

Internal Program Proposal Template
- *for-credit programs not requiring Ministry approval* -

This template is to be used for proposals to create or modify programs that do not require Ministry of Advanced Education approval.

Faculties and Departments must consult with the Portfolio Initiatives Manager in the Office of the Provost and Vice-President (Academic) (carley.roth@ualberta.ca) on the appropriate template and process. Graduate proposers must also consult with the Faculty of Graduate Studies and Research (fgsrgov@ualberta.ca). All program proponents must also consult with the Vice-Provost (Indigenous Programming & Research) during the early development stage.

PROPOSAL TYPE

This proposal is for a (select one):	
<input checked="" type="checkbox"/>	Creation of a new second-level specialization (e.g., minors of undergraduate programs and second-level specializations of graduate programs)
<input type="checkbox"/>	The addition of an Honors stream to an existing undergraduate program
<input type="checkbox"/>	Creation of a combined degree program where both contributing degrees have been approved by the Ministry of Advanced Education
<input type="checkbox"/>	Substantive program changes that do not require Ministry approval

1: Basics		
Program/Specialization/ Combined Degree Name	Minor in Agricultural Food Policy & Global Health available in the Bachelor of Arts and Bachelor of Arts Honors programs.	
Faculty/Department	Faculty of Arts and Faculty of Agricultural, Life, & Environmental Sciences	
Contact information	Name and Title	Rebecca Nagel, Associate Dean Undergraduate, Faculty of Arts Kristy Wuetherick, Senior Officer, Student Programs & Services, Faculty of Arts
	Phone	780-492-7657
	Email	arts.adu@ualberta.ca kristy.wuetherick@ualberta.ca
Proposed effective date	Fall 2025	
Attachments		
<ul style="list-style-type: none"> Letter of Support from the Dean of the Faculty of Agricultural, Life, & Environmental Science 		

- Emails of support from various departments where applicable cross-listed options are being proposed
- Proposed Calendar changes

2: Rationale, Implications, and Impacts

Rationale for the Proposal

Identify the purpose of the proposal with supporting rationale and evidence of demand.

This proposal is one of four new minors to allow students in the Faculty of Arts to study areas of focus through courses in the Faculty of Agricultural Life, & Environmental Sciences. These new minors allow for greater interdisciplinary options for students in the Faculty of Arts. Currently Arts students are able to choose minors offered by the Faculty of Science, the Faculty of Native Studies, and the Alberta School of Business in addition to those offered within the Faculty of Arts. The new proposed minors from ALES continue the work to expand the options available to our students, in alignment with the University's vision of One University.

Minors are optional for students in the BA and BA Honors. About 66% complete a minor. Some students choose a minor in a field related to their major and others choose a very different field. It is easiest to anticipate interest among students in related majors. As of Fall 2023, there are 202 majors in Anthropology, 544 in Economics, 72 in Human Geography, and 643 in Political Science.

Length of the Program

Identify the length of the program in years and credit units per year.

This is a Minor taken within either the Bachelor of Arts or Bachelor of Arts Honors programs, which are both 4-year Undergraduate Degrees.

The Minor in Agricultural Food Policy & Global Health requires a minimum of 24 units and a maximum of 36 units.

Provide the anticipated enrolments by head count for the next 5 years

Enrolment	2025	2026	2027	2028	2029
Total Headcount	12	17	26	35	40
• Year 1	5	5	5	5	10
• Year 2	5	5	7	10	10
• Year 3	2	5	7	10	10
• Year 4	0	2	7	10	10

<p>Work-Integrated Learning Describe how learners in this program will have access to Work-Integrated Learning (see CEWIL definitions).</p>	<p>All students in the Bachelor of Arts and Bachelor of Arts Honors programs have access to the Arts Work Experience program and the ability to add 4 – 16 months of paid work experience/co-operative learning to their program of study. The Faculty of Arts Work Experience program already collaborates regularly with the ALES Internship Program, sharing relevant postings and resources.</p> <p>Some courses might include Community Service Learning opportunities.</p>
<p>Consultation Describe the consultation process that occurred with students and other relevant stakeholders, and the feedback received.</p>	<p>This Minor was created in consultation with the Faculty of Agricultural, Life, and Environmental Sciences.</p> <p>This proposal was reviewed and approved by the Faculty of Agricultural, Life, and Environmental Sciences and their related departments in September 2023 (letter attached).</p> <p>Consultation and support was received by the various department/units that offer the additional cross-listed course options in October of 2023 (emails attached).</p>
<p>Indigenous Perspectives Describe the outcomes of the consultation with the Vice Provost (Indigenous Programming and Research) regarding how the program will integrate/include indigenous perspectives and content, and any action items that may result.</p>	<p>Dr. Florence Glanfield, Vice-Provost (Indigenous Programming and Research) advised on how to build a mandatory Indigenous content requirement into the structure of the proposed minors.</p> <p>Students can satisfy the requirement in several different ways:</p> <ol style="list-style-type: none"> a. Taking a course centred on Indigenous knowledge and perspectives, chosen from the list of approved courses for the minor b. Taking a course centred on Indigenous knowledge and perspectives elsewhere in their program c. Presenting Aboriginal Studies 30 or Cree 30 (or equivalent) d. Presenting proof of completion of the Indigenous Canada MOOC
<p>Equity, Diversity and Inclusion Perspectives Describe the outcomes of the consultation with the Vice-Provost (Equity, Diversity and Inclusion) regarding how the program will integrate/include EDI perspectives and content, and any action items that may result.</p>	<p>Dr. Carrie Smith, Vice-Provost EDI, reviewed the selection of courses for the minors and was supportive. She recommended ongoing review to look at the “diversity of readings lists, content, and training to attract and mentor new students.” (November 10, 2023). We will also rely on the Associate Dean EDI in the Faculty of Arts for continuing support and advice.</p>
<p>Resource Implications Identify financial impacts and internal resource requirements, particularly staff and classroom and lab space. Also identify any external resource</p>	<p>No additional internal or external resources are expected based on the new proposed minors; there is capacity to support the additional students in the existing course offerings.</p>

requirements such as practicum or internship placements, etc.	
Approval Process Indicate the internal governance path, including meeting dates	Arts Academic Affairs Committee – November 21, 2023 Program Support Committee – March 28, 2024 Arts Executive Committee – May 2, 2024 Arts Faculty Council – May 23, 2024 GFC Programs Committee – June 20, 2024

Dr. Rebecca Nagel
Associate Dean (Undergraduate)
Faculty of Arts
University of Alberta

Dear Dr. Nagel,

I am writing to provide the Faculty of Agricultural, Life and Environmental Sciences (ALES) unreserved support for the proposed ALES minors in the Faculty of Arts programs.

The specific minors are: Family Science; Clothing, Textiles and Material Culture; Environmental Policy and Agricultural Food Policy & Global Health.

The Faculty of ALES strongly believes that these new minors will afford students the opportunity to gain knowledge in these areas and will benefit their future career and/or educational aspirations. We also support academic collaboration of this nature, which is truly in the spirit of our "One University" operating plan and our institutional strategic plan, SHAPE.

Thank you for the opportunity to work with you on this project and we look forward to welcoming more Faculty of Arts students in ALES courses.

Kind Regards,

A handwritten signature in blue ink, appearing to read "S. Blade".

Hi Carrie,

I am reaching out to you because I am working on some new proposed minors in the Faculty of Arts that will be done in collaboration with the Faculty of Agricultural, Life, and Environmental Science.

We are proposing **four new minors** that will be available to our Bachelor of Arts and Bachelor of Arts Honors students:

Minor in Family Science

Minor in Clothing, Textiles and Material Culture

Minor in Environmental Policy

Minor in Agricultural Food Policy and Global Health

I have attached a link (above) to the proposed list of courses for each of these minors. I'm not sure what you might be able to suggest or recommend we consider for these programs in the context of EDI perspectives and content, but I wanted to reach out to see if you had any recommendations for us. If you would like to meet with Rebecca and I, we would be happy to do so.

Thank you in advance for your consideration,

Kristy Wuetherick

Hi Carrie,

I'm just following up on this email to see if there are any thoughts or recommendations that you have regarding our new proposed minors.

I hope you are doing well!

All the best,
Kristy

Dear Kristy,

My apologies -- this was in my drafts and I just couldn't get back to it. The list of courses (especially with the additional notes) looks good to me. When program proposals come across my desk, I tend to focus on how the area is addressing diversity of reading lists, content, and training to attract and mentor new students, among other pieces. I am happy to engage with any language you might have as you propose these, this information looks good to me.

I would also be supportive of a first check through on these things with Natalie (as I am slow to respond lately -- not something I'm used to), if you haven't already done so.

Take care,
Carrie

To: F Cardinal <freda.cardinal@ualberta.ca>, Sean Robertson <sean.robertson@ualberta.ca>

Hi Sean & Freda,

I'm just reaching out because the Faculty of Arts is in the process of developing some new minors for our Bachelor of Arts programs in collaboration with ALES, and within the minors, we are hoping to include some cross listed courses that include some Native Studies courses as possible additional options within these minors, but obviously, we wouldn't do that without consulting Native Studies first!

Attached are the [proposed minors](#) and I have highlighted the NS courses (in the pdf version) that we are hoping to include in the cross listed course options for three of the 4 of them: Minor in Family Science, Minor in Clothing, Textiles, and Material Culture, and the Minor in Environmental Policy.

If you have any questions or concerns about this, please feel free to contact me - or if you have other course suggestions that you would recommend for any of the four minors we are proposing, we would welcome that as well. If you are okay with the proposed courses as we have indicated, if you could please reply with an email of support that we can include in our submission, that would be wonderful.

Thank you very much!

Kristy

Hello Freda & Sean,

I'm just following up on this request. We are hoping to have these minors submitted to our initial Faculty of Arts governance committee shortly - the deadline being early next week.

Sara - I'm copying you for your information as well.

All the best,
Kristy

Dear Kristy,

This looks great. Here are our suggestions:

Wherever these courses are listed (NS 200, NS 201, separately or together), it should read as "NS 200 or 201" - this is because these courses have very similar content

Under minor in Env Policy: Delete NS 221 (it is off our books) and replace with: NS 380: Indigenous Peoples of the North (Special Topics)

Finally, for Food Policy and Global Health: add NS 476 (Ind Ppl Health and Wellbeing)

Let me know if you have any questions.

Sean

Hi Sean,

Rebecca Nagel and I just met with Florence Glanfield this morning to review these new minor proposals, and her feedback to us was that, given we do not currently have a specific requirement for our students to complete any indigenous content in our degrees overall (yet), in order for her to support these proposals she recommended that we include an explicit requirement for indigenous content within the minors (rather than simply having indigenous content courses as one of a list of potential options).

Given this recommendation, Rebecca and I wanted to come back to you to see if you would be supportive of us requiring courses in the following manner:

Minor in Family Science:

3 units chosen from:

NS 200 - Indigenous Canada: Looking Forward/Looking Back (or)

NS 201 - Indigenous Canada: Looking Forward/Looking Back

NS 362 - Indigenous Women

WGS 475 - Indigenous Genders and Sexualities

Minor in Clothing, Textiles, and Material Culture

3 credits chosen from:

NS 260 - Contemporary Indigenous Art

Minor in Environmental Policy:

3 units chosen from:

NS 200 - Indigenous Canada: Looking Forward/Looking Back (or)

NS 201 - Indigenous Canada: Looking Forward/Looking Back

NS 221 - Our Land, Our Life: Dene Self-Determination in Theory and in Practice

Minor in Agricultural Food Policy & Global Health:

3 units chosen from:

ECON 241 - Indigenous Economics

NS 200 - Indigenous Canada: Looking Forward/Looking Back (or)

NS 201 - Indigenous Canada: Looking Forward/Looking Back

NS 476 - Perspectives on Indigenous Peoples Health and Wellbeing

OR - for each these minors we will also include the ability to waive the above requirement if students can meet the following:

Proof of demonstrated Indigenous content provided from one of the following:

- a. Aboriginal Studies 30 (or equivalent) taken at the high school level
- b. Cree 30 (or equivalent) taken at the high school level
- c. 3 units of course work with Indigenous content completed elsewhere in the degree program
- d. Proof of completion of the Indigenous Canada MOOC

NOTE: contact the Faculty of Arts Undergraduate Programs Office for more information on approved courses that will meet this requirement

I would really appreciate your feedback on whether you think this is possible.

We do not expect large numbers within any of these minors - we are anticipating the most popular of the 4 minors to be the Family Science minor.

If you would like to meet to discuss this more fully, please let me know - we would be happy to do so!

Thank you,
Kristy

New Arts Minors in ALES - Cross-listed options from Nursing (Consultation)

5 messages

Kristy Wuetherick <kristy.wuetherick@ualberta.ca>

Thu, Oct 26, 2023 at 1:13 PM

To: Beverley Temple <batemple@ualberta.ca>

Hello Beverley,

The Faculty of Arts is in the process of developing some new minors for our Bachelor of Arts students based out of the Faculty of Agricultural, Life, & Environmental Science, and part of the proposal is a list of cross-listed options that students in these minors can also take and there are a specific course that we would like to include from Nursing in one of the minors, if you are in support of that.

There are [4 minors that we are proposing](#) (Family Science; Clothing, Textiles, & Material Culture, Environmental Policy, and Agricultural Food Policy & Global Health) and we have currently included INT D 222 specifically in the Agricultural Food Policy & Global Health minor.

What I am asking for is:

1. Do you support us using the listed course for the applicable minors?
2. Are there any other courses that you might think that could be added to the list that we haven't already identified?

If you are in support, please follow this up with an email indicating that so that we can include it in our proposal for governance.

Feel free to reach out to me if you have any questions or concerns at all with these proposals.

Thank you,
Kristy

Hi Kristy
I am sorry for the delay - I was on vacation and was also checking with our leadership team.
We usually did not allow for others to use the nursing courses currently - as our student numbers are so high and we do not have enough faculty to add extra sections.
We will have a decision about this - later this week - we would love to offer the opportunity for at least some other students to take the course - as it enriches our nursing student experiences.
thanks Bev

To: Beverly Temple <batemple@ualberta.ca>

Tue, Nov 28, 2023 at 9:32 AM

Thanks Bev,

I appreciate your consideration. I do understand if it's not something we will be able to include. I wouldn't expect large numbers for demand if it is something we are able to include - the overall numbers in the minor is not expected to be large and it would be one of a number of options that students can consider taking.

Looking forward to your final response on this.

All the best,
Kristy

Thanks for your understanding and patience Kristy
we have decided that there are certain terms that there would be some capacity to include others - of course reserving
seats for our students. We will allow that to stand then within your list.
I am wondering what specifics students in your area may need to plan?
If you need more let me know and we can try to provide you with that info

Hi Kristy,

First, we absolutely support SJC courses being included towards the minors you suggest.
Second, the following courses are suggested:

Minor in Family Science

- Current:
 - CHRTC 351, Sex, Love, Marriage
- Additional:
 - CHRTC 430, The Sexual Body
 - CHRTC 361, Death, Dying, Culture
 - CHRTC 103, Introduction to the Roads to Happiness
 - CHRTC 303, Well-Being and Resilience
 - PHIL 219, The Art of Living Well: Meaning and the Good Life

Minor in Environmental Policy

- Current: CHRTC 396, Environment and Christianity
- Additional: PHIL 279, Philosophy of Hunting

Please let me know if you need any further information from us in this regard.

With best wishes,
Sara

New Minors in ALES - Cross-listed options from Economics (Consultation)

5 messages

Kristy Wuetherick <kristy.wuetherick@ualberta.ca>

Thu, Oct 26, 2023 at 12:02 PM

To: Valentina Galvani <vgalvani@ualberta.ca>, Beyza Ural Marchand <ural@ualberta.ca>

Hi Valentina and Beyza,

I am in the process of developing some new minors for our Bachelor of Arts students based out of the Faculty of Agricultural, Life, & Environmental Science, and part of the proposal is a list of cross-listed options that students in these minors can also take and there are a few that we would like to include from Economics, if you are in support of that.

There are [4 minors that we are proposing](#) (Family Science; Clothing, Textiles, & Material Culture, Environmental Policy, and Agricultural Food Policy & Global Health) and we have currently included some Economics courses specifically in the Environmental Policy and the Agricultural Food Policy & Global Health minors.

What I am asking for is:

1. Do you support us using the listed courses for the applicable minors?
2. Are there any other courses that you might think that could be added to the list that we haven't already identified?

If you are in support, please follow this up with an email indicating that so that we can include it in our proposal for governance.

Feel free to reach out to me if you have any questions or concerns at all with these proposals.

Thank you,
Kristy

Cc: Valentina Galvani <vgalvani@ualberta.ca>

Hello Kristy,

Thank you for checking with us.

1. Yes, we do support our courses being cross-listed.

However, for one of the minors, the name "Environmental Policy" does not fit the course list, since it includes only one or two Sociology courses for the policy aspect. Typically, a degree in "policy" would have many more courses in Econ and Poli Sci. It seems the title is broad; perhaps they could reconsider the title? Please let us know if we can be a part of the discussion. It may be a good idea to check with the Poli Sci department as well.

2. Below are some additional courses that could be added to the list:

Minor in Environmental Policy:

ECON 467 - Environmental and Natural Resource Policy

Minor in Agricultural Food Policy & Global Health:

ECON 213 - An Introduction to the Economics of Developing Countries

ECON 251 - Indigenous Economics

ECON 323 - International Economics

ECON 357 - Health Economics

ECON 414 - Economics of Developing Countries

ECON 421 - International Trade

All the best,

Beyza

Thanks for your quick response and feedback, Beyza!

I will take your feedback and see what we might want to consider for the Environmental Policy minor.

I also appreciate the list of additional courses we can consider - I will certainly add them to the list.

Thanks, Kristy,
Just to add - Valentina mentioned that we might consider an Environmental and Energy Policy minor in the future... But in that case, ours would be really about policy (eg. carbon tax policy and so on). Most of our micro courses involve policy evaluation.

Thanks Beyza,

I specifically asked Cressida and Rob in Political Science their thoughts regarding the title for the Environmental Policy minor and they did not share your specific concerns - in fact, had the opposite opinion. I've spoken to Rebecca Nagel and based on our conversations with ALES, feel that we would like to keep the title as it is currently.

I have noted your concerns, and very much appreciate your feedback.

I think it's grand, but I am concerned about the ART 134, DES 135 - minors have a heck of a time getting into these courses.
HADVC 206 - that would be great and T DES 375 and 475 - would welcome the enrollments. Bonus these courses don't have prerques.

I'll speak to the depts and get back to you. Do you need a letter of support from them?

Hey Diane,
I am working on some new minors from the Faculty of ALES and one is a Minor in Clothing, Textiles, & Material Culture. We are hoping to include some FoA courses as additional options within the minor - so for this one, I have some Art & Design, HADVC, and T DES courses and I wanted to check to see if the department(s) would even be okay with the inclusion. Consultation etc. etc. Let me know what you think.
Thanks! :)

Hello! Aidan is all for this except for the fact that ART 134 and DES 135 are difficult (if not impossible) for minors to get in. He wondered about HADVC 100 as another option? He was also concerned with HADVC 209 - but this course is large (100 enrollments) and this fall the enrollments were a 50/50 split between Art/Hadvc/Des students and students in other programs. I think that is fine. April was all for making space for students in the T DES courses.

Thank you Kristy!

Hi Diane,

I think that's fair - I am happy to remove the ART 134 and DES 135 courses from the list.

As for adding other HADVC courses - are there specific recommendations? HADVC 100? others? Keeping in mind - the minimum requirements for these minors are entirely based out of the ALES courses...and it's only after that minimum if they are taking additional courses that the cross-listed courses become "at play" so to speak.

Thanks to you both!

Perhaps I will leave off POL S 333 at this point...and then as the new courses are submitted we can look at adding them to the list in the future - it's not likely that these minors will be in place before Fall 2025 at this point anyways given the timelines.

I have another question for you that was brought up by Economics - do you see an issue with the title of Minor in Environmental Policy given the course of the minor is based out of Rural Sociology. Economics feels that it might not be the proper name given that policy is more typically grounded in Economics and Political Science. I would be interested in your thoughts on the matter.

I hesitate to change it to Environmental Studies because we have another entire degree that is a BA in Environmental Studies as well, but I'm not sure what other options might make more sense than Policy.

Thanks!

Hi Kristy,

Cressida may have an altogether different view on this than I do (and this really is just my own perspective) but I do not think there needs to be any disciplinary ownership over 'policy'. The people I know in rural sociology do work that definitely addresses policy in a broad sense, so it seems appropriate to me.

best,

Rob

Thank you Kristy for your email.

While we agree that adding PSYCH 223, 323, 327 and 347 as cross-listed course options for the proposed BA minor in Family Science makes sense, we are concerned about capacity and enrolment numbers. These courses are already generally filled to the cap. It is unclear with our current instructor complement that we could handle many more students in these courses without additional sections being added. Of course if more sections were added we would need more funding to offer these courses. Is there an estimate of how many students would be involved in this new minor and what that would mean for enrollment numbers in these PSYCH courses?

Best, Wendy

Hi Wendy,

Thank you for getting back to me! I completely understand the concerns for sure!

The way that the minors have been created, the minimum requirements for students are entirely based on the ALES specific courses, and the cross listed courses only potentially come into play if they are looking to do more than the minimum requirements. This means that there isn't any specific expectation that students would have to be able to take these courses.

I would anticipate/predict that the students most interested in the Family Science minor would actually be our Psychology students, which then means that the Psychology cross listed courses would not really be used towards the minor because they are actually part of the major instead. Otherwise, I would anticipate the numbers to be relatively small and we could make sure there is a note placed on the minor to indicate that enrolment in any cross-listed courses is not guaranteed and is dependent on availability or something to that effect to help mitigate the expectations.

Let me know if that makes sense?

All the best,

Kristy

Cc: Kevin Haggerty <khaggert@ualberta.ca>

Hi Kristy,

We have no concerns with this list of minors, assuming that it doesn't come with the expectation that we offer them with particular frequency.

For the minor in Family Science, we would suggest you consider adding some of the following:

SOC 301 (Sociology of Gender)

SOC 342 (Socialization)

SOC 375 (Sociology of Aging)

SOC 377 (Sociology of Youth)

SOC 459 (The Social Demography of Partnerships and Families)

We also want to highlight that we have two relevant Topics courses (SOC 402) - "Changing Relations of Care" and "Sociology of Childhood" (though we have no immediate plans to turn these into regular courses).

For the minor in Environmental Policy, we would suggest adding "Commons and Climate Justice" at some point in the near future. It's currently a Topics course (SOC 402) but we will likely be submitting a request in the spring to turn this into a regular course. If you're interested in adding this course, we can send you the class number when we have it.

For the minor in Agricultural Food Policy and Global Health, SOC 369 (Sociology of Globalization) is listed but not SOC 269 (Introductory Sociology of Globalization). We're not sure how relevant either course is to this minor so I've attached recent syllabi for both courses below (they may actually be more relevant to the minor in Environmental Policy?). If either or both courses remain on the list, you should note that we are in the process of changing the titles of these courses. SOC 269 will become "Sociological Perspectives on Global Crises" and SOC 369 will become "Topics in Global Sociology" (these changes should take effect in the 2025/26 Calendar). Given some of the other courses listed for this minor, we would suggest consideration of SOC 382 (Sociology of Health and Illness).

Best,
Alison

Hello Kristy:

I support this inclusion.

I also think that WGS 475 Indigenous Genders and Sexualities would fit under Family Science.

WGS 240 Feminism and Food would also fit under Environmental Policy (it focusses heavily on the case for veganism).

Proposed Minor in Agricultural Food Policy and Global Health

In collaboration with the Faculty of Agricultural, Life, and Environmental Sciences, the Minor in Agricultural Food Policy and Global Health is one of four new proposed minors that will be available to students in the Faculty of Arts. These new minors increase our collaboration with the Faculty of ALES, which currently includes a joint degree (BA in Environmental Studies), and open up the interdisciplinary options available to students in the Faculty of Arts. Currently Faculty of Arts students are able to choose minors offered in the Faculties of Science, Native Studies, and the Alberta School of Business in addition to those offered within the Faculty of Arts.

Consultation has been done with the Faculty of ALES, Florence Glanfield (Vice Provost, Indigenous Programming and Research), Carrie Smith (Vice Provost, EDI), the Faculty of Native Studies, and the departments which offer the courses listed in the proposed Cross-Listed Options list (Letter of support from the Dean of ALES and emails from relevant departments available).
