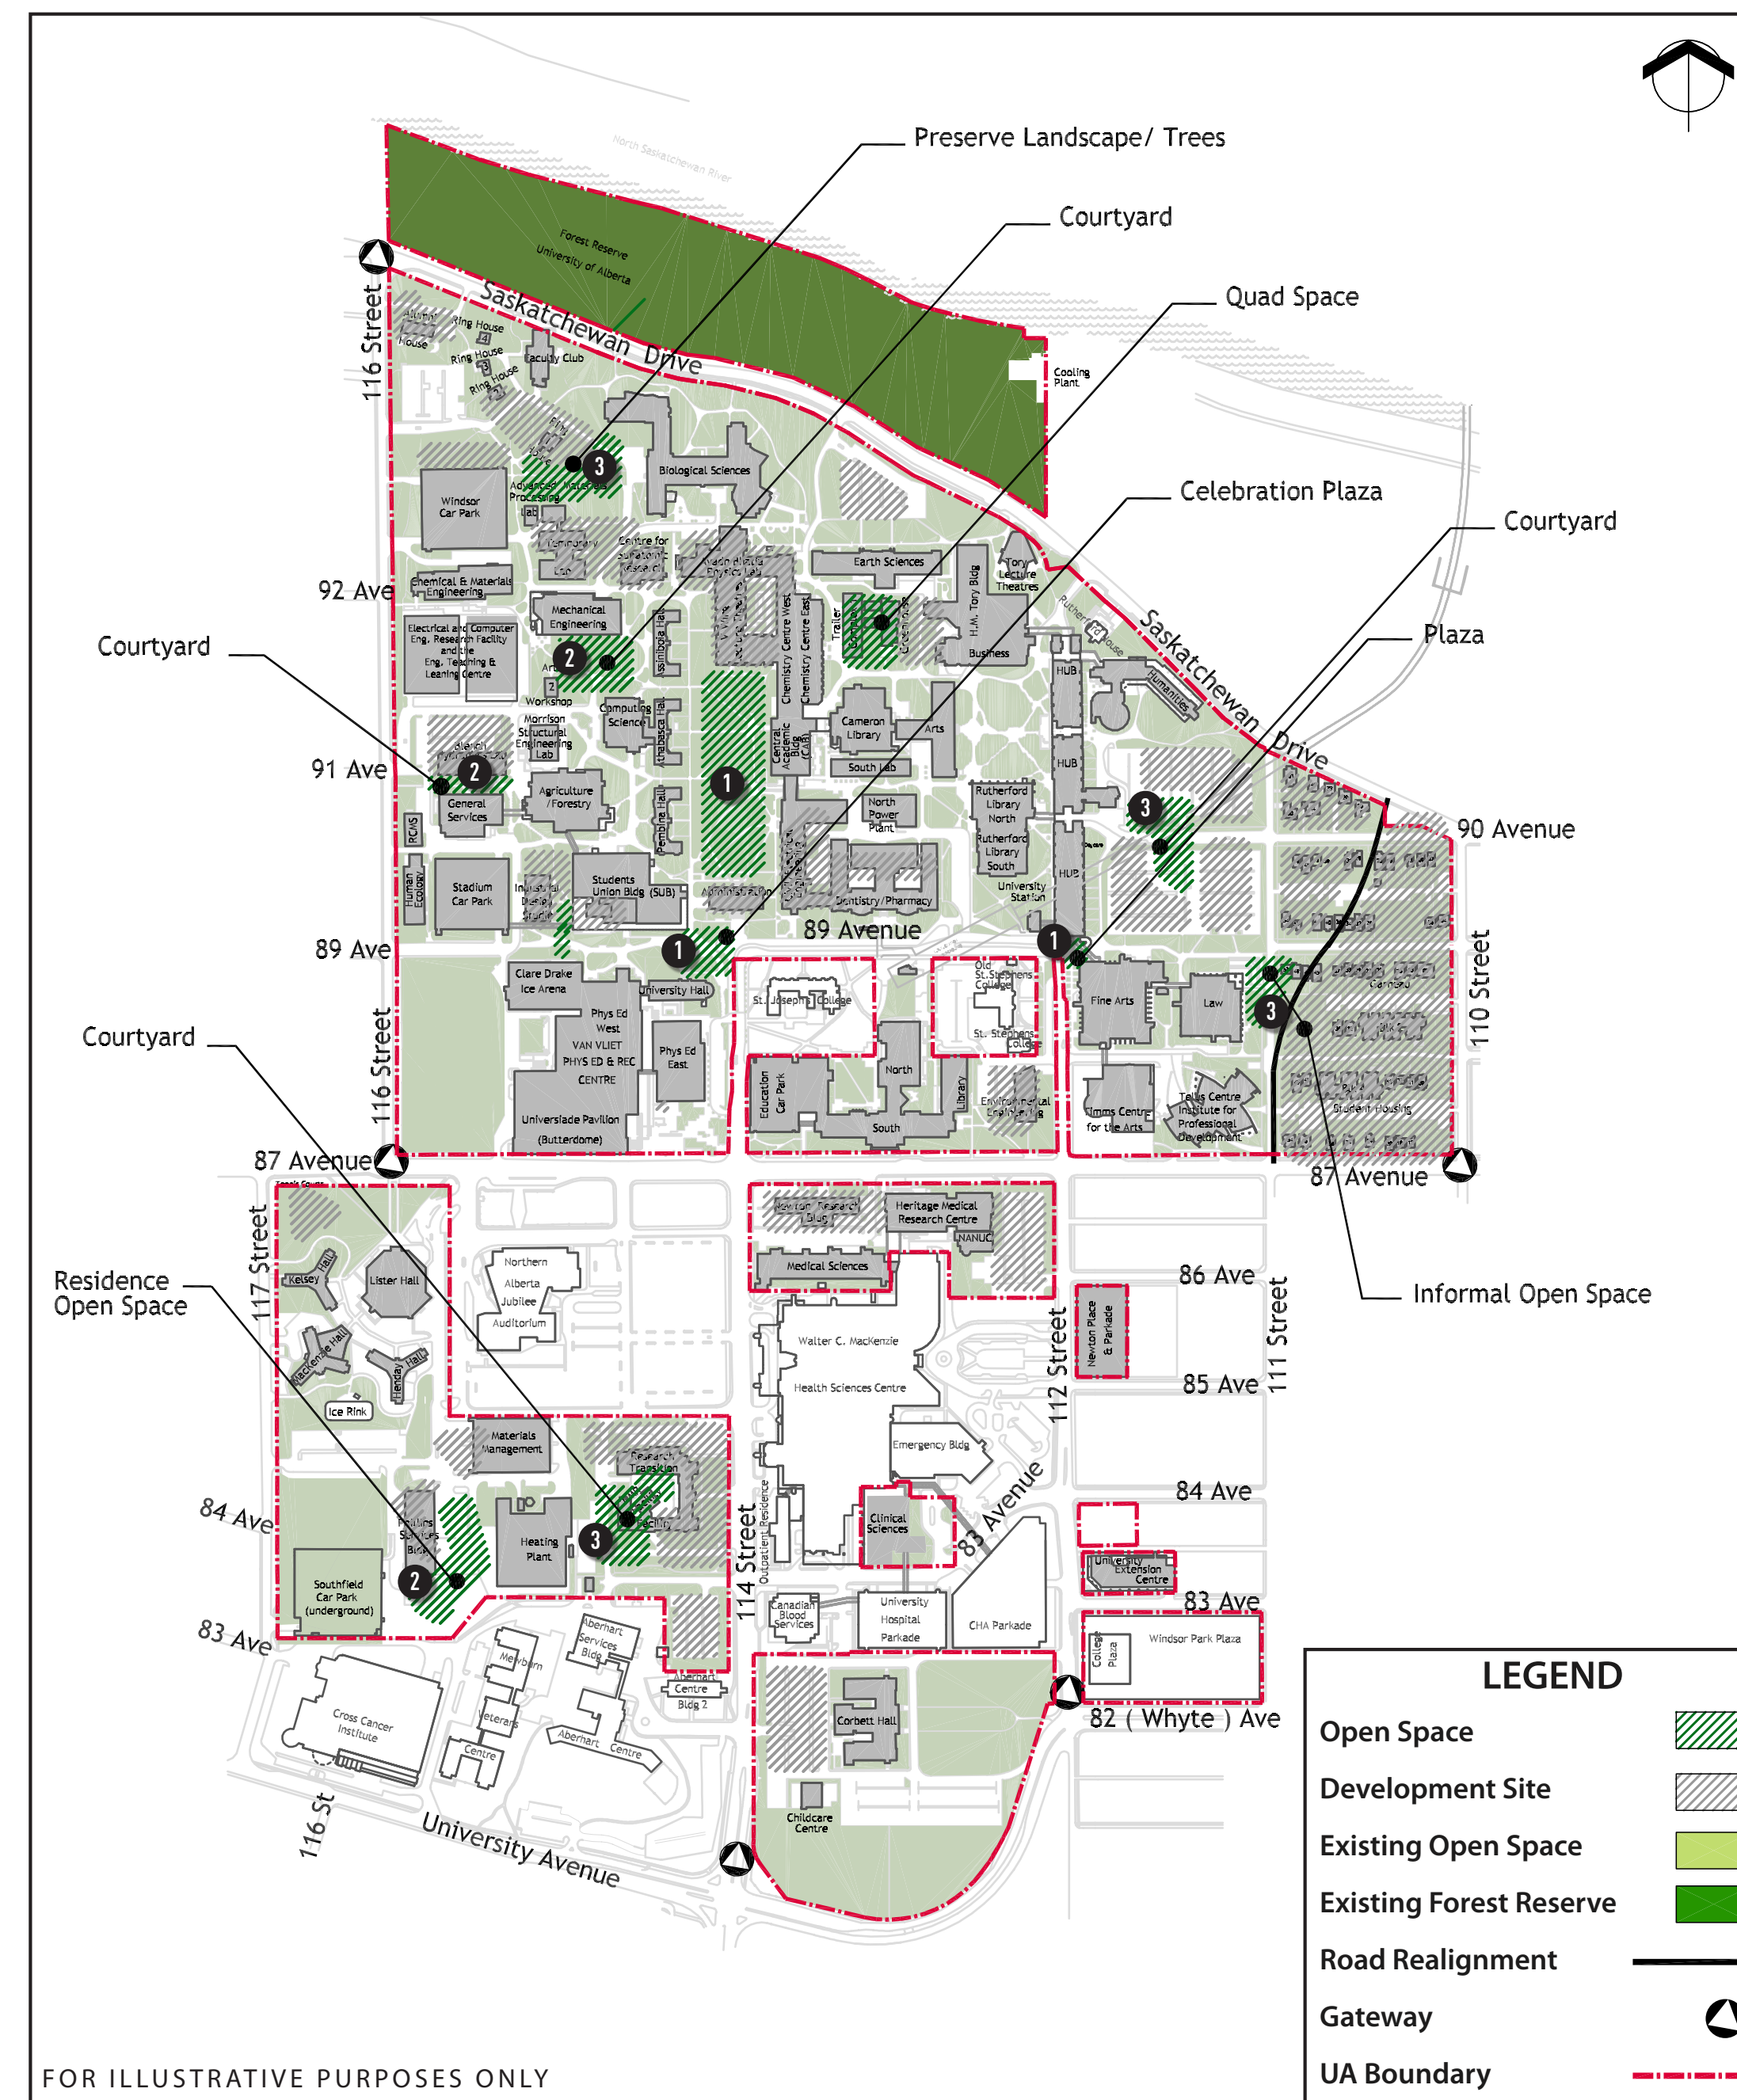

- New student residences, including Shaffer Hall at Lister Centre, International House, Graduate Student Residences, Pinecrest House and Tamarack House at East Campus Village, were constructed, incorporating residence life, recreation and leisure components.
- Existing commercial and retail functions at HUB Mall were renewed.
- SUB was renewed with an expansion. Additional basement renovation is underway.
- New food service outlets were provided at Centennial Centre for Interdisciplinary Sciences (CCIS), Edmonton Clinic Health Academy (ECHA), Education Building, Natural Resources Engineering Facility (NREF), Lister Centre, Cameron Library and Central Academic Building (CAB).
- The new Physical Activity and Wellness Centre is under construction.

Proposed 2014 LRDP Amendment

- Update East Campus Village to include development sites for student residences and amenity facility in accordance with completed Sector Plan for Sector 8.
- Redevelop and expand Lister Centre. New building will include residences and additional social, recreation and food service provisions.
- Maintain South Field and Varsity Field as fields to enhance sports and recreation activities. The current temporary paved parking area south of Varsity Field will be restored and developed as open space to support leisure and recreational activities.
- Development of a new student residence immediately south of St. Joseph's College Residence.
- Maintain North Power Plant as an activity centre. In addition, Telus Centre for International Studies and Dentistry/Pharmacy are denoted as activity centres that support student engagement and service.

OPEN SPACE SYSTEM

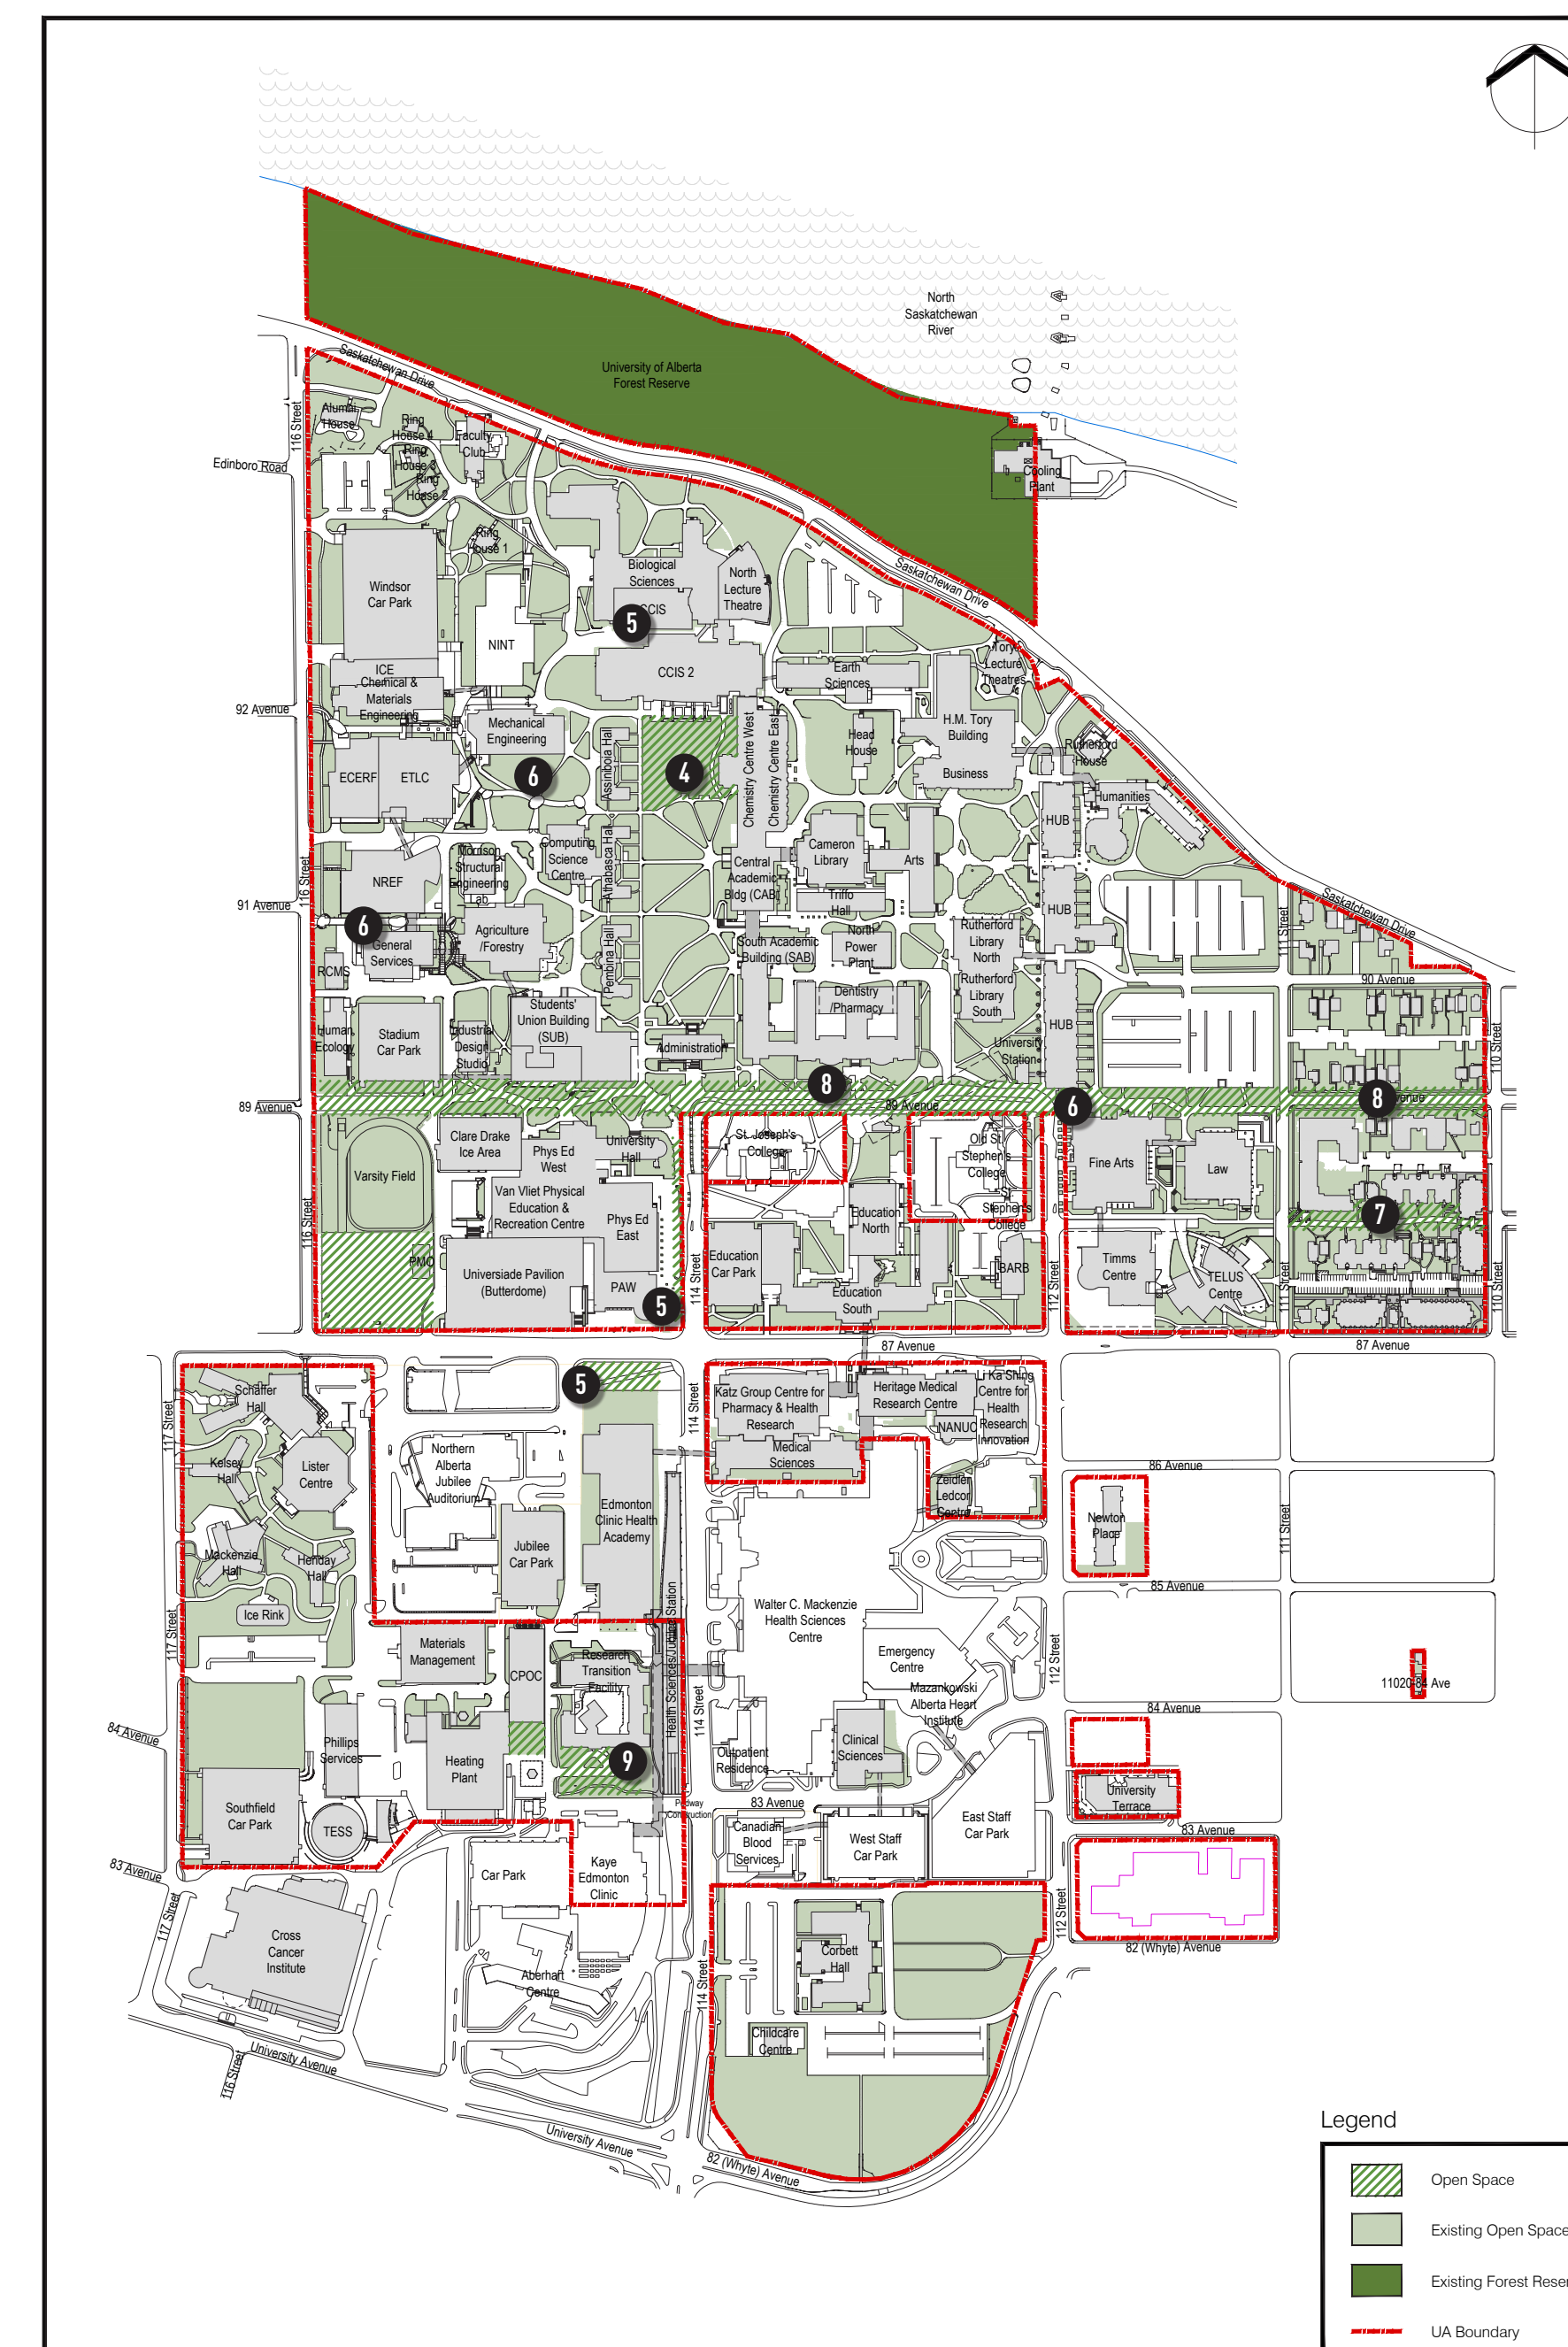

Potential Development Sites as per 2002 LRDP

Proposed Open Space Systems within 2002 LRDP

1. Reinforce Central Quad and Celebration Plaza
2. Develop open space courtyards around existing buildings
3. Plan for and develop new open space within new large development zones

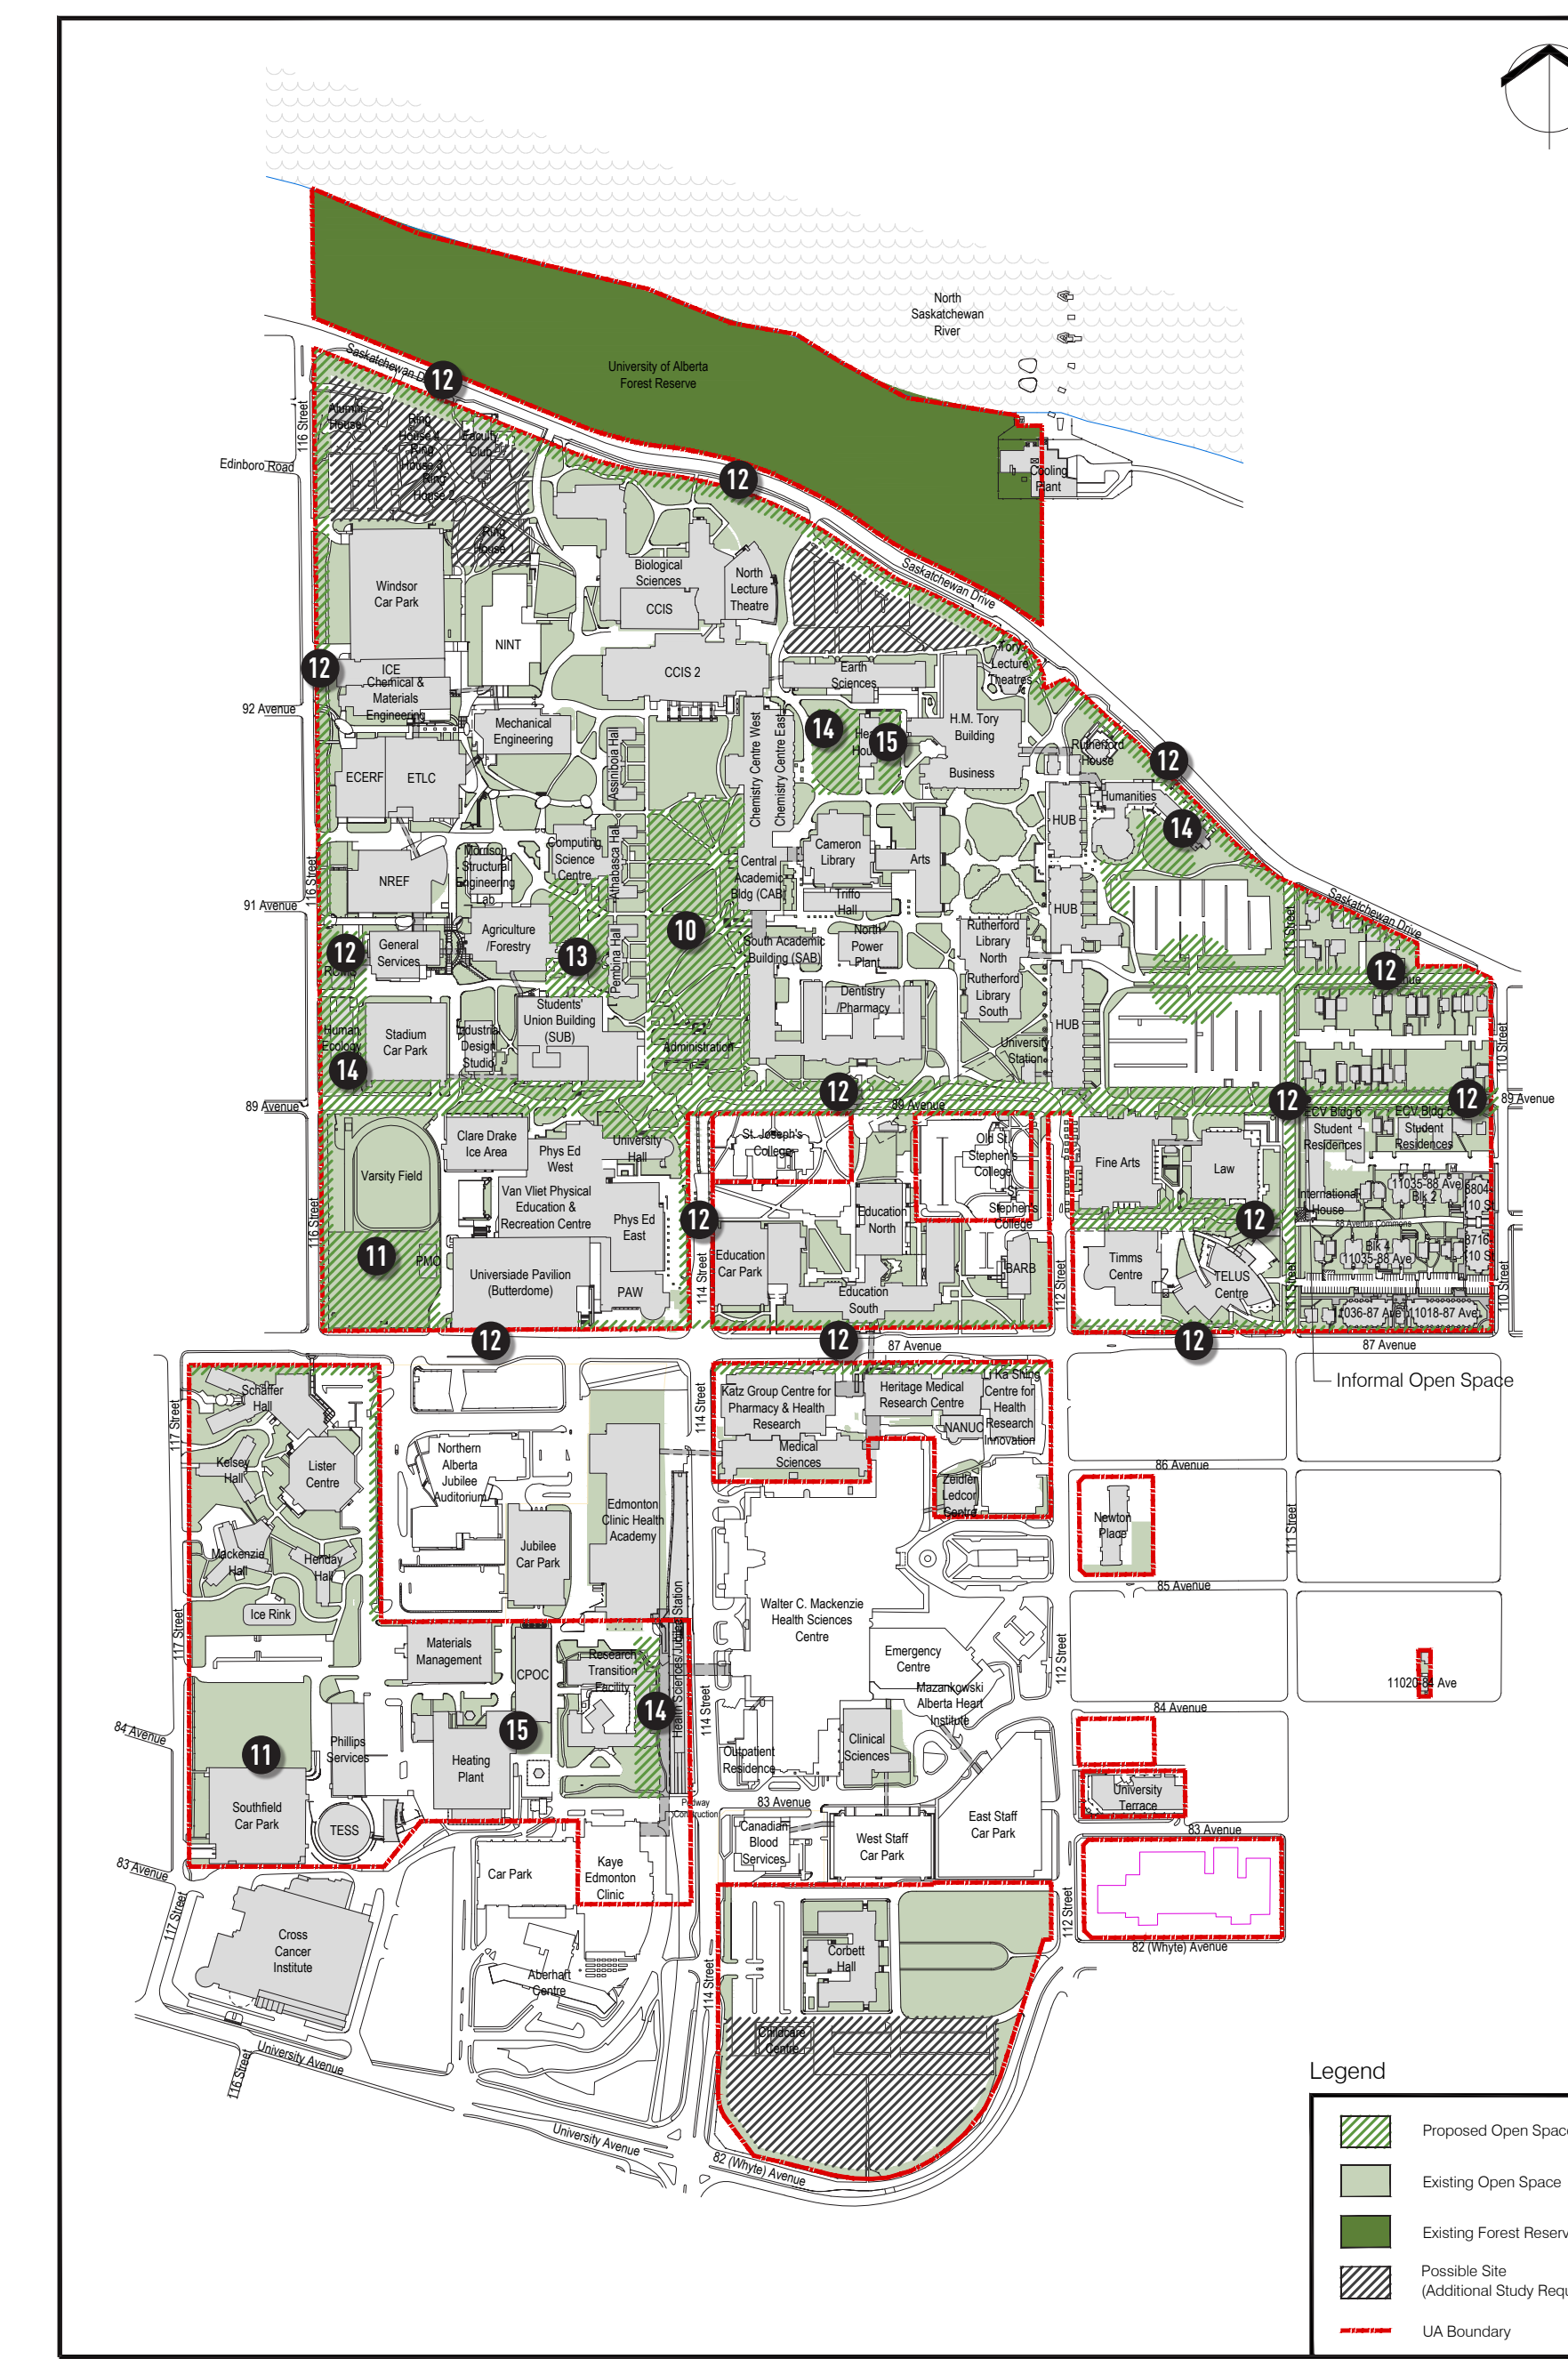

Construction since LRDP & Development Sites Identified by Current Sector Plans

Development & Consultation since 2002

4. Central Quad expanded with construction of CCIS.
5. Open spaces incorporated in design of CCIS, ECHA, PAW Centre, Graduate Student Residences, Tamarack House and Pinecrest House.
6. Maintained identified courtyard and plaza spaces.
7. Articulate new 88 Ave Commons between 110 Street and 112 Street.
8. Articulate new pedestrian spine along 89 Avenue between 110 Street and 116 Street.
9. Development of new open space.

Proposed Development Sites for 2014 North Campus Amendment

Proposed 2014 LRDP Amendment

10. Redevelopment of the Central Quad.
11. Maintain South Field and repurpose Varsity Field.
12. Articulate new contiguous open space boulevards along 87 Ave, 88 Ave, 89 Ave, Saskatchewan Drive, 110 Street, 111 Street, 114 Street and 116 Street.
13. Redevelopment of open space to reduce traffic intrusion.
14. New and/or redeveloped open space.
15. Removal of open space.

OPEN SPACE SYSTEM

2002 LRDP STATED

- Existing significant open spaces will be retained and reinforced whenever possible. New open spaces will be developed to balance the effects of increased density, and to improve livability and sense of community on this campus. New open spaces are to be included in all development and redevelopment of sites throughout North Campus. Open spaces are to be planned with each building project.
- Natural environments such as found in the Forestry Reserve will be preserved as well landscaped sites and elements identified as significant by the University.

Development & Consultation Since 2002

- Central Quad enlarged resulting from the removal of V-Wing and the construction of CCIS.
- South side of Varsity Field paved for temporary parking and construction staging.
- New open spaces were incorporated in new development and redevelopment projects including NINT, Li Ka Shing Centre for Health Research Innovation, Katz Group Centre for Health Research, NREF, CCIS, Jubilee Parkade, ECHA, ICE, PAW Centre, Graduate Student Residences, Tamarack House and Pinecrest House.
- New Engineering Quad constructed.
- 83 Ave west of 114 Street intersections closed to through traffic. Site being redeveloped as open space.

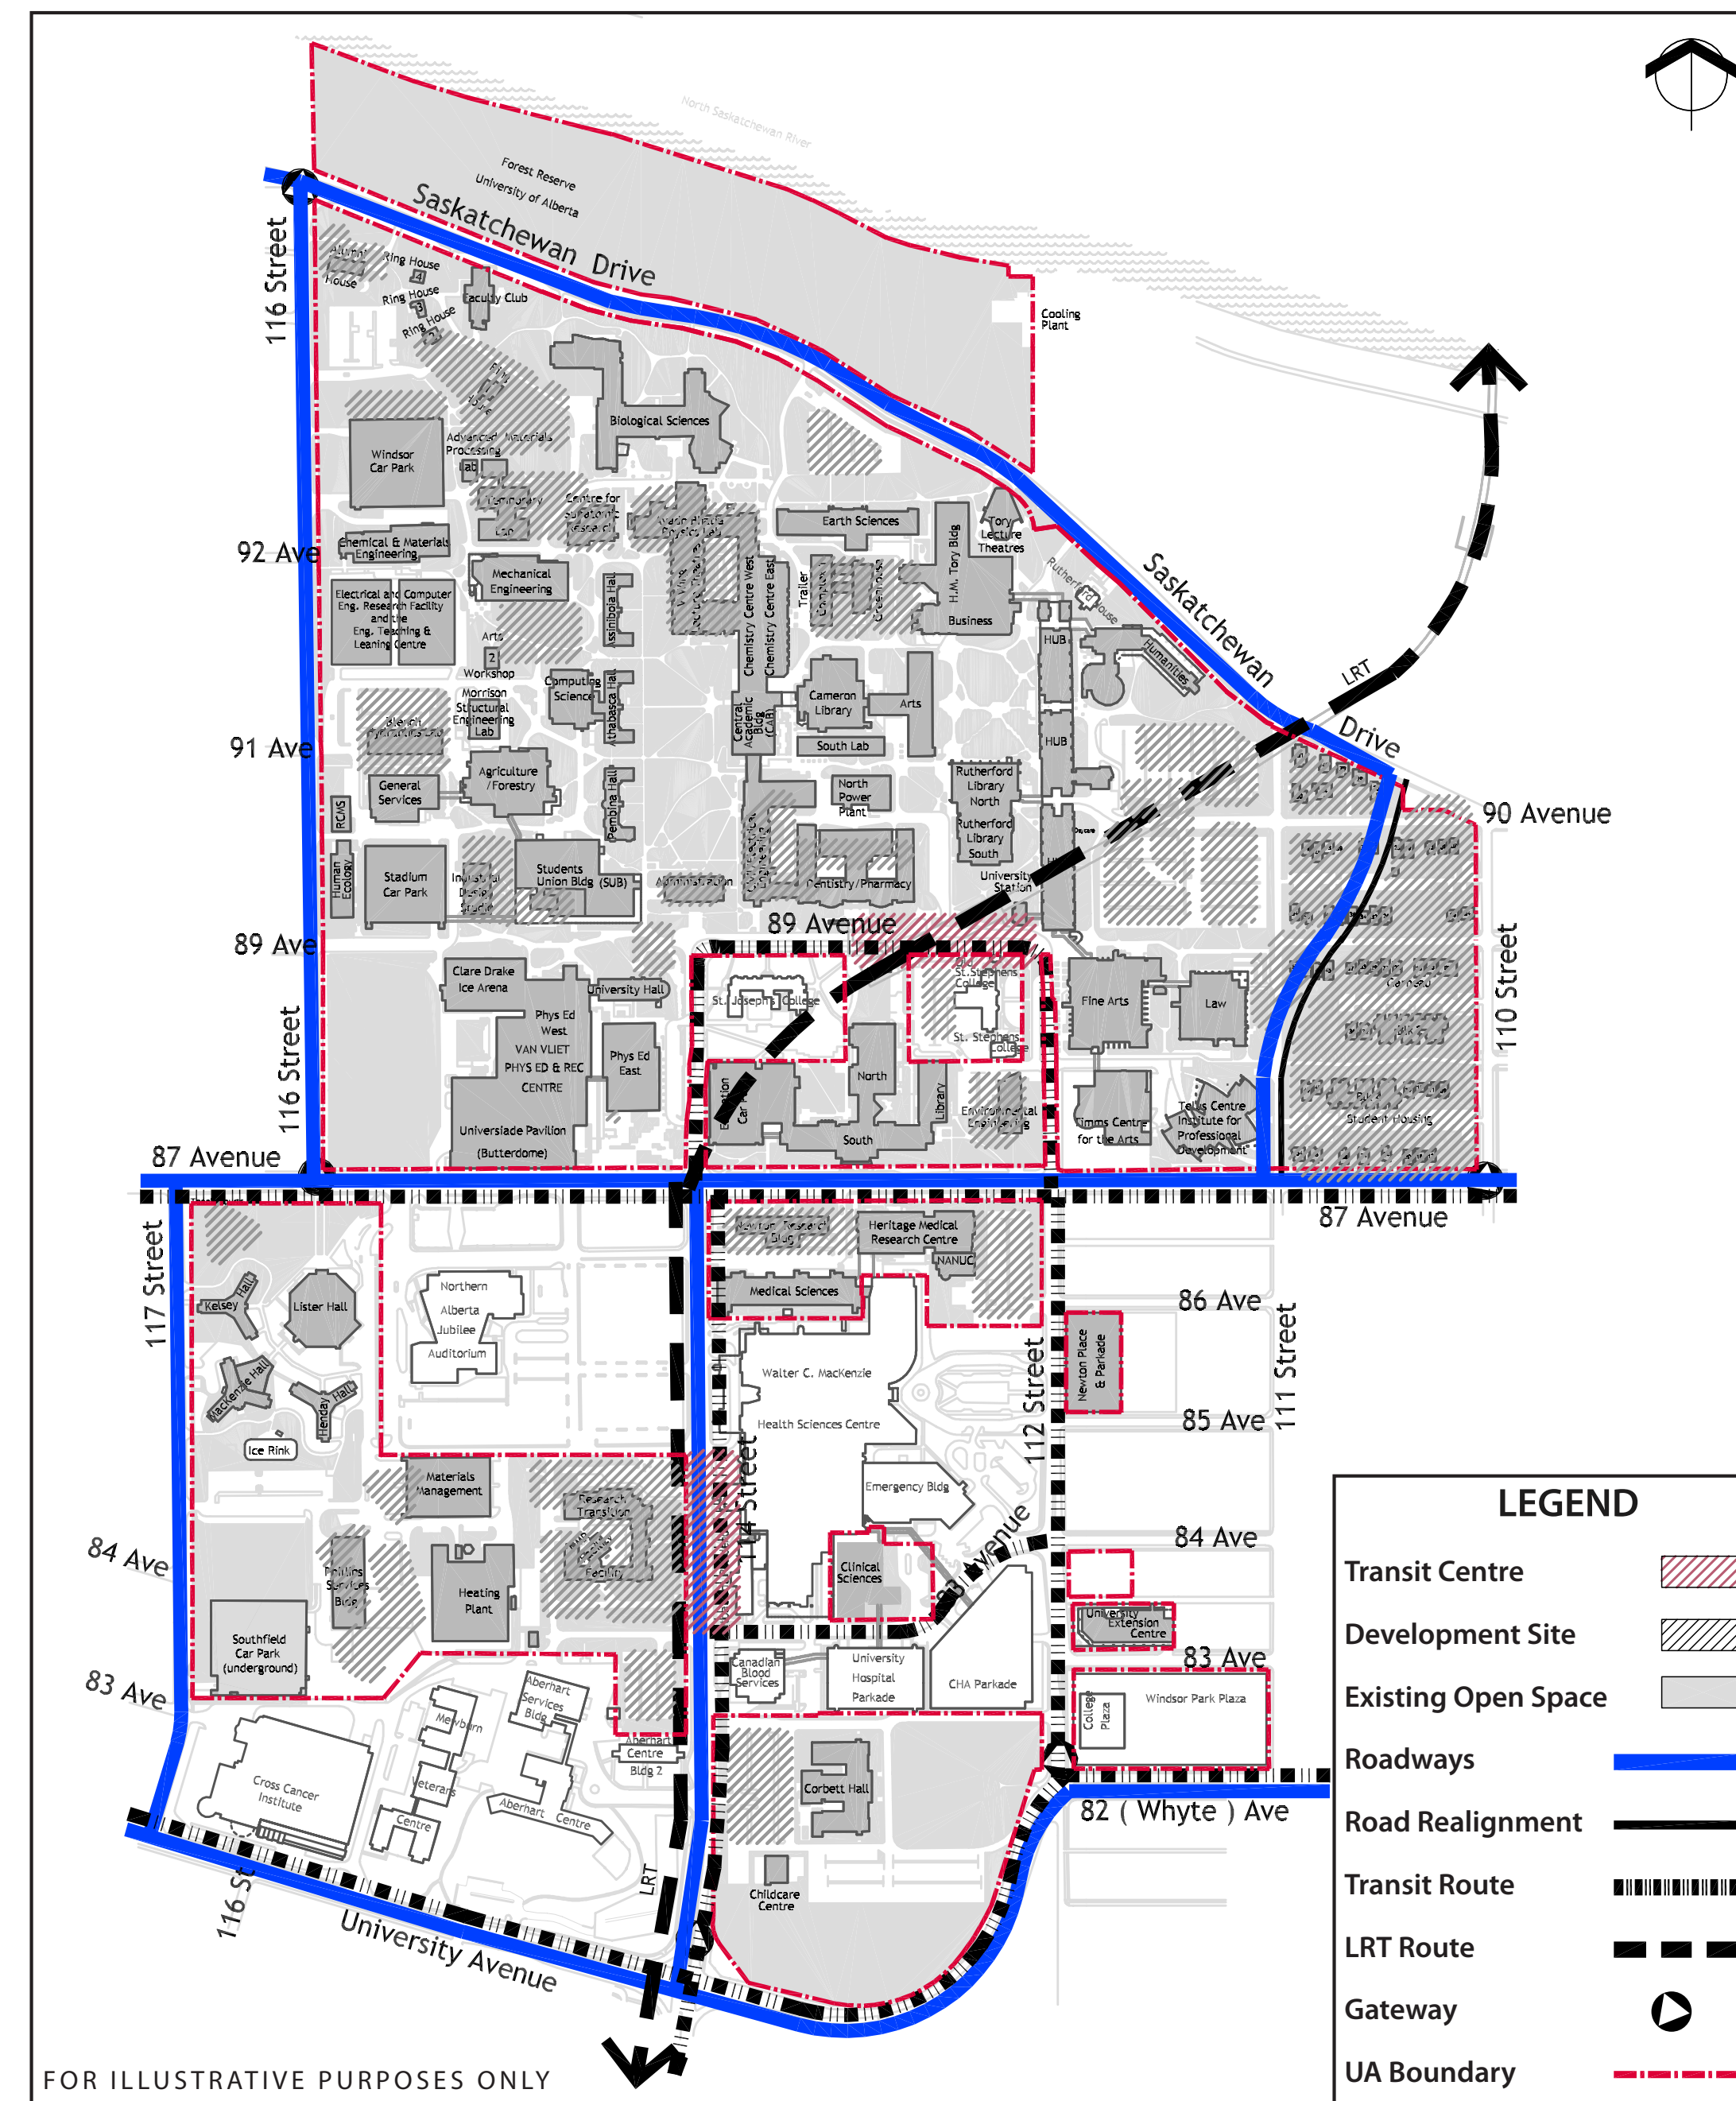

Proposed 2014 LRDP Amendment

- Update North Campus map to include new open spaces completed and in construction since 2002.
- Redevelop Central Quad and Celebration Plaza as major Open Spaces on campus with removal of Administration Building.
- 89 Ave between 110 Street and 111 Street was closed to vehicular traffic and opened to pedestrian traffic.
- Reinforce the quad space between Agriculture Forestry Building and Pembina Hall, between Computing Science Centre and SUB.
- Reinforce the quad space between Head House and Chemistry East Building, between Earth Science Building and Cameron Library.
- Remove Human Ecology, RCMS and Industrial Design Buildings. Incorporate new open spaces to neighbouring buildings and development.
- Restore current temporary paved parking area south of Varsity Field to open space to support leisure and recreational activities.
- Develop new pedestrian boulevards along 87 Ave, along 89 Ave, on the south side of Saskatchewan Drive, on the west side of 110 Street and along 111 Street, 114 Street and on the east side of 116 Street.
- Develop 88 Ave Commons between 110 Street and 112 Street as a pedestrian and bicycle pathway.

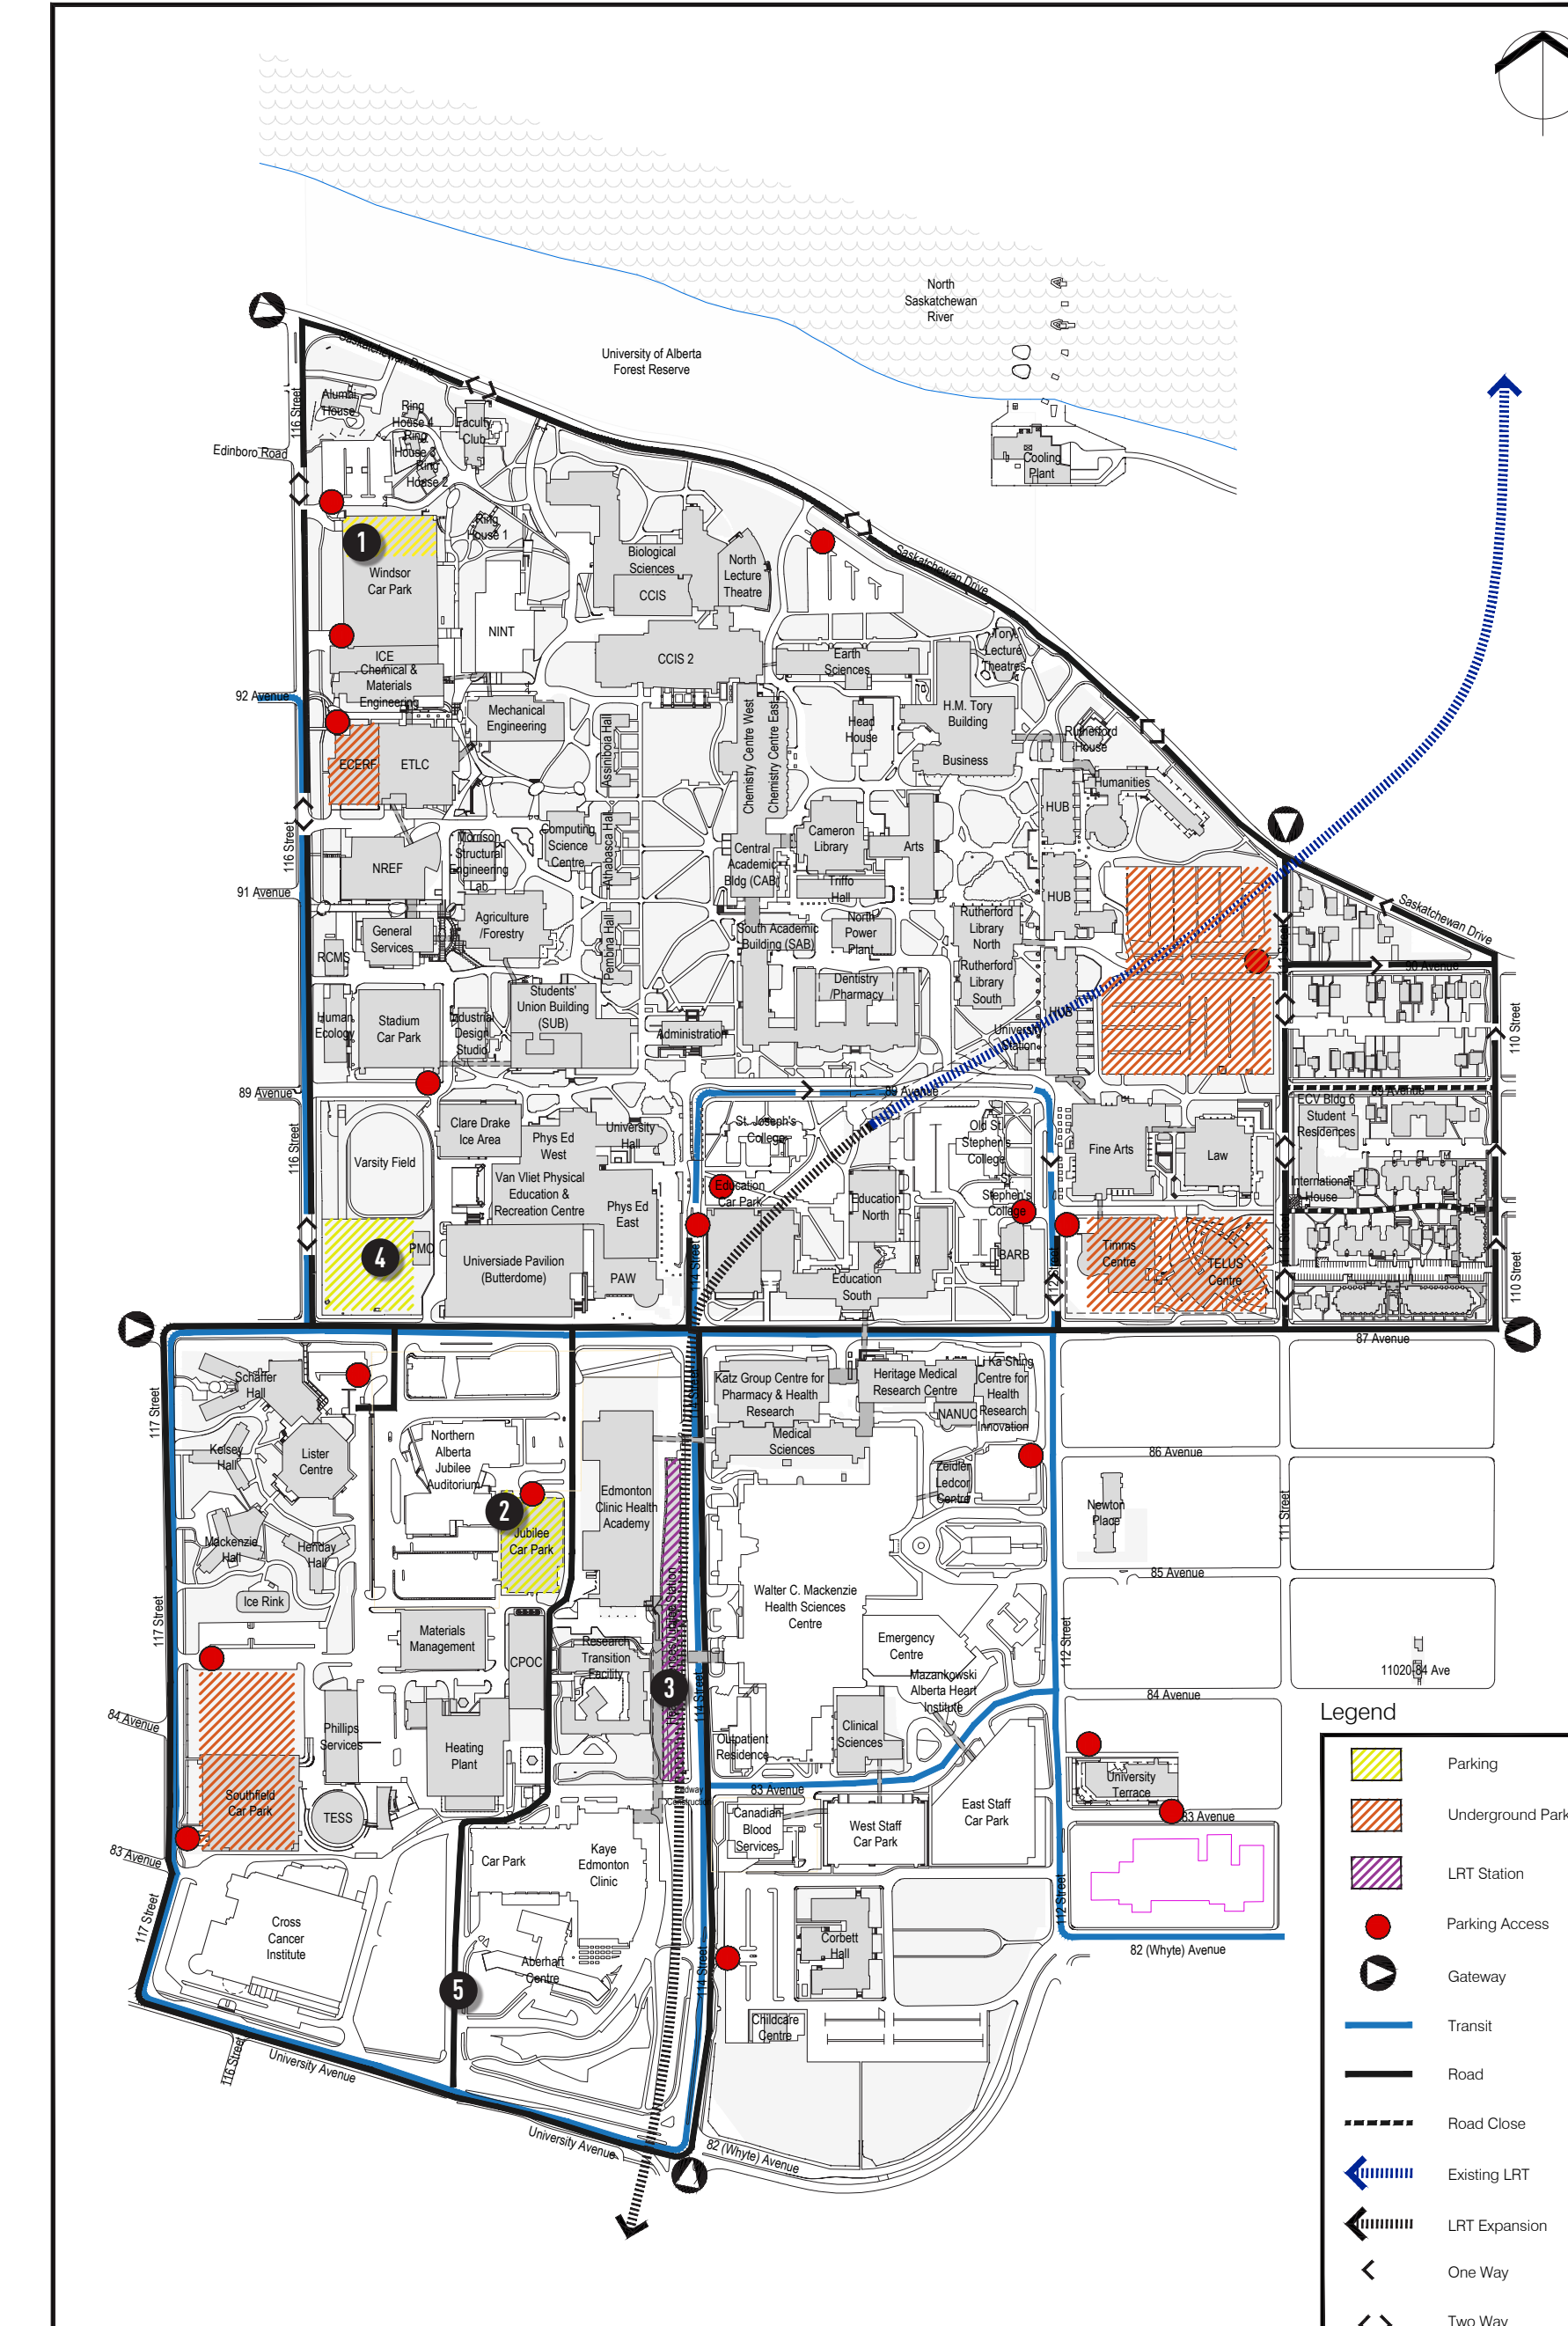

PUBLIC VEHICULAR TRANSPORTATION SYSTEMS / PARKING

TRANSPORTATION SYSTEMS / PARKING

Potential Development Sites as per 2002 LRDP

Construction since LRDP & Development Sites Identified by Current Sector Plans

Proposed Development Sites for 2014 North Campus Amendment

Proposed Transportation Systems / Parking within 2002 LRDP

- The primary automobile access routes to North Campus are 87 Avenue, Saskatchewan Drive, 116 Street and 111 Street, University Avenue and 114 Street. Any improvements to these routes will be planned in consultation with the City Transportation Department.
- Private automobiles access should be restricted to the periphery of campus.

Development and Consultation since 2002

- Windsor Car Park extension
- Jubilee Car Park
- Health Sciences/Jubilee LRT extension completed by City of Edmonton
- Varsity Parking Lot
- New access road [115 St] to Kaye Edmonton Clinic and Jubilee Car Parks

Proposed 2014 LRDP Amendment

- Opportunities to accommodate underground parking include:
- North area of Sector 7
 - University Terrace
 - Zeidler-Ledcor Centre
 - St. Joseph's Residential Development
 - West of Corbett Hall

2002 LRDP STATED

- Travel demand will be addressed through Travel Demand Management (TDM) initiatives including car-pooling, increased transit use and continuing programs for ONECard and U-Pass.
- The extension of the LRT has reduced private vehicle trips and created better connections to South Campus. 89 Avenue will continue its role as the bus transit centre.
- On-going discussions with Edmonton Transit Service will continue to ensure best possible service and solutions.
- Private automobiles access should be restricted to the periphery of campus.

Development & Consultation Since 2002

- LRT was extended by City and the Health Science / Jubilee Station completed.
- Jubilee Car Park and an expansion to Windsor Car Park was completed.
- Temporary surface parking lot was created on south half of Varsity Field.
- The ratio of parking stalls to students reduced from 1:4 to 1:5.
- New access road construction [115 Street] between 87 Ave and University Ave.

Proposed 2014 LRDP Amendment

- Update North Campus Map to include new construction since 2002 and development sites identified by current sector plans:
 - Jubilee Car Park and Windsor Car Park Expansion.
 - Sector 7 – Central District proposed academic facilities to include underground parking.
 - A number of surface lots converted to underground parking with future development.
 - New roads and road closures in Sectors 7 and 8.
- Refresh Transportation Demand Management and discussion with the City to manage and reduce vehicle trips to the north campus.
- On campus parking will be developed with one stall per 5 students.

PEDESTRIAN & BICYCLE CIRCULATION

PEDESTRIAN & BICYCLE CIRCULATION

Potential Development Sites as per 2002 LRDP

Construction since LRDP & Development Sites Identified by Current Sector Plans

Proposed Development Sites for 2014 North Campus Amendment

Proposed Pedestrian & Bicycle Circulation within 2002 LRDP

There are two major roads penetrating campus that strongly affect pedestrian circulation:

- 87 Avenue separates the students residing in Lister Hall from the majority of University facilities and it separates students from the Health Sciences sector from the rest of campus; and,
- 114 Street separates Health Sciences researchers and faculty from major concentrations of parking.
- The large and unpredictable flows of people crossing these thoroughfares impedes pedestrian and vehicular movements.

Internal pedways exist in several locations to enable pedestrian movements between buildings. Given the harsh winters in Edmonton, sheltered pedestrian circulation routes are highly desirable.

Development & Consultation Since 2002

1. 116 Street bike lane added between 87 Avenue and Saskatchewan Drive.
2. Bike share lane added on 87 Avenue from 116 Street to 115 Street.
3. Consultation with City and Alberta Health Services to extend shared bike/roadway along 115 Street from 87 Avenue to University Avenue.
4. 88 Avenue Commons completed.
5. 89 Avenue closed and being designed to be similar to 88 Ave Commons.

Proposed 2014 LRDP Amendment

6. Formalize 115 Street
7. 89 Avenue closure between 110 Street and 111 Street and developed as a commons.
8. Formalize 89 Avenue spine
9. Formalize 114 Street spine
10. Formalize 87 Avenue spine
11. Create pathway through Varsity Field
12. Add north south pedestrian pathway through Sector 8.
13. Add path on east side of North Lecture Theatre.

2002 LRDP STATED

Pedestrian and bicycling routes will be enhanced through and to campus. Existing pedestrian spines will be reinforced and extended and a hierarchy of pedestrian walkways will be developed over time to improve circulation and way-finding.

89 Avenue will continue to be the major east-west pedestrian linkage between 116 Street and 110 Street. It requires further design and upgrade to achieve this role. The north-south spines will be defined to University Avenue in the south (e.g. along 114 Street) and Saskatchewan Drive on the north.

The development of pedways will be encouraged in order to connect buildings and to provide safe passage over busy streets.

As with the pedestrian walkways, bicycle paths will be developed on a hierarchical basis to accommodate through-campus cyclists, as well as intra-campus circulation.

North Campus will be linked to community pedestrian and bicycle systems and therefore to the regional systems as well, e.g. the river valley system.

Development & Consultation Since 2002

- 88 Ave Commons completed as a vehicle free corridor from 110 Street to 111 Street.
- City created dedicated bicycle lanes on 116 Street from Saskatchewan Drive to 87 Avenue.

Proposed 2014 LRDP Amendment

- 89 Avenue Commons: develop 89 Avenue between 110 Street and 111 Street as mixed use for pedestrians and bicycles similar to 88 Avenue.
- 115 Street bike lane: conclude discussions with City to develop 115 Street between 87 Avenue and University Avenue for shared bike lane to connect with City system south of University Avenue.
- Develop a new Alumni Trail system as a cultural/natural heritage walk to connect campus open spaces and provide interpretation to history and legacy of the university.
- Formalize 89 Avenue spine.
- Formalize 114 Street spine.
- Create pathway through Varsity Field
- Add path on east side of North Lecture Theatre to connect to Saskatchewan Drive.
- Add north south pedestrian pathway through Sector 8.

NEXT STEPS

The University of Alberta will be holding a second community wide open house on Tuesday November 19, 2013 to outline proposed amendment to land use. Details about the next open house will be advertised throughout the neighbouring communities.

THANK YOU FOR COMING

Please submit your evaluations and comments in the box provided. Should you have comments to submit after the open house, please visit:

www.communityrelations.ualberta.ca

We will receive comments until Wednesday October 16, 2013.

WELCOME

**NORTH CAMPUS
LONG RANGE DEVELOPMENT
PLAN AMENDMENT
OPEN HOUSE**

NOVEMBER 19, 2013

WHY ARE WE HERE?

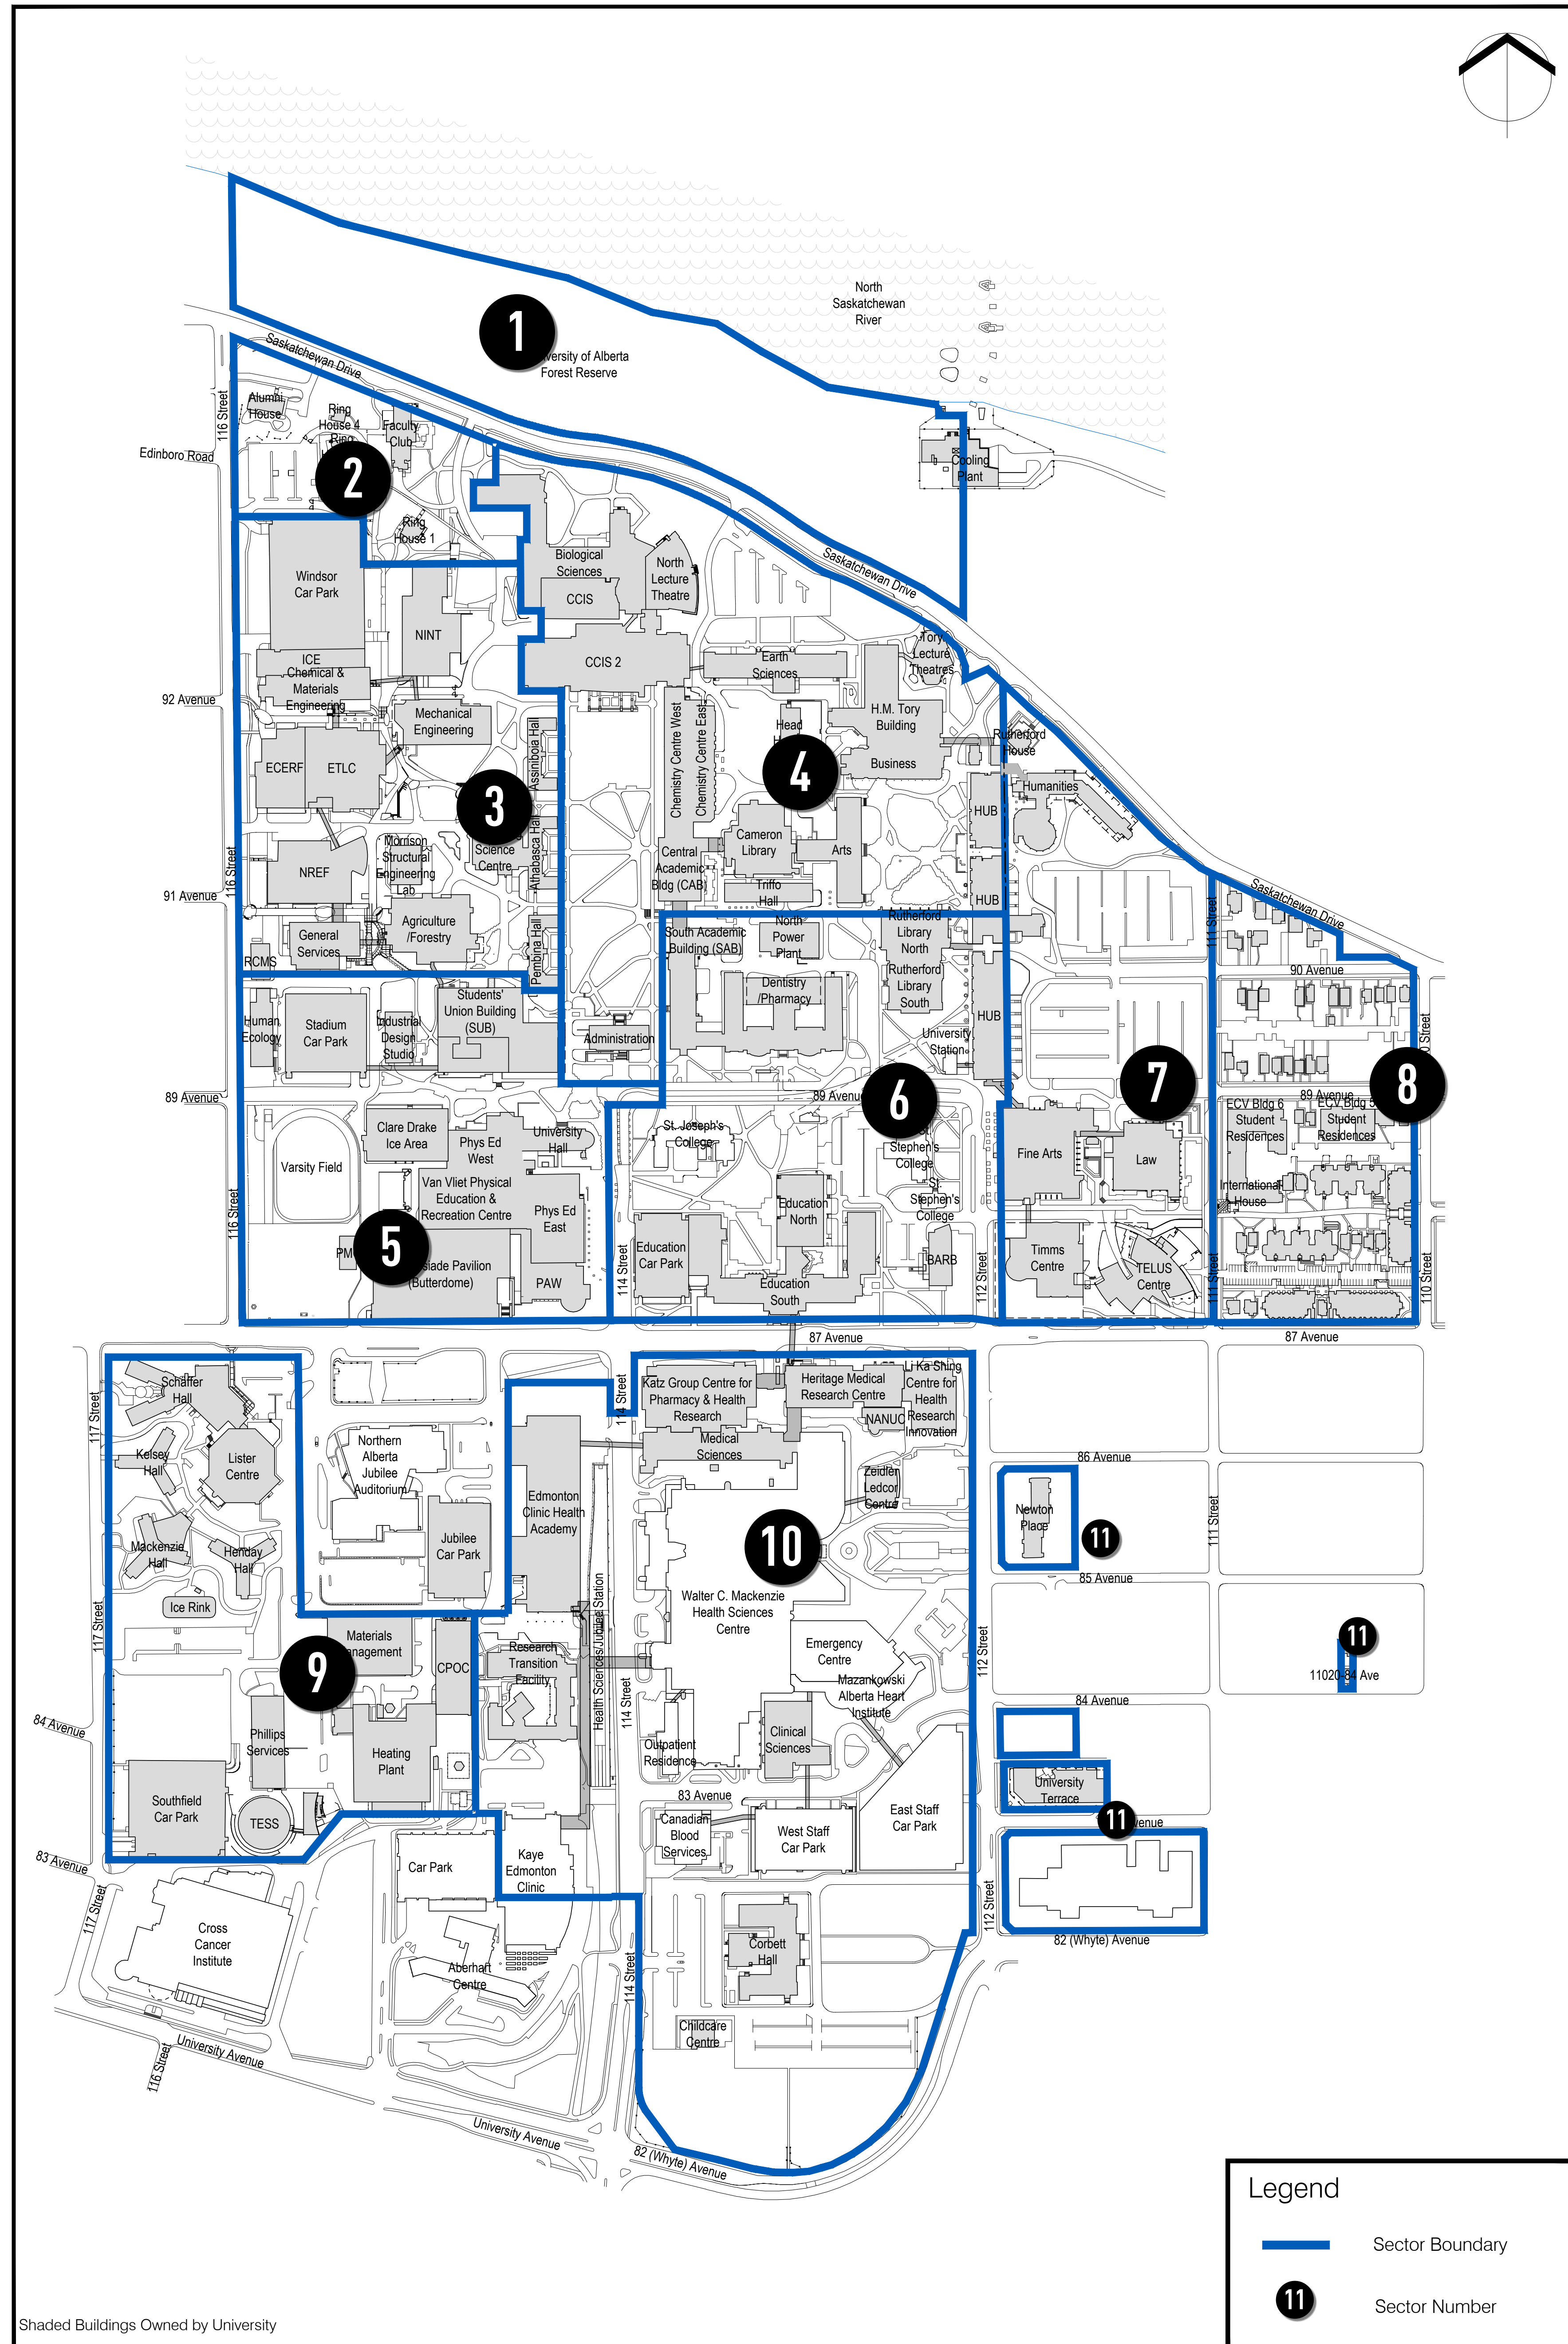

- To learn more about plans to amend the U of A Long Range Development Plan (LRDP) for its North Campus.
- To meet U of A staff involved in the long range planning of the U of A North Campus.
- To provide feedback on the proposed amendments to the LRDP for North Campus.

WHAT IS AN LRDP?

- The University's LRDP is the overall organizing framework for land use and development and is approved by the Board of Governors as the guiding document of physical planning and growth.
- The LRDP identifies and is responsive to a set of Strategic Planning Principles that form the basis for achievement of the goals, objectives and strategies expressed in the Academic, Research and Business Plans (currently referred to as the Comprehensive Institutional Plan).
- The U of A has completed a number of additional administrative implementation plans (sector plans) for each sector to address specifics of development and growth under the aegis of the LRDP and outline additional land-use details.
- The LRDP is developed and amended in accordance with the *Post-Secondary Learning Act* legislation.

NORTH LRDP SECTOR AREAS

SUSTAINABILITY & PLANNING PRINCIPLES

BUILDING FROM THE 2002 LRDP AND VARIOUS SECTOR PLAN DEVELOPMENT

- The University of Alberta, including students, faculty and staff, along with neighbouring communities and other stakeholders, have expressed interest in the principles of smart growth and planned communities. This LRDP amendment reinforces these principles.
- The 2002 LRDP planning principles have laid the foundation in guiding further planning and development of University of Alberta campuses.
- The amended North Campus LRDP document will include changes to Sections 6 and 7 of the 2002 document:
 - North Campus will continue to be the urban campus site of the university of Alberta. This will create one of the densest campuses in Canada, accommodating approximately 37,000 students on around 230 acres.
 - North Campus will be the primary campus of the university for the next 30 years and will be the hub for a majority of the university's faculties and facilities.
- The Land Use and Campus element plans for the North Campus reflect the strategic planning principles of the 2002 LRDP. The subsequent illustrative series of plans captures physical systems and elements that require supervision and management. This section offers system-specific initiatives and guidelines appropriate to those systems.

SMART GROWTH PRINCIPLES

- Pursue a healthy and sustainable campus.
- Realize operational, academic and social benefits to the university and surrounding communities.
- Promote greater connections and communication with the surrounding community.
- Create lasting, meaningful and accessible places.
- While the U of A needs to maintain barrier-free access and service ability to various facilities, it will promote a pedestrian-oriented campus to the extent possible.
- Smart growth appreciates that our campus will need to be phased as each campus develops.

PLANNED COMMUNITIES PRINCIPLES

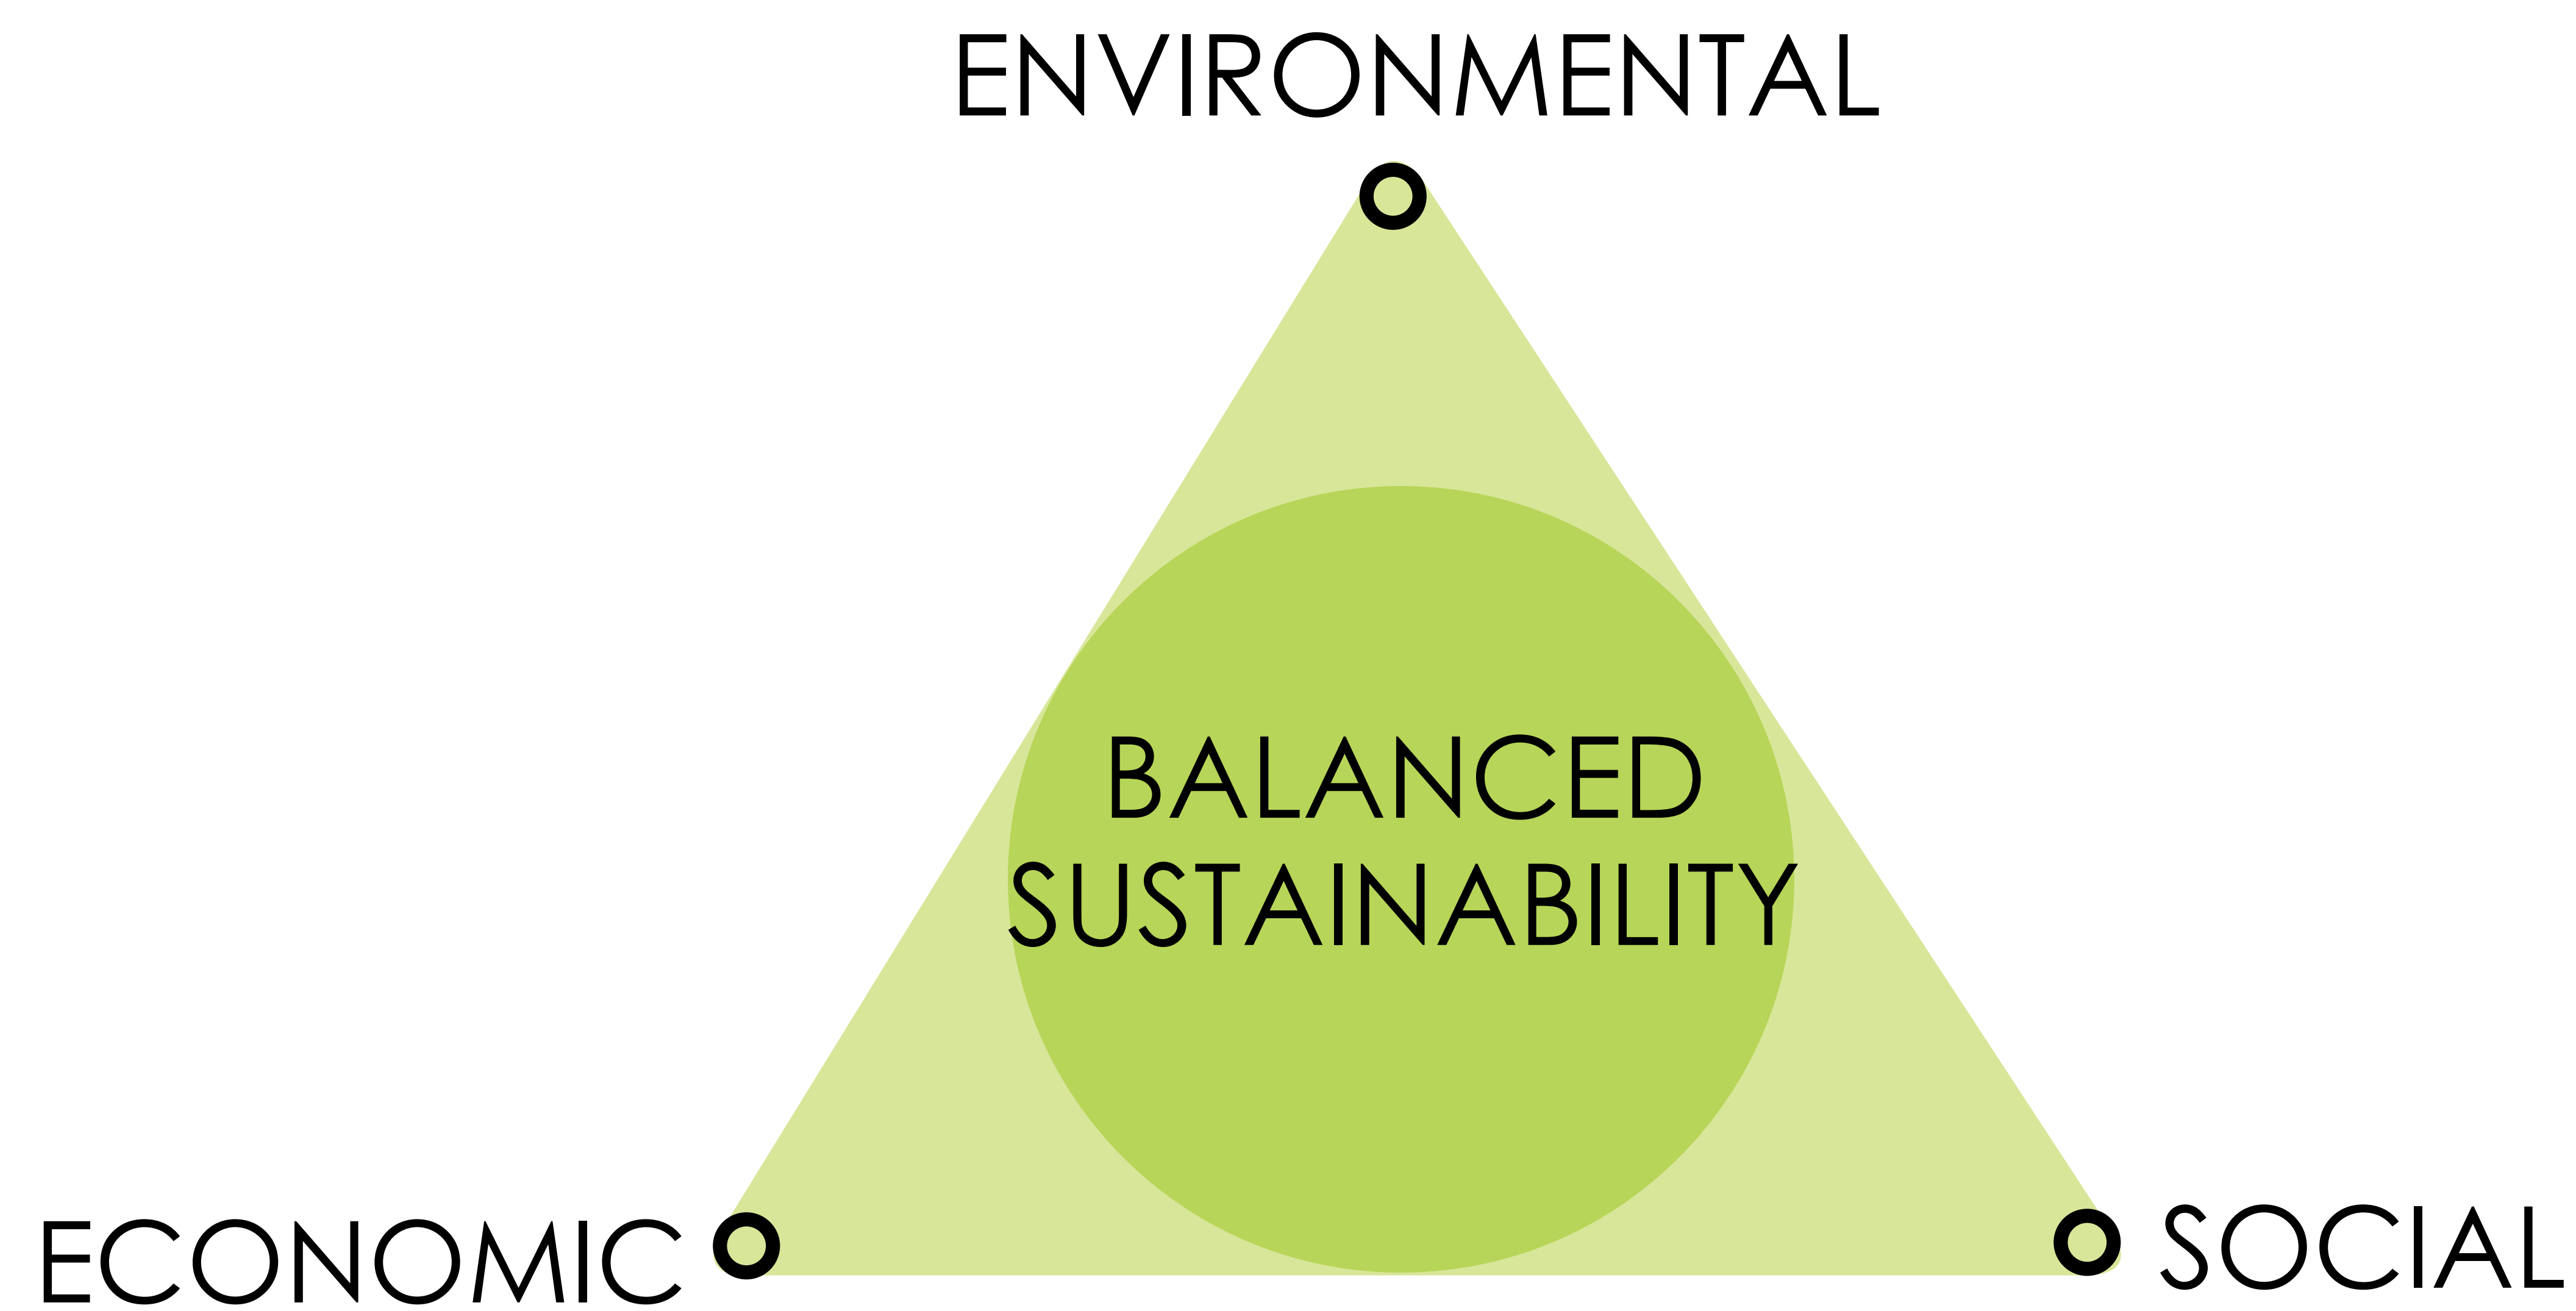

- Our campuses will embody and balance social, ecological, and economic sustainability in every aspect of its design and function.
- Enhancing and building upon the existing sustainability and resource stewardship philosophy of the University of Alberta by balancing the three spheres of sustainability: social, economic and environmental.
- Creating of an academic and residential environment which fosters the energetic exchange of ideas and creates a unique sense of place.
- Promoting opportunities for all U of A campuses to act as living laboratories, utilizing the site for the testing and integration of urban design innovations.
- Providing strong connections with neighbouring communities, allowing for shared amenities and services.
- Supporting and advancing the university's goal of becoming one of the world's top public educational institutions.
- Making optimal use of the university's budgetary resources and partnership funding.

SUSTAINABLE SYSTEMS

North Campus calls for an innovative, sustainable campus based on a triple bottom line approach. The following systems have been identified as components of the sustainable framework for North Campus, and are developed with a series of goals, targets and strategies intended to guide their implementation.

SEVEN SUSTAINABLE THEMES OF DEVELOPMENT:

- Energy efficiency.
- Waste and wastewater management.
- Water and stormwater management.
- Ecology and the environment.
- Transportation.
- Built environment.
- Healthy and complete communities.

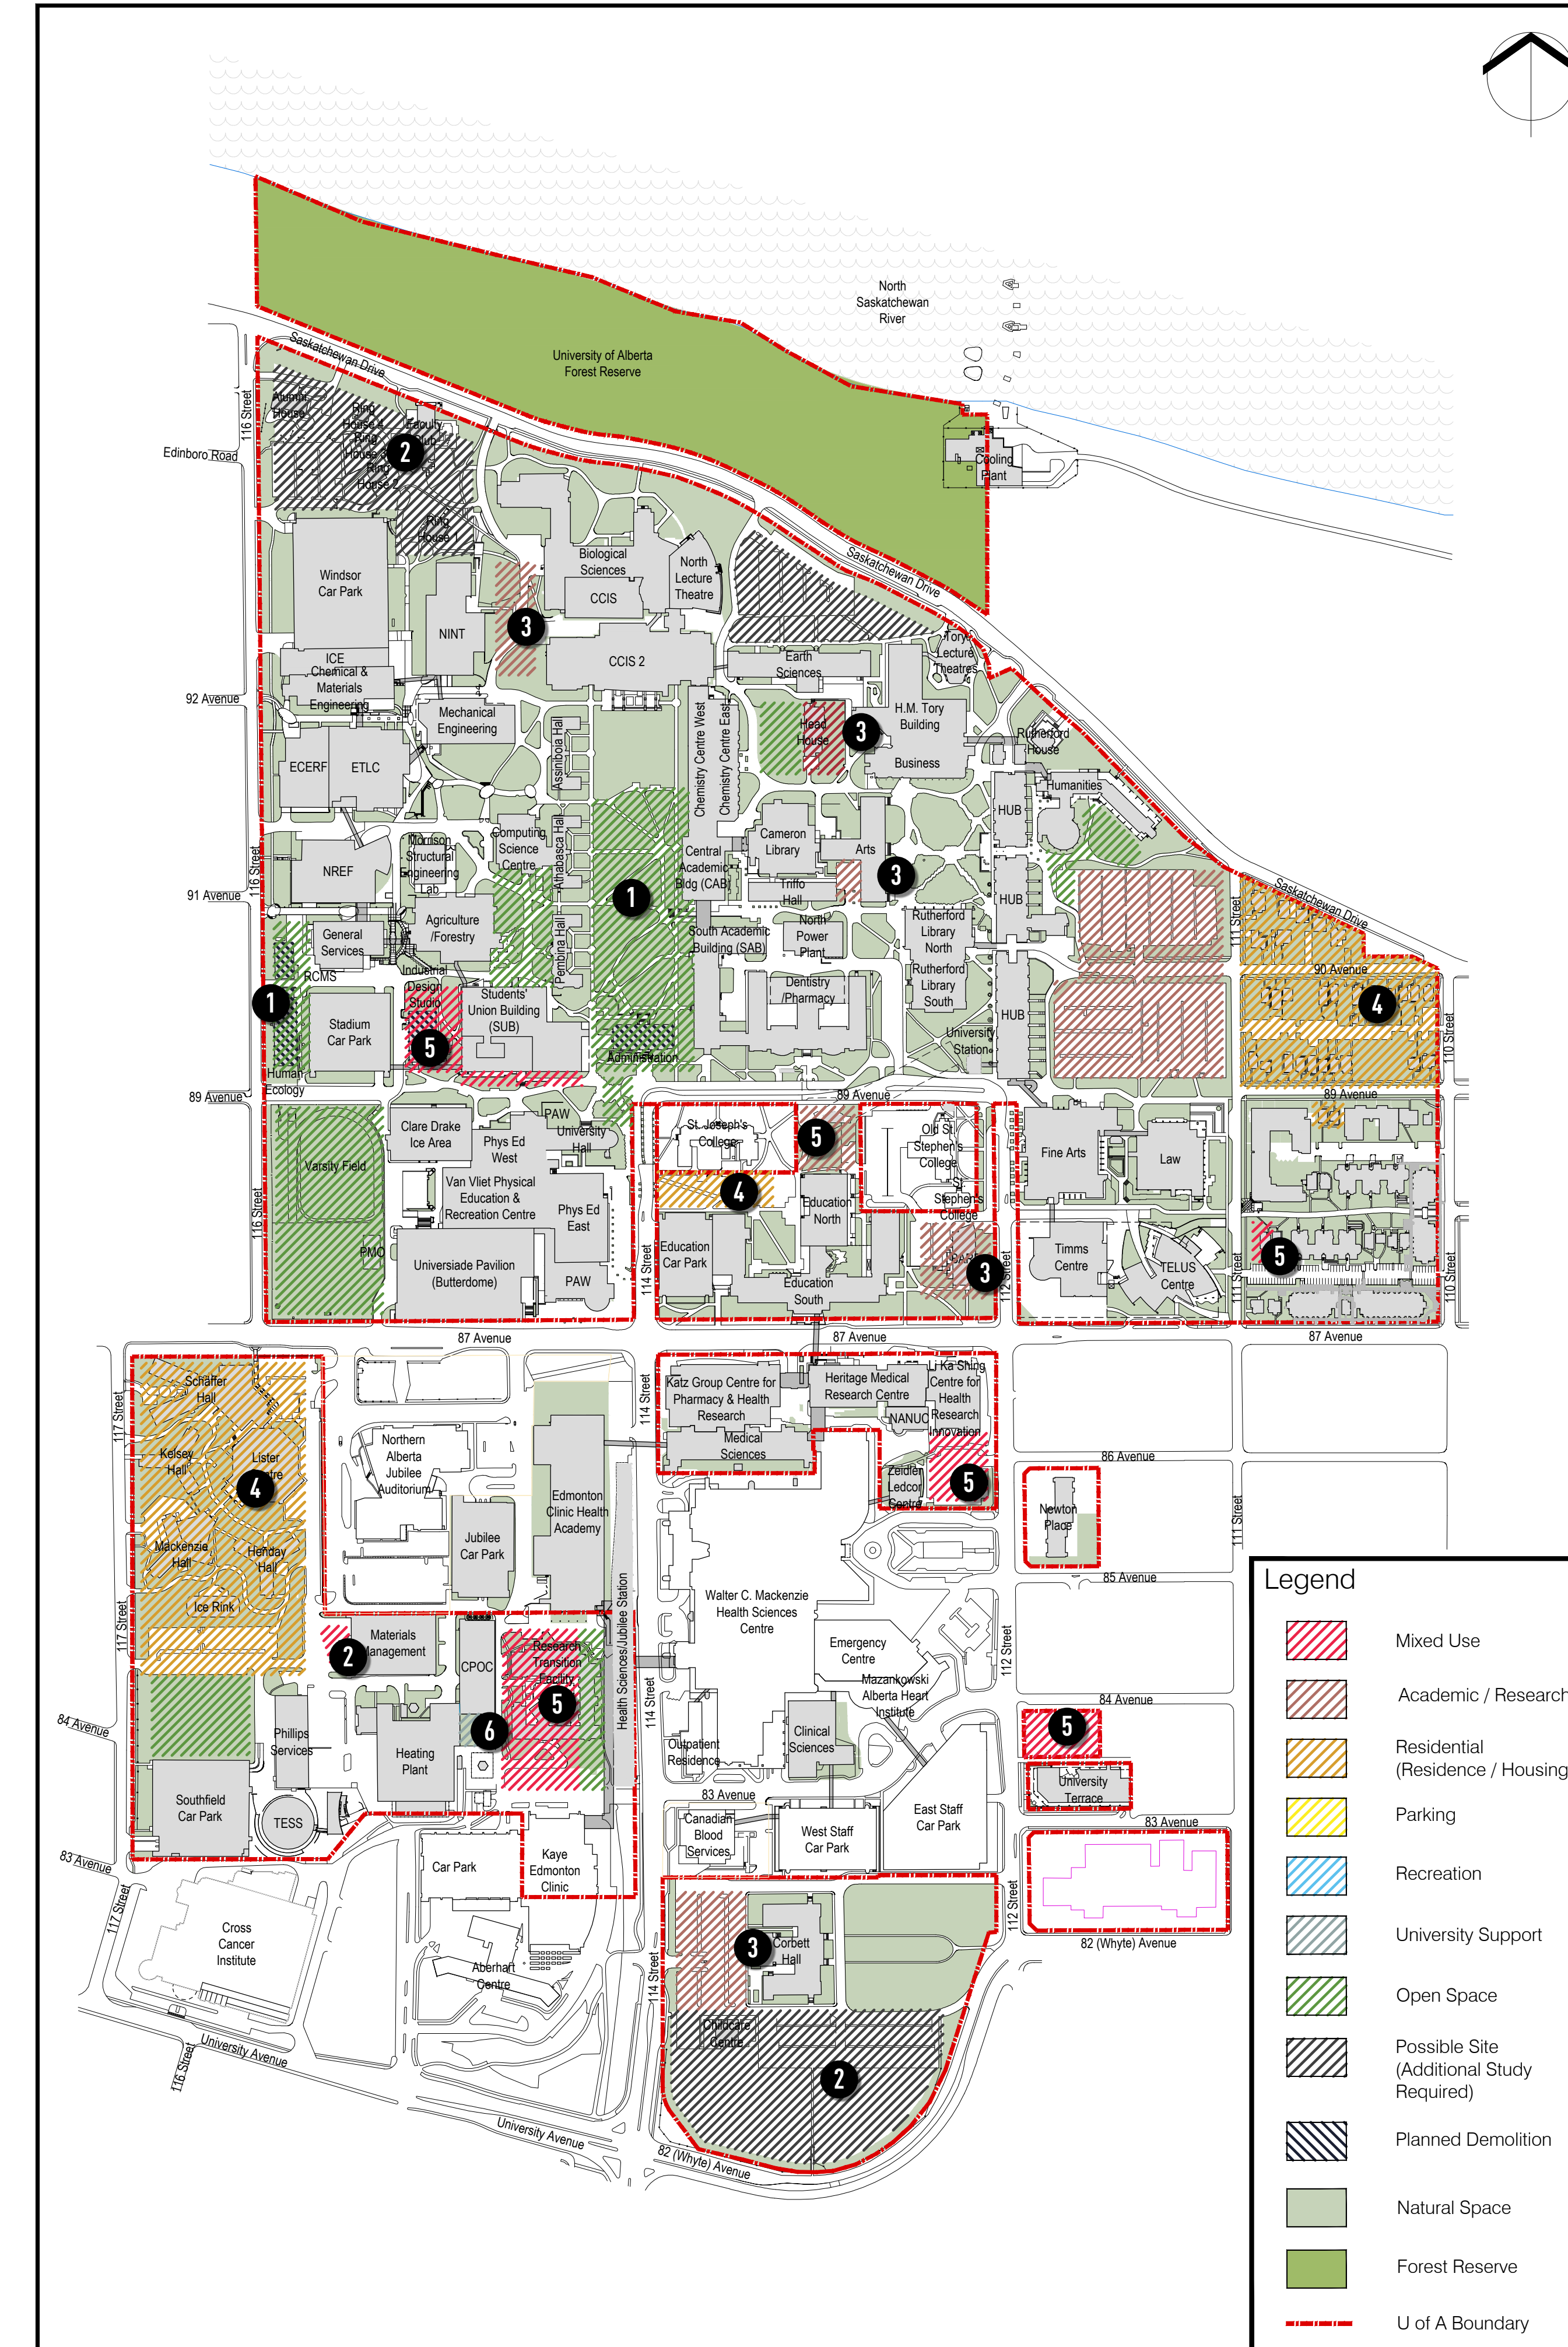

LAND USE NORTH CAMPUS

APPROVED LRDP 2002

PROPOSED LRDP 2013

What has been maintained:

- Nine Strategic Principles from the 2002 LRDP.
- Population of 37,000 students plus associated faculty and staff.
- Campus focus on academics and research.
- Limited public thorough-fare of traffic.
- Pursue a healthy and sustainable campus.
- Create lasting, meaningful and accessible places.
- The University will promote a pedestrian-oriented campus to the extent possible.
- Providing strong connections with neighbouring communities, allowing for shared amenities and services.
- Supporting and advancing the university's goal of becoming one of the world's top public educational institutions.

What has changed:

- 1 New Open Space development to establish consistent set back along 116 Street and new pedestrian friendly zone within campus.
- 2 Possible Development Sites (where additional study is required)
- 3 Revise and/or formalize location for Academic/Research.
- 4 Residential expansion to facilitate a portion of university's target for purpose built housing for 25% of full-time equivalent students.
- 5 Mixed-Use sites which can support any combination of academic, residential, and commercial activity.
- 6 University Support to accommodate utility plant expansion.

LAND USE:

The University of Alberta is a successful post secondary teaching, learning and research institution since its founding in 1908. Its North Campus has remained in continuous development, use and renewal for over 100 years to serve its expanding academic mission and vision.

Land use purposes remain consistent and are identified into categories, including: academic/research; mixed use; residential (residence and housing); parking; recreation; university support; open space; and natural reserve.

To be effective, a land use plan needs to be grounded in sound smart growth and planned community principles. The land use plan also needs to engender resilience in adapting to changing demographics, space needs, functional programs, evolving pedagogy, social and flexible learning space requirements, and also changing mandates and expectations from the Ministry of Enterprise and Advanced Education, as well as funding partners and requirements.

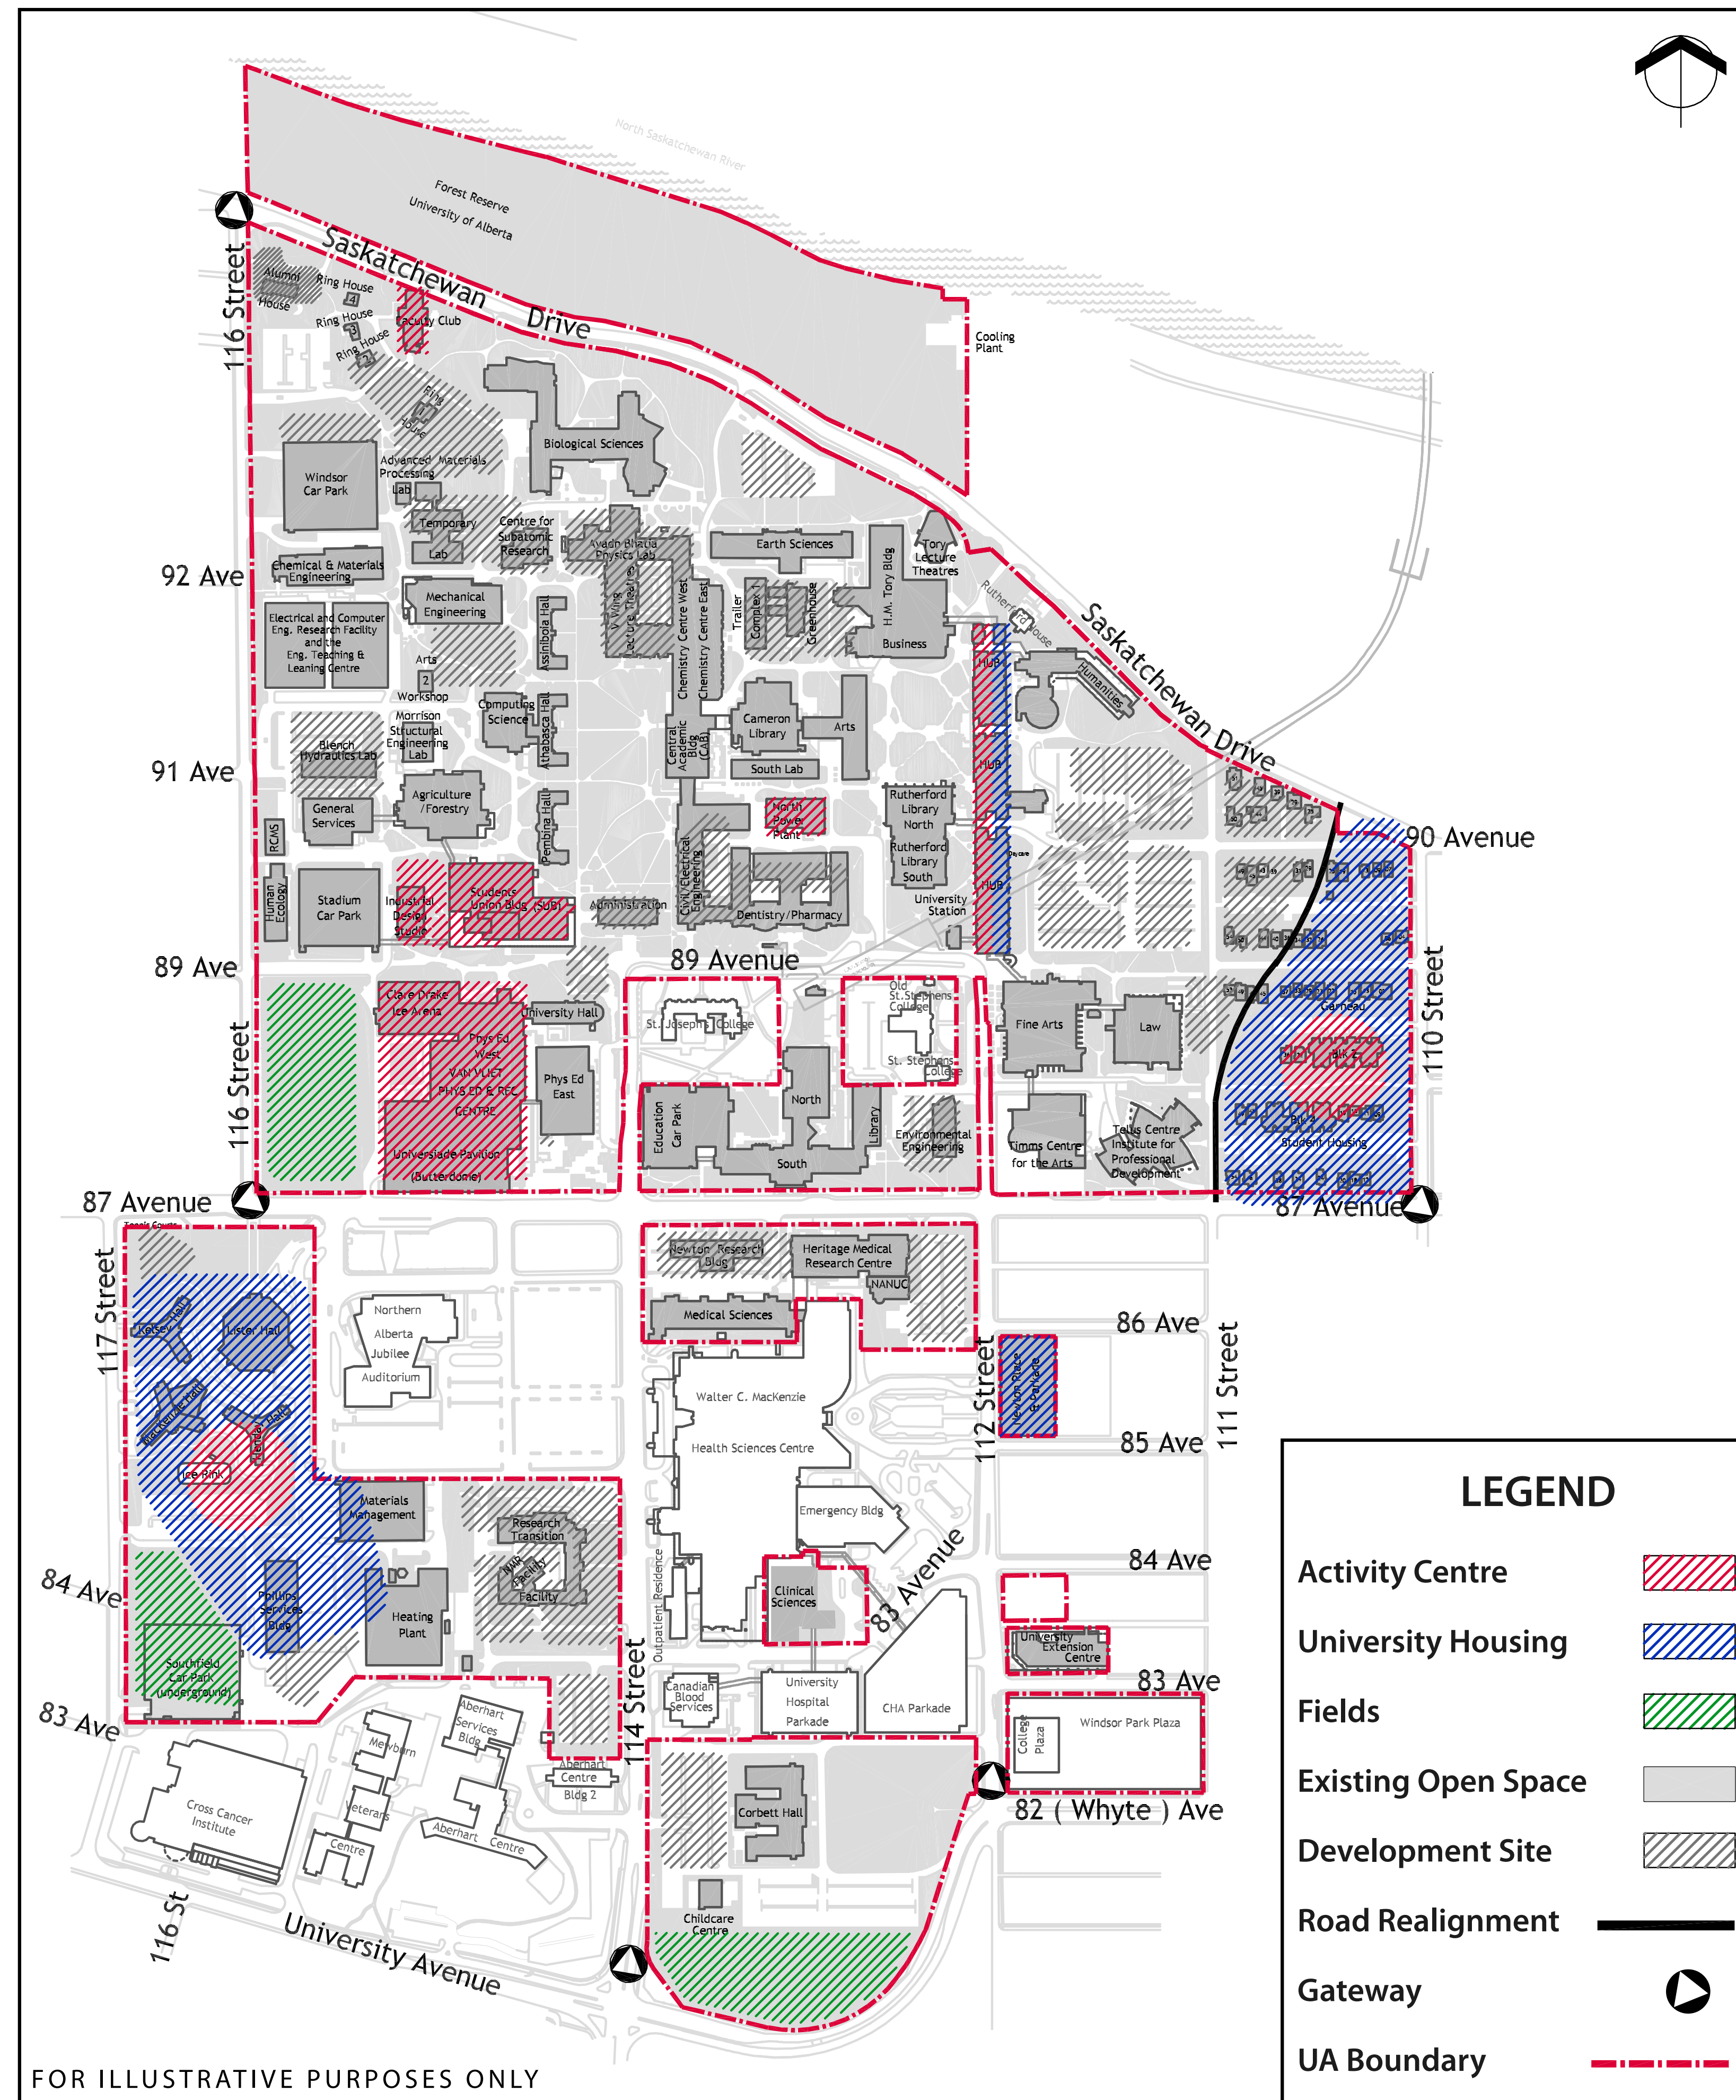

The resultant aspiration is a healthy and complete community that adequately provides the necessities of work, play and daily life for its inhabitants and users. It develops a community that locates its various centres of activity in a connected, efficient and logical manner to support a high degree of livability and functionality.

A healthy and complete campus means a mixture of land uses: teaching and research, residential, recreational and service uses, integrated within buildings and across campus properties. It means having a campus where students, faculty and staff can feel at home and provide for their daily campus needs. It also pertains to how North Campus interacts with its surrounding neighbours.

CAMPUS LIFE & HOUSING

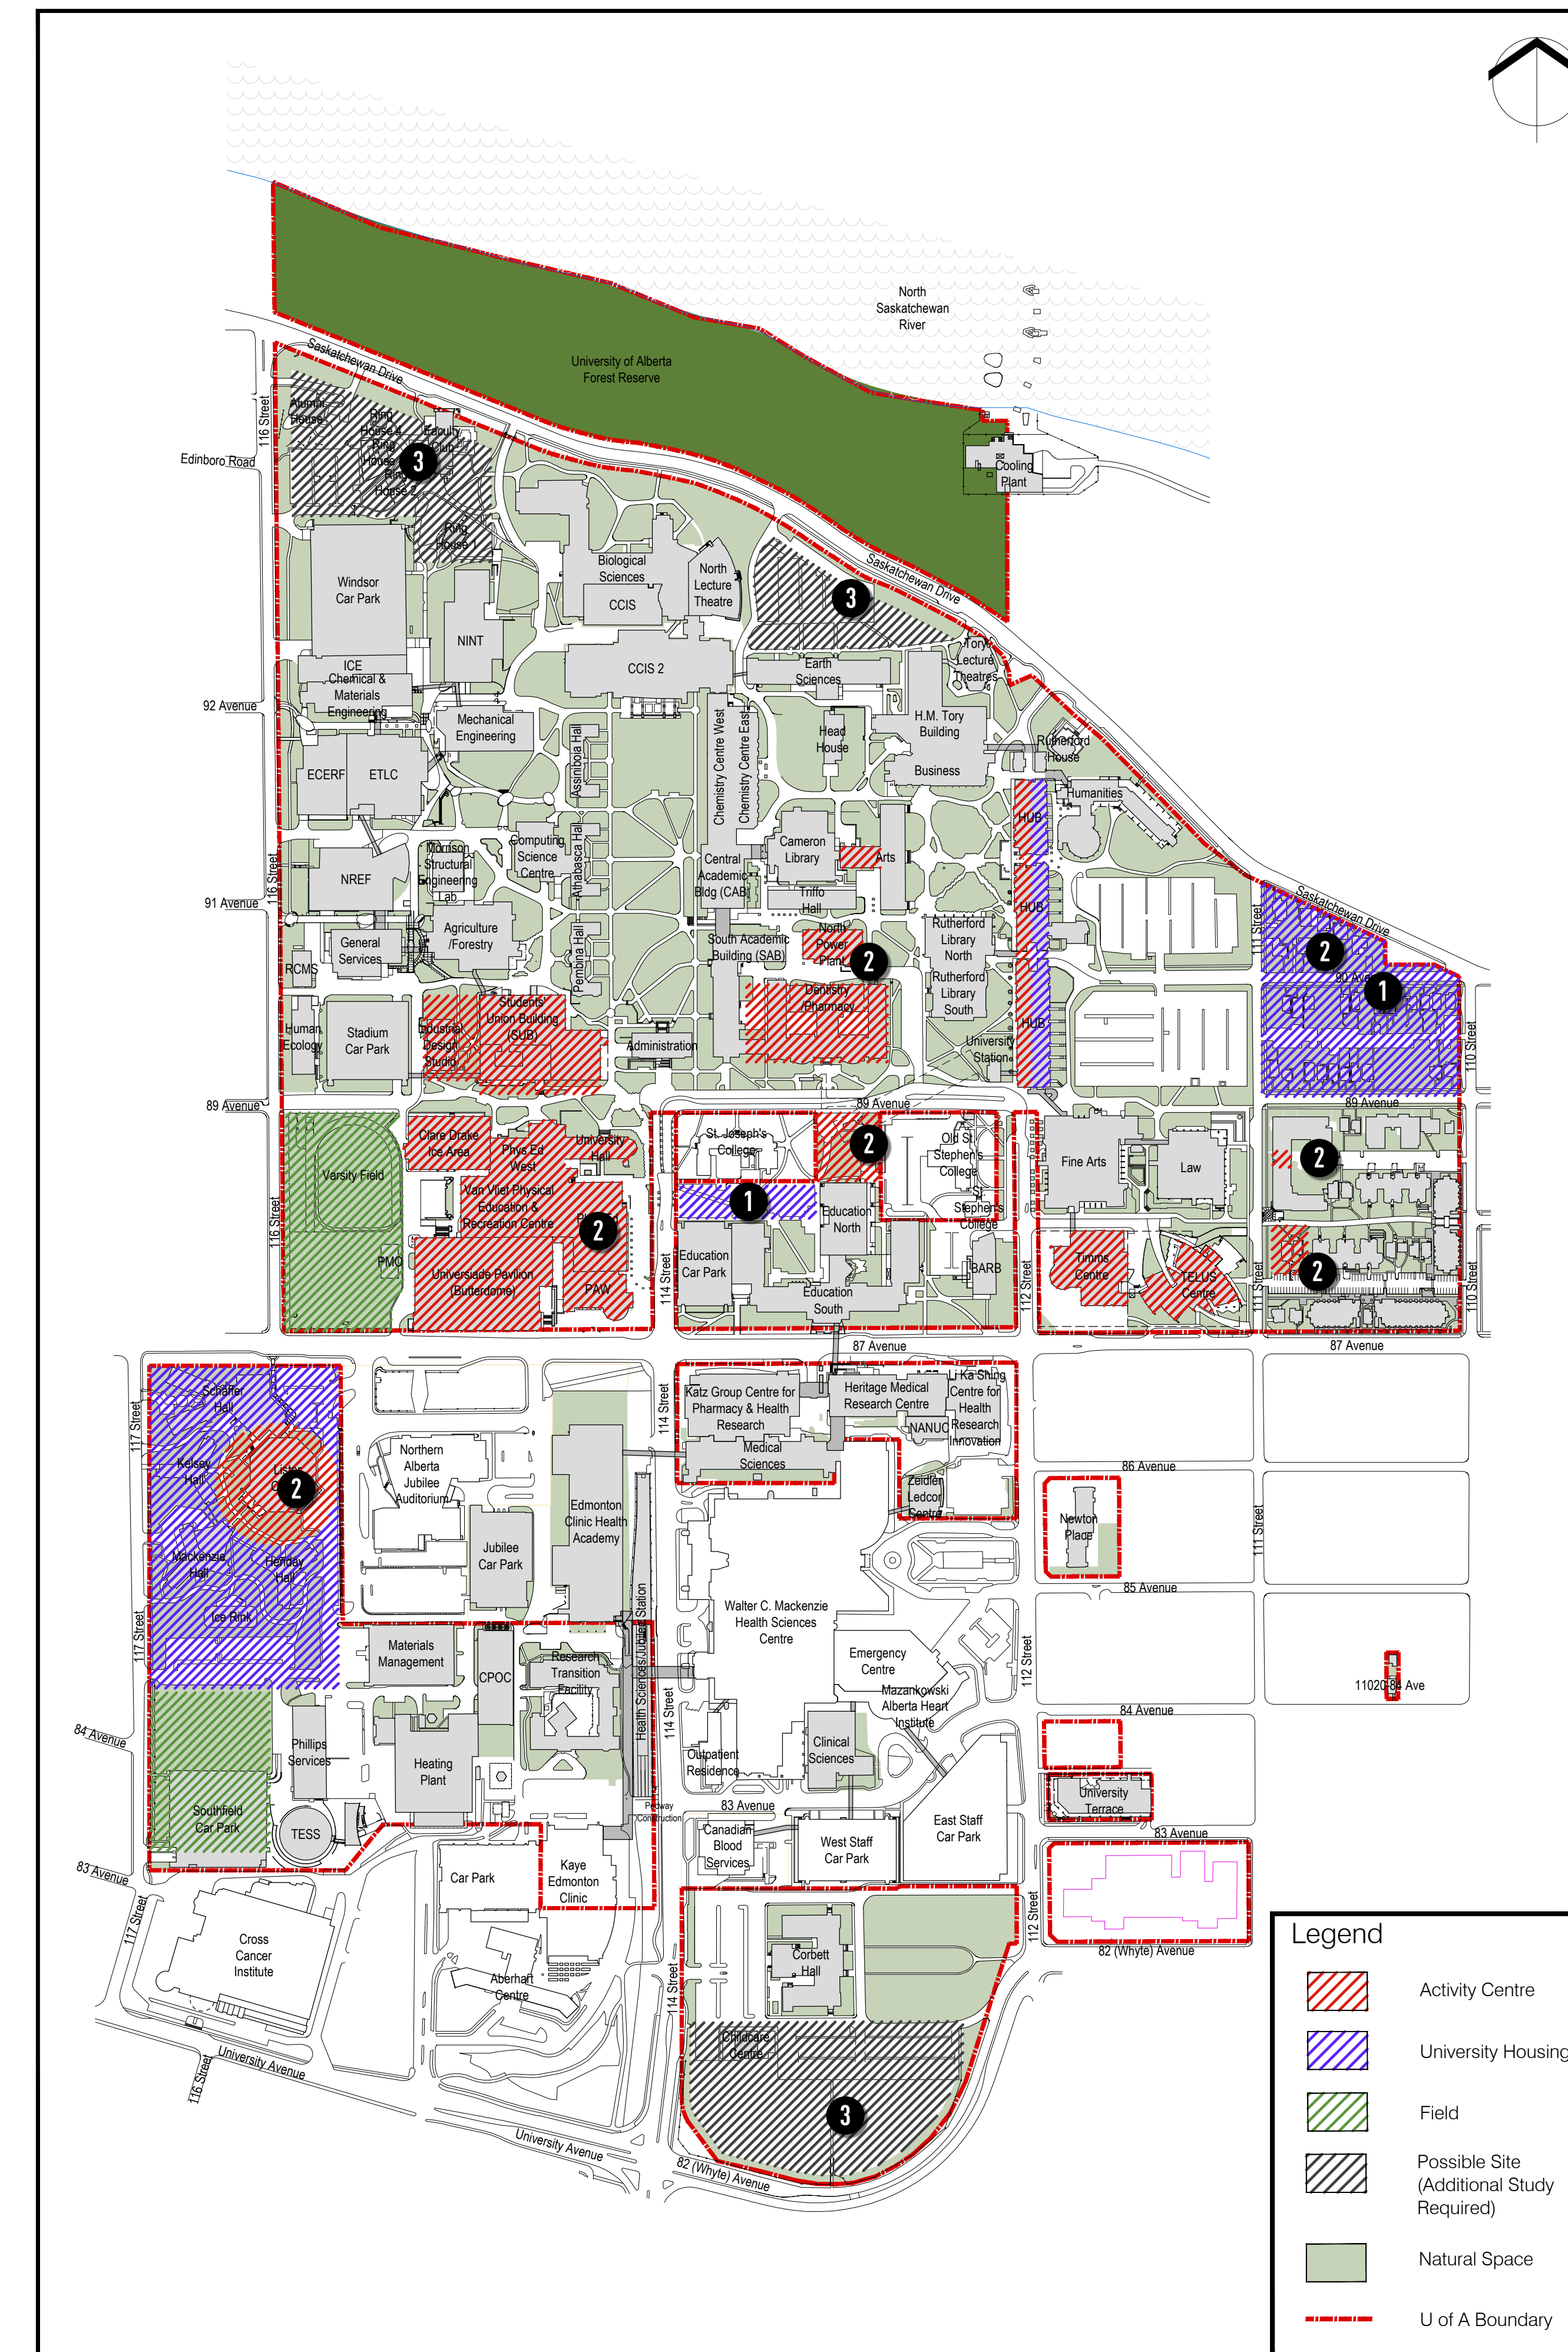

APPROVED LRDP 2002

What has been maintained:

- Campus life opportunities will be accommodated and expanded including student housing, recreation and leisure and student services.
- Housing that incorporates student life, recreation and leisure facilities will be encouraged.
- More recreational facilities will be required for 37,000 students than can be accommodated on North Campus. The shortfall must be developed on South Campus to keep pace with increasing enrolment.
- The commercial and retail functions that support urban campus will also be encouraged on campus.
- East Campus Village, HUB Mall, and Lister Centre remain focal points for students housing.

PROPOSED LRDP 2013

What has changed:

- 1 Expanded / modified student housing development zones.
- 2 New or proposed campus amenity centres.
- 3 Yet to be determined as additional study required.

CAMPUS LIFE & HOUSING:

Universities are institutions of purpose and place, established to nurture the development of students. Beyond purpose built facilities for academic purposes, the connectivity of educational community manifests itself through the campus residential and campus life experience.

Supported through research and evidence-based design, the concepts of campus life and housing program aspire to “use campus residences to augment, complement, and enrich student’s academic success and experience”. Source: (Kuh, G., Kinzie, J., Whitt, E., & Associates (2005). *Student Success in College: Creating Conditions that Matter.*)

Good planning for student residences necessitates careful integration with recreation, leisure and student services, as well as neighbouring community resources and amenities. Residences will be planned and designed to function as components of campus neighbourhoods underpinned by sound urban planning and design principles that foster active street life and energizes an integrated community, consistent with smart growth principles.

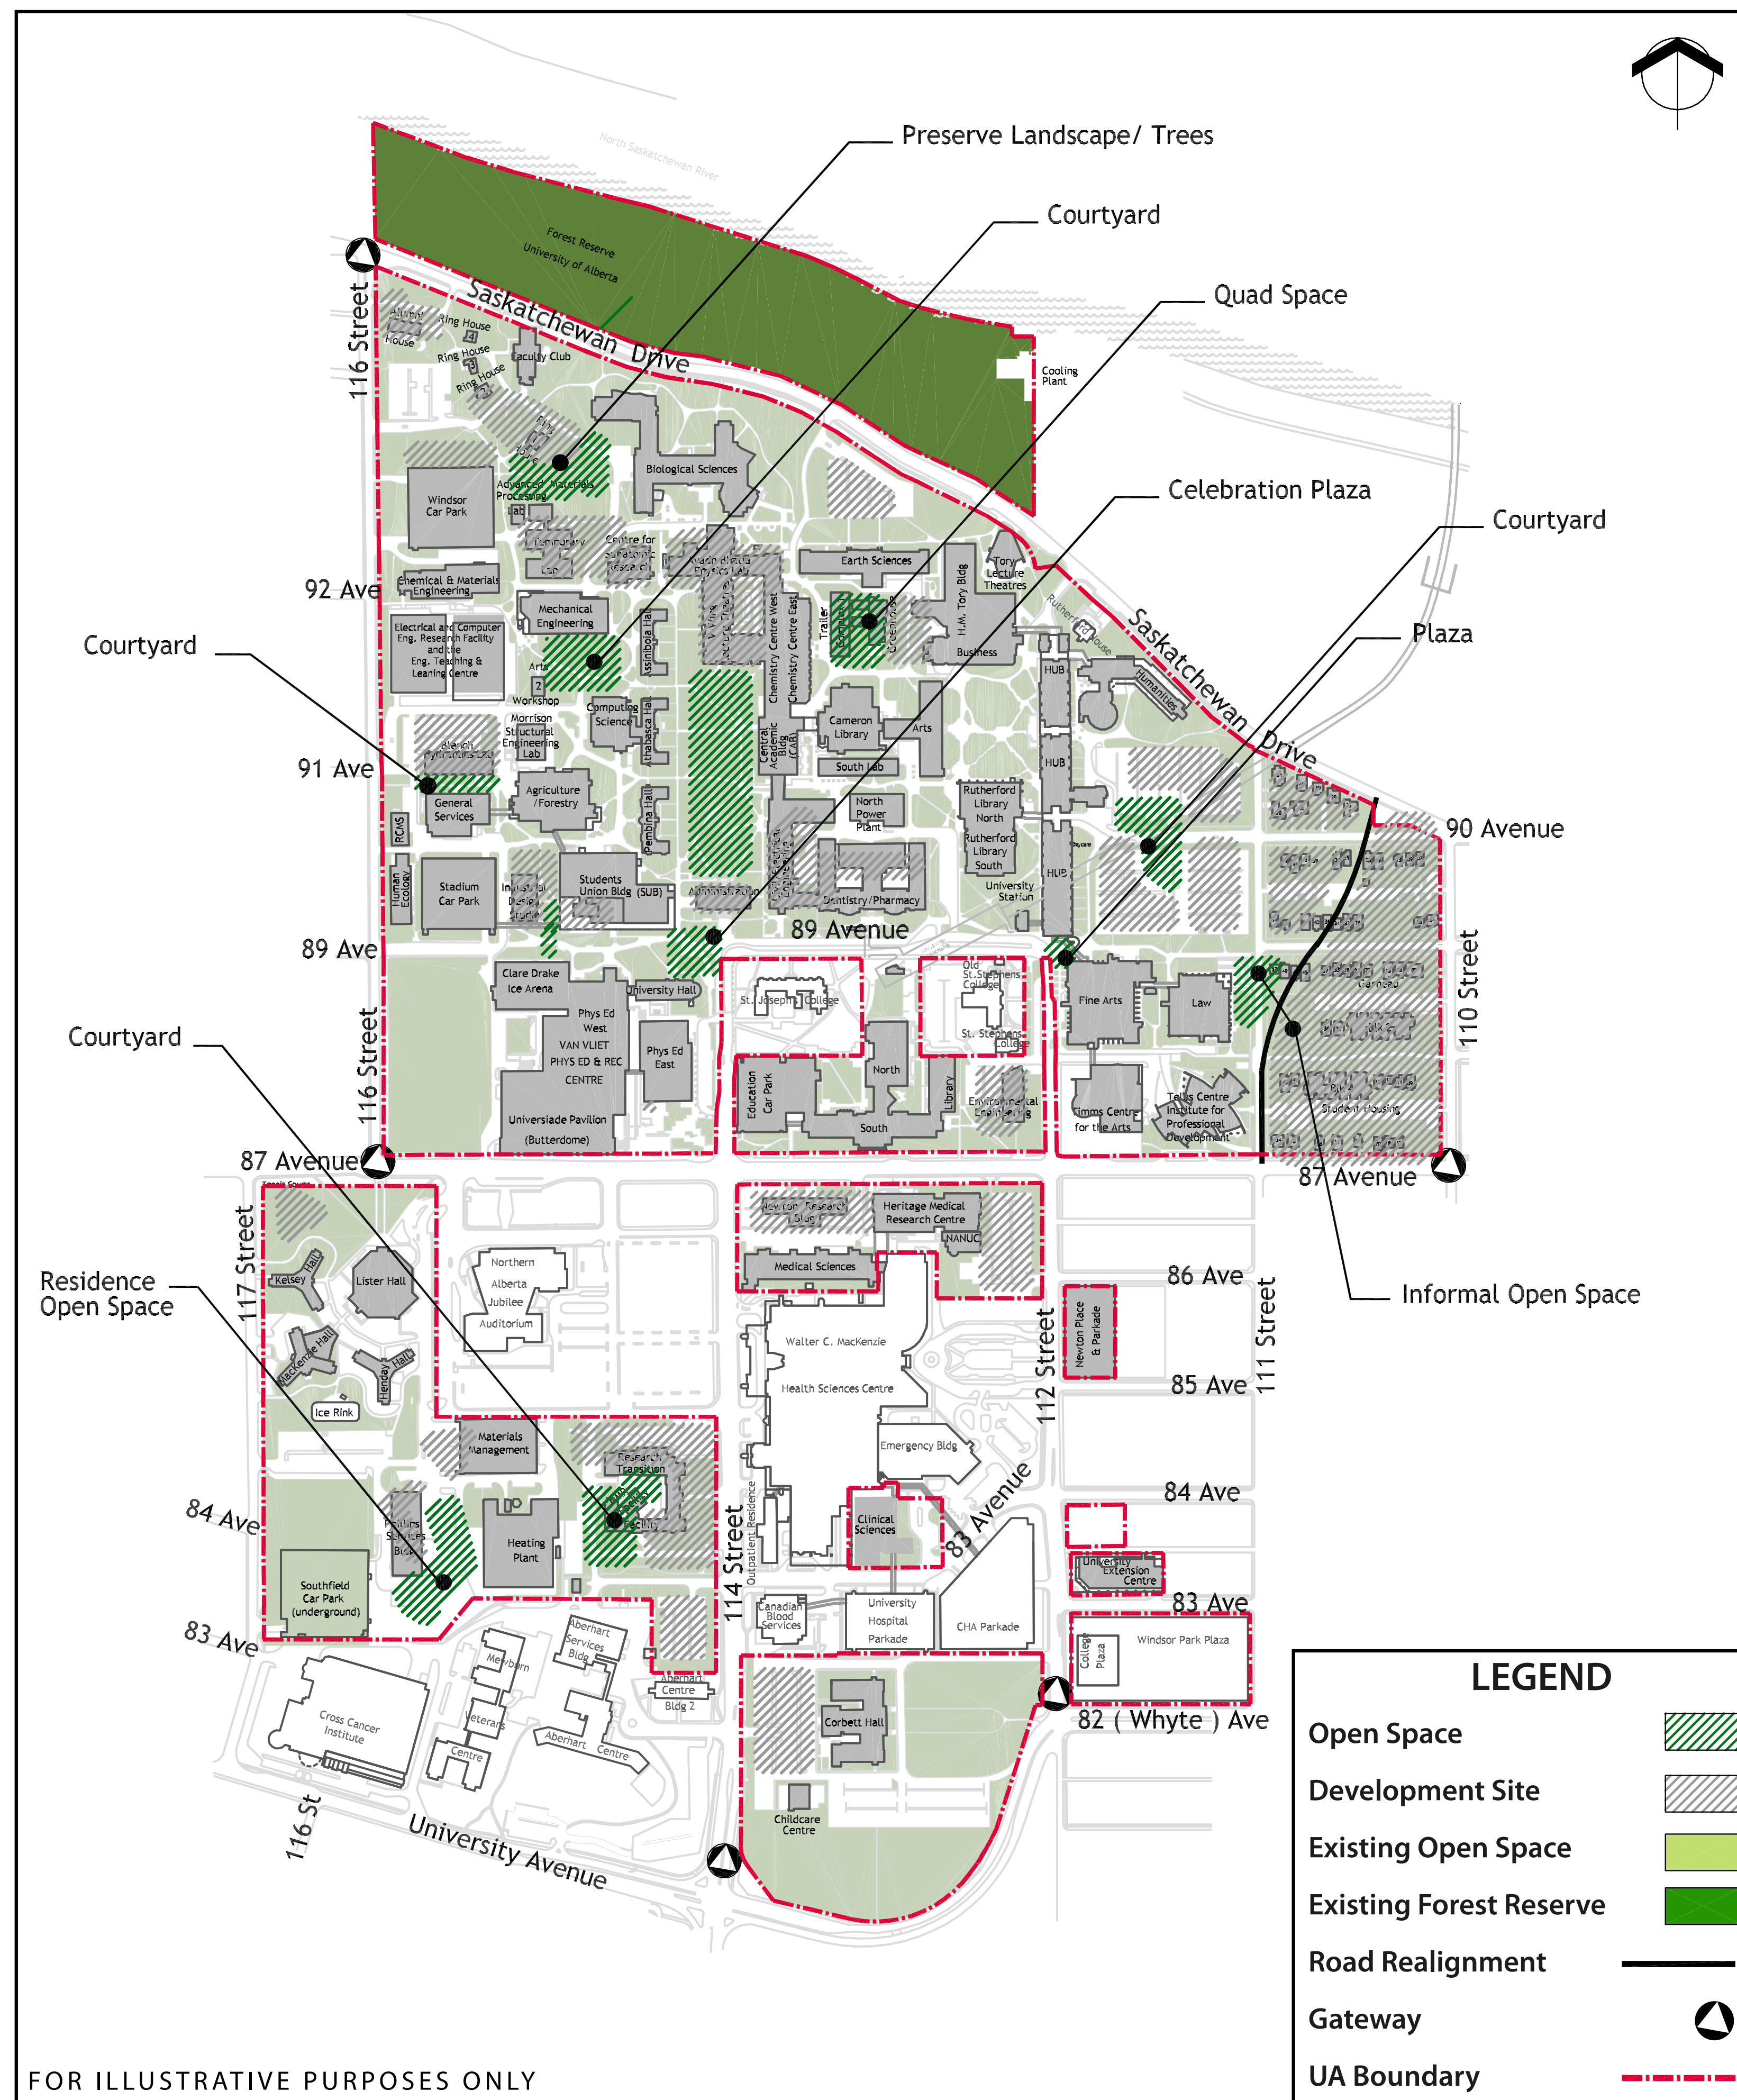

Four primary North Campus residential neighbourhoods are identified: Lister Centre; East Campus Village; HUB Mall, and St. Joseph’s. Among the goals of the university will be to ensure sufficient and quality student housing for up to 25% of full-time equivalent students.

There are also multiple centres of campus life distributed throughout North Campus. However, a concentrated zone along 87 Avenue and 89 Avenue is being developed to provide a safe and active day and night time active corridor. This includes Lister Centre, Varsity Field, the Universiade Pavilion, the Van Vliet Centre, the PAW Centre, the Students’ Union Building, the repurposed Dentistry/Pharmacy Building, the North Power Plant, future Gather Place, Convocation Hall, HUB Mall, Timm’s Centre for the Arts, Telus Centre, and a future East Campus Village amenities building.

OPEN SPACE SYSTEM

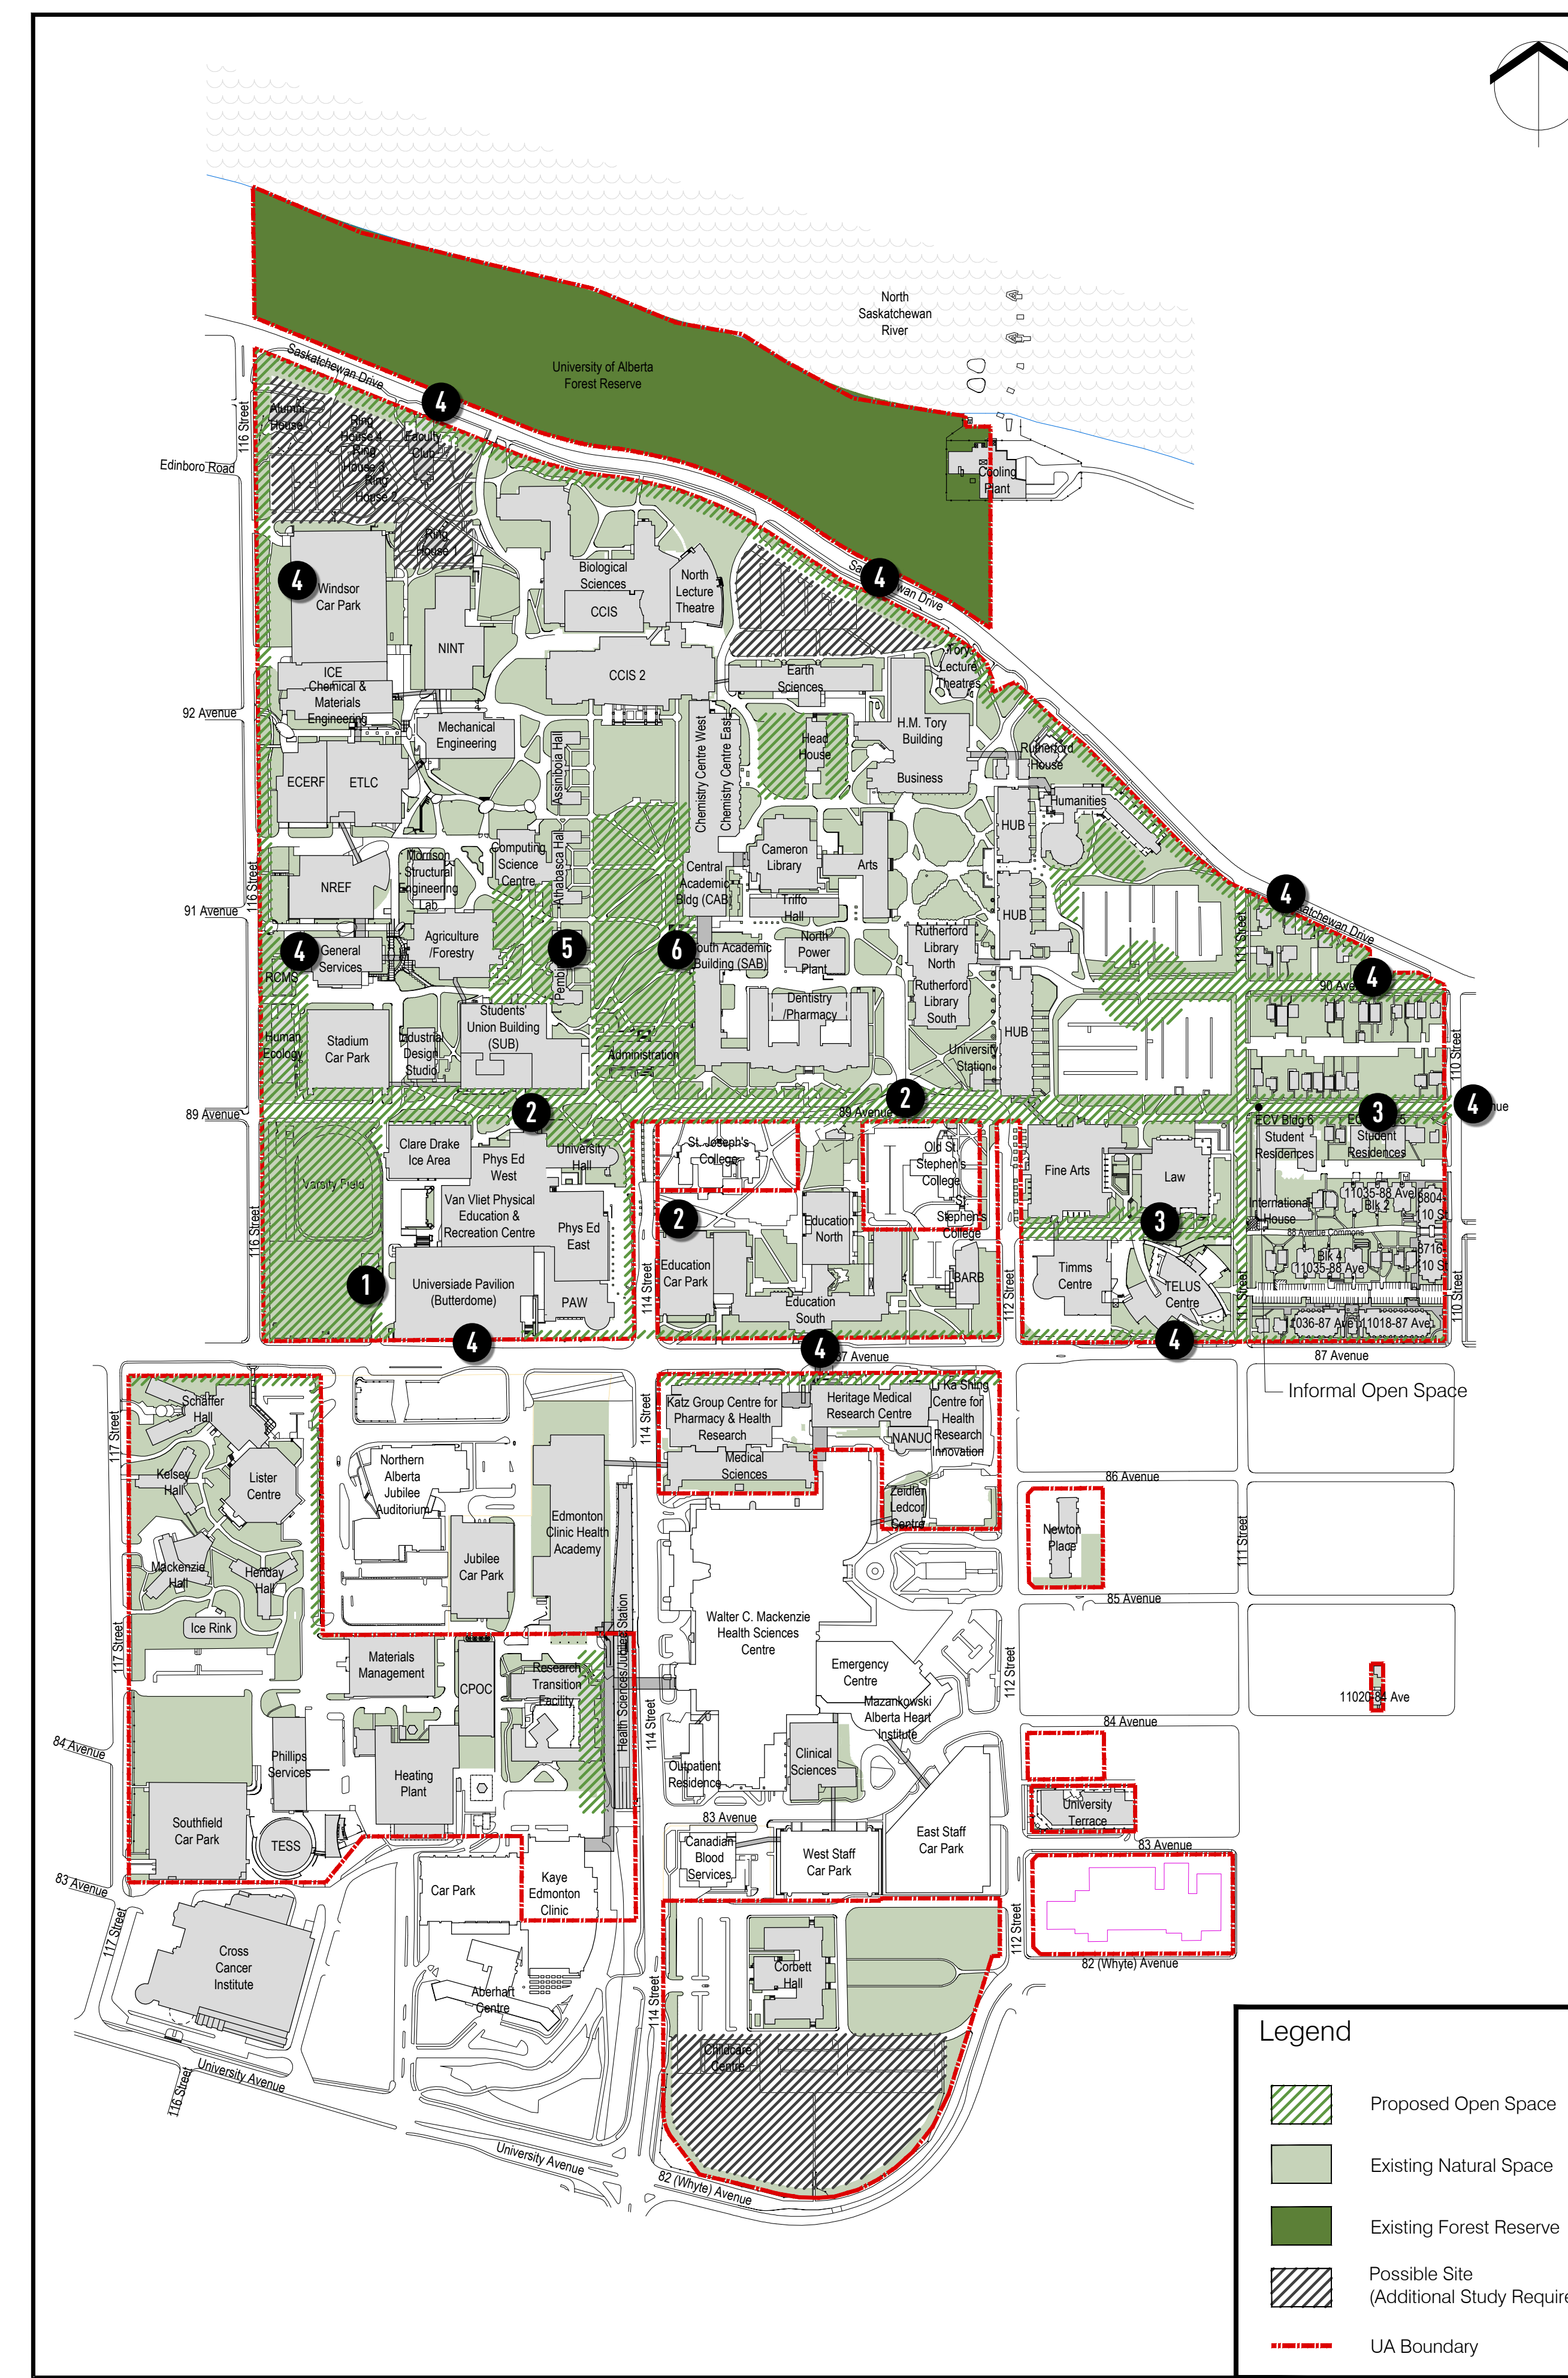

APPROVED LRDP 2002

What has been maintained:

- New open spaces are to be included in all development and redevelopment sites.
- Natural Forest Reserve as well as other sites/locations identified as significant by the university will be preserved.
- Existing significant open spaces will be retained and reinforced whenever possible.
- Open spaces are to be planned with each building project.

PROPOSED LRDP 2013

What has changed:

- 1 Remove parking lot and create new park/field.
- 2 Formalization of pedestrian friendly areas along 114 Street to Quad and 89 Avenue from 116 Street (Windsor Park) to 110 Street (Garneau).
- 3 Closing of 89 Avenue to private automobiles and creation of pedestrian/bicycle commons.
- 4 Formalization of naturalized transition zone between the university and adjacent communities and major roads.
- 5 New open space development coinciding with relocation of SUB loading dock.
- 6 Redevelopment of Quad in response to Administration Building removal and desire for improved east/west access.

OPEN SPACE SYSTEM:

The campus open space system is composed of tree-lined boulevards, walkways, paths, quads, courtyards, commons, plazas, building entries, sculptures, art, commemorative plaques, lights and various landscape features in addition to open fields and active recreation areas. Together, it is a medium that connects individuals to the present and past experiences and achievements of the university in the social, historical and emotional realms.

The campus open space system is the connectivity system for the entire university campus by balancing increased density, improving livability and reinforcing a sense of community. It underpins and supports the public realm where campus life, activities, rituals and celebrations of the institution occur. In addition, it provides the necessary circulation movement, air, natural light, cultural and natural landscapes, contributing to the health and wellness of the university's physical space. Its physicality, geographic spatial breadth, connection to the history, legacy and community building give the campus a complexity of meaning, a sense of place and identity unique to this campus.

Campus open space demonstrates the university's commitment to environmental stewardship, support of the City of Edmonton's Wintercity Strategy as well as smart growth principles of developing and building a healthy community for our campus, neighbouring communities, and the general public.

On the experiential dimension, a well-developed campus open space system extends gestures of hospitality and welcome to greet its occupants, new recruits and returning alumni. As such, the articulation, preservation, development and integration of various open spaces into a coherent campus to support formal and informal place-making activities are the ultimate aspirations of a campus open space system.

PUBLIC VEHICULAR TRANSPORTATION SYSTEMS / PARKING

PUBLIC VEHICULAR TRANSPORTATION SYSTEMS / PARKING:

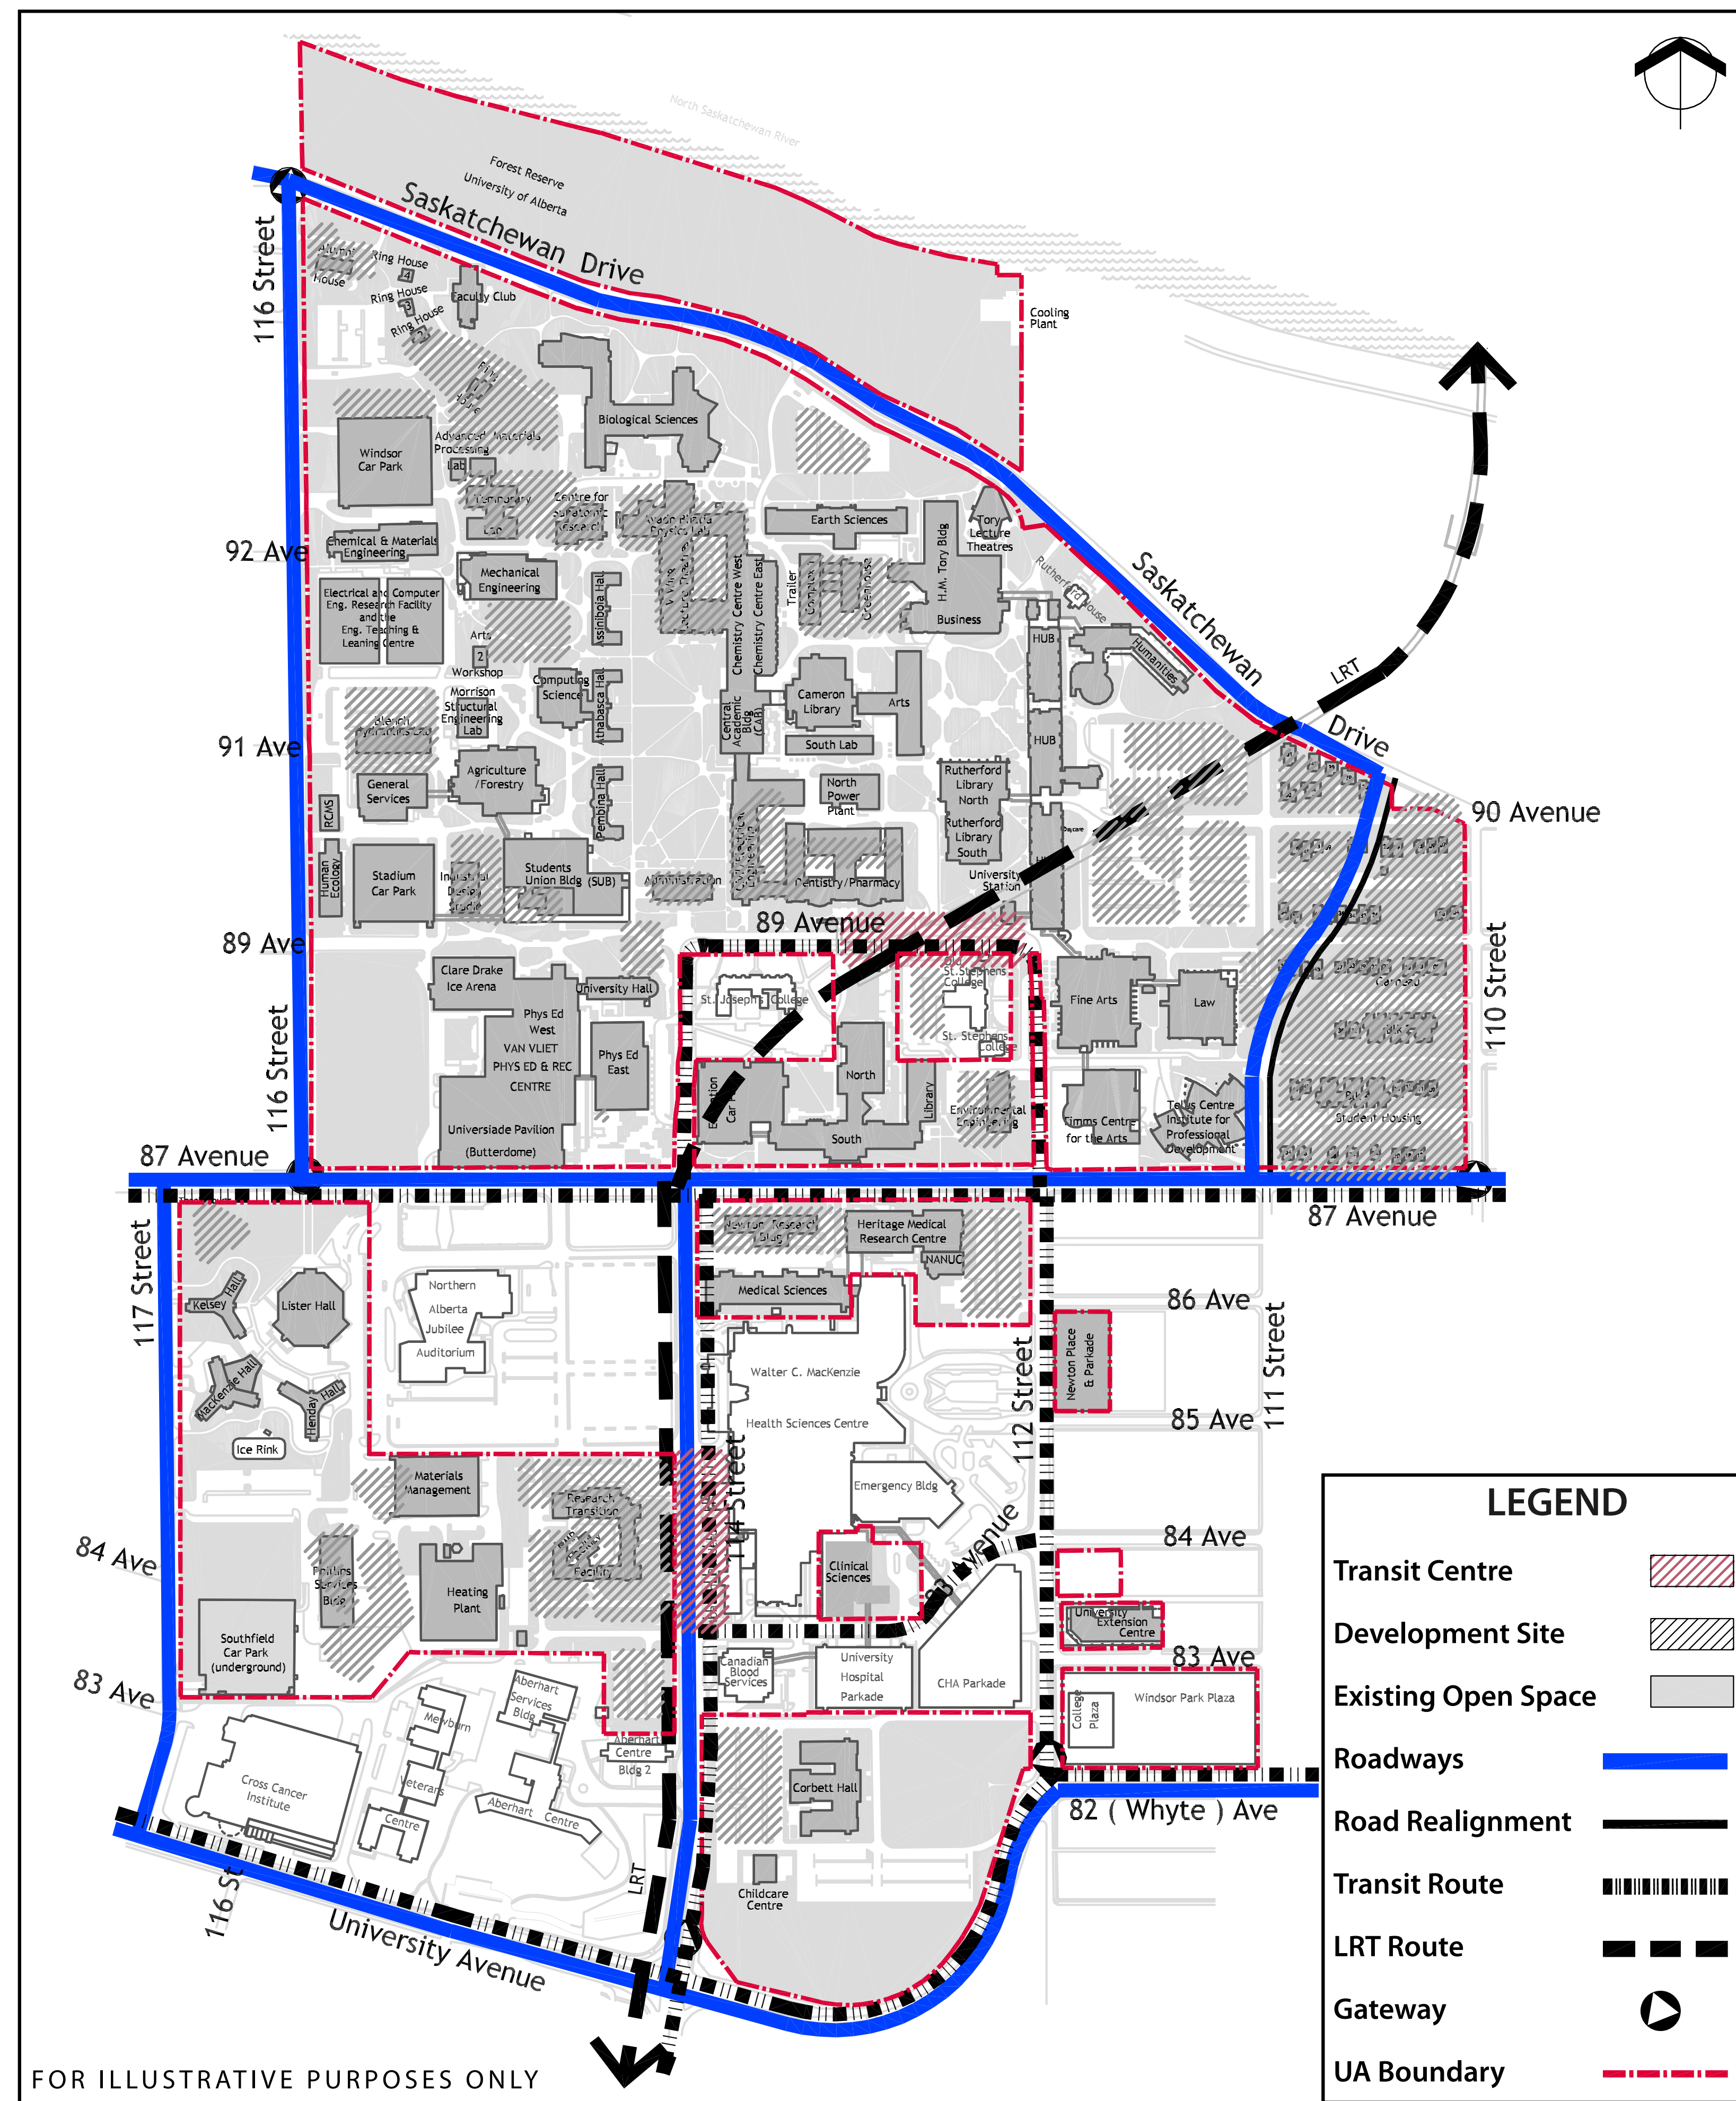

Campus planning for public vehicular transportation systems and parking requires balancing factors: such as costs; convenience; infrastructural provisions by the Capital Region Municipalities for public transit systems; the number of students living in residences or within walking distance to the campus; commuters and visitors; and service vehicles.

Managing transportation and parking on campus remains an ongoing challenge. Progressive changes over the past decade have included: the introduction of U-Passes for all students; increased staff usage of LRT between campuses; and other Transportation Demand Management (TDM) initiatives. Recent university data shows a marked decrease in the parking demand which supports a reduction in our total parking requirements. The gradual progress towards our target of providing on campus housing of 25% of our full time enrollment population has also influenced the decline in vehicular access to North Campus.

Private vehicular access continues to be restricted to the periphery of the campus, where parking structures will be located along these access routes over time. Surface parking lots will be converted to underground parking with future development where feasible. In alignment with smart growth principles, Transportation Demand Management (TDM) studies will be refreshed as required to examine the traffic flows and volumes coming in and out of North Campus.

The overall aspiration for transportation planning would be to create an integrated transportation system that emphasizes non vehicular movement, manages vehicular access, maximizes public transit use, and minimizes the impact of traffic on neighbouring communities.

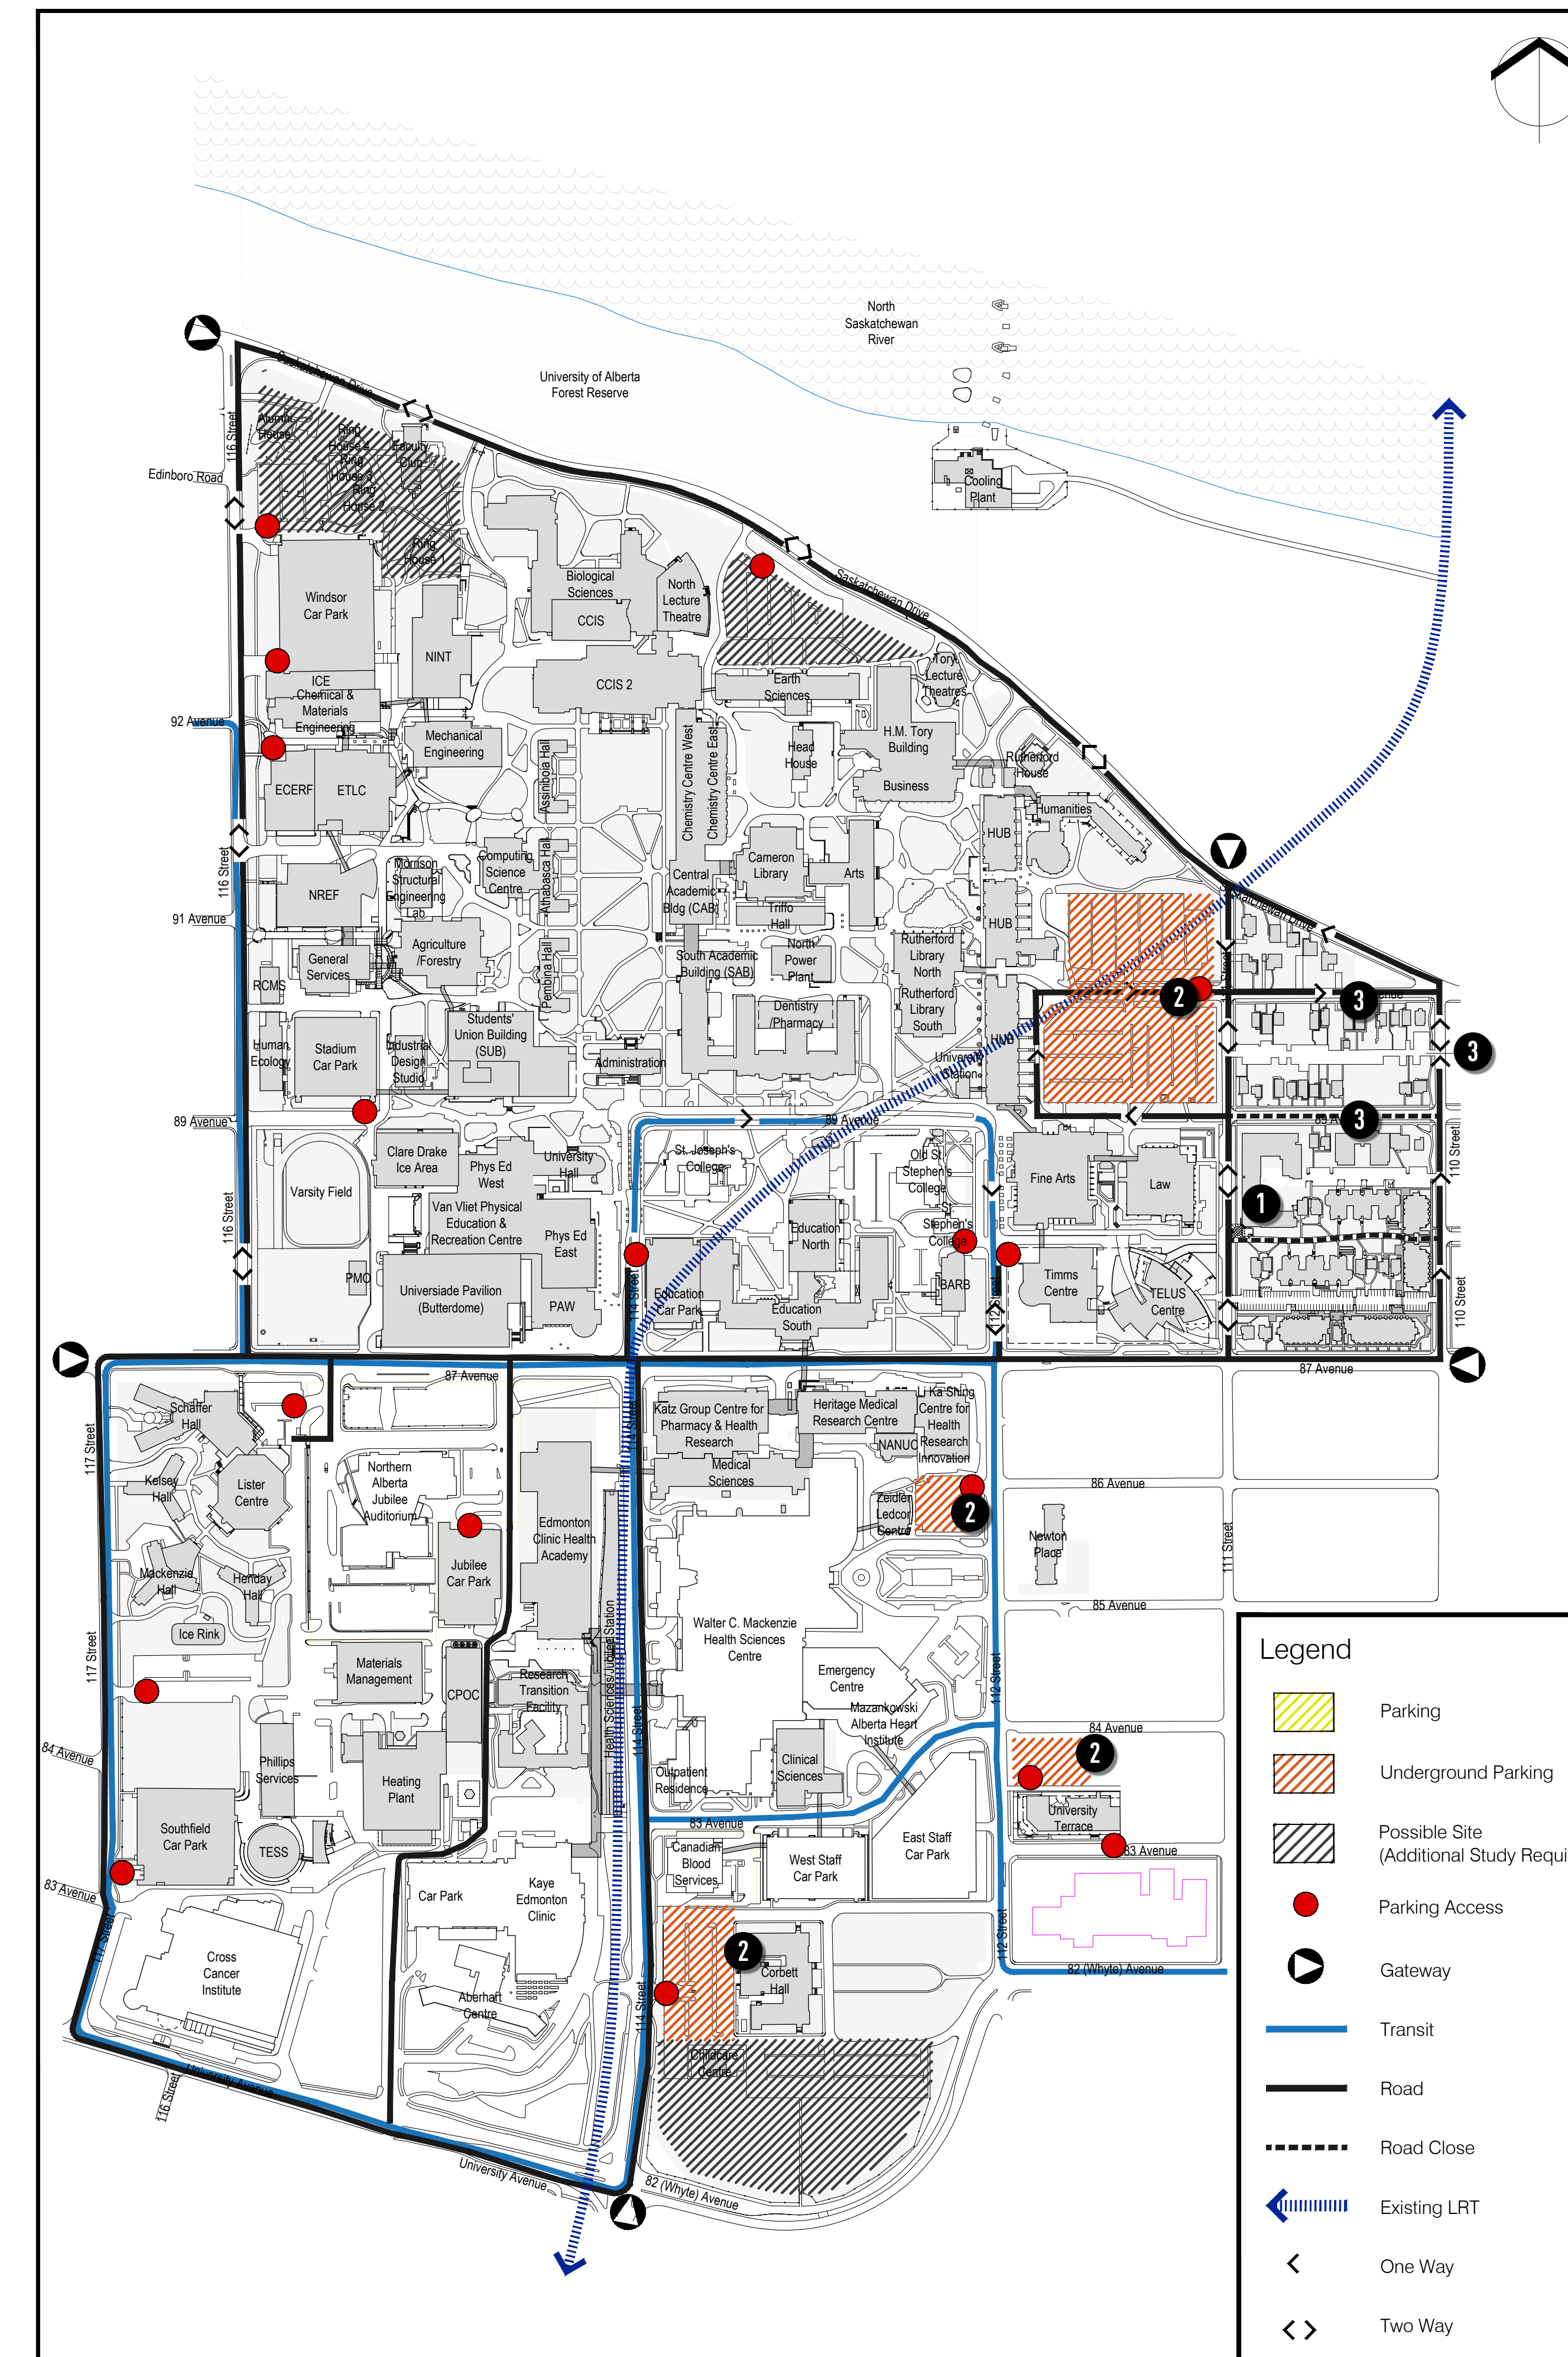

APPROVED LRDP
2002

What has been maintained:

- Public parking primarily located to the periphery of campus.
- Active Transportation Demand Management (TDM) strategy is in place and reviewed periodically.
- Primary access routes to North Campus are 87 Avenue, Saskatchewan Drive, 116 Street, 111 Street, 114 Street, and University Avenue.

PROPOSED LRDP
2013

What has changed:

- 1 No realignment of 111 Street between 88 Avenue and Saskatchewan Drive.
- 2 As surface lots are displaced by development, parking will be relocated to underground with no net additional parking for North Campus. Parking target decreases from one stall per four students to one stall per five students.
- 3 Closure of 89 Avenue with 90 Avenue being a one-way east, as a result, and in consultation with neighbours and City of Edmonton and 110 Street will be converted to two-way from Saskatchewan Drive to 89 Avenue with bike route being maintained.

PEDESTRIAN & BICYCLE CIRCULATION

PEDESTRIAN AND BICYCLE CIRCULATION

The LRDP amendment maintains and augments the pedestrian and bicycle circulation system of the North Campus. It promotes an integrated approach to enhance pedestrian and bicycle routes to improve intra-campus movement and external access to the campus. These pathways are part of a larger open space strategy to surrounding neighbours.

The existing access and circulation structure consists of vehicular, pedestrian, transit, and parking elements. Although generally well served by these elements, their overall organization and pattern will be improved to promote a unified connected system. Creating pedestrian/bicycle friendly precincts, where the use of vehicles is restricted, allows people to move comfortably about the campus. Generally, there is a need to refine the integration of the network, improve safety, make it easier to move on campus, and provide better wayfinding.

This network provides access from campus gateways and entrances, peripheral parking lots, and transit locations to all areas of the campus. Working closely with the City of Edmonton, the university is providing network routes that are shared-use for both pedestrian and bicycle use.

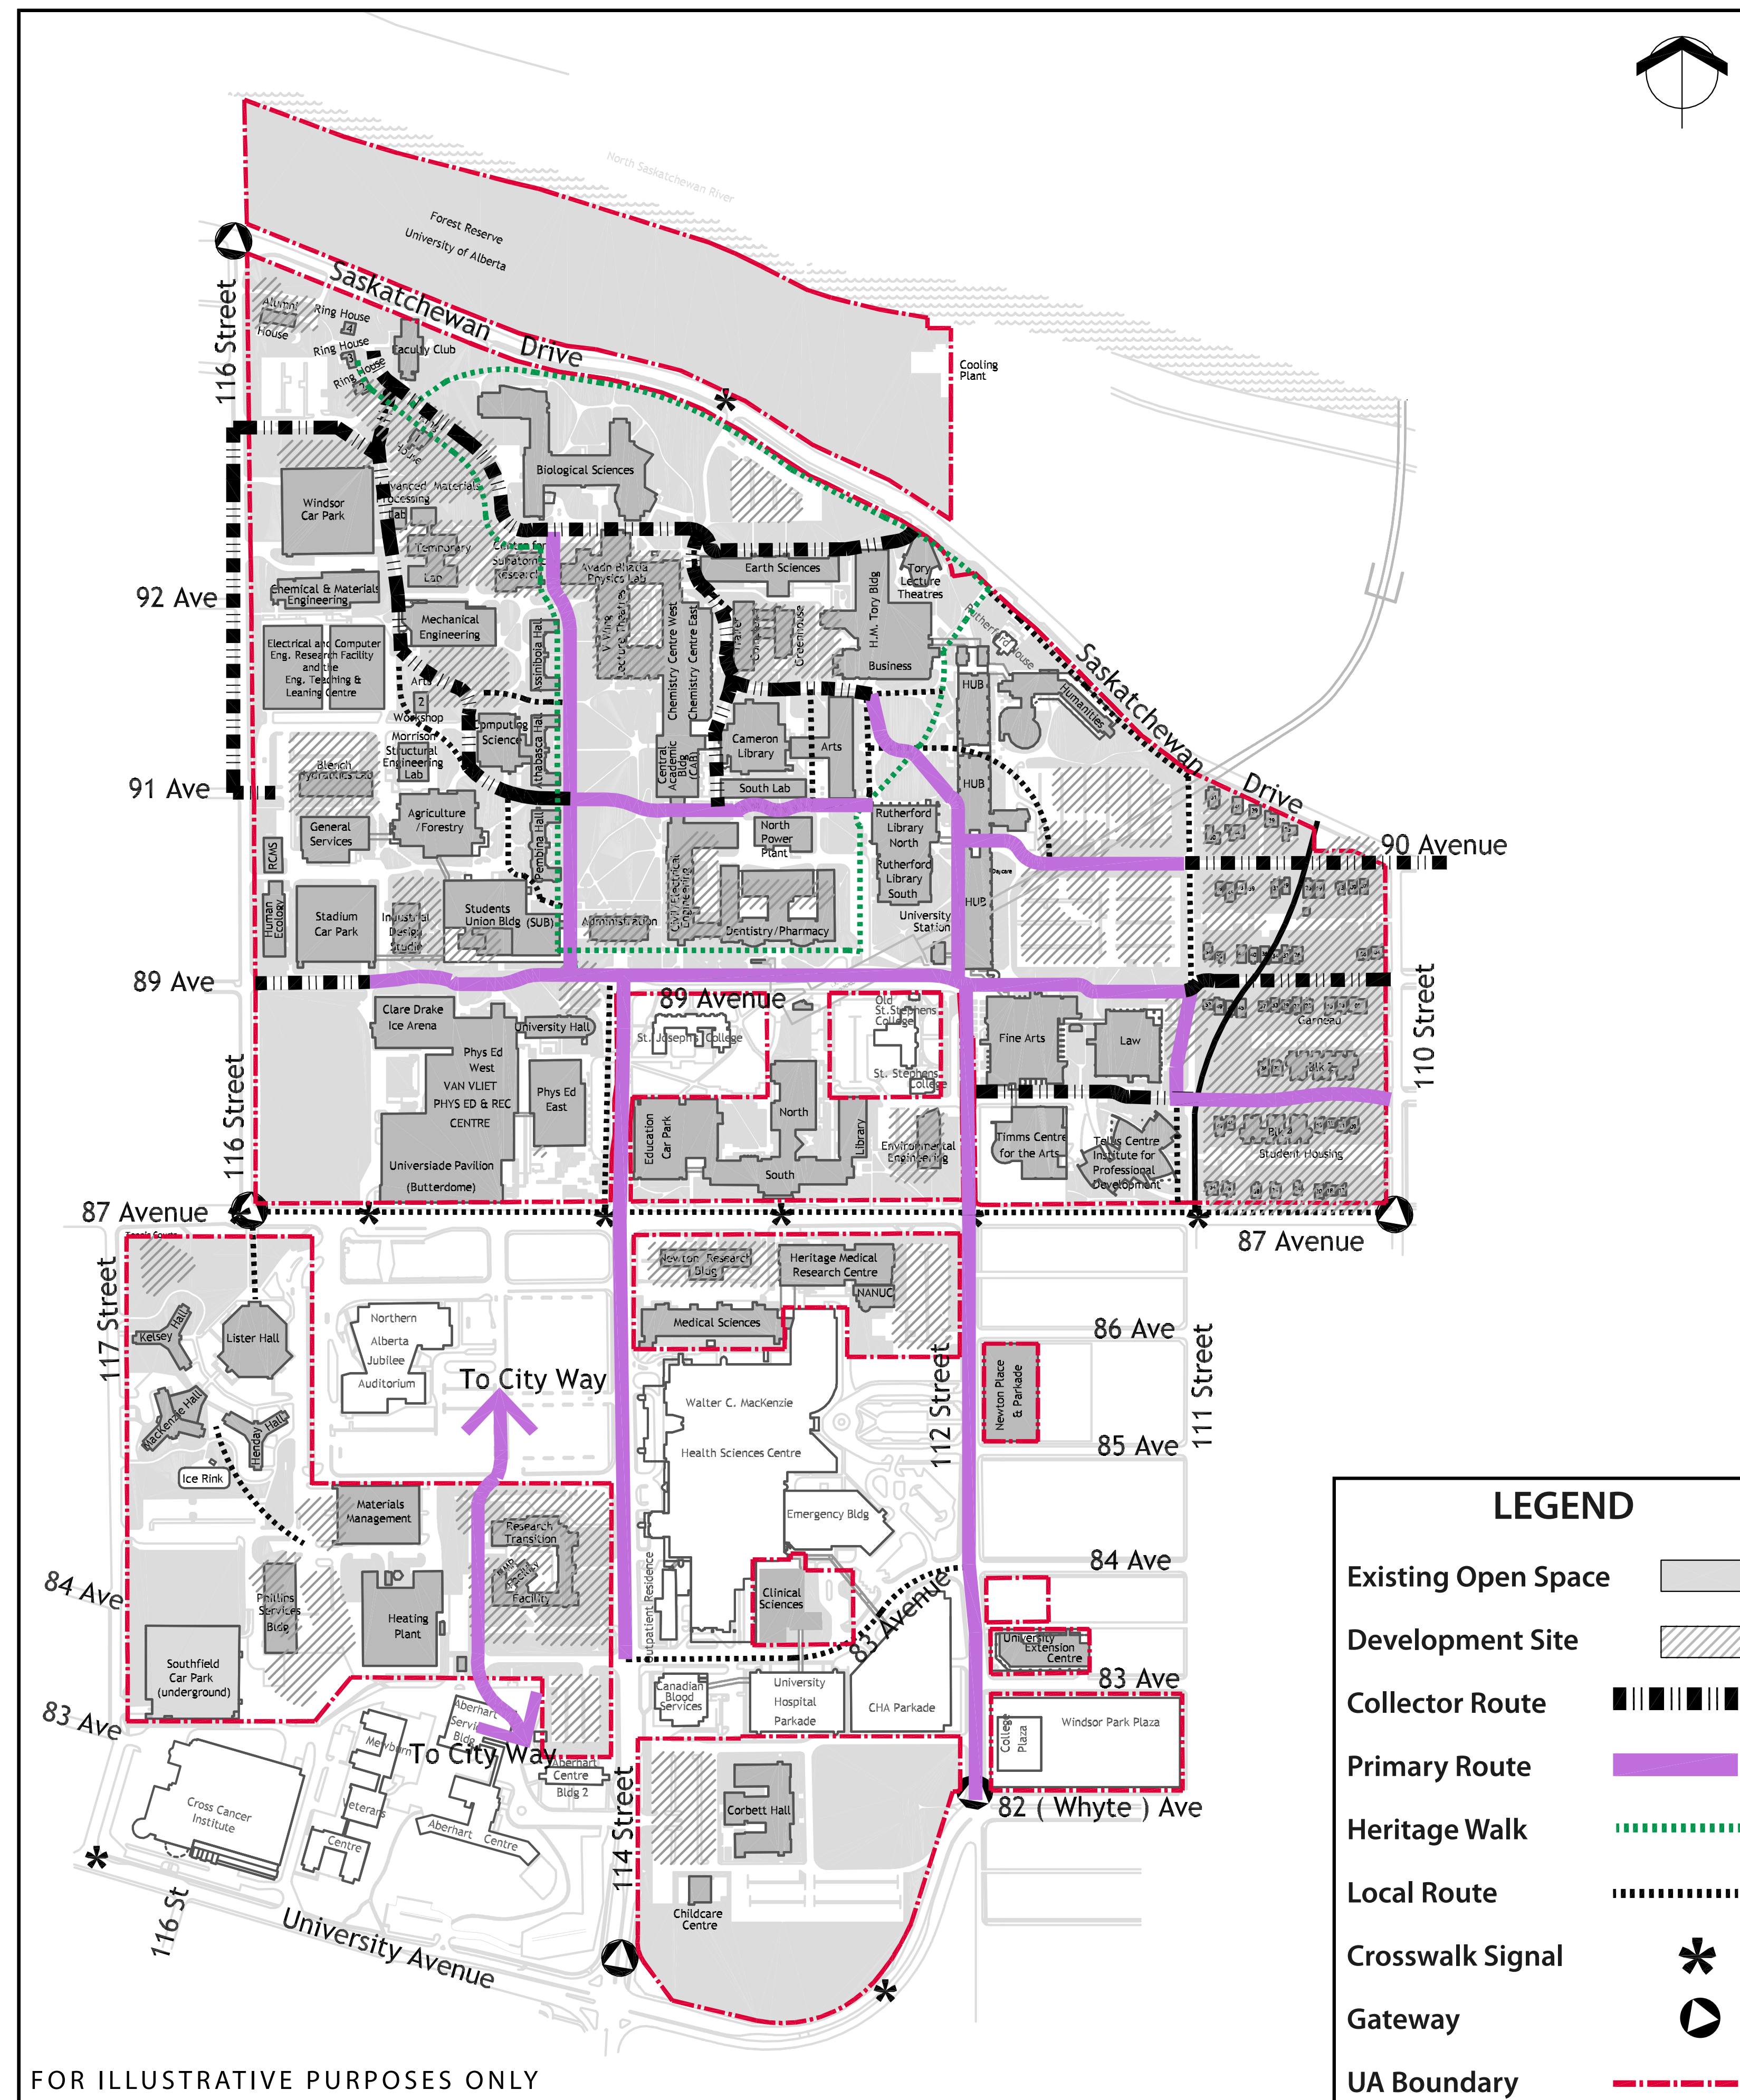

The development of pedways will be encouraged in order to connect buildings and to provide safe passage over busy streets.

North Campus will be linked to community pedestrian and bicycle systems and coordinated with City of Edmonton systems to promote increase participation and a safer use.

- Within East Campus Village, two-way traffic on Saskatchewan Drive between 111 Street and 110 Street and on 110 Street between 89 Avenue and 90 Avenue will be discussed with the City of Edmonton. Adjustments would be required to existing bicycle lanes.

Existing pedestrian spines will be extended and a hierarchy of pedestrian walkways will be developed to improve circulation and way-finding.

APPROVED LRDP
2002

What has been maintained:

- Existing pedestrian spines to be extended and reinforced.
- Bicycle paths will be developed on a hierarchical basis to accommodate both bike traffic to the campus while limiting intra-campus circulation outside of shared service roads.
- Encourage development of pedways to connect buildings providing safe passage.
- Continue redevelopment of 89 Avenue as major east-west pedestrian link between 116 & 110 Streets.
- Improve wayfinding and circulation.

PROPOSED LRDP
2013

What has changed:

- 1 Formalize 115 Street and 116 Street as a shared bike route with City of Edmonton which ties into existing routes along 87 Avenue and 115 Street within McKernan.
- 2 Create pedestrian path linking Lister Centre to Students' Unions Building (SUB) across redeveloped Varsity Field Park and tie it into the Heritage Trail System.
- 3 Create pedestrian link mid-block between 88 Avenue and Saskatchewan Drive and between 89 Avenue and 88 Avenue in East Campus Village.
- 4 As buildings on east side of Quad are renewed, reinforce and improve pedestrian walkway system.

NEXT STEPS

The North Campus LRDP amendment information that you have seen this evening will follow the University of Alberta Governance process and will go forward to the University of Alberta Board of Governors for approval in 2014. After the Board of Governors approves the North Campus LRDP amendment, it will be presented to the Minister of Enterprise & Advanced Education for confirmation of the consultation process.

THANK YOU FOR COMING

Please submit your evaluations and comments in the box provided. Should you have comments to submit after the open house, please visit:

www.communityrelations.ualberta.ca

We will receive comments until December 10, 2013

Item No. 15a

OUTLINE OF ISSUE

Agenda Title: **Proposed Change to the Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility (UAPPOL)**

Motion: THAT the Board of Governors, on the recommendation of the Board Human Resources and Compensation Committee, approve the proposed change to the Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility in UAPPOL, as amended, to take effect upon final approval by the Board of Governors.

Item

Action Requested	<input checked="" type="checkbox"/> Approval <input type="checkbox"/> Recommendation <input type="checkbox"/> Discussion/Advice <input type="checkbox"/> Information
Proposed by	Robert Teskey, Chair Marion Haggarty-France, University Secretary
Presenter	Marion Haggarty-France, University Secretary
Subject	Proposed Change to the Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility (UAPPOL).

Details

Responsibility	University Governance
The Purpose of the Proposal is (please be specific)	Revision is proposed to the Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility in UAPPOL to include a clause to ensure that broad representation is achieved on the Search and Review Committees for President, if the need arises.
The Impact of the Proposal is	To ensure that the Committee is balanced and broad-based, the procedure allows for the Committee to find a solution.
Replaces/Revises (eg, policies, resolutions)	Current Search and Review Procedures for President and the Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility (UAPPOL).
Timeline/Implementation Date	
Estimated Cost	N/A
Sources of Funding	N/A
Notes	At its meeting of December 13, 2013, the Board of Governors approved changes to Appendix A, with the exception of section 3, pending consultation with the Association of Academic Staff (AASUA) executive. This consultation took place on January 23, 2014, and the AASUA executive expressed its support for the inclusion of section 3 in this Appendix. The Board Human Resources and Compensation Committee reviewed the amended document at its meeting of February 26, 2014 and now recommends the revised Appendix, in its entirety, to the Board of Governors.

Alignment/Compliance

Alignment with Guiding Documents	1. <i>Dare to Discover</i> – <i>Four Cornerstones</i> – Talented People; Learning, Discovery and Citizenship; Connecting Communities; and Transformative Organization and Support.
----------------------------------	---

Item No. 15a

Compliance with Legislation, Policy and/or Procedure Relevant to the Proposal (please quote legislation and include identifying section numbers)

2. **Post-Secondary Learning Act (PSLA)** – Relevant sections of the PSLA are cited:

“Appointment, suspension and dismissal of staff

22 (2) A person shall not be appointed to, promoted to or dismissed from any position on the academic staff at a university except on the recommendation of the president made in accordance with procedures approved by the general faculties council.”

“Powers of general faculties council

26 (1) Subject to the authority of the Board of Governors, a general faculties council is responsible for the academic affairs of the university and, without restricting the generality of the foregoing, has the authority to

(o) ... make a recommendation to the board with respect of appointments, promotions, salaries, tenure and dismissals, and any other matters considered by the general faculties council to be of interest to the university.”

“President

81(1) The board of a public post-secondary institution shall appoint the president of the public post-secondary institution.

(2) The board shall prescribe the term of office of the president and the remuneration to be paid to the president by the board.

(3) A president has general supervision over and direction of the operation of the public post-secondary institution and has those other powers, duties and functions that are assigned to the president by the board.

(4) A president may delegate in writing any of the president’s powers, duties or functions as the president considers appropriate and may prescribe conditions governing the exercise or performance of any delegated power, duty or function, including the power of subdelegation.”

3. **GFC Executive Committee Terms of Reference:**

“3. Mandate of the Committee

To act as the executive body of General Faculties Council and, in general, carry out the functions delegated to it by General Faculties Council. (GFC 08 SEP 1966) (GFC 12 FEB 1996)

1. Urgent Matters

The power to deal with any matters that cannot be deferred is delegated to the Executive Committee which shall determine which matters are to be considered urgent. (GFC 09 AUG 1966)

2. Routine Matters

Item No. 15a

	<p>Matters which are routine in carrying out the policies approved by General Faculties Council are delegated to the Executive Committee. (GFC 08 SEP 1966)”</p> <p>4. Board of Governors of the University of Alberta - Mandates and Roles Document:</p> <p>“The Board shall manage and operate the institution in accordance with its mandate [PSLA Section 60(1)(a)].</p> <p>...</p> <ul style="list-style-type: none"> • The appointment of the president and vice-presidents [PSLA Sections 81(1) and 82(1)].” <p>5. Board Of Governors Terms of Reference: “[...]”</p> <p>2. The Board may create other committees (each of which is a ‘Committee’) and establish the terms of reference of such committees.”</p> <p>6. Board Human Resources and Compensation Committee (BHRCC) – Terms of Reference:</p> <p>“LIMITATION ON DELEGATION BY THE BOARD</p> <p>The general delegation of authority by the Board to the Committee shall be limited as set out in this paragraph. Notwithstanding the general delegation of authority to the Committee as set out in paragraph 3, the Board shall make all decisions with respect to:</p> <p>(a) the appointment, extension, reappointments and dismissals of Deans, Vice-Presidents and the President[.]”</p> <p>7. UAPPOL Procedure – Search Committee for President</p> <p>“Purpose</p> <p>To detail the procedure for search and selection of the University President.”</p>
--	---

Routing (Include meeting dates)

Consultative Route (parties who have seen the proposal and in what capacity)	Members of the Board Human Resources and Compensation Committee (for review and input); University Governance (for review and input); Administration (for information); Association of Academic Staff: University of Alberta – (consultation regarding proposed editorial changes to relevant UAPPOL procedures, and further consultation regarding section 3 of this Appendix, January 23, 2014)
Approval Route (Governance) (including meeting dates)	Board Human Resources and Compensation Committee – November 26, 2013 (for information and briefing); this committee was asked to review and approve the material electronically following the GFC Executive Committee meeting on December 2, 2013; GFC Executive Committee (for recommendation to the Board Human Resources and Compensation Committee) – December 2, 2013 Board Human Resources and Compensation Committee (for

Item No. 15a

	recommendation to the Board of Governors) – December 2, 2013 Board of Governors – December 13, 2013 Board Human Resources Committee (for recommendation of final amendment to Board of Governors) – February 26, 2014 Board of Governors (for approval) – March 14, 2014
Final Approver	Board of Governors

1. Attachment 1 (pages 1 – 2): UAPPOL - Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility – showing revisions
2. Attachment 1 (pages 1 – 2): UAPPOL - Search Procedure for President (Appendix A): Committee for President Position Definitions and Eligibility – without edits

Prepared by: Marion Haggarty-France, University Secretary, and Andrea Patrick, Assistant Secretary, General Faculties Council, c/o University Governance

Approval Date: December 11, 2009

Last Revision Date: December 13, 2013

Parent Policy: [Recruitment Policy](#)

This document is an appendix to its parent document. Questions regarding this document should be addressed to the Office of Administrative Responsibility.

Presidential Search and Review Procedures (Appendix A): Committees for President Position Definitions and Eligibility

Office of Administrative Responsibility:	University Governance
Approver:	Board Human Resources and Compensation Committee

COMPOSITION OF ADVISORY SEARCH AND REVIEW COMMITTEES FOR PRESIDENT:

Refer to Recruitment Policy (Appendix A) Definition and Categories of Academic Staff and Colleagues (UAPPOL).

1. PRESIDENT

Chair of the Board of Governors as Chair of the Committee

Chancellor

Two members of the Board of Governors appointed by the Board

Three faculty members from Categories A1.1, A1.6, or their counterparts in A1.5 and A1.7 (that is, only faculty members employed at the University under the terms and conditions of the Faculty Agreement are eligible), who do not hold administrative positions as defined in Section 2, elected by the faculty and the appointed academic staff representatives on GFC.

One Dean elected by Deans' Council

One Chair elected by Chairs' Council

One member of the AASUA appointed by the AASUA

Two members of the Students' Union appointed by the Students' Council

One member of the Graduate Students' Association appointed by the GSA

One member of the Non-Academic Staff Association as appointed by NASA

One member of the Alumni Association appointed by the Alumni Association

For a list of staff who are not eligible to serve on the advisory search and review committees for the President, please see Section 2.

2. STAFF WHO ARE NOT ELIGIBLE TO SERVE ON ADVISORY AND REVIEW COMMITTEES FOR PRESIDENT

Staff who are on leave are not eligible to serve on advisory search and review committees for President. The term leave includes: administrative leave, sabbatical, political, medical, parental, childbirth, disability, assisted, secondment.

Staff who hold the following administrative positions at the time of the initial nomination are not eligible to serve:

Vice-President, Associate or Assistant Vice-President, Dean, Associate or Assistant Dean or Department Chair (excluding those members elected by Deans' Council and Chairs' Council).

3. COMMITTEE BALANCE

At the first meeting of the committee, the matter of the committee's composition will be addressed to ensure that the committee is balanced and broad-based (both internally and externally). If some imbalance is evident, the committee can instruct the Chair to consult with the Chair of the Board's Human Resources and Compensation Committee and the Chair of the GFC Nominating Committee to find a solution for the committee's consideration.

1. Attachment 1 (pages 1-5) Guidelines and Procedures

Prepared by: Marion Haggarty-France, University Secretary, University Governance

GUIDELINES AND PROCEDURES

Introduction

1. The Board of Governors establishes the Presidential Search Committee. The Presidential Search Committee (the Committee) is an advisory committee of the Board of Governors.
2. Composition of the Committee is established pursuant to UAPPOL procedure- Presidential Search Procedure:

(<https://policiesonline.ualberta.ca/policiesprocedures/procedures/search-procedure-for-president.pdf>)
3. The role of the Search Committee is to search, screen, and recommend a candidate to the Board Human Resources and Compensation Committee (BHRCC). BHRCC then considers the recommendation, and if prepared to do so, recommends the candidate to the Board, for approval.
4. All members of the Search Committee are expected to fully participate in the work of the Committee, and in so doing, are charged with acting in the best interests of the University as a whole.
5. All proceedings and deliberations will be held in strictest confidence.

Role of the Committee

1. Work in the best interest of the University.
2. Prepare adequately and commit the time required to fully engage in the work of the committee.
3. Ensure a broad and fair search is conducted for the University.
4. Make full use of experienced executive search consultant.
5. Develop a position profile which represents the priorities, personal and professional attributes required for the next president, based on research, consultation and feedback.
6. Search, screen and interview short-listed candidates based on the position profile.
7. Help to identify appropriate information about the University and the presidency for all candidates at each stage of the screening process;
8. Ensure that external and internal candidates are treated equitably, and that all candidates are kept informed appropriately about the progress of the search.
9. Be knowledgeable about the University's ethical guidelines, equity and FOIPP policies and practices.

10. Provide assistance during the process in other appropriate ways at the request of the Chair.
11. Work within the timeframe in order to provide appropriate transition for both the out-going and in-coming President.
12. Commit to conducting the business of searching for a new president in total confidence.

Operational Procedures

Chair of the Meeting:

1. The *Chair* of the Board of Governors is the Chair of the Search Committee for President and shall ordinarily chair every meeting of the Committee.
2. The Chair is the sole spokesperson for the Committee.
3. The Chair may name and delegate responsibility to a Vice-Chair.
4. If, during the course of the search, any member ceases to represent the group which elected or appointed him or her, the Chair will decide if that member will continue serving on the Committee, or will be replaced. If the member is to be replaced, the Chair will consult as appropriate and then decide on a replacement.
5. If for any reason, a member is unable to complete their service on the Committee, the Chair will consult as appropriate and then decide on a replacement.

Meeting Schedule and Special Meetings:

1. Meetings of the Committee will be held at the call of the Chair.
2. The Chair may decide on regular meetings times, and if so, will circulate a meeting schedule well in advance. If special meetings need to be called, as is normally the case with respect to search committees, members will be given as much notice as possible.
3. Notice of the time and place of each meeting of the Committee shall be given by e-mail at least two days prior to the meeting.
4. Members of the Committee are urged to keep their schedules as flexible as possible during the search since members are expected to attend each meeting of the Committee.
5. If a member knows in advance that s/he will miss a meeting, the member should contact the Chair or Secretary.

Meeting Materials:

1. Meeting materials normally will be distributed to members in advance of scheduled meetings . Materials will be available electronically via a secure web portal specifically established for the Committee. Members will access the site through a CCID. Members will need to safeguard any materials distributed in hardcopy, and at the conclusion of the process, members will be required to return all materials for appropriate disposal.

Meeting by Telephone/Technical Tools:

1. Members of the Committee are encouraged to attend each meeting of the Committee in person.
2. If the Chair of any meeting of the Committee so consents, however, one or more members of the Committee may participate in that meeting by means of telephone or other communication facilities which permit all persons participating in the meeting to hear or communicate with each

other and the member participating in a meeting by that means is deemed to be present at the meeting.

3. Meeting proceedings will not be recorded.

Quorum:

1. The quorum for the transaction of business at any meeting of the Committee shall be a simple majority of the number of members of the Committee. For the final decision meeting, no more than one member can be absent.

Deliberations in Camera:

1. All meetings of the Committee shall be held in-camera.

Voting Procedures:

1. Show of hands or by other means which clearly indicates the affirmative vote, negative vote or abstention from voting of each member thereof.
2. Each member of the Committee, including the chair of the meeting, shall have one vote.
3. If requested by the chair of any meeting of the Committee or any other member thereof prior to a vote by a show of hands, voting on a particular question shall be conducted by secret ballot.

No Casting Vote:

1. The chair of any meeting of the Committee shall not be entitled to a second or casting vote.
2. If the result of any vote is a tie, the resolution shall be deemed to have failed.

Signed Resolutions:

1. A resolution in writing, signed by all members of the Committee is as valid as if it had been passed at a meeting of the Committee.

Record keeping and Committee Business:

1. The Secretary of the Committee will take notes at each meeting that reflect the substance of discussion and will communicate appropriately, through action summaries, correspondence, email, with respect to decisions taken by the Committee.
2. In the absence of a Secretary, the Chair will assign another person to act as the recording secretary for that meeting.
3. All communications to and from the Committee, including correspondence with persons or organizations solicited for comment, shall ordinarily be processed by the University Secretary, Board of Governors, University Governance.
4. All records will be done in accord with FOIPP regulations and managed with the records retention schedule of the unit. University Governance is the official record holder of the files. The Secretary of the Committee will safeguard all documents and information, and at the conclusion of the Committee's work, will collect from each member and thereafter dispose all documents and notes associated with the Committee.

Confidentiality and Communications

1. All proceedings, interviews, documents and opinions are to be held in the strictest confidence by all Committee members and discussion about any part of the process or about potential candidates shall only occur at Committee meetings.
2. The Chair of the Committee may seek the replacement of any member who fails to comply with this requirement.
3. The Chair will identify for the Committee members their responsibilities in keeping their constituencies informed of the status of the search and in seeking information from the constituencies.
4. The Search will have a public website and appropriate updates will be available on the site.

Resources

1. Budget: Approximately \$300,000
2. Staffing: University Secretary with access to temporary administrative support.
3. Location: Governance Office with secure files, portal, e-mail.

DRAFT

Search Timetable

March 2014	Board Chair and President – officially advise the Board of Governors. Board of Governors approves the establishment of the Advisory Search Committee for President.
January	Search firm selected (RFP issued in November, decision made by mid-January).
January – March	Elections and Nominations to replenish the Advisory Search Committee for President underway
