

Matthew D. Martens, PhD

Dr. Matthew Martens studies how regulators of mitochondrial bioenergetics intersect with cardiac health and disease. He earned his PhD from the Department of Human Anatomy and Cell Science at the University of Manitoba in 2021. During this time, he developed a deep interest in the cardiovascular system, mitochondrial biology, and children's health. Following his PhD, Matthew undertook a postdoctoral fellowship with Dr. Jason Dyck within the Cardiovascular Research Center at the University of Alberta. Dr. Martens was funded by the Women's and Children's Health Research Institute, and is an Alberta Innovates Postdoctoral Fellow in Healthcare Innovation. Dr. Martens has won numerous awards for research and presentation excellence and currently leads multiple projects focused on both adult and pediatric cardiovascular health.
